CHILDS,

RARE
FLOWERS,
VEGETABLES
AND
FRUITS.

ROSA LAEVIGATA.

FLORAL PARK,
N.Y.
JOHN LEWIS CHILDS,

The Grand New Everblooming Hardy Rose, "NORMA."

(See Colored Sketch on this Cover.)

NORMA is a Rose at once unique and valuable, having the vigor, strength and hardiness of a Hybrid Perennial, with an enormous flower like the American Beauty, and the perpetual blooming qualities of a Tea Rose. It is really an everblooming Hybrid Perpetual. From our experience with it (two years) we are satisfied that it is the grandest Rose ever introduced either for the garden or for pots. Its fragrance is superb, and its color an exquisite shade of pink, which no one can adequately describe. Mr. P. H. Mechan, the originator, says of it: "This is a seedling Rose I have had on trial for several years. The color is distinct, the same exquisite pink as Mad. Caroline Testout. Growth extra strong like American Beauty, perfectly hardy, having stood 16 degrees below zero the past winter, standing on top of the ground in a box, and is now coming into bloom without the loss of a bit of wood or a bud. Leaves very healthy and strong, flowers as large as the largest American Beauty, very double, and a constant bloomer all the time." Price, strong plants, 40c. each; 3 for \$1.00; 7 for \$2.00; 12 for \$3.00.

"HIGHLAND MARY"

COPYRIGHT.
1900 BY
J.L. CHILDS.

Everblooming Rose, Highland Mary.

A sport from Agrippena, which originated in Canada, and like that fine old variety, is a persistent bloomer, both summer and winter, with a stronger and better growth; flowers double the size and exceedingly sweet. Blossoms beautifully cupped, each petal being white, with a delicate lemon tinge; just enough to make it perfectly exquisite. Each petal is also bordered with a delicate band of pink, which, blending with the white and lemon tinge, makes a combination which is truly fascinating. It will bloom all the time, either in the garden or in pots; is hardy in the open ground with slight protection. 20c. each; 3 for 50c.

"HALLOWEEN"

COPYRIGHT
1900 BY
J.L. CHILDS.

Striped Everblooming Rose, Halloween.

The striped Meteor. Flowers fine large size and perfect shape of Meteor, while the color is rich dark crimson, each petal freely and distinctly striped pure white and pink. Like Meteor, the flowers are double, exceedingly sweet and borne in endless profusion, summer or winter. Quite hardy in the open ground. This is the only distinctly striped Everblooming Rose in cultivation, and a great beauty. It creates a genuine sensation wherever seen. Nothing like it in cultivation. 20c. each; 3 for 50c.

ROSA LAEVIGATA

COPYRIGHT. 1900
BY J.L. CHILDS.

New Evergreen Trailing Rose, "Laevigata."

(See Colored Sketch on this Cover.)

A new hardy, evergreen Japanese Rose with the most beautiful, heavy, dark, glossy-green foliage that is as bright and showy in winter out of doors as it is in summer. The plant trails over the ground, the runners growing six to ten feet in a season, making the most beautiful carpet of green ever seen, which sets off to great advantage the numerous clusters of large, pure white flowers, the center of each flower being filled with golden stamens. The blossoms are exceedingly beautiful and powerfully fragrant. Not only for the open ground, but for pots it is a highly beautiful plant. For Cemetery planting it is the grandest thing ever introduced. No description or cut can do it justice. 20c. each; 3 for 50c.; 7 for \$1.00.

SPECIAL OFFER—For 75c. we will send one each of these 4 Grand New Roses, or for 50c. one each of Norma and Laevigata.

A REVIEW OF THIS CATALOGUE.

This Colored Plate, the first thing in our New Century Catalogue is devoted to several grand Novelties, one of which every one of our customers may have as a present by naming their choice when they send in their order. This is followed by Plate No. 2, setting forth the merits of the Giant Flowering Caladium, and showing on the opposite side photographic views of the three main buildings of our establishment.

Greetings for 1901, General Instructions, and Offers of Books, Pictures, our Grand Fancy Leaved Caladiums and Everblooming Tritoma and some Collections come next, occupying pages 1 to 8, except

THE MAYFLOWER, which occupies pages 2 and 3, with Premium offers for 1901. This the reader should not overlook. In no way can one spend 25 or 50 cts. to better advantage, or that will be a greater help in caring for one's plants and gardens than by subscribing for this unique Monthly Magazine, which is published for the sole purpose of disseminating useful information.

Specialties and Novelties come next, occupying 10 more colored plates and 32 pages printed on *green paper*. Here the grand good things which are new or particularly rare are offered, including Flower and Vegetable Seeds, Bulbs and Plants. It will probably be the most interesting part of the Catalogue to most of our customers, and possesses far greater attractions this year than ever before.

Seed Department, on *white paper*, follows next, beginning with page 41, and covers 64 pages, devoted to our special select strains of Flower and Vegetable Seeds.

Bulbs and Plants, on *pink paper*, covering 32 pages, from 105 to 136, follow. Here are offered the finest select varieties of Summer Flowering Bulbs, Window and Bedding Plants, Hardy Perennials and Hardy Vines and Lilies.

Fruits, on *yellow paper*. The 16 pages of yellow paper, which come next, beginning with page 137, are devoted to New and Rare Garden Fruits. For years we have made a specialty of choice new Fruits, and have introduced scores of fine Fruit Novelties.

A GENERAL INDEX, on page 152 closes the Catalogue, which, we think, is convenient and comprehensive, with the main divisions on different colored paper—green for Specialties and Novelties, white for Seeds, pink for Bulbs and Plants, and yellow for Fruits.

SPLENDID NOVELTIES FREE.

A PACKET FREE TO EACH ONE WHO SENDS US AN ORDER.

Here are 5 exceptionally good new things which we propose to give away. Each one of our customers may select one of them and name their choice when sending in their order from this Catalogue, provided the order amounts to 25cts. or more.

PANSY, VIOLET SCENTED—This new type is a cross between the Pansy and the Violet, combining the ideal properties of each. The flowers are much larger than the Violet, more like Pansies, but with the delicious fragrance of the former. The flowers are also quite free from central rays and markings, and the habit of the plant is decidedly dwarf and compact, producing its flowers on long foot-stalks, and they appear continually from early spring until late fall. The plants possess the hardy and robust nature of the Violets, and make splendid pot as well as garden plants. The same plant will bloom profusely in the garden for two years, being perfectly hardy. The range of color runs through white, buff, canary, deep yellow, purple and azure blue, and the coloring of each is exceedingly delicate and charming. A most important novelty, and one in which all admirers of the Pansy and Violet will be especially delighted. We first introduced this strain several years ago, since when it has been wonderfully improved, this being much better than formerly. Pkt., 20c.; 3 pkts., 50c.

THE MAYFLOWER VERBENA—True, sweet scented, like the Trailing Arbutus in color and fragrance. See page 15. Pkt., 20c.; 3 pkts., 50c.

PANSY, MASTERPIECE—One of the greatest novelties in Pansies. Their chief difference from all other Pansies consists in the novel and beautiful form of the flower, the border of every petal being conspicuously curled and fluted. This characteristic appears in nearly every flower the size of which is extremely large. The plants are exceptionally free flowering, vigorous, strong and hardy, and the numerous blossoms large and showy during the entire spring, summer and autumn. The tints and colors are also wonderful, varying through all shades, and there are many striking and unique combinations, especially among the fringed varieties of which the specimen shown on this plate is one. Pkt., 20c.

JENNINGS PANSY—Not shown on this plate but fully illustrated and described on page 18. Pkt., 20c.

PRIMULA OBCONICA HYBRIDS—These are new flowering Obconicas of various colors, as large and fine as Primula Sinensis. Colors, pink, violet, blush, rose, lilac, white, etc. Very charming flowers, being borne in large trussess, and at all times of the year in great profusion. See Colored Plate No. 6. Per pkt., 15c.

When you send in your order, do not forget to name which one of these five Novelties you prefer, and we will send it FREE.

THE FIVE SORTS FOR 50c.—These five Novelties amount to 95c., but we will send them for 70c. From this deduct 20c., on account of the one packet you are entitled to *free*, leaving but 50c. as the cost of the collection of five Novelties.

**GIANT
FLOWERING
CALADIUM.**

GIANT FLOWERING CALADIUM, NEW CENTURY.

A New Species from Central America, and the Grandest Foliage and Flowering Plant yet Introduced.

Leaves three times as large as any other Caladium, having a heavy, leathery texture and a bright, glossy-green color, with metallic luster which is remarkably handsome. It does not produce a bulb, but is increased by suckers, and is perennial. The leaf-stalks are strong and tall, holding the mammoth leaves well above the ground. Leaves 3 to 5 feet long by 2 or 2½ feet broad; perfectly immense, and make a plant which for tropical luxuriance has no equal. Added to this wonderful foliage effect are the mammoth lily-like blossoms 12 to 15 inches long; snow-white, changing to cream, with a rich and exquisite fragrance so powerful as to perfume a whole garden, filling the air with fragrance for a long distance. Plants bloom perpetually all summer in the garden, or all the year round in pots, and are hardly ever out of bloom. The foliage is so hardy that it will endure without injury frosts that will kill other bedding and foliage plants. Not only is it the grandest garden or lawn plant, but as a pot plant for large windows, verandas, halls or conservatories, it rivals the choicest Palms in foliage, to say nothing of its magnificent flowers. Thrives in any soil or situation, and grows and blooms all the year. As many as 6 to 12 flowers rise successively from the base of each leaf-stalk, and are borne on stems 18 inches high. Regardless of all we can say in its praise, the plant will astonish everyone with its magnificence—so novel and so wonderfully effective, free-growing and fragrant. One flower is sufficient to perfume a large room with a most delicate aroma. Our plants growing in the open ground the past summer have been the wonder and admiration of all visitors to Floral Park. They have flowered constantly. We can in truth say that of all the great acquisitions in new plants which we have introduced, this new flowering Caladium is one of the most important and valuable. The splendid Gladiolus Childsi, or Rudbeckia Golden Glow, are not more wonderful than this. We first offered it last year at \$1.00 each and had orders for many thousand more than we could supply. Our stock this year is very large and fine.

Well established plants, by mail, 50c. each; 3 for \$1.00. Extra large plants by Express (too large to mail), \$1.00 each; 3 for \$2.00.

3 Great Brick and Iron Buildings of Childs' Establishment. Besides these there are 12 other Buildings and over 20 very large Greenhouses.

GREETINGS 1901.

There must be a feeling of confidence on the part of the public towards any house doing business through the agency of a Catalogue. Otherwise the house cannot succeed. We have devoted 25 years to building up a business of this kind. Our 25th Anniversary Catalogue last year told all about it from the start in 1875 with a dozen customers to 1900 with half a million. Our goods have stood the test of time and experience, and enjoy an unprecedented reputation. That we have the largest patronage of any house of its kind in the world is because our goods are known, and also because it is known that a 25-cent order receives the same careful attention as a \$25.00 order, our object being to please our customers (large or small) in every instance. This year sees the beginning of a new century and with our business a new quarter century, this being the 26th annual edition of our Catalogue and we have tried to make it the best, and as a matter of special appreciation of the long, continued loyalty of our customers we have made some particularly attractive offers in choice Seeds, Bulbs, and Plants.

We wish you all a happy and prosperous year.

GENERAL INSTRUCTIONS.

What We Do.

We Take the Risk.—We guarantee that all money sent us shall reach us, if sent by Post Office or Express Company's Money Order, Bank Drafts, Bills or Coin by Registered Letters. We will not be responsible for coin sent in ordinary letters, or for postage stamps.

Free By Mail.—We send Seeds, Bulbs and Plants FREE BY MAIL at the prices named in this Catalogue. This brings them to the very doors of our customers without trouble or expense. To points where the large express companies touch, we can send some orders as cheaply by express as by mail. In such cases we send by express, prepaid, and notify the purchaser to that effect.

By Express.—If a package is ordered to go by express we do not pay the charges; but larger Plants, Shrubs and Fruits can be sent in this way, and we always add extra ones, more than enough to pay the cost. All the large express companies carry our goods at very low rates.

We Guarantee that every package we send out shall reach its destination in good condition, and that everything shall be received exactly as ordered. If a package is lost, or any of its contents injured on the way, we will send again. We also guarantee everything true to name.

We Pack all plants carefully in strong boxes, which insures their safe transit through the mails to the remotest part of the country or abroad.

We Fill all orders as soon as received, if the stock is ready. Customers, who wish their order, or any part of it, booked for shipping at a later date, should state the fact.

To Canada, Mexico, Hawaii, New Zealand, Newfoundland, Germany, most of the countries of South and Central America, and the West India Islands, we can send goods in large parcels by mail, prepaid. We can ship only Seed to other foreign countries by mail, postpaid.

England, Ireland or Scotland, Australia and New Zealand.—We have so many customers in Great Britain, Australia and New Zealand, that we, at frequent intervals, fill their orders and ship the parcels in bulk to our agent in Liverpool or Auckland, from which point they are forwarded to their destination by rail or parcel post.

Discounts.—We make the following discounts to those who will get up a club or order largely for their own use. Considering our very low prices, we think them very liberal. Please notice that these discounts cover everything offered in this Catalogue except *Mayflower* subscriptions in Clubs.

Those sending \$	1.00	can select articles amounting to \$	1.10
"	2.00	"	2.25
"	4.00	"	4.60
"	5.00	"	5.75
"	6.00	"	7.00
"	10.00	"	12.00
"	25.00	"	30.00
"	100.00	"	125.00

We advise the formation of large clubs, and the above discounts will certainly pay anyone for some trouble in that direction. See, also, our splendid premium to *MAYFLOWER* clubs, on page 2.

What Buyers Should Do.

Forward Money with the order, and at our risk, when sent by Post Office Money Order on Floral Park; greenbacks or gold or silver coins, by Registered Letter; Bank Draft or express company's Money Order. Post-office Money Orders are by far the cheapest and the safest method for remitting, and nearly all post-offices issue them. The fee on a Money Order is only 3 or 5 cents for small sums. We send with this Catalogue an order sheet, envelope and a blank application for a Money Order to us, and earnestly request our patrons to remit by money Order if possible.

Private Checks.—Private checks for small sums are not desirable, as it costs us so much to collect them. All banks now charge for collecting private checks.

Stamps.—Please do not send postage stamps in payment for goods if it can be avoided. Letters often get damp in transit, causing stamps when enclosed to stick together and to the order, frequently resulting in the destruction of both. We shall return such as come in bad order.

Silver or Gold coin when sent in letters, should be sewed or pasted up in strong paper or cloth, to prevent its breaking through the envelope, which is frequently the case when enclosed loose. *We will not be responsible for Coin sent to us except in Registered Letter, nor for Stamps.*

Be Sure to write your name and address plainly. We have on our hands hundreds of orders of last year without names, others without post-office or state, and some with the name or post-office written in such a careless or illegible manner that it is impossible to read them. Keep a correct copy of your order, that you may know when the package arrives if all is correct, as people often forget what they ordered, and complain without cause.

Please Write your order plainly and distinctly by itself and not mix it up with anything else you may wish to say.

Those Who Send a neat, plainly written order will be sure to have it filled correctly and with despatch, and will also receive some valuable "extras." Always carry out the price of each article, and after adding the amounts together and deducting the discount, remit the exact sum.

Order Early.—We strive to fill all orders within a day or two after they reach us, but this is frequently made impossible by a great rush of business about planting time. Do not wait until you need your seeds and bulbs before ordering. Anticipate planting time by getting your orders in early.

Important.—It occasionally happens that an order is lost in coming to us or the goods in going to the customer; if any who order do not hear from us within a reasonable length of time, they should send a duplicate order, naming the date on which the former one was sent, and the amount of money enclosed, and in what form. This will enable us to investigate the matter and fill the duplicate order with despatch. *No inquiries will receive attention which do not contain duplicate, etc., as here mentioned.*

MAYFLOWER PREMIUMS, FOR 1901.

THE MOST CHARMING HORTICULTURAL MAGAZINE IN THE WORLD.

Many Pages, Fine Illustrations and Superb Colored Plate each Month, at only 25c. per year, in Clubs of Five or More, including Premium--Single Subscription, 50c. per year, with Premium; 25c. per year, without Premium.

A GREAT PREMIUM TO EACH SUBSCRIBER.

AND A CLUB PREMIUM TO THE CLUB RAISER FOR EACH NAME SENT.

OUR MAGNIFICENT PREMIUM.

FREE to Everyone Who Subscribes.

Every person who subscribes for a year (at 50c. singly or 25c. in clubs of 5 or more) may select one of the following two Premiums, (No. 1 or No. 2) which will be sent at once by mail, postpaid. All subscribers renewing, as well as new subscribers may have one of these premiums which is worth more than the subscription price asked. In case of clubs all the Premiums will be sent to the club-raiser for distribution.

PREMIUM NO. 1.

This Premium is 14 packets of very choice Pansies and Sweet Peas, 7 of each, all different colors. The Pansies are extra choice giant-flowered kinds and the Sweet Peas the finest known varieties; same as shown on Colored Plate in this Catalogue.

- 1 Pkt. Giant Pansy, Finest Snow White.
- " " " Coal Black.

THE MAYFLOWER,

With the "WARBLER" and "DELICIOUS FOOD," without extra cost.
John Lewis Childs' Great Horticultural Magazine.

Its Pages Artistically Illustrated, and with One or More Fine Colored Plates of New Flowers, Plants or Fruits Each Month. The Leading Publication of the World on Flowers and Gardening.

The Mayflower is devoted to the Cultivation of Flowers, Plants, Fruits and Vegetables, and to Gardening and Home Adornment in general. Each issue contains scores of interesting, attractive and valuable articles from our staff of contributors, representing every State in the Union, and nearly every country of the Globe. It goes monthly to every civilized country, and is the leading horticultural magazine of the world. It contains about 64 pages each month, bound in colored covers, with charming colored plates and elegant illustrations.

SUBSCRIPTION PRICE, only 25 cts. per year in clubs of 5 or more including Premium. Single Subscription, 50 cts. with Premium; 25 cts. without Premium. Foreign Subscribers (except Canada), should send One Shilling (24 cts.) extra, for Foreign Postage.

STAFF AND CONTRIBUTORS.

JOHN LEWIS CHILDS, Editor and General Manager.
WALTER NATHAN PIKE, Managing Editor.
JOHN F. KLEIN, Business Manager.
H. M. CARLETON, Mgr. Advertising Dept.
FRED WEIGAND, Artist.

THE MAYFLOWER has a staff of over 100 contributors, among which are the following:

Mrs. Mary A. Miller, Alabama.	Mrs. G. W. Flanders, Me.
Sharlot M. Hall, Arizona.	Mrs. Fred Myron Colby, N. H.
Lawrence D. Fogg, Conn.	K. W. Lawson, N. Y.
Mrs. L. M. Townsend, Colo.	Mrs. Elizabeth Luney, N. Y.
J. Torrey Connor, Cal.	Helen Kern, Ohio.
Lennie Greenlee, N. C.	Mrs. Jessie Lynch, Oregon.
Prudence Plafin, S. C.	Bessie L. Putnam, Pa.
Rose Seelye-Miller, S. Dak.	Mrs. S. E. Kennedy, R. I.
Mrs. Jennie S. Perkins, D. C.	Mrs. W. J. Standlee, Texas.
Irene L. Moose, Florida.	Sarah A. Gibbs, Vt.
Mrs. J. B. Park, Ga.	Lillie Sheldon, Wash.
Bernice Baker, Ill.	"Thlma," W. Va.
Mrs. H. B. Monty, Ind.	Henry Nehrling, Wis.
Maud Meredith, Iowa.	Florence Holmes, Canada.
Laura Jones, Ky.	Mrs. S. H. Snider, Manitoba.
Mrs. G. T. Drennan, La.	John B. Lee, New Zealand.
Dora Read Goodale, Mass.	Maurice Wolf, Egypt.
"Sister Gracious," Mich.	D. H. Hitchcock, Hawaii.
Mrs. W. J. Stahmann, Minn.	Rev. A. Fuller, D. D., Turkey.
Clara S. Everts, Miss.	Mrs. Frank Muller, Japan.
Lora S. La Mance, Mo.	M. J. Alley, Jerusalem.

And a score of others, representing every State and Country.

As may be supposed, the articles on Flowers and Gardening, which come from all parts of the world, are intensely interesting and useful. Every number is well worth a year's subscription price. This is the verdict of our readers. Each issue is a mine of information, interest and beauty.

SPECIAL FEATURES.

Information Box—What our Readers Want to Know, by EBEN E. REXFORD. In this New Department Mr. Rexford will answer all requests for information asked by our readers. These answers will be given in a novel and attractive manner.

Spending Money for Women Which may be Earned at Home—By HELEN E. HUNTINGTON. 12 articles, one for each month of the year, suggesting various ways in which light and profitable work may be done at home. Some of the titles to these articles are: "Mushrooms," "Busy Bees," "More than a Windowfull," "Home Products," "A Strawberry Bed," "Supplying Wants," "Brains vs. Hands," "What Some Women Have Done," etc. Mrs. Huntington has prepared these articles in a very attractive manner and they are exceedingly interesting as well as useful.

Correspondence—Under the heading of each individual State we publish interesting and useful letters from our readers. Questions and Answers, which makes this department of great interest and value to every subscriber. Nearly every State, as well as Foreign countries, are represented in each issue.

Delicious Food From Orchard and Garden and How to Prepare it.—Notes, suggestions, recipes, etc. Of great benefit to all and a source of much valuable information to the housewife.

Famous Parks of the World, By J. TORREY CONNOR, CAL. Under the above title our well known contributor, J. Torrey Connor, who has spent the past summer abroad, will contribute a series of articles on the famous parks of the world, including the Yellowstone and Yosemite parks, the historical park of Chapultepec and the world-famed Alameda, City of Mexico, the wonderful Garden of the Gods, in Colorado, the Golden Gate Park, San Francisco, in mid-winter, "The Lungs of New York," (New York City Parks), Hyde Park and Kensington Gardens, London, "The Parks of Paris," and "A Visit to Versailles"—the greatest park in the world.

The following articles are now in hand ready to publish.

Tropical Fruits for Pots. By LORA S. LA MANCE, Mo.
Rose Culture in California. By GEORGINA S. TOWNSEND, CAL.
An Old Virginia Garden. By S. LATIMER PHILLIPS, GA.
The Baby Primrose. By MRS. G. T. DRENNAN, LA.
Flower Perfumes. By FRANK H. SWEET, R. I.
Palms and their Culture By an Amateur, By MRS. A. M. HOLMES, IND.

ALSO SEVERAL ARTICLES ON

The Cannia, The Gladiolus, The Rose, The Begonia, The Gloxinia, The Amaryllis, The Geranium, The Chrysanthemum, The Violet, The Cactus, Potting Soils, Odd Plants, etc., and scores of other subjects.

THE WARBLER.

A decided hit, and has created great interest.

In addition to the increased space to floral topics we have added a little magazine on birds, which we call "The Warbler." This is devoted to the study of our native birds, with a view to setting forth their usefulness, especially in the orchard and garden, and to agriculture in general, that people may learn how important it is to protect them from slaughter. Bird stories, anecdotes, bird ways, song, beauty, etc. This is a very interesting magazine of itself, but it will be bound with THE MAYFLOWER and be really a part of THE MAYFLOWER. No extra subscription. It has proved a great success and is pleasing our subscribers immensely.

OUR TEN CENT HORTICULTURAL BOOKS.

We publish several valuable books on Horticulture, which we supply at 10 cents each. They are so cheap that all our customers CAN afford to have them and so valuable that all SHOULD have them.

ALBUM OF FLORAL PARK VIEWS.

We publish a beautiful album of half-tone photographic pictures of Floral Park, showing the beautiful lawns, flower beds, summer-houses, fountains, buildings of various kinds, green-houses, seed-stores, residences, MAYFLOWER printing office, etc. It also contains a fine portrait of Mr. John Lewis Childs. This album of Floral Park views is gotten up to accommodate those of our friends and customers who have asked for something of the sort, and is offered at cost price. The album also contains several press notes on the beauties of Floral Park, and several pages of poems, called "Gems from THE MAYFLOWER." They are a selection of the most beautiful poems (all original) which have appeared in THE MAYFLOWER during the last eight years. Price of Album, by mail, postpaid, 10 cents.

BEAUTIFUL HOME SURROUNDINGS.

A NEW BOOK BY LORA S. LA MANCE.

This charming book contains 80 pages, and is the most comprehensive and valuable work on planting, laying out and keeping in proper order the lawn and garden, and everything pertaining thereto. It is worth almost its weight in gold. It should be in the hands of all who love gardening. Price, 10 cents.

CHRYSANTHEMUMS.

A charming little illustrated book on the Chrysanthemum, giving all needed information in regard to its culture in the house, garden or conservatory. It tells all about propagating, insect enemies, growing from seed, etc. Eleven chapters. Price, 10 cents.

HOUSE PLANTS.

BY LORA S. LA MANCE.

This is a thorough treatise on House Plants and their culture. It is a companion to "Beautiful Home Surroundings," and is as valuable a guide to floriculture in the house as that charming book is to floriculture in the open air. No one should be without it who grows window plants. Price, 10 cents.

INSECTS.

This valuable book tells all about insects of every kind which infest house and greenhouse plants, garden vegetables and flowers, shrubs, trees and field crops, moths, ants, flies and other insects which infest our homes. In every case it gives the best known means of destroying them, many of the remedies being new and little known. This book is worth its weight in gold. Price, only 10 cents per copy.

GLADIOLUS AND THEIR CULTURE.

BY C. L. ALLEN.

This is a unique and complete treatise on the Gladiolus, giving all needed information regarding the different species and their culture. It is finely illustrated, and is a valuable work on this most important garden flower. Price, 10 cents.

THE PANSY.

A fine little booklet on the Pansy by Mrs. La Mance. Tells all about Culture, History, Modern Pansies, Arrangement of Blooms, etc. Price, 10 cents, postpaid.

HOW TO COOK VEGETABLES.

BY JESSIE LYNCH.

555 Choice Recipes for Cooking Vegetables, all the different kinds. This pamphlet is worth its weight in gold to any family. If you want vegetables better than you ever ate before, this will tell you how to cook them so that they will be. Price, 10 cents.

SPECIAL OFFER.—Any of the above valuable books by mail, postpaid, at 10 cents; the eight for 50c.

OUR GREAT CHROMO PICTURES.

A new and positively the last edition of these two grand pictures has been issued, and they are now ready to mail. Not one of our readers should fail to order them. They are well worth a dollar, and over 200,000 have been sold already. There was never anything produced in floral art which can compare in magnificence with these two great Floral Paintings.

Gladiolus Childsi.

A most beautiful picture in eighteen colors, 16x33 inches, showing in natural size and color several spikes of this grand new race of Gladiolus (Childsi). It is a magnificent picture, and is acknowledged to be the finest thing ever produced in floral art. It has been ordered from all parts of the world, and about 200,000 copies have already been sold. It is well worth a dollar. Everybody who sees it wants it, and many people are making money by selling them at 50 cents and \$1.00 each. Mailed on receipt of 15 cents.

Iris Kämpferi.

A companion picture to Gladiolus Childsi, size 16x33, in eighteen colors, showing thirteen varieties of the finest double Iris Kämpferi in natural colors. It is useless to attempt to describe the beauty of this loveliest of all floral paintings. The great flaming blossoms in their loveliest tints stand out in all their silken lustre and charm the eye with their matchless beauty. Sent by mail, postpaid, in strong roller, on receipt of 15 cents.

SPECIAL OFFER—For only 20 cents we will send by mail, in strong cardboard roller, these two elegant pictures.

Complete Volumes of The Mayflower.

We can supply back numbers of any month for several years past at five cents each. The entire volumes for 1900, 1899, 1898, 1897, 1896, 1895, 1894, at 25 cents per volume of 12 numbers complete.

Gossamer Rubber Mittens for Garden Work.

After once using these mittens, one who cares to protect the hands would not be without them. The disagreeable part of gardening, in the estimation of many, is overcome by them. The hands are kept from contact with the dirt and protected from the sun. For ladies' use they are invaluable and every lady who works or would like to work among her plants and flowers should have them. 20c. per pair, postpaid.

Paper Flower Pots.

Here we offer Flower Pots made from Naponset Waterproof Fabrics. They are very light, durable, unbreakable, cheap, and of terra-cotta color. Just the pots for growing small plants and seedlings.

Size, 2 1/4 inches, 25c. per dozen; per 100, \$1.00.

Size, 2 1/2 inches, 30c. per dozen; per 100, \$1.25.

Size, 3 inches, 35c. per dozen; per 100, \$1.50.

By mail, postpaid, at above prices.

Bent Neck Plant Sprinkler.

This is the finest Rubber Sprinkler made, as its neck is so bent that plants can be readily sprinkled, both above and underneath the foliage. It is durable, quickly and conveniently filled, throws a fine, strong spray, which thoroughly washes the foliage of plants, removing dust and insects. Price, by mail, postpaid, 75c.

ITALIAN INSECT FUME.

A New Sure Death to All Plant Pests, Flies, Mosquitoes, Moths and Other Troublesome Insects.

This wonderful new article, which is made for us in Italy, is a piece of punk-like substance which when ignited produces no flame but a large quantity of smoke. This smoke will kill all flies, mosquitoes, moths, gnats or other insects which may be in the room where the smoke is made. For fumigating plants infested with aphids, mealy-bugs or other insects it is the best thing known, and the most convenient to use. The smoke is in no way injurious or offensive to any person. On the other hand it is a valuable disinfectant, cleansing and purifying a room of all disease germs or other impurities. Burn one at night to kill mosquitoes in your sleeping room, or at any time to rid a room of flies or moths; and fumigate your plants to kill all insects with which they may be infested. It is made in cakes or bricks 1 1/2 inches long. Price, by mail postpaid, per box of one dozen bricks, 20c.; per box of two dozen bricks, 30c.

A NEW INSECTICIDE OF GREAT VALUE.

The Most Convenient to Use, and The Surest of All Insect Killers.

It is with great pleasure that we offer this, the greatest of all compounds for destroying insects of every kind and description. It is a paste, a teaspoonful of which is dissolved in a pint of warm water (or a tablespoonful in a quart of water). With this water the infested plants are sprayed, washed, syringed or sprinkled. It kills every insect with which it comes in contact, on the spot: also, their eggs and larvæ. Those which escape its touch die afterwards, by feeding upon the plant which has been syringed. Though so destructive to all insect life, it is non-poisonous and harmless to vegetation when diluted as directed. It dissolves quickly and readily in cold water. It is a great discovery and is absolutely sure death to every form of insect life at touch. Price, in seven-ounce cans, postpaid, 40c.; 3 cans, \$1.00.

Potting Soil.

Many people, especially those residing in cities, find it difficult to get good potting soil, and we have been urged to prepare a good mixture for general use and offer it. This we have done, and here offer a rich, sandy sod loam, mixed with a proper quantity of old, pulverized manure, leaf mold and bone dust. It is just the soil which suits all sorts of plants and bulbs best. It is finely sifted and will be sent by express or freight at buyer's expense. Price, 80c. per bushel; \$1.50 per bbl.

Tilton's Emery Knife Sharpener.

It is a round, emery-covered tool and suitable for sharpening all sorts of knives, especially Christie and other peculiar knives, which cannot be ground or sharpened on hones. A few strokes of a knife on this sharpener is sufficient to give it a keen edge, no matter how dull it may be. For carving-knives or for kitchen use it is worth its weight in gold; the best thing in use. By mail, postpaid, 20c. each; 3 for 50c.

CHILDS' EXCELSIOR FERTILIZER.

BEST OF ALL PLANT FOOD.

A NEW ODORLESS FERTILIZER FOR POT PLANTS. Makes Plants Grow and Bloom Luxuriantly, and Drives Insects from the Soil.

This excellent fertilizer is used by dissolving a teaspoonful in a pint of water and applying it to the soil of pot plants every week or two. It starts the plants at once into healthy and vigorous growth and abundant bloom. It drives worms and other troublesome insects from the soil. It has no disagreeable odor, and is the only artificial fertilizer which can be used without danger or injury to the plants. It takes the place of liquid manure and is just the thing that has been wanted for a long time. Mr. Eben E. Rexford says: "There is nothing so convenient to use, or better in results, than the Excelsior Fertilizer, put up by Mr. Childs, especially for pot plants. It produces a vigorous and healthy growth, and plants to which it is given flower very freely." Price, one-half pound packages, 25c. each, postpaid; or 30c. per pound, by express.

THE EVERBLOOMING TRITOMA.

The greatest bedding plant ever introduced, surpassing the finest *Cannas* for attractiveness and brilliancy, equal to the *Gladiolus* as a cut flower and blooms incessantly from June until December, regardless of frost. Plants perfectly hardy in open ground all winter south of Philadelphia; further north they must be protected or wintered in a cellar like the ordinary *Tritoma*. Just bury the roots in sand; nothing more is required. Should be planted out very early in spring, and will commence growth and bloom at once, growing larger and finer every day. Plants show from 6 to 20 grand flower stalks all the time, each holding at a height of 3 to 4 feet a great cluster of flame-colored flowers of indescribable beauty and brilliancy. Each cluster keeps perfect several weeks, and when it fades 2 or 3 more are ready to take its place. Fall frosts do not kill it or stop its blooming, and it is as brilliant as ever long after all other garden flowers have been killed. For cutting it is unsurpassed, and the beautiful long spikes keep several weeks in water. Without a single exception, it is the most desirable garden flower. It has created a sensation in the New York cut flower market, and will be a great factor among cut flowers in future. Strong plants that will soon bloom, 30c each; 4 for \$1.00; 10 for \$2.00. Seed, 15c per pkt.

Fancy Caladiums.

Easy to grow in summer, either in beds or pots. For piazza or summer conservatory decoration they are unrivaled. Their beautifully shaped and glossy foliage is elegantly variegated in the most telling manner. One, perhaps, is regularly dotted with round raised spots of white, another is ribbed and veined with pink or scarlet, or yellow, while still another is flashed and marbled with white or shaded almost black. In fact, the immense leaves are so marked with delicate and vivid colors as to make them as showy as great and peculiar flowers. The small early leaves do not always show all the fine colors of the large ones which come later. Our collection is superb, comprising over 80 named kinds of which the following are the best.

- Duc de Ratavor**—White and dark green beautifully mottled. Green band around each leaf and wide ribs of dark red.
- Louis Duplessis**—Fine net-work of green veins on white ground. Extra large ribs of intense crimson.
- Wright**—Dark green with large distinct spots of pure white and deep crimson.
- Ed. Moreau**—Ground color of leaf emerald green with distinct crimson ribs of numerous splashes of pure white.
- Dr. Neubrunner**—Ground color of leaf very light olive-green shading to white. Numerous large crimson spots.
- Jupiter**—Very dark olive-green with metallic luster. Large, distinct ribs of bright crimson, freely mottled white.
- L' Aurora**—Deep sea-green with pink-shaded center and prominent pale pink ribs.

- Mon. A. Hardy**—Magnificent large leaf, the ground color being composed of an intricate net-work of white, green and crimson with large blood-crimson mid-ribs.
 - Napoleon III.**—Enormous size leaf, a most as large as Caladium Esculentum. Deep olive-green shading toward the center to lighter olive. Crimson center with bright crimson mid-ribs and large splashes of blood-red.
 - Princess Alexander**—Ground color of leaf delicate pink, the mid-ribs and veins being dark olive-green.
 - Reine Victoria**—Deep, lustrous green freely mottled with white and a few spots of crimson.
 - Cuambara**—Very light olive-green, almost white, freely spotted with lavender. The center and fork of the leaf showing deep crimson. A rarely fine sort.
 - Berose**—Very dark green freely mottled with pink.
 - Clio**—Delicate pink interwoven with a lace-work of green veins. Mid-ribs dark olive-green, and a double border of green around each leaf.
- Price.**—Above sorts, 20c. each; 3 for 50c.; the 14 for \$2.00.

Mixed Fancy Caladiums.

A grand assortment, some 100 kinds, many of them very rare and grand, 15c. each; \$1.50 per dozen.

7 Beauties for \$3.00.

For \$3.00 we will send 7 extra fine new and rare sorts which are perfectly immense. Space does not allow us to give names and descriptions.

Our NEW CENTURY Surprise Collection.

It Will Be Unusually Fine This Year, and Our Customers Will Find it a Great Bargain.

MANY DOLLARS' WORTH OF FINE PLANTS, BULBS AND SEEDS FOR \$1.00.

It is our custom each year, after the heavy spring business is about over, in May, to take the surplus stock of various good things, make it into "Surprise" Collections, and offer them to our customers, giving four or five times the value of their money. In fact, the "Surprise" is in the great amount of fine things one gets for the money paid. These collections cannot be sent until about the middle of May, and will be entirely of our own selection, from kinds of which we have a surplus. No collection will be made up for less than ONE DOLLAR, and from that up to any amount the purchaser may desire. They will be sent free, by mail, unless desired by express, and in that case we can send very much more for the money than by mail. All "Surprise" Collections ordered previous to May 15th will be booked and shipped then, but we can continue sending them up to the first of July. We advise our friends to invest a dollar or more in this collection, particularly this year, for we are going to see how good it can be made.

SPECIAL "BARGAIN" COLLECTIONS.

Below we offer Six Special Collections, made up entirely from our own Novelties of the past few years. It is needless to say that they represent the finest varieties of their kind, and the prices we offer these Collections at is merely nominal, not their true value, which is much greater:

10 PKTS. SUPERB FLOWER SEEDS FOR ONLY 50c.

One pkt. Cosmos, Hybrids.
One pkt. Golden Leaved Salvia.
One pkt. Chinese Lantern Plant.
One pkt. Datura, Sweet Nightingale.
One pkt. Phlox, Childs' Jubilee.
One pkt. Pansy, Imperial German.
One pkt. Poppy, Improved Shirley.
One pkt. Japanese Morning Glory.
One pkt. Verbena, Childs' Prize.
One pkt. Zinnia, Childs' Improved.

The above 10 pkts., all our own introduction, for 50c.

5 BEAUTIFUL POT PLANTS FOR 50c.

One Alocasia.
One Fuchsia, Trailing Queen.
One Pigmy Boston Fern.
One Palm, Filifera.
One Rose, Winter Gem.

These 5 grand Plants, of our own introduction, for 50c.

5 HARDY PLANTS FOR 50c.

One Rudbeckia, Golden Glow.
One New Syplium.
One Chrysanthemum, Everblooming.
One Iris, Kampheri, named.
One Tritoma, Everblooming.

These 5 Hardy Plants, of our own introduction, for 50c.

10 PKTS. FINEST VEGETABLE SEEDS FOR ONLY 50c.

One pkt. Cabbage, Long Island.
One pkt. Egg Plant, Giant Spineless.
One pkt. Cucumber, Early Beauty.
One pkt. Lettuce, Half Century.
One pkt. Melon, Musk, Combination.
One pkt. Melon, Water, Kleckley's Sweet
One pkt. Onion, Early Radish.
One pkt. Pepper, Celestial.
One pkt. Tomato, Diadem.
One pkt. Turnip, Early Ivory.

The above 10 pkts., all our own introduction, for 50c.

5 FINE BULBS FOR 50c.

One Amaryllis, Aulica Platipetala.
One Great Ismene.
One Gladiolus, Childs, named.
One Amorphophallus Simlense.
One Zephyranthus, Sulphurea.

These 5 splendid Bulbs, of our own introduction, for 50c.

5 SPLENDID FRUITS FOR 50c.

One Balloon Berry.
One Tree Strawberry.
One Wineberry.
One Tree Blackberry.
One Climbing Raspberry.

The above 5 Fruits, of our own introduction, for 50c.

All 6 Collections, for only \$2.50.

Floral Park Lawn Grass.—Quick Growing.

Not even fine trees and beautiful flowers add as much beauty to the home surroundings as does a fine, velvety lawn. To secure a fine, close, even sward, it is absolutely necessary to use proper grasses. Good, deep, rich color and turfy, compact habit, stooping out well from the bottom, and they must be able to stand the sun as well, and a considerable amount of drought, without injury. We have a mixture of grasses that meets all these requirements. We use it at Floral Park, where it has been much admired. We have sold it in every State and Territory in the United States, and it has given entire satisfaction in every location. It grows quickly, making a fine green sward in a few weeks. A whole season's drought will not kill out this grass. It may dry and burn as brown as possible, yet the first good rain will immediately bring it up green and velvety. 35c. per quart; \$2.25 per peck, postpaid; by express, per peck, \$1.25; per bushel, \$4.00.

OUR FALL CATALOGUE FOR 1901.

Our Illustrated Catalogue of Hyacinths, Tulips, Narcissus, Crocuses, Scillas, Freesias, Crown Imperials, Snowdrops, Alliums, and all Hardy Bulbs and Plants, for fall planting and winter blooming, will be sent to our customers the first of September. It will also be sent free to all others who apply. Address all orders and other Communications to.

JOHN LEWIS CHILDS, Floral Park, N. Y.

SPECIALTIES AND NOVELTIES.

SPECIAL OFFERS.

All the **NEWEST** and **BEST** Seeds, Bulbs and Plants.

OUR REMARKABLE INTRODUCTIONS FOR 1901.

Elegant Caladiums, Azaleas, Carnations, Begonias, Grand Pelargoniums,
Gigantic New Geraniums, The Grandest Pansies,
Everblooming Tritoma and Gardenia, New Boston Ferns, Choice Roses,
Pot Grapes, Etc., Etc., Etc.

THESE SEVERAL COLORED PLATES and the following green paper pages contain our leading Novelties, Specialties and Special Offers for this year. The list embraces Flower and Vegetable Seeds, Bulbs and Plants. Of many items, both Seed and Plants (or Bulbs) are offered, as in the case of Gloxinias, Begonias and Coleus. With a few exceptions all items are quite new or very rare, the exceptions being some special offers of extra fine things, as in the case of the Colored Plates of Hardy Ornamental Shrubs, Tropical Fruits, Sweet Peas, etc. All the Flower and Vegetable Seed Novelties offered on their respective Colored Plates are very fine indeed. We would also call special attention to our new Sweet Scented and Double Vernon Begonias, magnificent Geraniums, Pelargoniums, Cannas, Everblooming Tritomas, Chrysanthemums, Fancy Caladiums, Rudbeckias, Yellow Calla, Boston Ferns, Streptocarpus, Syllphium, Coleus, Mayflower Verbena, etc. This department of Specialties and Novelties closes with 9 pages of our Roses (pages 32 to 41) both old and new varieties. Our grand new Roses are offered on Cover.

CHOICE NEW VEGETABLES.

Radish Icicle.

A long Radish of almost transparent whiteness, which has no rival among all existing varieties. It is so early that the roots are 4 to 5 inches long in 20 days from the time of sowing the seed in the open ground, and ready for the table. As to quality, it has no superior, and is the most beautiful Radish yet seen. A long, white, alabaster-like, early variety, has not previously existed. This is a real jewel. Pkt., 10c.; 3 pkts. for 25c.

Danish Cabbage.

A remarkable fine Cabbage from Denmark, having qualities which are lacking in any standard American variety. Heads medium size, uniform, round, and remarkably solid. It is a fine keeper and a fine shipper. For a late Cabbage for winter use it has no superior, being of good size for family use and of extra good quality; crisp and tender, better than any Cabbage with a less solid head can possibly be. Pkt., 10c.; oz., 25c.; lb., \$3.00.

Smart's Hybrid Bush Bean.

Quite a distinct Bush or Snap Bean, of quick rapid growth and excellent quality, originated at Nashua, N. H. We have had it under test two years and are highly pleased with it. It seems to possess all qualities which go to make a strictly fine class garden Bean. Pkt., 10c.; pint 25c.; quart 40c.

Great Mississippi Tomato.

On receipt of the following letter from A. W. Martin, Duncan, Miss., in the fall of 1899, we purchased stock of this new Tomato and have grown a large crop. In bringing it to our attention Mr. Martin said: "I have grown a wonderful Tomato plant. It is 8 feet 2 inches high and has a circumference of 15½ feet. It has ripened 167 Tomatoes averaging 9 ounces each for its first crop, and now has 147 young Tomatoes on it and as many blossoms, and still it grows. As to the flavor of the fruit, it is far more delicate and sweet than the common Tomato. This plant came up in a row of Beet seed sent me from the Agricultural Department at Washington and is supposed to be of Foreign origin."

Other letters from the neighborhood confirmed Mr. Martin's report and the Tomato evidently created a genuine sensation. We grew a large crop of it this season and find it to be, as Mr. Martin says, a remarkable grower and cropper. While we had no specimen plant that came up to his, we can readily believe that they might even exceed that record if given special attention, as the growth and yield for ordinary field cultivation was perfectly marvelous. The Tomatoes are of medium to large size; bright deep crimson, and as smooth as wax. We have never seen a more beautiful fruit of any variety, or fruit which run so uniformly even in size and beauty. It is certainly a great acquisition, and we are fortunate in having stock sufficient to offer it at 10c. per packet; 3 pkts. 25c.

One packet each of these 4 new Vegetables for 30c.

MIGNONETTE "GOLIATH"

MAMMOTH
HELIOTROPE

Superb Flower Seed Novelties.

Mignonette Goliath.

Beyond all question the finest variety of Mignonette yet introduced. It has a compact growth with rich green foliage. Flower stalks strong and stiff with giant trusses of flowers, reaching in the open ground a length of 7 inches and a diameter of more than 2 inches. The single flowers measure up to 1/2 inch in diameter; the color is the richest yet seen, being a deep brick red, much deeper and better than any other so called red flowering variety. In every respect the finest Mignonette ever grown. Pkt. 15c.

Fuchsia-Flowered Morning Glory.

A perfect gem of a vine, being of very slender graceful growth, with beautiful foliage and climbing rapidly to a good height. Its lovely blossoms are about the size of a Fuchsia and droop in the same manner, hanging by long thread-like stems. Color fine lilac-pink. For delicacy and grace this is about the finest vine we have ever seen. It branches freely and is fine for screens or tall trellises or for strings. For beauty of habit and flower, and general graceful aspect it is par excellent. One of our very best novelties. Pkt., 15c.

Heliotrope Mammoth.

This new Heliotrope is the result of a cross between the well-known Giant Heliotrope having been introduced a few years ago, and Mad. Bussy. It does not grow as high as the Giant but the more sturdy and broad, producing immense umbels of light and deep violet flowers, which have a diameter of 16 to 20 inches. The delicious perfume of this novelty by far exceeds all other Heliotropes. Plants will bloom within three months from the time of sowing the seed, and the enormous panicles of bloom are magnificent. Pkt., 20c.

Stocks, Perpetual Branching.

This new Ten-Weeks Stock has proved to be the finest variety in cultivation. It blooms very quickly from seed, the plants being stout, branching, and compact, with numerous flower spikes of very large size. The individual flowers are large, very double, and perfect in form. For pots it is greatly superior to any other variety, and as a pot plant it is just superb, flowering for a long period and at any time of year, according to time of sowing. Another great point in its favor is the fact that only a very small per cent. of the plants raised from seed will be single, nearly all producing magnificent double flowers. It is one of the greatest flower seed novelties we ever introduced, and one than will give far greater satisfaction that can be anticipated. We cannot say anything too good for it. 15c. per pkt.; the 2 for 20c.

Pure White—Large snow-white. Perfectly magnificent.
Rich Crimson—Fine, deep, velvety color.

Miniature Zinnia.

A perfectly wonderful plant, growing only 4 to 6 inches high and bearing great numbers of double blossoms of various colors. It is so dwarf and compact that a plant looks like a tasty bouquet set in the ground, the mingling of bright blossoms and foliage being very effective and so uniform and precise as to suggest artificial arrangement. For bordering beds of taller Zinnias or other flowers this is just the thing, or as a little clump or bed by itself it is very attractive. One of the best flower seed novelties in many years. Many colors mixed. Pkt. 15c.; 3 pkts., 30c.

New Annual Delphinium,

"BLUE BUTTERFLY."

In our Blue Butterfly Delphinium we have a combination of attractions which have never been equalled in one plant. In the first place it is an annual which will come as a surprise to those who only know Delphiniums as perennials. Secondly, it is dwarf and compact, hardly reaching a foot in height; a surprise equal to the first. Thirdly, it has a bushy yet branching habit instead of the ascending upright growth. Fourthly, the size of its blossoms is beyond anything we have ever seen in the old perennial section; and lastly its color is of the intensest blue yet found in any flower, defying the artists skill to reproduce, and bids fair to outvie the unique blue of a *Salvia Patens*. This novelty is perfectly hardy and can be grown by anybody in any soil and will be in full bloom in 70 days from the time of sowing in the ground. We have also proved it to be a most effective pot plant for table and occasional decorations of every kind, imparting a color which has been missing too long. For bedding purposes it is fine. Pkt. 15c.

Cyclotoma platyphylla.

(CYCLONE PLANT.)

The Great Cyclone plant of the Black Hills. It is leafless and a great curiosity. Seed can be sown early in the open ground and when the plants are young they have leaves, but as they grow older they send out long, wiry stems in every direction, until the whole makes an oval plant as round and regular as a half circle, and covers two or three feet of ground. From the ground to the top this plant is a solid mass of bare stems and small seed vessels so numerous and compact as to make a solid mass. The plants are green up to about the last of August at which time they will, in a few days, turn to a bright deep purplish-black color, and remain so until killed by frost. After the plants are dead the wind will detach them from the ground and blow the great compact mass about sometimes to great distances. This habit of turning purplish-black, and rolling about gives it the name of Cyclone plant. They are very good for a large border, as they grow so compact and evenly, or for single specimens as curiosities. Per packet, 10c.; 3 packets, 25c.

Nicotiana, Sylvestris.

We regret that space does not permit us to show a large cut of this beautiful plant. It is a magnificent garden ornament, growing five feet high, with large, handsome leaves, making it a grand foliage plant. It also bears large, branching panicles of long, tubular, white flowers, which are very handsome and fragrant, each panicle showing as many as 50 flowers at a time. For ornamental bedding it is great, and has attracted great attention here at Floral Park. Seed may be started early inside or sown directly in the open ground. The best results will come from an early start. Pkt., 10c.

These 8 fine Novelties for only \$1.00.

CHILDS' MAGNIFICENT SWEET PEAS.

The Cream of all the Grand, New Large-Flowering Varieties.

EVERYONE who has a yard ought to grow quantities of this sweetest of all flowers, that is not only a beautiful low-growing vine for garden and decoration, but one of the most useful of all in furnishing material for vases, bouquets and all cut-flower work. Plant quantities of these lovely flowers and cut them with a lavish hand. Their presence will bring pleasure in the sick room, adorn your friends' otherwise empty vases, and make happy the flower-hungry children with no pretty yards and flowers of their own: for every flower you pick, two will come to fill its place. Easy to grow anywhere if sown early. For the largest and finest blossoms, dig a trench six inches deep, put in two inches of rotten manure, a little earth, and sow the seeds over this three inches apart in the row, covering an inch and a half deep. Do this as early as the ground can possible be worked in the spring, and as the plants grow, fill up the trench around them with rich earth. Such planting will produce enormous quantities of flowers of the largest size.

SPECIAL OFFER.

8 Finest New Sweet Peas.

Shown on this Plate.

The following eight sorts are the finest of their color and they represent white, black, yellow, pink, blue, cream, crimson and striped. The finest cheap collection ever offered.

- Black Knight**—Deep, rich, maroon-black.
- Golden Gleam**—Finest yellow; large and beautiful.
- Lady Mary Currie**—Orange-pink, the largest, brightest and best of the pinks.
- Navy Blue**—Best dark navy blue.
- Oriental**—Fine cream, large and grand.
- Salopian**—Deepest and brightest crimson-scarlet.
- The Bride**—Extra fine, pure white.
- Striped**—White, pink, crimson and purple, all beautifully striped and variegated.

PRICE—5c. per packet; the 8 sorts for 25c.

55 Grandest Sweet Peas.

The following list of 55 sorts is the very cream of all the fine, large-flowering Sweet Peas that have been recently introduced. Nothing further can be desired.

All at 5c. per packet, 10c. per oz.

- America**—Bright cardinal and white stripes.
- Apple Blossom**—Shaded pink and rose standard, wings lighter shade.
- Aurora**—Salmon and white stripe; blossoms large and one of the prettiest of the stripes.
- Blanche Burpee**—A pure white, slightly hooded.
- Blushing Beauty**—Light delicate pink.
- Capt. of the Blues**—Purplish mauve standard and blue wings.
- California**—Very light soft pink.
- Captivation**—Purplish magenta; quite unlike any other.
- Coquette**—Standard light violet shading to primrose and light primrose wings.
- Countess of Radnor**—Lavender standard and light blue wings.
- Crown Jewel**—Violet and rose-pink blended in the standard, wings light primrose; large blossoms and very vigorous vine.
- Dorothy Tennant**—Deep rosy mauve.
- Duke of Clarence**—Bright rosy claret; sort of purple-maroon.
- Duke of Sutherland**—Purplish maroon standard, indigo blue wings. A very dark variety.
- Duke of York**—Very bright rose standard; wings primrose and light pink shaded.
- Emily Eckford**—Rosy purple standard and bluish purple wings changing to almost blue when open a day.
- Eliza Eckford**—White, shaded and edged with light pink on standard; wings almost white.
- Emily Lynch**—Rose-pink standard; wings light pink and primrose, hooded.
- Emily Henderson**—Pure white, large bold flowers.
- Earliest of All**—Blossoms same as extra early Blanche Ferry, but it is earlier.
- Ex. Ey. Blanche Ferry**—Rose pink standard and white wings, same as in the the original Blanche Ferry. It is two or three weeks earlier than the older variety.
- Fashion**—Light purplish crimson.
- Golden Gate**—Lavender and pinkish lavender blended and shaded.
- Corgeous**—Standard bright orange and wings bright orange-rose.
- Grey Friar**—Marbled or watered purple on white.
- Her Majesty**—Bright rose; one of the prettiest of the bright red varieties.

- Katherine Tracy**—Light carmine and rose-pink; delicate but bright.
- Lady Penzance**—Bright pink suffused with a tint of orange.
- Lady Nina Balfour**—Lavender standard, bright blue wings, the whole suffused with pale primrose which gives it a sort of greenish hue.
- Little Dorrit**—Rose-pink standard, white wings.
- Lovely**—Deep rose at base of standard and wings, shading to pale pink and blush at edges.
- Lottie Eckford**—White ground shaded and edged with light blue and mauve.
- Lottie Hutchins**—Pale primrose, striped with light pink.
- Mars**—Bright crimson-scarlet.
- Maid of Honor**—Almost white, with light bluish lavender edge.
- Modesty**—Very soft blush, almost white. The lightest pink Sweet Pea of all.
- Mrs. Jos. Chamberlain**—Rose-pink and white, striped. Very large.
- Mrs. Eckford**—Pale primrose yellow. The best of this shade and superior to Primrose in size and form.
- Mrs. Sankey**—Supposed to be a pure white of fine form and good size, but it opens with a slight tinge of pink.
- Ovid**—Light carmine with distinct rose veins.
- Oregonia**—White ground, veined and striped with ox-blood or brownish red.
- Prima Donna**—Light but bright blush-pink.
- Prince Edward of York**—Cerule standard and crimson wings. Large open form and vigorous vine.
- Prince of Wales**—Bright rose-pink.
- Pink Friar**—A marbled or watered pink on white.
- Queen Victoria**—Light primrose yellow.
- Ramona**—White, striped with light pink. Well formed large blossoms.
- Royal Rose**—Standard deep rose, shading with lighter pink; very light pink wings. Very large blossoms.
- Royal Robe**—A soft light pink.
- Senator**—Deep purplish maroon and white stripe.
- Sensation**—Pale buff and pink standard, white wings. Nearly always four blossoms to the stem nicely placed.
- Shazada**—Deep maroon standard; indigo blue wings, blossoms large and well formed; a very dark variety.
- Stella Morse**—Primrose yellow, tinged with bluish-pink, perhaps more correctly a rich cream color.
- Venus**—Light salmon suffused with buff.
- Waverly**—Rose-claret or wine color, clear and distinct.

5c. per packet; 10c. per oz.; the 55 sorts, 1 packet each for \$1.50.

Choicest Mixed Sweet Peas.

50 Sorts in One Pkt. for 10c.—For 10c. we will send a packet containing 50 seeds—mixed—one seed each of 50 different named varieties.

Our Grand Large-Flowering Mixed Sweet Peas—The finest mixture possible, as only the largest-flowered or "Grandiflora" type (Eckford's) is used. More than 100 different colors; perfectly magnificent. Pkt., 5c.; oz., 10c.; ½ lb., 35c.; ¼ lb., 60c.; 1 lb., \$1.10; 2 lbs., \$2.00.

Mixed Seedlings—Fine hybridized large flowering strains showing an endless variety of colors. A grand and novel mixture. Pkt., 10c.; oz., 25c.; lb., \$2.00.

Double Sweet Peas.

The new double sorts produce flowers nearly half of which will be double, as shown on this plate. Very beautiful and attractive.

Double Pink.		Double White.
Double Scarlet.		Double Black.

Above double Sweet Peas, 10c. per pkt.; the 4 pkts. for 30c.

Double Mixed Sweet Peas—Several colors. Pkt., 10c.; oz., 25c.

For "Cupid" Sweet Peas, and "Bush" Sweet Peas see page 67.

PRIMULA
OBCONICA
"HYBRIDS"

PLANT OF
PRIMULA OBCONICA
"HYBRIDS"

PRIMULA SINENSIS FIMBRIATA

Primula Obeonica Hybrids.

GREATEST OF ALL NEW POT PLANTS.

These are new large-flowering Obeonics of various colors, as large and fine as *Primula Sinensis*. The old white variety is well known, but these new colors and larger flowers are among the very best novelties this year. Colors, pink, violet, blush, rose, lilac, white, etc. Very charming flowers, being borne in large trusses, and at all times of the year in great profusion. When we introduced these fine *Primulas* last year people could not realize what a treasure they are, but now they are better known the demand for them is something phenomenal. They bloom very quickly from seed, and the large showy blossoms are borne continually for a year, and when we realize that these flowers are as large as *P. Sinensis*, and almost as varied in colors, their great value is at once apparent. Plants very vigorous and easily grown as a *Geranium*.

Seed—All Colors Mixed, 15c. per pkt.; 3 pkts., 30c.

Plants—Fine healthy stock, ready to bloom, 20c. each

Primula Forbesi.

(Baby Primrose.)

Plant is exceedingly graceful and ornamental, with slender flower-stalks rising above the light green leaves, and bearing many dainty-colored flowers with yellow center. New flower stems are constantly appearing as fast as the old ones fade, and the same plant is always in bloom. The foliage grows in a tufty, compact mass, while the graceful flower stems reach high above it. Very hardy and easily grown in window gardens and apartments. Beautiful for cutting. One of the most charming pot plants grown. Seed, 10c. per pkt.; plants, 15c. each; 3 for 35c.

Primula Sinensis.

Ask any florist you will for a list of good house plants, and one of the very first plants he mentions will be the *Primula*. Everyone counts them as one of the "must haves" of winter bloomers, and with good reason. Easy to grow, pretty in leaf, handsome in flower, and continuously in bloom for months at a time. These merits alone would earn it a place in every window, but when we add that it is one of the plants never attacked by insects, and that it will blossom in a sunless window, where a *Geranium* or *Heliotrope* would never show a bud, it is clear that the smallest collection would never be complete without it. Young, vigorous plants are always the best, and are easily grown if the seed is sown on light, porous soil, underlaid with charcoal, and kept moist, but not wet, until the seeds germinate, which will be in about two weeks. Give young plants plenty of air and plunge pots in the summer in cool, shady places. In potting see that the soil at rim of pot is lower than in the center, as water standing on the crown rots them. In the house they will stand plenty of light, but not hot sun. Our seed is saved from the choicest strains and can be relied upon to produce the largest flowers and finest colors. Pkt.

- Mixed**—Very good; from a fine collection.....10
- Fimbriata Filicifolia**—Mixed (fern-leaved); beautiful cut-leaved foliage.....20
- Fimbriata Globosa**—Mixed colors; this is a new strain of *Fimbriata*, with unusually large flowers of great substance, and colors very clear and pleasing, such as pure white with large lemon eye, deep red, carmine, steel blue, white, and pink, striped, flaked with other colors, etc. Extra fine for pot culture.....20
- Fimbriata Crimson**—Immense large fimbriated flowers of a deep bright crimson color.....15
- Fimbriata Cristata Hybrids**—Fine new hybrid strain, with crisped foliage, and producing a great diversity of colors, from white to deep crimson.....15
- Fimbriata, fl. pl., Double, Mixed Colors**—The double *Primulas* are among the choicest of all window plants, and the admiration of all who see them. The seed we offer is the choicest to be had, and will produce a large per cent. of plants showing magnificent double blossoms.....25

PLATE NO. 7.

Childs' New Giant Flowered Perfection Geraniums.

These Geraniums are in their way most remarkable Novelties, for they show great improvement over sorts previously introduced, in habit, vigor, size and quality of bloom and in radiant coloring. For three years they have been the admiration of all who have visited our conservatories. They are now offered for the first, after three years of critical test, and we know just what they are. They have been carefully compared with the best new sorts of recent years, and in every point they show their superiority. Habit, compact, with large healthy foliage. Flowers perfect in shape, round and sometimes beautifully cupped. Trusses immense and the blooming qualities of the plant truly wonderful. But in color they are perfect marvels, showing combinations and brightness of tints hitherto unknown. The spotted or speckled varieties are very novel and extremely attractive. Such worthy novelties, and so many of them we think should bear the names of different States, and we have named them accordingly, as others yet to come will be named.

12 SORTS INTRODUCED LAST YEAR.

- Maine**—Pure white, slightly tinged pink. Large flower and magnificent truss.
- Georgia**—Delicate sea-shell pink. Extra fine and large.
- Virginia**—Large, extra fine, salmon-pink. A fine shade.
- Massachusetts**—Extraordinary size and beautifully colored. Exquisite pure pink with white rayed center, freely spotted or speckled.
- Indiana**—Pale lilac-pink, slightly spotted. Large size and beautiful form.
- California**—Salmon-pink, white center; beautifully rayed and clouded.
- Iowa**—Mammoth size; shape round and perfect; velvety crimson-scarlet. Very rich.
- Illinois**—Soft pink, white center, thickly spotted deep crimson. Distinct and very beautiful.
- Pennsylvania**—Pure snow white; best of its color.
- Ohio**—Flower like a Pelargonium. Deep blood scarlet, veined black; upper petals rayed intense orange-scarlet. Largest known size.
- Kansas**—Intense orange-scarlet, each petal beautifully veined with a dark color.
- New York**—Enormous clusters of great substance; beautiful round flowers. Soft pink; perfectly exquisite.
- Kentucky**—Beautiful soft rose, with numerous spots.

Price 20c. each; any 3 for 50c.; the 13 for \$3.00

8 SORTS INTRODUCED THIS YEAR.

- Oregon**—Flower very large and perfectly magnificent. Orange-scarlet clouded and mottled with pure white.
- Missouri**—Good flower of peculiar color, being scarlet freely mottled with gray. Quite distinct.
- Michigan**—Bright, deep, orange-pink with blue tinted center. A very delicate, pleasing and beautiful color.
- Colorado**—White, tinted violet-pink. A shade so delicate and shifting as to be perfectly exquisite, and has been appropriately called "Shifting Shades."
- Minnesota**—Extra large, light red with small white center. Quite a new and distinct shade and a fine one. Large.
- New Jersey**—White, tinted, veined and spotted.
- Connecticut**—Enormous flower, often measuring 2½ inches across. Leaves gigantic in size with conspicuous dark zone. Color intense scarlet.
- Wisconsin**—Bright violet-crimson, white rayed center freely spotted.

Price 30c. each; the 8 for \$2.00.

GERANIUM SEED.

New Hybrid Large-Flowering.

This is saved from such grand sorts as those offered above. It will produce magnificent varieties, probably many as good as those here named. It is the finest Geranium seed ever offered. Plants from seed bloom in a few months. Pkt., 20c.; 3 pkts., 50c. See page 76 for other Geranium seed.

Geraniums.

BEST DOUBLE SORTS.

- Chopin**—Enormous size, semi-double great truss, fiery orange-scarlet. Fine bedder.
- Hoff Beach**—Very dark. A deep amaranth shaded purple.
- Jupiter**—A grand flower of the very largest size, and of a glowing dark vermilion. Extra fine.
- S. A. Nutt**—A massive truss of large double florets; close, compact habit; rich dark crimson-black.
- La Favorite**—The best white bedding Geranium, as it does not turn pink in the sun. A fine pot sort also. A strong

- grewer, and with flowers of snowy whiteness.
- Mars**—Immense trusses of very large flowers, of fiery scarlet rayed with violet-scarlet and touch of orange-yellow.
- Mrs. Parker**—While the foliage is deep green, with a broad border of pure white, the flower is perfectly double, and of a clear bright pink, a combination novel and beautiful.
- Mad. Jaulin**—Grand flowers of a most beautiful pink color.
- White Swan**—Very floriferous. An extra fine pot Geranium, covered with large trusses of snow-white flowers that are very double and perfect. Habit, short, jointed and bushy.

EXTRA CHOICE SINGLE SORTS.

- John Lewis Childs**—This new and unique Geranium is unlike any other variety in cultivation. Its color is a pale pearly pink, heavily mottled and spotted with crimson. The background is a good light color and the spots bright and brilliant. It is the only good spotted variety yet known in cultivation, except some of our novelties.
- Mar. de Layres**—A grand pure white sort with enormous flowers and truss. Finest of all single whites.
- Wonder**—The flowers are the most intense dazzling scarlet and are borne in trusses of enormous size, measuring from 10 to 20 inches in circumference, with single florets measuring 7 inches in circumference.
- Empress**—Flowers enormous in size, borne in great clusters, durable, and produced in profusion throughout the year. Color a most lovely soft pink, with large white shadings on upper petals and small veins,

Price of all the above Geraniums, 15c. each; 6 for 75c.

Flowering Rose Geranium.

Strong fragrance, and large deep scarlet flowers. Combines free flowering qualities with fragrant foliage. Very useful for summer cut flowers, and as a pot plant for winter cannot be surpassed. A very fine plant, and either for pots or for bedding it will give great satisfaction. Its bloom is very fine, and the fragrant foliage makes it a truly novel plant. 25c. each; 3 for 60c.

Double Ivy Geranium.

A very popular class of Geraniums, of robust, trailing habit, thickly clothed with dark green ivy-pointed leaves of smooth, glossy, wax-like texture, worth growing for the beauty of foliage alone. When in bloom they are doubly beautiful, with large trusses of beautiful flowers borne well above the foliage. These flowers are much larger than the ordinary Geraniums, and marked like superb Pelargoniums.

- Jeanne d'Arc**—Pure white; very double and fine.
- La Rosaire**—Fine rose. Delicate and charming.
- Souv. Chas. Turner**—Deep bright pink; feathered maroon.
- Chas. Montselet**—Bright scarlet; large and fine.

20c. each; the 4 for 60c.

NEW EARLY
CHRYSANTHEMUMS.

New Early Chrysanthemums

We take much pleasure in introducing a set of grand early flowering Chrysanthemums of our own raising. They will all be in full bloom early in October, yet they are as large in size, beautiful and double in shape as the finest of the late varieties. They are, indeed, an acquisition. Except the last two these are the earliest sorts in cultivation.

Lilac Queen—Light lilac, very large, double and full. Quite a new color and a truly glorious flower. Very early.

Giant Pink—Enormous size, very double, finely incurved and of the loveliest pink color; greatest and best early pink.

Colden Harvest—Large Japanese, richest golden yellow and very early.

Blanche—Largest and finest pure white. Massive incurved flowers with very broad petals. Unlike any other, and by far the finest white yet seen. Very early.

Tinted Cold—Yellow, tinted red; very large, very early, very good.

Rose Perfection—Large, rosy pink, exquisite color; extra early.

Cov. Roosevelt—Finest incurved Japanese golden yellow; by far the earliest and best of all early yellow sorts.

Pink Globe—(MEDIUM EARLY)—Large incurved, solid globe-like flowers of the finest pink color; best late pink by all odds.

Bronze Beauty—(MEDIUM EARLY)—Large double incurved; finest bronzy yellow.

20c. each; 3 for 50c.; the 9 for \$1.50.

New Chrysanthemums.

From the large list of new 'Mums, we select the following recently introduced as being the most remarkable, distinct and beautiful. They are really marvels in their way.

Black Douglas—(POMPON)—Color so deep as to be almost black, while the tip of each petal shows a glint of gold, making the whole blossom appear as if sprinkled with gold dust.

Philadelphia—Flowers of enormous size, as round as a ball, pure white with a delicate shadowy tinge of lemon, giving the flower a peculiar translucent effect. One of the grandest varieties in cultivation.

Wm. Simpson—The best pink and largest flower of its color. Flowers have been grown that measure 11 inches across. Early and a fine robust grower. Color, a most exquisite shade of pink, of indescribable loveliness.

Norma Dee Childs—A beautiful Chinese; enormous flower, seven inches across, perfectly double to the center; petals wide, and color snow white. Best pure white.

P. Manda—A superb large flower opening flat and double to the very center. Petals beautifully curved. The center petals are fine canary yellow, while those outside are pure white, combining these two delicate and exquisite colors in one flower. A gem of the first water.

Uncle Sam—A fine large flower with long wavy petals of a rosy lilac color, striped and bordered with white. It is the finest and most distinctly striped variety in cultivation, and a decided acquisition.

Good Gracious—Probably the very largest flower of any Chrysanthemum. As large as a man's hat and double to the very center. Petals quilled and irregular. Three different colors, pink, white and yellow.

Maudie Klein, or White Maud Dean—Is pure white, large, beautifully shaped, double blossoms; truly exquisite. No white variety can surpass it.

Mayflower—Flowers six inches across, perfectly double to the center. Petals long and wavy, and beautifully and deeply lacinated; color, pale whitish lavender, slightly shaded with yellow toward the center. Unlike any other.

Cold Standard—With us it produces flowers 10 to 12 inches across on stems 6 feet long. The flowers are double to the very center, flat, with incurving petals, the outer petals being long, grading down shorter and shorter towards the center. Color, finest golden yellow.

Colden Shower—The most novel sort. Petals long, hair-like and wavy, hanging on a luxuriant truss which is of a reddish yellow color. Odd and beautiful.

C. B. Freeman—(OSTRICH PLUME)—Soft plummy flower of rich golden color. Best hairy yellow.

Mrs. Higginbotham—Elegant large ostrich plume of a soft downy pink. Petals broad and plush-like.

Mrs. W. J. Codfrey—(OSTRICH PLUME)—Pure snow white, large and double, and very hairy; best white sort.

Princess—A large-flowering Pompon, and, to our mind, one of the very finest sorts for amateurs. Flowers very double, beautiful round shape, and of the most delicate and exquisite tinted white and pink ever seen. Colors delicate as an orchid. Always does well in the window or garden, and is an early bloomer.

15c. each; 5 for 50c. or more at 10c. each.

New Everblooming Chrysanthemums.

Perfectly Double and Bloom Profusely from July to New Years.

A seedling raised some years ago by S. F. Duncan, Piqua, Ohio, who at once brought it to our attention, and in 1888 we purchased the entire stock, having been negotiating for it since 1886. Plants lifted from the open ground and sent to us in May began budding and blooming in our grounds in July and on Nov. 1st were still full of flowers and buds, while those in pots continued blooming far into the winter. It may be used either as a garden or pot plant, and is perfectly hardy in the open ground. The flowers are of the Chinese type, perfectly double and produced by the hundreds. No other sort can equal it in profusion. Plants of dwarf habit, 18 to 24 inches high with perfectly healthy foliage and enormous branches, all of which produce bloom. Mr. Duncan says that the plants in his garden have always begun blooming by July 4th, and are perfectly hardy any winter without protection. A new Chrysanthemum which may be grown either in the garden or in pots, and which will produce such a crop of fine double white flowers for so great a part of the year must certainly be regarded as the greatest modern novelty. With us plants bloom beautifully all the summer and fall in open ground, and at all times of the year in pots.

Everblooming, White—Pure white, full double.

Everblooming, Yellow—A sport from the above which originated with us. Bright golden-yellow, in all other respects just like the white variety.

1c. each; the 2 for 2c. or more at 10c. each.

CHOICE CHRYSANTHEMUM SEED.

Chrysanthemums are very easily grown from seed, and flower abundantly the first season. It is no trouble at all to grow them and they are sure to flower beautifully in October and November from spring sown seed. Every plant raised will produce a flower of a different color and character, no two will ever be alike, and among them there will be many exceptionally beautiful and valuable varieties.

Extra Hybrids, Mixed—Saved only from the finest named sorts, carefully hand fertilized. Pkt., 20c.

EARLY FLOWERING HARDY.

Early Flowering Hardy Chrysanthemums.

These are exceedingly fine, and are perfectly hardy planted in the open ground and flower magnificently in October and late into November. They should be planted on the south side of a building or wall, or in some spot where they will be sheltered as much as possible. In such a situation they are sure to bloom magnificently despite early fall frosts. They have attracted great attention here at Floral Park, making a border which was as brilliant and beautiful as the gayest flowers of summer. They are mostly of the Pompon type, very double and perfect and flowers in great clusters. All colors mixed, 5 plants for 50c.; 12 for \$1.00.

Childs' Grand Flowering Cannas.

These are now the most popular and most magnificent of all summer blooming plants for brilliant bedding and massing, and are among the very finest of all pot plants, either for summer or winter blooming. The following named sorts are the very best of the new and better known large flowering Dwarf varieties. We have selected these varieties after careful tests of hundreds of sorts, and our customers can rely upon them as being the most magnificent and desirable in every respect, combining large flowers of great brilliancy with beautiful foliage, free blooming and easy growing qualities.

Best Named Cannas.

- Ailsae**—A vigorous grower, 4 feet, with large panicles of bloom. Spikes full, dense, and produced early and continuously. Color, lovely creamy white, the nearest to a pure white yet seen among Cannas.
- Coronet**—Semi-dwarf; bright green foliage and large trusses of pure sulphur-yellow flowers. Absolutely a pure yellow. Exceedingly fine.
- Alphonse Bouvier**—Rich, luxuriant foliage and enormous panicles of great wide-petaled flowers, which are of the darkest and richest blood vermilion color.
- Paul Marquant**—3½ feet high, fine healthy growers, flowers very large and borne in long panicles. Color very peculiar, being sort of a salmon, shaded red.
- Madame Crozy**—Fine scarlet with gold band and markings. One of the very best. Height, 3 feet.
- Giant Crimson**—Extra fine green foliage; petals 1¼ to 2 inches across, dark orange-crimson spotted with deeper crimson or maroon. Very fine and showy variety. 2 feet.
- Flamingo**—Half dwarf; deep blood-crimson. Large fine flowers and truss; very showy.
- Golden Star**—Very dwarf, like Star of 1891, with large panicles of bright golden color. 2 feet.
- Florence Vaughan**—The queen of the fancy spotted varieties. Flowers of enormous size, petals exceedingly broad and of perfect shape. Color, bright canary yellow thickly spotted with vivid scarlet. 4 feet.
- Pink Ehemanni**—A fine soft pink color, in other respects like Ehemanni. 4 feet high.
- Primrose**—Fine clear primrose yellow. 3 feet.
- Burbank**—Magnificent yellow, spotted. Elegant foliage. Much the style of Austria. 4 feet.
- Pres. Carnot**—A magnificent Canna with dark maroon-black foliage. Equalled in darkness, richness and beauty only by Black Beauty. Added to the magnificence of its foliage are its immense trusses of rich, deep crimson-scarlet blossoms; a most superb sort. 4 feet.
- F. F. Hunt**—Fine large flower and beautiful compact truss. Color, pure canary-yellow freely striped with scarlet. A grand new variety. 3 to 4 feet.
- Little Duke**—A superb pink variety offered now for the first time. Large truss composed of beautiful large flowers, of an exquisite pink color, usually with a slight edging of gold which gives it a thoroughly distinct characteristic. One of the most beautiful varieties. 4 feet.
- Italia**—Flowers very large, each petal 4 to 5 inches, and most beautifully colored. Brightest scarlet, with a broad yellow border, irregularly blotched and spotted. 5 feet.
- Austria**—Enormous flowers, beautiful canary-yellow with a silvery hue, inside slightly dotted with red. Both in foliage and flower it is grand. 5 feet.
- Wm. McKinley**—Dwarf scarlet, extra large flower and cluster, with luxuriant dark foliage.
- Duke of Marlborough**—Dark velvety maroon. Perhaps the darkest and richest in color of all Cannas. Petals wide, truss compact, erect and very large. Elegant foliage of a metallic green color. Height, 3 to 4 feet.
- Maiden's Blush**—Very large, fine flower of a lovely blush white color. 3 to 4 feet.
- PRICE**, 15c. each; any 4 for 50c.; the 20 for \$2.00. Any sort at \$1.25 per dozen, postpaid.
- BY EXPRESS**,—Any of the above at \$1 per doz.; \$6 per 100.

Childs' New Cannas.

- Magnificent new sorts of our own production, offered last year for the first time.
- Flame**—A new dwarf sort with remarkably large flowers, which are borne in immense panicles. Color is flaming orange-scarlet, so intense as to be fairly dazzling. By all odds as fine a Canna as was ever seen. 3 to 4 feet.
- Perfection**—A grand yellow, freely spotted red, same style of coloring as Florence Vaughan, but a much better flower, and a better bloomer. Finest spotted sort yet introduced. Very dwarf, wide petals, immense panicles. 3 to 4 feet.
- Crozy Improved**—Tall, fine spikes, finest and freest bloomer. Scarlet, bordered yellow; like Mad. Crozy, but much better. 3 feet.
- Sunray**—Dwarf, yellow spotted. Best of its type, and the only first-class very dwarf spotted variety. Seldom grows over two feet in height and requires but little room. 2 feet.
- John B. Dutcher**—Immense truss of gigantic blossoms. Color, dark crimson-maroon, rich and velvety. Probably the finest and richest dark color. 4 feet.

25c. each. The 5 for \$1.00.

Improved Rainbow Canna.

This is the most magnificent novelty among foliage plants. Each leaf is beautifully variegated with pink, scarlet, orange, gray, green, etc. The foliage keeps its color all through the season; either for open ground or pots. In habit of growth it is superb. It hardly reaches the height of 3 feet, and is compact, with numerous leaves, which are wide wavy and graceful. In this respect more charming than any other Canna. Aside from its beauty and usefulness as a garden ornament, it is still grander in pots for the window or porch, and makes a specimen plant which nothing, not even Fancy Caladiums, can surpass. Fine roots, 25c. each; 5 for \$1.00.

Black Beauty Canna.

A tall grower with luxuriant leaves which are of a rich maroon-black color. Very effective as a foliage plant. Very scarce, there being but little of the true variety in cultivation, most of which we possess. The most magnificent dark foliage Canna and a grand bedder. 25c. each; \$2.00 per doz.

Mixed Cannas.

For large Show Beds.

A mixture of the finest dwarf large flowering kinds, which will go well together, and make a most magnificent bed or border of bright colors. We can thoroughly recommend this mixture, for we know that it will give the greatest results. Price, by express, strong roots, 60c. per dozen; \$4.00 per 100.

Hybrid Canna Seed.

Cannas grow readily from seed and bloom in a few months. The seed here offered is hybrids saved from the above grand new sorts, and will give magnificent results. Per pkt., 20c.

For other Canna Seed, see page 47.

GUAVA.

OTAHEITE
ORANGE.

KUMQUAT ORANGE.

MELON PEAR.

Rare Tropical Fruits for Pot Culture.

These make the most novel and interesting pot or tub plants, and are the easiest of all pot plants to grow. Many are handsome in foliage, in blossoms, and all showy, interesting and luscious in fruit. The most of them fruit the greater part of the year. Growing the beautiful and rare fruits in pots opens up a new field in plant culture which is rich in interest and pleasure. Our friends will be delighted with them.

Figs.

A most popular and easily kept tub plant that will beautify the lawn or veranda all summer and winter safely in the cellar. Good growers, with a luxuriant growth of large, wide leaves, and bearing at a year old an abundance of sweet, pulpy fruit, unsurpassed for eating fresh. They are also very fine for preserving or pickling, or to dry. South of the Middle States can be grown in the open ground. Here on Long Island they are hardly outdoors if protected during winter. Nothing is more luscious than Figs fresh from the tree, especially when eaten with cream like Strawberries. We have several fine sorts well adapted for pots, often bearing three crops in a season. A two-year-old tree bore over two hundred fine figs this season. 30c. each.

Otobeite Orange.

An extra fine pot plant, with glossy green leaves, the true fragrant orange blooms and abundant little bright oranges that will hang on the little bush like balls of gold for six months after they are ripe. They will bloom and fruit in a two-inch pot; and we have seen a plant in a common window, that was but 15 inches high, and had 23 oranges on it. With good sunlight they are never out of fruit from one year's end to another, and at least two-thirds of the time are in flower also. The fruit is very sweet and handsome. Could we have but one plant in our window it would be an Otobeite Orange. In beauty, grace and fragrance there is nothing like its delicate, leafy sprays of bloom, so indescribable, exquisite, dainty, lovely and adorable. Fine plants for blooming and fruiting at once.

20c. each; 3 for 50c.; extra large, by express, 10c.

The Kumquat Orange.

Another dwarf Orange for pots, or for the open ground South, and even finer than the Otobeite. It bears in marvelous profusion little miniature oranges, no larger than a damson plum, of a rich golden color and glittering amid the dark foliage like burnished gold. The whole fruit, rind and all, is eaten, and people become extremely fond of them. The rind is sweet and the pulp agreeably acid, making a piquant combination which is most delicious and refreshing. They are also delicious preserved and crystallized. In both flower and fruit this is a most beautiful pot plant, and is bound to become as popular as the Otobeite though entirely different. 50c. each.

The Strawberry Guava.

A beautiful pot plant, with shining evergreen foliage that resembles Camellia leaves, and handsome fruit nearly the size of a walnut, and a fine strawberry-like flavor. The fruit makes the finest and most nutritious jelly that there is and blooms and fruits continuously the year round. It must be considered as useful as ornamental. A very heavy bearer, and the fruit is very handsome. 20c. each; 3 for 50c.

Banana Orinoco.

This is a superb plant both in foliage and fruit. One of the finest Bananas for pot culture, and fruits splendidly. The leaves are borne in a palm-like crown or cluster, each leaf three to five feet long, and two feet broad; of a clear, shining green, curved and crinkled in the most pleasing manner. This is even finer than *Musa Ensette* as a decorative plant. The most beautiful foliage plant that can be grown outside of a hothouse. Grand for bedding out in summer, or for conservatory or warm window decoration. Can be kept unwatered in a warm cellar over winter, if there is no room for it in the window. 30c. each; 3 for 75c.

Pine Apple.

A picturesque plant. Always a centre of attraction in conservatory or window. Fruits when but a year old, and the handsome conical fruit is very delicate, and finely flavored and highly fragrant. Not at all hard to grow, if kept in a warm place. It will be a success if grown in a window where ordinary plants do well. Really one of the most desirable plants; 30c. each.

COPYRIGHTED 1885 BY J.L. CHILDS.

Melon Pear, or Pepino.

A rapid-growing, dark-leaved plant, blooming when quite small. The fruit is the size and shape of a goose egg, and is very handsome; in color a pale lemon mottled with waves of bright violet. Inside the fruit resembles a pear, and tastes somewhat like a banana, but is much sweeter and juicier. Very ornamental when in flower and fruit. An elegant pot plant; also fine for the garden. 20c. each; 3 for 50c.; 7 for \$1.00.

SPECIAL OFFER.

For only \$1.50 we will send you each of the 7 fine Tropical Fruits offered on this plate.

Hardy Ornamental Flowering Shrubs.

Nothing can take the place of Shrubbery for the lawn, for hedges and specimen clumps. Shrubs thrive in any situation, are beautiful all summer, producing some of the choicest of out-door blossoms. The list here offered is a select one, including only the very finest and most desirable sorts, mostly new and very rare and choice.

Althea—A fine tall-growing shrub, that once planted is good for a lifetime. Blooms when but a slip of a plant, but eventually reaches the size of a small tree. Always a symmetrical, upright grower, well clothed with a dark green foliage, and bears every year, without fail, a profusion of large, showy double flowers that closely resemble Hollyhocks in shape and colors, but often larger in size. They bloom from midsummer until frost, at a time when few other shrubs are in bloom. Fine for cemetery planting or for grouping upon the lawn. In Europe this is the most popular of all flowering shrubs.

Calycanthus Florida—The "Sweet Shrub" so long a favorite in gardens. The purplish flowers have an exquisite pineapple fragrance of which one never tires, and a spray of them will perfume a whole room. Cannot be omitted from any lawn or garden.

Fern Leaf Tree—A beautiful tree of a low, shrubby growth, making a superb large foliage shrub. Its leaves are like beautiful fern fronds, so finely lacinated and graceful, often two feet in length by ten inches in width. Color very dark green, while the stems are dark ebony-red. It also bears large bunches of red berries, and in autumn the leaves color very brightly at the touch of frost. It is one of the very finest shrubs in cultivation. As a specimen shrub or small tree for the lawn it is grand.

Spirea, Anthony Waterer—A perpetual bloomer, and suitable either for garden or pots. It is of a dwarf habit, flowering profusely when only a few inches in height, and at all times and seasons. The flowers are of a lovely pink color, borne in dense clusters, and have a peculiar feathery appearance which is extremely beautiful.

Spirea, Bumalda—This new Spirea blooms from early summer until frost, and is not only very handsome in the flower garden, but is quite indispensable for cutting, furnishing the fine, feathery fluffy spikes so necessary to bring out the full beauty of a bouquet. Very easy to grow and entirely hardy, and so dwarf and compact it can be grown where larger shrubs would be out of place. A cloud of lovely rose-pink flowers for months.

Deutzia Gracilis—Grows only two feet high, but is weighted to the ground with its load of white Lily-of-the-Valley-like blossoms. Fine for forcing in winter.

Daphne Cneorum—A hardy shrub which trails over the ground in a most beautiful manner. Extra fine for any position, and being evergreen it is the most desirable plant we know for cemeteries. The plant is composed of spiral branches of dense evergreen leaves. The flowers are a lovely pink color, in clusters, and are borne profusely in early spring, and more or less during the entire summer and fall. The delicate beauty of the blossoms is great, but their fragrance is marvelous. Hardly a flower known possesses such a powerful fragrance.

Hardy Azaleas, Mollis—Among the rarest and choicest of all garden flowers. Great flaming masses of bloom are produced by these new Hardy Azaleas, making a show the glory of which one cannot describe. Suffice it to say that the blossoms are often larger than the hot-house Azaleas, and more brilliant and fiery in colors, scarlet, red, orange, yellow, pink, etc., often flamed and variegated in a lovely manner. Perfectly hardy anywhere in the U. S. and the most brilliant flowering shrub known.

Azalea Amoena—A lovely hardy evergreen Azalea with beautiful foliage, and fine compact bushy growth. In May or June the plants are densely covered with rich violet-red blossoms, which are exceedingly showy. Every leaf and every twig is hidden by the enormous quantity of flowers produced.

Weigelia, Eva Rathke—A grand New Everblooming Weigelia. Producing great quantities of bloom all the season, in magnificent clusters on the terminal branches. Color, deep, rich blood red, the finest color yet seen among Weigelias. A really valuable novelty.

Hydrangea Paniculata—Generally considered the most valuable and ornamental shrub in existence. Bushy and robust, every branch tipped in midsummer with an immense close panicle of flat, snow-white flowers of gigantic size. The trusses of bloom are ten to twelve inches long and nearly as thick through, and last for two or three months, turning pinkish toward the last. No other shrub makes such a show on the lawn or is so universally admired. Grand for cemetery use, and always blooms finely the first summer.

Jasmine Officinalis—A low trailing or weeping shrub, which produces all summer long large quantities of star-like, waxy white blossoms, of the most powerful and delicious Jasmine fragrance. Unsurpassed for cutting, button-hole bouquets, etc.

Sweet Pea Shrub—The shrub of shrubs for bouquet makers. When it is in bloom it is really but a big bouquet itself, so full is it of dainty sprays of large, lovely rose-pink blooms, to which the graceful pinnate foliage is an admirable background. Very hardy and robust, and commences to bloom when but a foot high. Its glorious flowers are borne in clusters and are the size and shape of the most lovely Sweet Peas, but their color is more beautiful. The amount of bloom which one of these little shrubs will carry is astonishing, and the sight presented is one of remarkable beauty.

Syringa, Double—A double flowered form of the lovely old fragrant Syringa. Blossoms snow-white, double like roses, very fragrant and borne in profusion.

Clematis Davidiana—(BUSH CLEMATIS)—This is a lovely species of Clematis, growing in bush form three or four feet high, and yielding through the summer great panicles of lovely blue flowers, which are exceedingly handsome and very fragrant. The foliage is large and luxuriant and the plant is, all in all, one of exceptional beauty. It is perfectly hardy in any locality, and blooms profusely when only a foot high. This lovely Bush Clematis will be a rare attraction in any garden or border.

Syringa Japonica—This is the great Japanese Tree Lilac, which begins blooming when but 4 or 5 feet high, but grows eventually to 30 feet in height. The flowers are borne late in June, pure white in color and in mammoth panicles two feet or more in height. A very fine and rare thing.

PRICE :—Any of the above Shrubs, 20c. each; 3 for 50c.; 7 for \$1.00; the 16 for \$2.00; or \$1.50 per dozen.

Extra large specimens by express (too large to mail), 30c. each; \$2.50 per dozen; the 16 for \$3.00.

FINE CALLAS.

Among the very best things offered in this Catalogue are our new Sweet Scented, Everblooming and Yellow Callas. The rare yellow variety we now offer at a very low price. See pages 28 and 29.

100 FINEST GLADIOLUS FOR \$1.60.

A Special Collection Offer.

50 GANDAVENSIS HYBRIDS, First Quality, All Colors Mixed
25 CHILDSI " " " " "
25 LEMOINEI " " " " "

Making 100 Bulbs of our Grandest Mixtures of three classes, Gandavensis Hybrids, Childsi and Lemoinei for only \$1.60, by mail, postpaid. All fine flowering Bulbs but not the largest sizes—they will make a grand show bed.

OUR NEW CENTURY Surprise Collection.

It Will Be Unusually Fine This Year, and Our Customers Will Find It a Great Bargain.

MANY DOLLARS' WORTH OF FINE PLANTS, BULBS AND SEEDS FOR \$1.00.

It is our custom each year, after the heavy spring business is about over, in May, to take the surplus stock of various good things, make it into "Surprise" Collections, and offer them to our customers, giving four or five times the value of their money. In fact, the "Surprise" is in the great amount of fine things one gets for the money paid. These collections cannot be sent until about the middle of May, and will be entirely of our own selection, from kinds of which we have a surplus. No collection will be made up for less than ONE DOLLAR, and from that up to any amount the purchaser may desire. They will be sent free, by mail, unless desired by express, and in that case we can send very much more for the money than by mail. All "Surprise" Collections ordered previous to May 15th will be packed and shipped then, but we can continue sending them up to the first of July. We advise our friends to invest a dollar or more in this collection particularly this year, for we are going to see how good it can be made.

Asparagus.

Sprengeri—A new variety of the finest ornamental qualities. For hanging pots, or bracket pots where the mass of rich foliage can droop in its natural grace, it is one of the loveliest objects it is possible to find for window decoration. For cutting it lasts weeks in water. Plants also blossom freely and bear large red berries which add greatly to the beauty of the wavy foliage. Nothing finer for decorating, or for bouquet making. Fine plants 20c. each; 3 for 50c. Seed 10c. pkt.

Plumosus Nanus—A grand plant with wide spreading foliage which is very fine, soft and feathery. Nothing else so good as this to make up with cut flowers. Grows rapidly and foliage may be freely cut. Plants 20c. each; 3 for 50c.

New Abutilons.

These are of the beautiful Infanta Eulalia type introduced by us a few years ago. Unlike the ordinary Abutilons of scraggy growth, they are very compact and short jointed, making a neat pot plant. The flowers are the most beautiful we have seen among Abutilons, being very large, yet short and beautifully cupped and of the most lovely colors. They produce flowers by the score both summer and winter. It is safe to say that these varieties will produce five times as many flowers as any other Abutilon under the same conditions.

Infanta Eulalia—This is perfection itself. Plants dwarf and short jointed, producing exquisite large cupped blossoms by the score from the time the plant is four inches high. Blooms all the time summer and winter. Color, a most beautiful soft satin-pink. No finer pot plant for windows than this.

Wm. McKinley—Exactly like the above, except in color, which is a beautiful clear lemon yellow; exquisite.

African—A perfectly grand sort with magnificent large blossoms, of a dark crimson-black color.

Snowstorm—Large, pure white; finest of its color.

Grandiflora—Rich golden yellow. An extra fine grower.

Savitzi—The most beautiful in foliage of all Abutilons. Each leaf has a broad, distinct margin of pure white, making a most conspicuous plant. The long stemmed flowers are golden yellow color, veined with scarlet. It is a remarkably free bloomer, either in pots or bedded out during the summer, and is always a most attractive specimen plant, especially for exhibiting. The leaves are so very large, and so distinctly marked with white, and the flowers so showy, that all admire it. An improved Souv. de Bonne.

Leopard Eclipse—Trailing or weeping habit. With fine green leaves beautifully spotted with yellow. Blooms profusely all the year, and one of the most highly ornamental plants in cultivation.

20c. each; 3 for 50c.; 7 for \$1.00.

Abutilon Seed.

Choice hybrid seed of the grand large flowering Infanta Eulalia type. Will give a grand variety of colors, and blooms in about three months from time of sowing. Pkt. 20c.

Azalea Indica.

Elegant pot plants, much used for Easter decorations. Though attaining a good size, commence to bloom when very small. The flowers are large and very beautiful, always much admired, and range from white to deep crimson in color, with all intermediate shades and markings. Easily grown in a window. Our plants are first new varieties, introduced last year, and are greatly superior to the older well-known sorts. Many of them are very double, and the colors of all are greatly improved, as well as the flowering qualities. We have such a large and fine stock of Azaleas that we can offer them at unprecedented low prices. All the plants we send out are of blooming size.

Mixed Azaleas.

A very fine collection of more than 25 of the finest sorts mixed, double and single. These will give great satisfaction, 20c. each; 3 for 50c.; 7 for \$1.00.

Fine Named Azaleas.

- Niobe**—Fine double white, flower large, bush compact.
- Bernard Andres**—A good double flower of a rich rosy purplish color.
- Emperor of Brazil**—Deep rose with white. A most lovely shade, and a large double flower. A splendid variety in every respect.
- Simon Marduer**—Large double rose or deep pink.
- Dr. D. Moore**—Large rose, with white and violet reflex. Perfectly exquisite.
- Mad. Paul de Schreyver**—Elegant, large, double red.
- Mad. Vandercruyssen**—Large, lovely rose, with large blotch.
- Raphael**—Immense double white.
- Deutsche Perle**—Large double white. Very early.
- Ceres**—Fine double white, striped crimson. Great bloomer.
- Apollo**—Deep brick red, semi-double and fine.
- G. de W. Anne**—Double, rosy pink, flaked white.

20c. each; 3 for \$1.00; the 12 for \$2.00.

New Carnations.

During the past few years great strides have been made toward improving the Carnation, the florist's skill in this direction being well shown in the following varieties of recent introduction. Their superiority appears in many points, but more especially in large size of flowers, vigor of growth, freedom of bloom, exquisite color and fragrance. For pot culture none are so good as the following: In Blue Bedder and Lawson we have two very distinct new sorts of great value.

Big Pink—Enormous size and the finest shade of pink yet produced. Superb large petals and a large, round bloom of the most perfect points and greatest beauty. Long stems, solid calyx, bright, lively pink color.

White Cloud—Fine, pure snow-white, on long stems. Flowers of gigantic size, very double and beautifully formed. Its fragrance is rich and it is a persistent bloomer. All in all probably the best pure white variety.

Eldorado—Finest canary-yellow, slightly tipped rose. Best yellow variety.

Gen'l Maceo—Very full, deeply fringed flower, 2½ in. to 2¾ in. in diameter, on stiff, wiry stems, 12 in. to 18 in. long under ordinary culture. Under extra culture blooms 3 in. in diameter, on 18-in. stems, may be grown. Ground color deep, brilliant scarlet, heavily overlaid with maroon-black, making one of the darkest and richest shades yet seen in Carnations, fully as rich and striking as the Meteor Rose. Habit erect, stiff, wiry. Foliage covered with rich, glaucous bloom. The most profuse and abundant bloomer we have ever grown, outbloomed every other variety. Flower an excellent keeper, and can remain on the plant six or eight days, and we have kept it three and a-half weeks in a cool room. The best dark Carnation grown.

Price 15c. each; the 4 for 50c.; \$1.00. per doz.

Carnation, Mrs. Lawson.

This is one of the sensational novelties of the times, and it is said that thirty thousand dollars was paid for the original stock plants by the introducer. It is probably the largest Carnation grown, its flowers borne on magnificent long stems, and are of a most lovely pink shade, quite unlike any other. As a cut flower it is by far the best Carnation known. Strong plants, 25c. each; 5 for \$1.00.

4 Carnation Novelties.

The following 4 superb sorts are of our own production and are offered now for the first time.

Pure Gold—Beautiful large flower borne on long stiff stems. Exquisite fragrant petals deeply serrated, and color dark yellow with a few faint marks of pink.

Fred Douglas—A grand flower, almost black in color being such a deep dark crimson, large size, rich fragrance, and beautiful round petals, in this respect quite distinct.

Torch—Extra large flower, brilliant scarlet in color, and borne on stems 3 feet long. Petals beautifully fringed. Best scarlet variety.

Goliath—Probably the largest flower except Lawson. Color orange-scarlet, quite a new and distinct shade. Its monstrous flowers are borne on stems 3 feet long.

Price 25c. each; the 4 for 80c.

Superb New Carnation, Blue Bedder.

This new Carnation is as important and valuable as a bedder as Lawson is for cut flower purposes. While the flowers are not actually blue, they are of a bluish-violet color the blue shade being at times very pronounced. The plant is of a stout, compact habit and will bloom in the garden profusely all summer long. A great many flower stems are sent up, each bearing an average of 12 flowers, and on the original plants we have seen as many as 50 to 60 flowers on each plant at one time. It is good as a winter bloomer but is particularly fine for summer bedding, owing to the fact that it at all times shows a great many flowers which are very double and perfect in form, odd and unique in color. There is not another color among Carnations like it, or, to our mind, one so exquisitely beautiful. Added to this it has the strongest and finest clove fragrance of any Carnation we have ever grown, surpassing by a long way the choicest hot-house varieties. We claim for it superiority to any other Carnation in three particulars, namely: color, fragrance and profusion of bloom. From a few plants one may cut flowers every day during the summer and fall, and when brought inside it still continues blooming during the winter. It is certainly one of our greatest and most important novelties for this year. Fine plants 30c. each; 4 for \$1.00.

For \$1.50 we will send the 10 sorts here offered

LAWSON CARNATION

BLUE BEDDER

New Double Begonia Vernon

The well-known single form of *B. Vernon* has established itself in the affections of all plants lovers. Its cheerful aspect and perpetual-blooming qualities, through thick and thin make it a most charming plant. These new Double Vernons from France are in no respect different from the single, except the flowers are larger and double. Truly they are attractive flowers, borne in large clusters, and with a freedom that is surprising. Every day the year round shows them in their radiant beauty. There is certainly no other plant producing fine double flowers in such quantity the year round as does this. It is adapted to any window or porch, or it may be bedded out in summer. In any position it is always a prize bloomer, and beautiful in foliage.

Vernon Double Pink—Fine shade.

Vernon Double White—Pure.

Vernon Double Crimson—Deep and rich. Foliage rich bronze in open air, and very handsome.

Fine plants, 50c. each; the 3 for 1.00. Seed, mixed, 50c. per pkt.

New Begonias.

Luxuriant—A great profusion of luxuriant foliage and magnificent flowers, and strong tuberous roots. Leaves the size of *B. Rex*, dark velvety green, tinged with black; underneath, brilliant cherry-red. Flowers are borne in magnificent, large, drooping clusters. White, slightly tinged pink. Perfectly magnificent.

Bismarck—Same style, habit and foliage as *B. Rubra*, but a more magnificent plant, growing often three to four feet high. Its flowers are large and borne in enormous pendulous panicles; deep coral red. One of the most magnificent flowering plants it is possible to have.

Mastodon—Luxuriant-growing plant with large, handsome leaves and clusters of pink blossoms, the size and shape of good Tuberous-rooted varieties. By far the largest and most magnificent flowers of the fibrous-rooted or pot class. The shape of the blossoms is perfect, and the color soft and delicate.

Credneri—A strong grower with immense leaves which are very handsome. Flowers, bluish rose, covered with silky hairs, and borne in clusters often as large as a bunch of *Hydrangea* blossoms. No description can do it justice.

50c. each; the 3 for \$1.00.

Begonia, Tuberous-Rooted Rex.

A decided Novelty, which originated on our place. In foliage and growth it in no respect differs materially from the common *B. Rex*, but the crown or base forms a tuber after the style of *B. West-indensis*, which may be dried off and kept in that state like common Tuberous-Rooted Begonias, and when re-planted will start at once a strong growth of beautiful foliage. It is a Novelty which will be admired, and has already created a great amount of comment. Plants 50c. each; 3 for \$1.00. Seed, 50c. per pkt.

NEW
SWEET-SCENTED
BEGONIA.

Begonia.

NEW SWEET-SCENTED.

These are brand new, and were shown on the Colored Covers of THE MAY-FLOWER, June issue, 1899, and created a great sensation. Hundreds of people wrote asking where the plants might be purchased, so great was the interest aroused. Not only are the flowers deliciously scented, but they are borne in the most fascinatingly beautiful sprays, clusters a foot to eighteen inches wide, loose, graceful and charming. Plants fine, vigorous growers, with luxuriant and beautiful leaves, and the flowers are borne at all times of year, particularly in fall and winter. Extra fine for the holidays. The two colors harmonize, and produce a most lovely effect. These are Novelties of the highest order.

Sweet-Scented White—Pure white.

Sweet-Scented Pink—Charming sea-shell pink.

Fine Plants, 40c. each; one of each for 60c.

Begonia.

Double Dwarf Vernon

A new dwarf form of the fine Double Vernon Begonias offered on foregoing page. Plant dwarf and compact, loaded at all times with fine double crimson blossoms; a perfect little gem. New this year. 25c. each; 3 for 60c.

Hybrid Begonia Seed.

We offer a grand mixture of fine large flowering Begonias, Choice Hybridized Seed of all kinds, including Sweet-Scented, Double Vernon, Bismarck, Mastodon, Luxuriant, etc., etc. This is the finest Mixed Begonia Seed ever offered and will produce an endless variety of fine sorts. Pkt., 15c.

Cyclamen Persicum Giganteum Grandiflorum.

IMPROVED LARGE-FLOWERING, FINEST CYCLAMEN GROWN.

For pot plants none so desirable as the foregoing, and for winter blooming. Though they are universal favorites, they are not seen in general cultivation, and the few that do flourish are in the hands of those who, considering their ease of culture, great beauty, and long and profuse flowering, are desirous of the best and finest, and the greatest profusion of flowers, and the longest and most perfect flowering season. These plants are the most perfect and most beautiful of the kind, and are the most valuable and most desirable of all the flowers. They are the most perfect and most beautiful of the kind, and are the most valuable and most desirable of all the flowers. When the flowers will be spotted with the most beautiful and most desirable colors, and the most beautiful and most desirable of all the flowers.

The foliage is very beautiful, and is a variety of green, and helps to show off the flowers, which are above all things remarkable in beauty. To have the best and most perfect specimens, use a very large and deep vase of flowers at all times. After blooming a winter foliage should be cut off, and the plants should be kept in a dry state like Calceolarias.

We have only this strain of Cyclamen, it being superior to all others of the kind.

PLANTS—Fine healthy vigorous plants, 25 cts. each pot.

SEED—Best quality, many colors MIXED, 100 per pkt. Separate colors, WHITE, CRIMSON, PINK, WHITE BED-EYE, 25 per pkt.; the 5 pkts., for 75c.

**MAYFLOWER
VERBENA.**

The Mayflower Verbena.

First offered by us two years ago and is acknowledged to be one of the great good things of the century, which will eventually be seen in every home where flowers are grown. With the habit, beauty and fragrance of the Trailing Arbutus, a plant equally valuable for the garden or for pots and a perpetual bloomer,—what more can be desired. This great novelty was raised and named by Luther Burbank, of California, the noted horticulturist. It is named Mayflower because the shape of its blossoms, its color, and fragrance, are almost identical with the wide-famed and cherished Trailing Arbutus, or as it is called in New England, Mayflower. The flowers are as rich and powerful in fragrance as the Arbutus. The Verbena, being of a creeping or trailing habit, like the Arbutus, with clusters and individual flowers much the same, one can easily imagine how the addition of the same fragrance may make a close imitation of that most beautiful of all wild flowers.

Mayflower Pink—Varies from light to deep pink, like the Arbutus, with the same unexcelled fragrance. Perfect form and great beauty. A lovely pot as well as garden flower. Seed, 20c. per pkt.; 3 pkts. for 50c. Plants, 15c. each; 4 for 50c.

Mayflower White—Pure snow white, with same delicious Arbutus fragrance. Comes absolutely true from seed. Seed, 20c. per pkt.; 3 pkts. for 50c. Plants, 15c. each; 4 for 50c.

One pkt. each for 30c.—One plant each for 25c.

Mayflower Verbena Sports.

We have many "Sports" from the Mayflower Verbena which show flowers of various colors (all fragrant) such as scarlet, lilac, crimson, blue, lavender, striped, tinted etc. These do not come true from seed but we can supply plants of all colors mixed at \$1.00 per dozen; 6 for 60c.

**GIANT
RAINBOW-
LEAVED
COLEUS.**

COPYRIGHT,
1900 BY
J.L. CHILDS.

Childs' New Giant Rainbow-Leaved Coleus.

This is one of the most magnificent Novelties we ever introduced. They grow easily and rapidly from seed, and make fine specimen plants in two or three months, and if you raise a thousand of them no two will be alike. The leaves are large (often a foot long) and wavy, spotted, mottled, striped, splashed, marbled etc., with the most rich and charming colors—white, purple, pink, crimson, green, yellow, velvety red and black—in endless variety. Such colors; such combinations and contrasts! They excel Fancy-Leaved Caladiums and all other foliage plants. We never put out a finer novelty than this, or one the magnificence of which will prove such a surprise and delight to those who grow it. Our cut represents a plant only two or three months from the seed. The seed we offer is saved from the magnificent specimens which have been so greatly admired at our conservatories.

Seed—Choice hybridized and hand-saved. 20c. per pkt.; 3 pkts. for 50c.

Plants—Choice cutting plants from the grandest specimens, 3 for 40c.; 6 for 75c.; 12 for \$1.30.

Three Grand New Coleus.

Velvet-like leaves of wonderful richness and beauty.

Dr. Ross—Enormous leaves like a Rex Begonia, but more exquisitely colored, being a blending of yellow, crimson, pink, green, chocolate, etc. A grand specimen plant. 15c. each; 3 for 35c.

Mrs. Saunders—A wedge of creamy white in the center of the leaf, with a clearly defined margin of oxide green, bronze, crimson and purple. Perfectly fascinating. 15c. each; 3 for 35c.

Admiral Dewey—One of our new Giant-Leaved, and the finest Coleus yet known for bedding or for a fine specimen pot plant. Leaves large, finely toothed, dark maroon, flamed and variegated crimson-pink, blotched yellow and bordered green. Underside, green and yellow, finely variegated. 25c. each; 3 for 60c.; 12 for \$2.00.

One each of the three for only 40c.; three each for \$1.00.

Everblooming Cape Jessamine.

This grand novelty does not differ from the common Cape Jessamine or Gardenia except it blooms all the year round, while the old sort blooms only for a short time in the spring. The flowers of this are very large and perfect with pure white wax-like petals and glorious fragrance. Large, double and surpassingly lovely. A good plant will show flowers every day in the year, and it is an easy thing to manage, growing well as a window plant. A grand Novelty. 50c. each.

Acalypha Sanderi.

(Chenille Plant)

This is one of the most gorgeous and peculiar flowering plants thus far discovered. It grows up a straight, stout branching plant, clothed with large green leaves of good substance, and out of the axil of every leaf grows a spike of blossom, glowing crimson-scarlet in color, 24 to 30 inches long, as large around as one's finger and looks like a long piece of crimson-scarlet chenille cord. They grow on the plant exactly as our cut-haws, and on plants a foot high the lower flower spikes will hang below the bottom of the pot, and they continue to lengthen as the plant grows larger. They last for months before fading and before they fall off several other spikes have started out in the same leaf axil, and it is thus always in bloom—January to December. Even tiny plants in thumb-pots bloom, though of course the spikes are proportionately smaller. This plant was discovered in New Guinea and it did not come from the Philippines as Dewey's favorite flower, as has been sensationally advertised. A magnificent novelty. Strong, healthy plants, 30c. each; 4 for \$1.00.

**Childsia
Wercklei,
or
Treasure
Vine.**

A new plant, entirely unknown to science until discovered by Mr. Carlo Werckle in 1898 in the mountain regions of Costa Rica,

Central America. It is a beautiful climbing composite, suitable for cool, shady windows or verandas. While it will grow to the height of 10 feet, it blooms profusely when very small, its flowers being like a Clematis in shape, but intense scarlet in color, which, added to the beauty of its foliage and natural grace of growth, makes one of the most elegant flowering plants ever seen. It is a quick, robust grower, and so hardy and vigorous that it will stand any amount of abuse. Specimens which we sent to the Royal Botanic Gardens at Kew attracted great attention and it has been decided to call it Treasure Vine on account of its great value, scientifically Childsia Wercklei. Good for pots, and flowers most profusely during winter and early spring. Planted out, it blooms well on trellises late in summer. Should have periods of complete rest. 25c. each; 3 for 60c.

25c. each; 3 for 60c.

Cypripedium Insigne.

A lovely window Orchid which blooms freely during winter. As easily grown as a Geranium in any window. Blossoms perfectly exquisite. Fine plants, 40c. each.

Commelina Sellowiana.

A lovely perpetual flowering "Wandering Jew," suitable for the garden in summer or for pots all the year. Like the common "Wandering Jew" it is of trailing habit, producing each day large numbers of beautiful blossoms, two inches across, of the most exquisite blue color. The flowers really look like blue butterflies. It is one of the finest of all blue flowering plants. Blooms in a very short time from seed, and for either garden or pots it is a perfect gem, flowering freely every day all winter and summer. Besides it is a superb trailing vine for hanging pots. One of the very best new flowering plants. Fine plants, 20c. each; 3 for 50c. Seed, 10c. per packet. Seedlings bloom in two months.

Trailing Crassula.

No trailing plant can be more lovely than this beautiful succulent. Leaves thick and heavy, closely placed about the stems, which are long and droop and curve beautifully. It is not only beautiful, but exceedingly odd; quite impossible to properly describe it. We have been years working up a stock of this plant that we might offer it. 20c. each; 3 for 50c.

COPYRIGHT
1900
J. L. CHILDS.

Jennings' Pansies.

A wonderful new strain of Pansy which has been developed in Conn. The flowers are truly the **LARGEST**, and **FINEST** colored we have ever seen. Among a lot we had last spring some of the blossoms measured $4\frac{1}{2}$ inches across, and there were new and fantastic colors that we had never before seen among Pansies. All colors and shades were represented. No amount of praise can do full justice to them. Seed, 20c. per pkt.; 3 pkts. for 50c. Fine strong plants, 90c. per dozen.

Sylphium, or Compass Flower.

A splendid hardy Perennial Plant which stands any climate, no matter how cold, and each spring throws out from the crown root a mass of large handsome leaves, which make a highly ornamental tuft of foliage. From the center of them the flower stalks rise to the height of 6 to 7 feet, branching freely and symmetrically, producing flowers by the hundred. These are 3 inches across of rich deep yellow color and composed of three rows of broad petals. It is very effective and is in flower for fully two months. A grand ornament to any garden or lawn. Now this year. Strong flowering plants, 25c. each; 6 for \$1.50.

Not only in flower, but in foliage as well, the Compass Flower is a grand ornamental plant and one that is sure to become very popular. For clumps of color among shrubbery it is particularly fine, and as single specimen plants or groups it is a splendid thing. We can strongly recommend it.

SYLPHIUM.

Moonflower.

The most popular quick growing vine in cultivation. Its rapid, luxuriant growth, its thick, overlapping glossy foliage, and its nightly scores of immense silky blooms of rare fragrance, are merits that cannot be over estimated. By actual count a strong vine will bear one to three thousand of its superb blooms in a season. Very fine for piazzas, arbors, etc.

Ipomœa Noctiphiton—Grand foliage and magnificent snow-white blooms, four or five inches across. Stands drouth like a Salamander. Give it rich soil if possible. Fine plants, 15c. each; 4 for 50c. Seed, 10c. per packet.

Ipomœa Learei—A large vine, but not quite so rank growing. Flowers of a lovely azure blue, with faint crimson bars. Texture almost as delicate as the spider's web. Lovely beyond description, 20c. each; 3 for 50c. Seed, 10c. per packet.

Pandurata, or Hardy Tuberous-Rooted Moonflower—This will stand a year's drouth without a murmur. An immense subterranean root weighing sometimes a hundred pounds, sustains the vine through any vicissitude of weather, until frost kills the vine to the ground. Each year it springs up stronger than before, until it becomes a large, luxuriant vine, clothed with a luxuriant growth of pretty cordate leaves, and bearing great quantities, y'es, thousands of large, thick-textured waxy flowers of a rich creamy-white, with a throat of violet-purple. It will grow in any soil, no matter how poor, and its blossoms remain open all day, unlike other Ipomœas. It is perfectly hardy in any climate, and a vine which will cover an enormous amount of space. 25c. each; 3 for \$1.00.

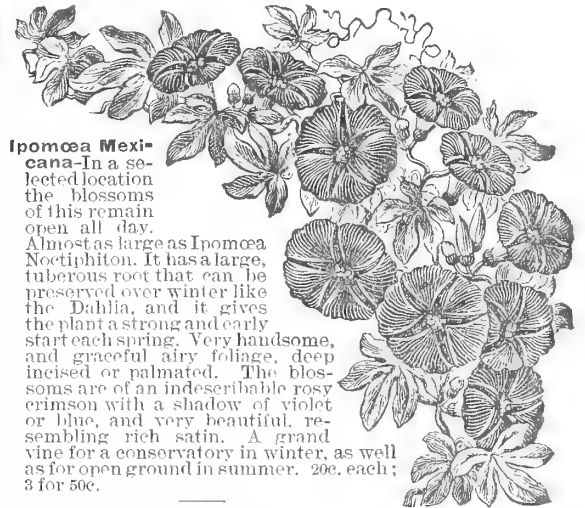

Ipomœa Childsi—Giant white Moonflower, mammoth in size and a strong grower. It is not uncommon for this to grow 30 to 40 feet in a season, and with a rapidity that is truly astonishing. Rather large and late for the North but a grand thing South. Seed, 20c. per packet.

Mixed Moonflower Seed—Fine mixed seed of all the Moonflowers here offered. 10c. per packet.

Giant Pink Hybrid—A Hybrid Pink Moonflower of marvelous growth. Seeds germinate very quick and plants begin to bloom early. Seed, 10c. per packet.

Japanese Yellow—A new sort bearing large golden-yellow blooms in abundance. It is a valuable novelty, and adds much to the beauty and variety of Moonflowers. Seed, 20c. per packet.

Ipomœa Mexicana—In a selected location the blossoms of this remain open all day. Almost as large as Ipomœa Noctiphiton. It has a large, tuberous root that can be preserved over winter like the Dahlia, and it gives the plant a strong and early start each spring. Very handsome, and graceful airy foliage, deep incised or palmated. The blossoms are of an indescribable rosy crimson with a shadow of violet or blue, and very beautiful, resembling rich satin. A grand vine for a conservatory in winter, as well as for open ground in summer. 20c. each; 3 for 50c.

SPECIAL OFFER—One plant each of Noctiphiton, Learei, Pandurata and Mexicana for 60c.

“Painted” Moonflowers.

The grand new large flowering Japanese Imperial Morning Glories have been termed “Painted Moonflowers” on account of their large Moonflower-like blossoms, varied and unique colors. They are not however night bloomers, but equal in size. See page 60 for cut and full description. Seed, 15c. per packet.

PITCAIRNIA

COPYRIGHT
1902 BY
J. L. CHILDS.

Pitcairnia.

A splendid pot and bedding plant having the general appearance of a Dracaena with beautiful dracaena-like green leaves. The flowers are borne on a strong stem which rises from the center of the plant and produces a grand spike. The color of the flowers is intense scarlet and makes a fine show. It is a very rare and novel plant, highly ornamental in foliage and exceedingly brilliant in flower. 30c. each; 2 for 50c.

Bottle Brush.

The Bottle Brush, *Myrica pensilv.* is a hard wooded shrub with small, narrow, willow-like foliage which is ever-green. The plant branches freely and bears at the terminal of the branches a large round cluster of bristle-like blossoms, exactly the shape and size of a large brush for cleaning bottles. The flower is one of the most curious and unique in cultivation, and attracts universal attention. The name several colors, but a scarlet, white and a dark reddish-pink. Makes splendid pot plants. 25c. each; 3 for 60c.

Climbing Fern.

A highly beautiful and valuable Fern which produces a slender graceful vine that will grow up 4 or 5 feet in a window showing a mass of lovely foliage. As an ornamental foliage vine it is one of the best things in cultivation. 25c. each; 3 for 60c.

Japanese Fern Balls.

These are large, round, basket-like bunches of Fern roots interwoven with moss. When suspended in a window and watered, elegant green foliage starts out from every side, top and bottom, making a highly ornamental object. Can be sent only by express—too large to mail. 85c. each.

PASSIFLORA
PRINCEPS.

Passifloras.

Fine foliage and graceful climbing habit. Very peculiar corona-like flowers, but very beautiful and unlike any other flower. Easy to grow either in window or open ground.

Pfordti—The best for pot culture, as it blooms when but a foot high, large, handsome, fringed flowers, exhibiting a mingling of white, pink, brown and blue in its coloring, making a flower of the most fascinating beauty. 15c. each.

Constance Elliott—One of the most graceful of all vines. Flowers pure white. 15c. each.

Princeps Coccinea—Intense scarlet blossoms borne in large, graceful racemes two feet in length with 20 or more blossoms. One of the handsomest of all greenhouse vines. Very rare. 50c. each.

One of each for 60c

"GOOSE FLOWER" COPYRIGHT,

HELIOTROPE PICCIOLA

Heliotrope Picciola.

A dwarf, large flowering variety. Plant robust, with fine, healthy foliage, but a dwarf, compact grower, making it particularly desirable as a pot plant. Flowers, which are of a fine violet blue color, with large white center, are of enormous size and borne in immense panicles. In bloom all the time; exceedingly fragrant. Fine plants, 20c. each. Seed of fine, large, Early Flowering Heliotropes, mixed, 15c.

TOLINIUM VARIEGATUM.

Tolium Variegatum.

A robust plant with thick, succulent leaves which are beautifully variegated white and green, the larger portion being white. A highly ornamental plant and one that does well in windows. For bedding it is just superb, being superior to Phrynum or any white leaved plant. Will always attract much attention for the beauty of its foliage and delicate sprays of pretty flowers. 20c. each; \$1.75 per doz. Seed, 10c. per pkt.

Great Goose Flower.

This remarkable flower was color plated and described in THE MAYFLOWER of November, 1898. It is a vine bearing flowers which are the size and shape of a goose. In fact, the entire length of the blossoms, including the tail, is over four feet. The largest flower known, and the most curious and beautiful. The vine is a fine and rapid grower, best suited for greenhouses or windows, but will do well outside during summer, and is likely to get through blooming before frost. Price, 50c. each.

GLOXINIA TUBIFLORA.

Gloxinia Tubiflora.

This is a hybrid from one of many Gloxinias, being a plant of erect habit, which is propagated by cuttings, but probably a strong tuberous plant. Flower stems rise to the height of a foot, each bearing several large pure white blossoms 4 inches in length, and of a peculiar and fascinating fragrance. It is a hardy and easily grown pot plant, good for any situation, flowering freely, and always attracting great attention by its oddity, novelty, and remarkable beauty. Strong tubers, each 10 cents.

WEEPING LANTANA.

New Lantanas.

Weeping—This new trailing plant is a real beauty and highly desirable for brackets, pots and hanging baskets. The slender trailing growth and abundance of rich blossoms making it a plant of peculiar beauty. Color a fine lilac, and sweetly scented. Very graceful, and a plant easily grown in any situation. One of the best novelties.

Scarlet Fiery—A new Lantana of unusual beauty, being of dwarf compact growth, and a profuse and perpetual bloomer. Its flowers, which appear at all times of the year in great numbers, when they first open are golden yellow, changing the next day to deep fiery scarlet. This unique habit causes each cluster of flowers to show to most beautiful advantage, as the center flowers, which recently opened, are yellow, and those which surround the center deep scarlet. Valuable alike for pots, for blooming at all times of the year, or for bedding out.

Yellow Firefly—A seedling of the above, golden-yellow.

Price 75 cents each; 10 for 7.

Lantana Seed—Mixed colors. Seedlings make blooming plants in a few months. Pkt. 10c.

Genista,

SHOWER OF GOLD.

As a plant for late winter and early spring blooming especially for Easter, it is well worth an equal trial. It is a bushy plant with a very fine, bright yellow, very fragrant, and long in large, drooping racemes, and in such quantity as to almost hide the green branches and twigs. "Shower of Gold." It is one of the most prettiest flowering winter plants, and is also very sure to bloom in pots, in a sunny window. As a plant of rare beauty, delightful fragrance, and easy culture, it has no superior, and should be on every home's shrubbery at all times. Seed, 10c. Pkt.

GENISTA.

Golden Leaved Salvia.

Half compact, showy, light and lustrous, with an abundance of large, which is of a fine yellow shade, hardly a tinge of orange in it. The flowers are a light transparent saffron or orange brilliancy. The color of the foliage is a soft and beautiful orange when bled out in the hot sun. In fact, the color is perhaps intensified by heat. The fact that the flowers are against the yellow foliage produces the most striking effect we have ever observed in any plant. Not only is the plant a fine border, but it is also a magnificent pot plant, blooming at any and all times of the year without intermission. For winter it is particularly fine, and the most important plant that can be grown in one's window or conservatory. Strong plants, each 5 for 50c. Seed, (will bloom in six weeks) 25c. per packet.

STREPTOCARPUS
HYBRIDS

Streptocarpus, Grandiflora Hybrids

We can honestly say that we do not know a pot plant more desirable for window culture than these new giant-flowered hybrids of Streptocarpus. They are very tough, hardy plants, likely to stand any amount of abuse and thrive under adverse surroundings. Plants from seed will begin blooming in a few months, and continue for YEARS, without once stopping. Leaves long and narrow, radiating from the crown of the plant, close to the soil. From the same spot spring the flower stems, shooting up to the height of 6 to 19 inches, each one bearing a large trumpet-shaped flower of exceptional beauty, some pure white, blue or purple, but mostly finely marked in a charming manner with harmonious colors. A plant will show several of these exquisite flowers all the time, those which fade being replaced by others, which are constantly appearing. The flowers, during late fall, winter and spring, are particularly fine even better than during summer. We do not hesitate to pronounce this the grandest window plant that has been introduced in a generation. Its

ease of culture and adaptability for all conditions, is remarkable for a plant of such exceptional beauty. Seed, 20c. per pkt. Fine plants, 25c. each; 5 for \$1.00.

CROTON

COPYRIGHT
1897
BY J.L. CHILDS.

Crotons.

These are but little known among general collections of house plants, yet they are not exceeded in beauty of foliage by any foliage plant, not even Palms. The leaves are long, narrow and graceful, and are most charmingly spotted and variegated. The sorts we offer are hardy and vigorous and succeed in any window. The cut gives a good idea of the beauty of a Croton, even when very small.

Price, 20c. to 50c. each, according to variety and size.

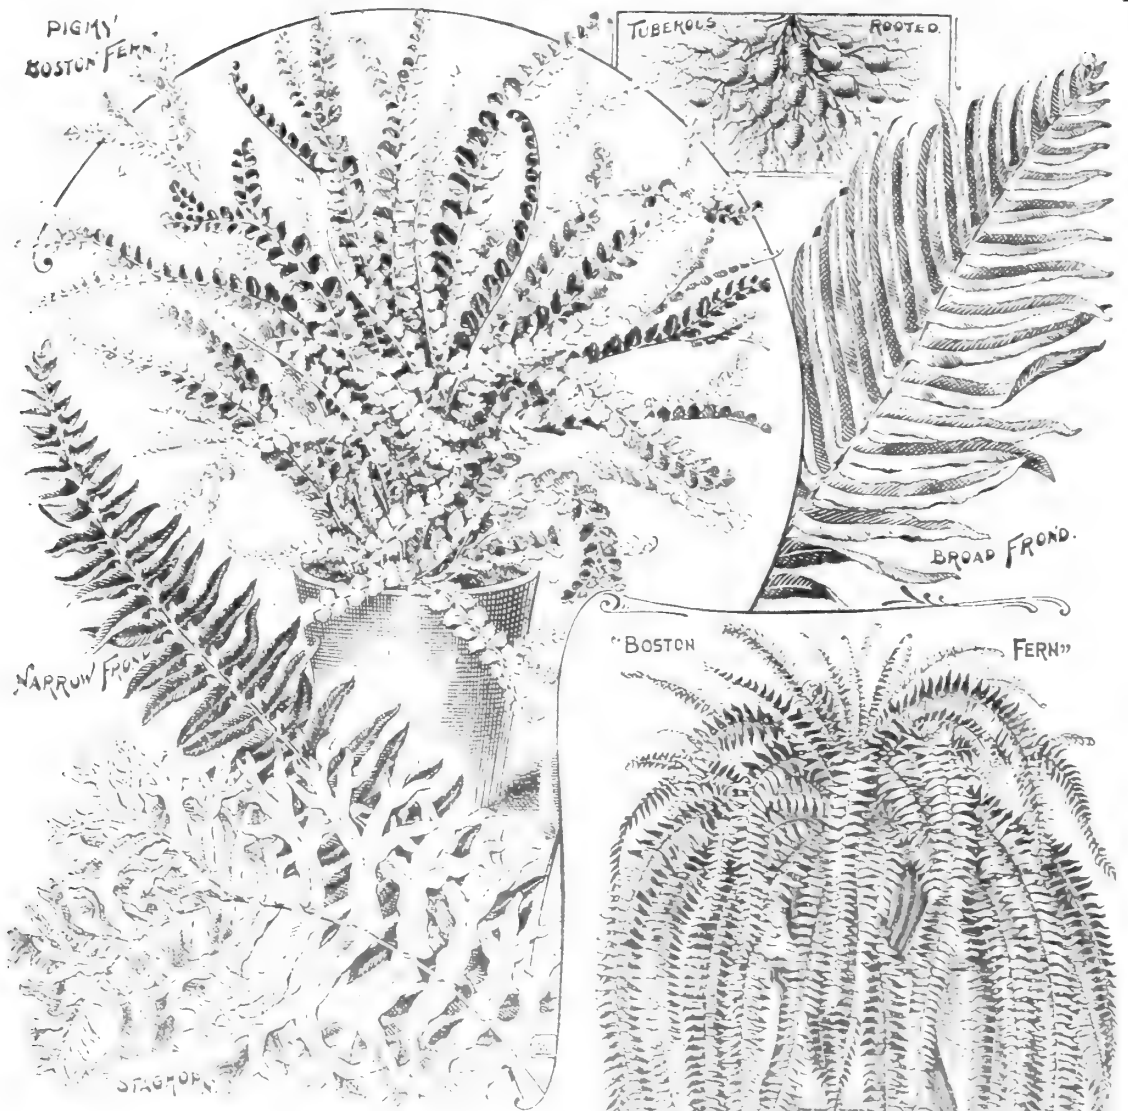

Shining Alocasia.

A grand plant for ornamental foliage effect in the garden. Leaf stems rise to the height of 4 to 5 feet having immense Caladium-like leaves which are of a very dark green with a handsome metallic luster which gives them a still darker appearance. Grows freely in any position, and makes a truly tropical appearance. Plants may be wintered in pots or in pits or cellars. Nothing finer for ornamental bedding, or for single specimens. As a tub plant it is also immense, its luxuriant growth and the fine appearance of the dark shining metallic leaves attracts attention when other plants are not noticed. 20c. each; 3 for 50c.; 7 for \$1.00.

Boston Ferns.

The first descriptive plants in cultivation, and in addition to the well known standard variety, we are able to offer several new and most striking varieties. All are robust, vigorous and as easily grown as the original Boston Fern.

Boston Fern (ORIGINAL)—Of a representative plant for house culture this is perhaps the most beautiful and satisfactory form. It is so hardy that it will stand and thrive in a frost, and it is an evergreen throughout the year's season. It grows to a height of 18 inches, and its fronds are 18 inches long from the petiole to the tip, and are 12 inches wide and 12 inches deep at the base of the leaf. The fronds are very green and are very hardy. We are now introducing a new and improved variety of this fern, growing to a height of 18 inches.

Narrow Frond Boston Fern—This is of this variety with narrow fronds, the above larger and very green and hardy plants, 25¢ each.

Broad Frond Boston Fern—Fronds twice the width of the ordinary Boston Fern, it grows to a height of 18 inches, and is a very distinct and rare variety. Excellent plants, 10¢ each.

Tuberous-Rooted Boston Fern—In foliage this does not differ much from the original variety, but numerous bulbs, the shape of sparrow-eggs are formed on the plants, which may be taken and kept dry for months without killing their vitality. When planted they sprout and grow like any other bulb. 10¢ each.

Stag Horn Boston Fern—Elegant broad fronds, the edges being flattened and divided into many wide prongs resembling a stag's horn. The most unique and beautiful of all Boston Ferns. 75¢ each.

Pigmy Boston Fern—This is the new gem of the lot. A plant makes a dense mass of hundreds of beautiful fronds wider than one's finger, which grow to a considerable length and curve most gracefully. For small pots and baskets it is the best thing yet introduced. Grows readily in a window or in a corner in the open air and is one of the most exquisite beauties the whole year, summer and winter. By far the most valuable of all the Boston Ferns and will, when known, be the most popular. Fine plants 25¢ each; 10 for \$1.00; 10 for \$2.00.

SPECIAL OFFER—For \$1.75 we will send one fine plant each of these Boston Ferns.

Giant Pelargoniums.

These new giant-flowered Pelargoniums are among the very finest novelties ever produced at Floral Park. They were chosen from a great many carefully bred seedlings, and show great improvement in vigor, habit, size and color of bloom. They are really remarkable for size and coloring, the delicate shades and markings being indescribable. Plants bushy and spreading, and at the blooming season are covered completely with flowers, so great is the number of clusters. We name them in honor of America's new possessions.

- Cuba**—Flowers exquisite shape, round, crinkled and fluted. Milk white, with small rosy crimson stain in upper petals. Truly a flower for the gods.
- Hawaii**—Same fine shades and size of above; color, a delicate tinted white, with large, rich velvety maroon and rose splash in upper petals.
- Luzon**—Enormous size, round, wide-open shape; pure white with violet-maroon blotches. Quite new as to shape of flower, and very handsome.
- Porto Rico**—Lovely rosy pink, with a large, feathery blotch of maroon-crimson in two upper petals. A superb flower in every sense.

Guam—This is a distinct bushy, compact, dwarf-flowering variety which makes a dense plant almost as round as a ball. The flowers are large, round, widely open at top, like a Morning Glory. Color a delicate suffusion of white and delicate pink. No spots.

Price of above 5 sorts, 75c. each; the 5 for \$3.00.

Dwarf Mixed—All the same dwarf, compact habit as Guam, but producing a variety of colors. Fully as good as any of the named sorts above. 40c. each; 3 for \$1.00.

TWO OTHER FINE PELARGONIUMS.

- Mrs. Robert Sandiford**—The flower is of large size, well doubled, and of glistening snow-white color. 50c. each.
- Marion**—The same plant bears flowers of different colors. One cluster of bloom will be white marked with crimson, while another will be fine rose marked purple. 50c. each.

Pelargonium Seed.

Very choice seed, carefully hybridized; will produce some magnificent sorts. Pkt. of 10 seeds—20c.

CHILDS' SUPERB GLOXINIAS

CHOICEST GLOXINIA SEED.

The most beautiful of all pot bulbs. Seedlings grow well and, if given good care, will bloom in five months from the time of sowing seed, giving large and beautiful blossoms. There is no flower more charming.

- French Hybrids**—Splendid mixed; the finest varieties of various colors. Pkt., 15c.
Tigered and Spotted—Mixed colors; all beautifully spotted. Pkt., 15c.
Crassifolia Erecta—Mixed colors; all erect bloomers. Pkt., 15c.
Pure White—The most heavenly of all flowers for true loveliness and purity. Pkt., 15c.

Gloxinia Bulbs.

The grandest of all summer-blooming bulbs for decoration of the window, a garden, or conservatory in summer. Everyone is astonished at their regal beauty. We have seen people pay \$2.00 for a small plant with four or five blooms on it when they could have bought the bulb two months before for 25 cents and potted it themselves. They are no trouble at all to grow, and bloom constantly until autumn, when they should be allowed to die down, and the pots kept dry in a warm place until next spring, when the bulbs can be started in growth again. Our new Gloxinias are great improvements over the older sorts, with large, luxuriant leaves that recurve in such a manner as to conceal the pot they grow in, and erect, large-throated wide-labeled flowers borne above the foliage like a floral crown. These flowers are very large and satin-like and of the most exquisite color, viz., soft, clear or brilliant, sometimes self-colored but more often tinged, spotted or edged with contrasting colors, but always rich and beautiful.

- Defiance**—Pure scarlet. Very rich.
Grandiflora—Pure white. Perfectly exquisite.
Erecta Violeccata—Grand velvety blue.
Tigered and Spotted—Extra fine spotted.

Price 20c each; the 4 for 60c.

Mixed, All Colors—Our strain of mixed Gloxinias includes the finest and most varied varieties from best European collections, including the beautifully spotted and tigered strains, Erecta, Grandiflora, Hybrids, Crassifolia, of elegant soft and variegated colors. Fine select bulbs, 15c. each; 3 for 35c.; 5 for 50c.; 12 for \$1.00.

Gloxinia Novelties.

The following grand varieties were leading Gloxinia novelties last year. Seed and Bulbs we offer are of our own growing, and extra fine and true.

- Coquette**—Elegant large blossoms, the ground color of which is white, beautifully marbled and clouded with delicate pink or blue, but all with charming lemon-tinted throats. The beauty of these blossoms can be better imagined that described. Fine bulbs, 30c. each; 4 for \$1.00. Seed, 20c. per pkt.
Princess Maud—Great blossoms of a rich crimson-purple, with a pure white margin, which is beautifully spotted. A very striking combination. Bulbs, 30c. each; 4 for \$1.00. Seed, 20c. per pkt.
Queen Victoria—The largest and finest of all pure white sorts. A flower for the gods. Vigorous, and great bloomer. Bulbs, 30c. each; 4 for \$1.00. Seed, 20c. per pkt.
Scarlet Queen—Large, wide-open flowers of a dark, deep, rich crimson-scarlet. The finest and brightest colored sort. Bulbs, 30c. each; 4 for \$1.00. Seed, 20c. per pkt.
Princess Henry—New this year. Large upright flower of brilliant purplish carmine with beautiful velvety reflex, margined with a broad carmine edge. Bulbs, 30c. each.
Childs' Giant—Originated by us, and is a flower of most extraordinary size and widely open. Outside, pure white; inside throat, yellow, thickly spotted red. Ground of petal, deep, velvety crimson-pink, spotted darker, and with a wide margin of pure white around the entire flower. A regal giant, and perfectly exquisite. Bulbs, 30c. each; Seed, 20c. per pkt.

One Bulb each of above 6 new Gloxinias for \$1.50.

"TUBEROUS BIGONIAS"

TUBEROUS-ROOTED BEGONIAS.

The fashionable plant of the day, and richly does it deserve its honors, for in addition to very handsome foliage it bears a never-ending profusion of the most ravishingly beautiful flowers the whole summer, and then, with the coming of cold weather, very obligingly take a nap until spring, asking no further care, through the winter than to be packed in soil away from frost. This trait will be appreciated by the many people who have no spare windows to carry over tender bedding plants, yet dislike to be at the expense of buying a new lot each spring. This grand plant is a rival to the Gloxinia as a summer window or conservatory plant, and as strong a rival to the Geranium and Verbena as an outdoor bedding plant. The enormous size and intense brilliancy of the flowers astonish those who have never seen any but the ordinary house Begonia. The bulbs can be started from March to June and will soon be in full bloom. Give partial shade out of doors and protect from severe winds if possible. Our strain of both double and single is a very superior one, many of the flowers measuring 4 to 6 inches across.

- Single White—Fine pure color; large flower.
- Single Yellow—Extra fine.
- Single Scarlet—Fine bright shade.
- Single Pink—Beautiful soft shade.
- Single Dark Crimson—Deep and rich color.

10c. each; the 5 for 40c.

- Double White—Extra fine.
- Double Scarlet—Large fine flower.
- Double Yellow—Very beautiful.
- Double Rose—Fine rose-pink.

20c. each; the 4 for 60c.

- Single Mixed—Extra fine. 3 for 15c.; 6 for 25c.; 12 for 40c.
- Double Mixed—All colors. A glorious strain of finest large flowered double sorts. 15c. each; 6 for 60c.

Choicest Begonia Seed.

With good care seedlings bloom in from five to eight month's time. Per pkt.

- Tuberos-Rooted Hybrids, Single—Flowering sorts, mixed..... 15
- Tuberos-Rooted Hybrids, Double—Mixed..... 20

Begonia Novelties.

The following extra fine new Tuberos-Rooted Begonias were offered for the first time last year. Both Seed and Bulbs are of our own growing.

- Giant Crimson-Black**—Magnificent large blossoms of perfect shape; deep, rich, crimson-black—the darkest and richest color yet produced in Begonias. Bulbs, 50c. each; Seed, 20c. per pkt.
- Giant Crispa**—Enormous blossoms with elegant fringed edges. Color, bright orange-scarlet. One of the grandest yet seen, and an entirely new departure. Bulbs, 50c. each; Seed, 20c. per pkt.
- Childs' Giant, Mixed**—Our own new strain of giant-flowering varieties. Greatly improved in size, shape and color. The most magnificent strain of Tuberos-Rooted Begonias ever offered. Every bulb a select one, and seed comes true to this magnificent type. Bulbs, 50c. each; 3 for \$1.00; Seed, 20c. per pkt.
- Baumanni Hybrids, Mixed**—A new class of Begonias, producing blossoms of various shades of light and deep pink. Grows readily from seed, and flowers freely for a long period, more like plants of ordinary flowering varieties, but the flowers are large and delightfully scented. Bulbs, 50c. each; Seed, 15c. per pkt.

CHILDS'
DWARF
EVER-BLOOMING
CALLA

Childs' Dwarf Ever-blooming Calla.

This is of a dwarf habit, and does not grow tall and scraggy like the old variety but is strong and compact, with a great abundance of lustrous dark green foliage. It is a true ever-bloomer, its flowers appearing in great abundance both summer and winter when grown in pots, or it will bloom profusely all summer long in open ground, and being potted in September will continue blooming without intermission all winter. The same plant will grow and bloom for years without once ceasing, and the quantity of bloom which a good plant will produce is astonishing. It is estimated that six plants of the old sort will not produce so many flowers in the same season as one of this variety. This variety is a true ever-bloomer. A plant is hardly ever without one or more flowers, and its dwarf compact habit makes it a much more desirable pot plant than the old variety. Its flowers are of large size and snowy white in color. Price—First size, extra large, 25c. each, 3 for 60c.; second size, 15c. each.

Little Gem

Calla, Little Gem.

A perfect miniature Calla, growing 8 or 12 inches high, and producing very large snowy white blossoms. It is in truth a perfect little gem. 15c. each; 3 for 30c.

New Sweet Scented Galla Fragrans.

Probably the greatest novelty of last year. It seems to be identical with Childs' Dwarf Everblooming, possessing the additional charm of delicious fragrance. This new Calla was originated by Luther Burbank, of California, who speaks of it thus: "The plants are of medium size, compact in growth and bloom profusely. It has not only a most charming flower produced in a profusion never before surpassed, but also with a genuine, sweet, lasting fragrance all its own, but similar to the fragrance of Violets or Lilies." With us it has proved a great success and we have a large stock of it. The description of our Dwarf Everblooming is a correct description of *Fragrans* also, adding only its additional merit of sweet scent. Fine plants 25c. each.

The Yellow Galla.

The Yellow Calla (*Calla Hastata*) is one of the rarest and most eagerly sought of all bulbs. They should be potted in the spring and they will start growth at once and commence blooming in a short time. The bulbs are strong and send up numerous flowers, which are a bright golden yellow with a black center. The color is one of the most beautiful shades of yellow seen among flowers, and the jet black center lends to the blossom a peculiar charm. Bulbs are very scarce, and a year or two ago sold at \$1.50 each. We now have a large stock of strong flowering bulbs which we offer at 30c. each; 2 for 50c.

Spotted Calla.

The leaves of this beautiful Calla are deep green, with numerous white spots, which give the plants a magnificent appearance. The flowers are pure white, with a black center and very beautiful. 15c. each; 3 for 35c.

SPECIAL OFFER.

For only 75c. we will send one fine plant each, of our Everblooming, Little Gem, Sweet Scented, Yellow and Spotted Callas. 5 in all.

YELLOW CALLA.

Rudbeckia
laciniata fl. pl.,
"Golden Glow."

A hardy perennial plant growing eight feet high, branching freely, and bearing by the hundreds, on long, graceful stems exquisite double blossoms of the brightest golden color and as large as *Cactus Dahlias*. The cut represents a plant in bloom, as photographed. Mr. William Falconer, the best authority on plants in this country, says of it: "When I saw the double-flowered form of *Rudbeckia laciniata* in bloom in your grounds at Floral Park, I was amazed, for I had never before seen a double-flowered *Rudbeckia*; and I was delighted with the fullness and gorgeousness of the blossoms and their clear, bright yellow color. The plant you gave me grew vigorously and threw up strong branching flower stems, six feet high, laden with sheaves of golden blossoms as large as fair *Chrysanthemums*, and all having an elegant, graceful appearance, without any of the stiffness in habit or blossoms peculiar to sunflowers. Many eminent florists and amateurs have seen it here and all admired it. As cut flowers the blossoms last well. In fine, I unhesitatingly regard it as the most desirable introduction among hardy perennials since we got *Clematis paniculata*." It is the most effective flowering plant for August and September in cultivation.

Strong plants, which will bloom freely this season, 15c. each; 5 for 50c.; 12 for \$1.00.

RUDBECKIA
"GOLDEN GLOW."

RUDBECKIA
"GOLDEN TREASURE"

New Single Rudbeckia.

"GOLDEN TREASURE."

Offered last Spring for the first. Not so tall as *Golden Glow*, but equally handsome. Flowers of larger size, fine form, and borne on long, graceful stems. Color, brightest gold; the most aesthetic garden flower yet seen. Do not despise it because it is single. It is fully as handsome and effective as *Golden Glow*, but entirely different. We predict for it as great a popularity as the wonderful *Golden Glow*, which we introduced five years ago, and which is still a sensation among new flowers. 20c. each; 3 for 50c.; 7 for \$1.00.

SPECIAL OFFER.

One each of these two grand plants for 25c.; 2 of each for 50c.; 12 of each for \$2.00.

Rudbeckia Golden Glow has now established itself the world over as the finest new plant of recent times. In England it has created a real sensation, and we have filled orders for nearly or quite ten thousand plants for the British Isles alone. All the leading florists there now offer it as the most magnificent hardy plant in cultivation.

POT GRAPES.

Pot Grapes.

The finest grapes in the world can be grown from these vines in 10 to 12 inch pots, in conservatories, windows or on verandas. With 4 to 6 feet of growth several bunches of fine fruit, some weighing over a pound will be produced. The sight of these small vines growing in pots has been one of the wonders to be seen at our place the past year. Grow the vines out doors (pots plunged) the first summer. Winter them in cellar, pit or cold shed. Any

time after February they may be placed in light and warmth for growth which will start at once. Flowers and fruit will speedily follow. These great bunches of delicious fruit will ripen in May if plants are started end of February. The January (1901) MAYFLOWER contains an article by Adolf Jaenicke on the growing of these wonderful pot grapes. They are one of the easiest and simplest things to manage properly, and to bring into fruit, as a window or veranda plant, and certainly there is nothing more attractive, novel, or satisfactory to grow. The enormous bunches of large berries are extremely handsome and perfectly delicious. The ideal thing to grow in large quantity in greenhouses or conservatories. Fine vines, 60c. each; 3 (all different kinds) for \$1.50.

Plectanthus
Paniculatus.

BANANA SCENTED
PLANT.

A splendid plant from Jalapa, and one of peculiar value owing to the great fragrance of its foliage. Each leaf is highly perfumed like a delicious ripe Banana. This rich fragrance is perfectly delightful, and fine for vases and bouquets. Its flowers are also very pretty and fragrant. Plant is a free, easy and rapid grower, even better in this respect than a Geranium. 20c. each; 3 for 50c.

MERICA GRACILIS.

Merica Gracilis.

A beautiful plant with bright green sword-shaped foliage which is evergreen and beautiful all the year. In fact it is a splendid decorative or ornamental foliage plant. It blooms freely from March to June and its blossoms are exquisitely handsome, being shaped like a Tigridia, the large petals pure white while the inner ones are sky blue with beautiful spotting in other colors. A very rare plant, and fine in every respect, growing freely in any situation, even in shady windows. 20c. each; 3 for 50c.

CHILDS' STRONG, HEALTHY ROSES.

There is a difference between strong, cool grown, well established Roses, and those which have been forced into an immediate and rapid growth from cuttings by excessive heat. The former are from summer propagations and are thus tough, vigorous, well rooted and hard. The latter are weak, tender, with limited vitality, and are profitably sold at a very low price.

Our Roses are not of this class. They are propagations of last summer, heavily rooted, cool grown, well hardened, strong and tough, and will give results.

The Rose is the emblem of beauty and true worth; the Rose-bud of innocence and purity. At all times and in all places the Rose has ever been acknowledged the Queen of Flowers. The maiden of two thousand years ago adorned herself with chaplets and garlands of Roses as does the maiden of to-day. The use of Roses is now more universal than ever. We cannot get along without Roses for pillars and hedges and bedding. They are indispensable for vases or for fine cut-flower work, while no other flower is as popular for wearing or table decoration. Every family ought to grow them in abundance, for never in the history of the world have Roses been as low in price as now, and never as beautiful. The Rose has been brought to such a state of perfection as regards size, shape and color of flower, that it seems impossible for further improvement.

The secret of having good Roses is to begin with good, healthy plants, and not weak, sickly things, or those with stunted growth. The growth of many Roses is stunted before they are sent out, by leaving them too long in the cutting bed or in small pots, hence the weak growth and poor blossoms which follow. We furnish strong, vigorous, well-rooted Roses ready to grow and bloom at once, and it is for this reason more than any other that our plants produce such an unusual large amount of the finest flowers. We have reviewed our list of varieties over and over again, until we know that those here offered are the very cream of more than a thousand known kinds. We do not believe that the list could possibly be improved. It embraces many recent novelties, as well as all the fine old sorts of tried and true merit.

Our complete system of cutting Roses and other plants in glass boxes insures their coming to the remotest parts of the Union in perfect order.

Tea, or Everblooming Roses.

The most popular for bedding. Blooms when very small and if well cared for flows continuously the whole season. The Roses are of great size and are, with remarkably long handsome buds and shell-petal flowers of most exquisite soft shades and distinct real-like fragrance. Largely grown in pots for winter blooming. Give winter protection by banking with earth or covering with evergreen boughs.

Bridesmaid—A lovely new Rose of large size and perfect form. Explosive. Its shell pink, with a satin lustre.

Duchesse de Brabant—Explosively robust and fragrant and one of the finest of all in bloom. The color is a delicate and peculiar shade of rose, richly shaded.

Etoile de Lyon—One of the best outdoor Roses, 20 wing and the hardiest of all the yellow varieties. A free bloomer, flower large, of a rich creamy yellow, and fully cupped.

Gen. Robert E. Lee—Enormous bloomer; explosive buds, borne on long, graceful stems. When fully open, it is perfectly double to the center. Beautiful soft yellow.

Golden Gate—A magnificent Rose with large, full, finely formed flowers; buds long and beautiful. Color, rich, creamy white, tinged with golden yellow and clear rose.

Hermosa—Long a favorite, and will be a hundred years from now. Unusually hardy, and bears great quantities of medium-sized, shell-like flowers of the loveliest pink.

Marion Dinglee—A beautifully cupped flower of exquisite beauty, and a most profuse bloomer. Deep crimson.

Madame de Watteville—Often called the Tulip Rose. One of the best fancy Roses, an indescribable blending of cream and carmine, each shell-like petal outlined with bright pink. Its distinct fragrance is very pleasing.

Marie Guillot—One of the finest outdoor White Roses. Very free, perfect and beautiful.

Mermet—The perfection of form, while the color is exquisite bright pink, with shadings of paler pink.

Papa Contier—Fine for either garden or house. Large flowers of great substance and very fragrant. Color, a rich, dark carmine. A glorious Rose.

Perle des Jardins—Almost an exact counterpart of the famous Marshal Niel Rose, but very robust and of dwarf growth. Fine either for pots or open ground.

Queen—This superb Rose has beautiful pointed buds and distinct fragrance; pure snowy white in color.

Queen's Scarlet—An extra good Rose. Always in bloom, and the color an unusual one among ever-bloomers, being a dark, rich, satiny crimson. No better dark Rose.

Rainbow—A charming new Rose, showing several different colors in the same flower.

Snowflake—A new white Rose, with lovely waxen blooms.

Sunset—A rich golden amber, or old gold, elegantly tinged and shaded with ruddy copper. Flowers and buds are extra large, full, finely formed and deliciously perfumed.

Sou. de la Malmaison—A double Rose; flower is extremely large and double; color flesh white, clear and fresh. Has been considered the finest Bourne Rose for many years. Its great beauty in the bud makes it the finest of all Roses at that season. A flower that is universally popular.

The Bride—An exquisitely lovely Rose, and very popular. Beautiful foliage and none of our double flowers of the very largest size, and of the most snowy whiteness.

White Perle des Jardins—All know the great beauty and value of *Perle des Jardins*, one of the very finest yellow ever-bloomers, excelled only by *Marshal Niel*, but all do not know that there is a new white variety of it, a genuine sport from *Perle des Jardins*. It is exactly like that superb sort in every respect, except color, which is a pure snowy white. One cannot imagine a more lovely Rose.

Childs' Jewel—The most remarkable Rose in cultivation, as well as the most novel and beautiful one. Childs' Jewel produces flowers which range in color from dark orange-yellow to crimson, variegated, blotched, mottled, etc. A plant in bloom shows no two flowers alike. Some will be dark yellow, others light yellow, buff, suffron, light and dark crimson, pink, blush, apricot, etc., while others will be variegated in a most beautiful manner. As may well be imagined, the sight which such a plant in bloom presents is a novel and beautiful one. It is a pure Tea Rose, the flowers being large, delightfully fragrant, and in both bud and blossom exquisitely beautiful. It is a free grower and a profuse bloomer, especially in the open ground.

Price 15c. each; 5 for 75c.; or more at 10c. each.

Rose Winter Gem.

THE GREATEST POT BLOOMER OF ALL FINE ROSES.

This is the greatest Rose Novelty in years, owing both to its beauty and its unparalleled blooming qualities. It is a Tea Rose of remarkably strong and vigorous growth and a prodigious bloomer all the year. It flowers all the time, particularly during winter, hence its name. The blossoms are borne on long, graceful stems, are of large size and a lovely crimson-pink color. Buds perfectly exquisite and the open flower full and double. It is the strongest, hardiest, most vigorous and rapid growing Tea Rose in cultivation. One plant of it will produce more good Roses in the year than 12 plants of any other Tea Rose grown. This is saying a good deal, but it is true. The plant will bloom continually, and nothing but killing it outright will check it. The blossoms are singularly beautiful in shape, color and poise, and most deliciously scented. More fragrant than any other Tea Rose. It is so strong and vigorous that it never mildews, and is a rapid grower blooming at once from small cuttings. The greatest Rose for amateurs, and one that will positively bloom prodigiously in any window at all times of year. Strong, well established plants, grown especially for winter blooming, and ready to bloom at once. 25c. each; 3 for 50c.; 7 for \$1.00.

THE CREAM OF
Hybrid Tea Roses.

These combine the best qualities of both the Teas and Hybrid Perpetuals, of which they are a cross, giving us the fine coloring and large size of the Hybrid Perpetuals with the everblooming character of the Teas. This section is also much hardier than the average Tea, and while of a fine erect habit, are much dwarfier than the Hybrid Perpetuals, making them extra fine for specimen plants upon the lawn, or as center-plants for beds of Tea Roses. Splendid for pots.

La France—Delicate silver rose, shaded with cerise-pink—often silvery pink with peach shading. Very large, very double and of superb form. It flowers continually throughout the season. None can surpass the delicacy of its coloring; in fragrance incomparable; in form perfect. The sweetest of all Roses. It ranks first, not only in the section to which it belongs, but stands first and foremost among Roses.

White La France (Augustine Guinoisseau)—This magnificent new Rose is a pure white La France; the buds and flowers are extra large, very full and finely formed; the fragrance is delicious. It is a free, continuous bloomer, and will give satisfaction wherever planted.

Meteor—Shows the peculiar velvety richness of the best dark Hybrid Perpetuals and blooms as freely as any Tea. Very double and perfect; a rich, glowing crimson, never tinged with magenta or dull purple in hot weather, as are some dark roses. A grand bedding Rose.

Mme. Abel Chatenay—This is a wonderfully strong, healthy growing variety, with rich bright foliage. A grand bedding Rose, as it is a profuse and continuous bloomer; flowers of good size, very double, with slightly recurved petals; elegant buds, just the right size and shape for buttonhole use. Color rosy carmine shaded salmon.

Maman Cochet—This is a remarkable new Rose of great merit. In rapidity and sturdiness of growth, profusion of bloom, and superb form of bud and flower; it will be hard to find its equal. Small pot plants in open ground will, during the season, produce on long, stiff stems hundreds of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich and mellow—pearly pink, changing to silvery rose. It blooms nearly all the time. We recommend it as a grand Rose in every particular.

White Maman Cochet—This is a superb variety and to see it in bloom one is lost to find words to express its wonderful beauty. It is identical with its parent, Maman Cochet, a Queen among pink garden roses, except in color of flower, which is snowy white, sometimes faintly tinged with faintest suggestion of pale blush; same freedom of bloom, magnificent form of buds and flowers, which is beautiful in its perfection. Flowers large and double, petals of unusually heavy texture, making it of more than ordinary value in the open ground.

Souvenir du President Carnot—This variety is so fascinating that we believe it to be, everything considered, one of the greatest introductions of the last ten years. It is superb in every way. The flowers are large, full and double, exquisitely shaped, with heavy, thick shell-like petals. The buds are beautiful—long and pointed like Niphetos. The color is new; delicate, rose blush, shaded a trifle deeper at center of flower. Deliciously fragrant.

15c. each; 7 for 80c.

THE CREAM OF
Polyanthus Roses.

These are the "Baby" or "Fairy" Roses, wee little rosettes of bloom, sometimes less than an inch across, but borne in large panicles at the end of every shoot. We have counted 120 flowers in one cluster of Mignonette, and other varieties are not far behind. Fine for pot culture. Compact, bushy, always in bloom. Hardy in open ground and blooms from May to December.

Mignonette—Tiny pale pink flowers. Very pretty and borne in immense clusters.

Parquette—Large clusters of wee white blossoms, which are perfectly lovely.

Mad. Cecil Brunner—Salmon on yellow ground; dwarf habit, but vigorous.

Clorie de Polyanthus—Bright pink, raved with red. Beautifully cupped blossoms in great profusion.

George Pernet—A strong growing dwarf variety, forming a perfect round bush. It is continually in bloom, the flowers being large, bright rose, with touches of yellow.

Clotilde Soupert—As large as an ordinary Tea Rose, and exceedingly lovely. Fine for outdoor, and by many florists considered the very finest pot Rose. Flowers borne in large panicles, each floret double and rosette-like. Color, a pearly white, with exquisite center of tinted salmon-peach. A more lovely or exquisitely colored Rose never bloomed.

Yellow Soupert—A valuable new sort with flower equally as large as Clotilde Soupert; very double, of fine Camellia shape when fully open. Color beautiful light yellow, shading to white at edge of petals; plant dwarf, bushy and very free flowering in clusters.

15c. each; 3 or more at 10c. each.

CHAMPION OF THE WORLD.

**New Rose,
Champion of the World.**

This grand rose commences to bloom as soon as potted from the propagating bench and continues in the greatest profusion all the time, SUMMER and WINTER. Plants which have bloomed all summer in the garden may be potted in the autumn, and they will immediately start new growth and bloom profusely all winter in any window. Returned to the garden in the spring, they will again bloom all summer without intermission. It is never without flowers. Though a perpetual bloomer, it is hardy and robust as an oak, standing the severe winters of Vermont, where it originated, in the open ground without the slightest protection, and commencing its season of bloom earlier than any other sort. For a hardy garden Rose it is as valuable as it is for pots. It is the most healthy and vigorous Rose in cultivation, for its handsome rank foliage has never been known to mildew under any condition, indoors or out. It is ABSOLUTELY MILDEW PROOF. It has the most delicious and powerful rose fragrance, which is maintained during the whole year. Its perfume in December is as rich, delicate and sweet as it is in June. Its blossoms are perfectly double to the center and of the most perfect shape, both in bud and blossom, while its color is a degree of loveliness which few roses can equal, being a rich, deep, rosy pink, darker and richer than Hermosa, and a shade, the delicate richness of which is seldom seen. Its size is very large for an everbloomer, often as large and fine as La France, or the best hybrid perpetuals. 15c. each; 4 for 50c.

**New Rose,
Dorothee.**

One of the most beautiful of Roses. Color hard to describe, but perfection in tint. It is a sport from Perle des Jardins, and is a lovely mingling of pink and tawny buff. A warm, lovely color, but lacking the coppery red found in Sunset. A very distinct and valuable variety. The finest of the Perle family. Foliage as handsome as the flower. With us it has proved to be an extra free bloomer, and we regard it as one of the very finest of Tea Roses. 30c. each; 2 for 50c.; 5 for \$1.00.

Climbing Meteor.

This Rose which we recently introduced, might properly be called a Perpetual Blooming Climbing General Jacquemina. It is a sport from that finest of all Hybrid Teas, Meteor, it is much larger and of a deeper, richer color, equalled only by the peerless Jacquemina, but will produce twenty blossoms to Jacquemina's one. It is a Rose which will make a 15 foot of growth in a season and show a profusion of bloom every day. Foliage strong, healthy and luxuriant. But its exquisite flowers large, beautifully shaped, and of that rich, dark, velvety crimson color seen only in the Jacquemina. Much deeper and richer than Meteor. We do not hesitate to pronounce it the finest Rose in existence for summer blooming, as it will make a large growth and is loaded with its glorious blossoms all the time. For winter blooming it has few equals in beauty and probably none in profusion. Just the Rose to train up in a conservatory or bay window, where its exquisite blossoms will show to wonderful advantage every day, summer and winter. Price of large, strong, well-rooted, healthy plants, for abundant blooming at once, 20¢ each; 3 for 50¢; 17 for \$1.00.

CLIMBING METEOR.

Climbing Bride.

A superb new Rose offered last year for the first time, and a fine companion for Climbing Meteor. It flowers freely at all times of the year, its blossoms being of large size, beautiful shape and pure snow-white in color. It is like Marechal Niel in growth, but stronger and more free in blooming. Flowers larger than Bride and possess more substance. It is almost as hardy as a hybrid Perpetual, and is safe in open ground south of New York. It makes a most magnificent pillar Rose, especially when grown with Climbing Meteor. As a pillar Rose for window or conservatory it has no superior. It is far ahead of the celebrated Climbing Marie Guillot in every respect. 20¢ each; 3 for 50¢.

Empress of China.

A new free-flowering, climbing Rose of Chinese origin. The plant is a strong, healthy grower, making a fine specimen in a very short time, and produces its flowers in the greatest profusion. Hardy and a perpetual bloomer, like Mary Washington. Color, soft red, changing to light pink when fully open. 15¢ each; 3 for 40¢.

Marechal Niel.

The old and well known Climber bearing flowers of the largest size and most exquisite beauty. Color brightest and richest yellow. 20¢ each; 3 for 50¢.

One each of the above 4 Grand Roses for 60¢.

Cream of Hybrid Perpetual Roses.

Hybrid Perpetuals ought to be very extensively grown. The flowers are of very great size and beauty, produced in great profusion in spring, and to a considerable extent all summer. Their tall, erect habit fits them for ornamental hedges, centers of large Rose beds, or clumps of shrubbery. They furnish us with deep, rich glowing colors, to be found in no other section of the family, and their flowers are also very much longer, while beautifully cupped and imbricated. They are the finest of all Roses for vases. Perfectly hardy in the open ground in all localities.

Anna de Diesbach—A superb flower of immense size. Rich, dazzling crimson.

HYBRID
ROSE

- Coquette des Blancs**—Very double and perfect, blooming in large clusters. Snowy white.
- Coquette des Alps**—Fine snowy white, large and full.
- General Jacqueminot**—Large, velvety flowers of the most intense maroon-scarlet, each set in a cluster of rich green leaves. Blooms repeatedly through the summer and fall and is the most popular Rose grown, without exception.
- Paul Neyron**—Immense double flowers, of a shining carmine-pink. The largest Rose grown; perfectly grand.
- Dinsmore**—Always in flower, with large, finely imbricated flowers, of a rich, bright crimson. Extra fine as specimen Rose upon the lawn.
- Francis Levet**—Extra fine Rose of large size and clear, bright rose color. Very rich and fragrant.
- Clorie Lyonnaise**—This is the nearest approach to a yellow in this class. A pale shade of salmon-yellow with deeper center, changing to creamy white.
- Prince Camille de Rohan**—Plenty of name and plenty of Rose. Flowers crimson-black, very large and velvety.
- Marshal P. Wilder**—Bright cherry-carmine. Great size and perfectly double. Superb.
- Vick's Caprice**—The flowers are large, ground color of soft satiny pink, distinctly striped and dashed with white and carmine. It is beautiful in the bud form, being quite long and pointed, showing the stripes and markings to great advantage, making it a valuable and desirable variety for cutting.
- Cllo**—Flesh color. One of the finest Roses, having the most delicate texture and coloring imaginable. In size very large. Flowers measuring 5 inches in diameter, and truly magnificent in appearance. The plant is a very vigorous grower, perfectly hardy; flowers freely produced throughout the season.
- Jubilee**—Color pure red, shading to crimson and maroon at the base of petal, forming a coloring equaled by that of no other rose. The buds are long, held up by long, stout flower stems, making it valuable for cut flowers.
- Countess of Oxford**—A superb Rose; extra large flowers; full, perfect form; exceedingly sweet; color bright carmine red, elegantly shaded.

15c. each; 5 for 60c; the 14 for \$1.40.

Hardy Climbing Roses.

Their beautiful foliage and profusion of bloom make them valuable for small trellises, old walls, arbors, gates, and vines, trees, etc. Perfectly hardy, easy to plant, thrifty growers, reaching to 12 feet or more.

Crimson Rambler—This new Rose is the sensation of the hour, and well may be, for it is indeed a marvel. It originated in Scotland and is a heavy, everblooming, climbing Perpetual. It is perfectly hardy in the open ground, and will grow to perfection in a season. It begins to bloom from early in the season, the flowers appearing in large clusters as large as a man's fist, and of a deep, rich crimson color. It is a decided velvet, and when cut, last two weeks in winter, and fully a month in the South, which is a perfect proof of its hardiness at all times. It is a great favorite in various ways, as a pot rose, as a trellis rose, and for covering a wall it has no equal, and when pegged down it will form a bed of its life. Cut back it is a magnificent pot rose for the winter. It is always in bloom, even when very small, and is easily trained to a bushy growth.

Mary Washington (White Rambler)—This Rose was raised by George Washington over one hundred years ago in his garden at Mt. Vernon, and named after his mother. We introduced it a few years ago, our stock plants coming direct from Mt. Vernon from the original vine. Aside from the fact that this Rose was raised and named by George Washington, it is one of the most valuable sorts that has been introduced for many years. A hardy, perpetual blooming climber has long been needed. Its flowers are pure white, perfectly double to the center, sweet, and borne in endless numbers all summer. It is a vigorous and rapid grower, and a most valuable Rose for outdoor culture. Its buds are as beautiful as the finest Tea Rose, and in large clusters. One plant of the Mary Washington will produce more flowers than a dozen Tea Roses. Its fragrance is tinged with the old-fashioned musky flavor so much admired in older times. It will commence blooming immediately after planting, and the smallest plant will produce hundreds and even thousands of flowers the first year.

Yellow Rambler—A new hardy yellow climbing Rose, blooming after the same manner as Crimson Rambler in large clusters; flowers of medium size, often 35 to 40 flowers in a single cluster; very sweet scented. Color a clear, decided yellow, a color heretofore unknown in a hardy climbing rose. It is a rampant grower, well established plant, often making a growth of from 10 to 12 feet in a single season. The flowers keep in perfect condition 3 to 4 weeks without fading. A strong plant in full bloom makes one of the finest pictures for plants imaginable.

Baltimore Belle—Literally a sheet of fragrant, pale blush, blooming in early summer. Over 4,000 buds and blossoms have been counted on a single vine at one time.

Tennessee Belle—Large full flowers of a rich blush.

Seven Sisters—Large clusters of Rose, shaded to a white-crimson, very double cluster. Very old and fine.

Queen of the Prairie—A distinct Rose, with deeply sunken center making a cup-shaped flower of much beauty.

Price, per each, and \$ for 20c.; the 2 for \$1.00, or \$1.50 per dozen.

CRIMSON RAMBLER.

"HYBRID WISCHURIANA"

COPYRIGHT, 1899 BY J.L. CHILDS.

COPYRIGHT 1899 BY J.L. CHILDS.

HYBRID SWEET BRIAR ROSES.

Hybrid Sweet Briar.

(Lord Penzance).

These lovely Hybrids, apart from their extreme beauty, are most interesting, being crosses between the Common Sweet Briar and various garden Roses. Like their parent, the common Sweet Briar, the foliage is deliciously scented. The flowers are of the most beautiful tints and produced in great profusion. They are perfectly hardy even in the coldest situations and possess a robust vigor which is quite astonishing; bushes throwing up shoots of ten, twelve, and even fifteen feet high; these when covered with flowers of the most delicate shades have a most gorgeous effect.

Annie, of Geierstein—Dark, rich crimson; branching. Very fragrant.

Brenda—Delicate peach; dainty and charming.

Rose Bradwardine—Beautiful clear rose. Perfect shape, strong and profuse.

20c. each; the 3 for 50c.

MOSS ROSE.

Moss Roses.

The Moss Rose is the acknowledged queen of all Roses. The moss-covered stems and buds show off the delicate loveliness of the blossoms to great advantage. They are perfectly hardy in any location.

Bianche Moreau—Perpetual. Pure white.

Princess Adelaide—Lovely bright pink.

Countess Murinals—Large pure white.

Henry Martin—Fine, clear rose.

W. N. Cranston—Bright crimson-scarlet.

Crimson Globe (Centifolia Moss)—Dark carmine red, very large and full. The freest of the family in production of bloom; finely mossed.

20c. each; the 6 for \$1.00.

Trailing or Memorial Roses.

New and very distinct; of rapid and perfectly prostrate or trailing habit of growth. The foliage is of a deep glossy green color and very dense. It is also evergreen, remaining bright and fresh all winter, and until the new foliage is ready to start in spring. Flowers produced in great abundance during most of the summer, are of good size and borne in clusters. These blossoms are followed by bright red berries, which are highly ornamental. Nothing finer for cemeteries, or for covering banks, rockeries, stumps, etc.

Evergreen Gem—The most wonderful grower of the set, not only evergreen, but growing during mild weather in winter. Stems long, branching, rich bronze color, closely matted. Flowers produced singly on stems, yellow, buff in bud, opening to almost white, two or three inches in diameter, perfectly double, and of a delightful sweet briar fragrance. This will be found most valuable for landscape work, as well as for cut flower purposes. I consider this the best plant of the set.

Universal Favorite—This is the most vigorous plant of the set. The long branching shoots are covered with dense bright green foliage. The double flowers are over two inches in diameter, and of a beautiful rose color, similar to the Bridesmaid, and deliciously fragrant. A grand variety for any purpose.

Manda's Triumph—This grand Rose is of free growth, luxuriant foliage, and produces large clusters of double, pure white flowers, 2 inches in diameter, beautifully imbricated and well formed, very sweet scented.

Pink Roamer—Growth rampant, and the luxuriant foliage partakes more of the Wichuriana. The single flowers, which are produced in close heads, are 1½ inches in diameter, bright rich pink, with almost a white center, producing an effect which, combined with fragrance, makes it one of the most valuable roses in cultivation.

COPYRIGHT 1897 BY J.L. CHILDS.

PINK ROAMER.

20c. each; the 4 for 60c.

MULTIFLORA
SEEDLING ROSE.

NEW MULTIFLORA ROSES.

Roses from Seed, Blooming in 60 Days.

With seed of these new Roses plants may be had in bloom in 60 to 90 days from time of sowing. Plant at any time. They grow quickly and flowers appear in large clusters, and in such quantity that a plant looks like a bouquet. Perfectly hardy in the garden, where they bloom all summer. In pots they bloom both summer and winter. From a packet of seed one will get Roses of various colors—white, pink, crimson, etc.—no two alike and mostly perfectly double and very sweet. Greatest novelty of recent years, and gives unbounded satisfaction.

ROSA MULTIFLORA HYBRIDS—All colors mixed, choicest seed, 15c. per pkt.; 2 pkts. for 25c.

Mixed Flower Seeds, 100 Kinds.

People who wish a great variety of seed at small cost will do well to plant a packet of this seed. It is a mixture of 100 different kinds, all the best sorts, and those which grow and bloom together in wild garden style. It will make a brilliant and attractive bed. Large packet, 10c.; 6 packets, 50c.

— SPECIAL LINES IN —

CHOICE SELECT FLOWER SEEDS

Our Special Improved Strains of Leading Annuals, Perennials and Climbers.

ONLY SELECT SEED OF IMPROVED STRAINS OFFERED.

The ordinary commercial grades of flower seeds, such as are usually sold, can be and are sold at a very low price. They are grown and harvested in large crops, much like grain. They are produced cheaply, sold cheaply, and are, in fact, cheap in every sense of the word; and he who sows them has no right to complain at their poor quality. They cannot possibly be anything else. Seed of high quality can be produced only by thorough, careful, painstaking and expensive methods. We do not offer our customers the ordinary commercial grades of seed. Our stocks are special strains of special varieties bred up to the highest mark of perfection and selected with great care, and for this reason we grow and offer but a limited number of varieties,—only those which are of the greatest merit and sure to give satisfaction everywhere. The very best varieties, bred up to an unequalled mark of perfection, has made our seeds famous the world over.

We sell only select stocks of special varieties, including Annuals, Climbers and Perennials. The two latter are indicated by the word CLIMBER or PERENNIAL, following name. Seed of CHOICE HOUSE PLANTS and GENERAL FLOWER SEEDS are offered under their respective headings. See pages 75 and 80.

For the best summer display the garden is dependent upon flowers which are grown from seed sown every year. There are thousands of varieties of them, some good, some indifferent, but the great majority are poor, or in some respects unsatisfactory and not desirable for general cultivation. With a view to offering our customers only the very best varieties, those which cannot fail to produce good results in every part of the country, we have for years carefully grown, tested and selected to ascertain what sorts possessed superior merits. The list here presented is the result of our labor. It contains the very best of all sorts, and all which are really and generally desirable. We might offer one hundred varieties of Asters or fifty varieties of Balsams, Phloxes, Poppies, etc., but there would be no advantage in so doing. On the other hand, it would be a decided disadvantage, for our customers might therefore fail to select the best kinds.

CLIMBERS.—Every garden, every cottage, every fence, wall, stump or old tree, is beautified by graceful and profuse flowering vines. Vines are nature's draperies, and are essential to any and every attempt to beautify one's home surroundings. Our Sweet Peas, Morning Glories and Nasturtiums are particularly fine.

PERENNIALS.—These are all hardy plants which live in the garden year after year, blooming every spring or summer, with little or no care. They are exceedingly beautiful, while many of them are among the brightest gems of the floral kingdom. As a rule, they bloom early in the spring, when the garden is almost destitute of flowers.

ANNUALS.—All sorts, not designated as Climbers or Perennials are classed as Annuals, such as Asters, Phloxes, Zinnias, etc., of which our strains are the finest in the world.

CULTURE.—As a rule, seed may be sown in the open ground about corn-planting time, or they may be started in the house or in hot-beds earlier and transplanted to the garden when danger of frost is over. A rather light and moderately rich soil, thoroughly spaded, is most desirable. Do not grow the plants too thick. Keep the weeds down and the surface of the soil well stirred with a hoe or rake during the summer, especially if the weather is dry. Pretty effects are produced by massing different colors in Asters, Phloxes, Zinnias, Verbenas, etc., yet mixed colors are always showy and pleasing.

Prices:

We offer regular sized packets at a stated price, and will give THREE packets of any ONE kind for the sum that TWO packets would cost. For instance, any one variety listed at 5c., three packets of it may be had for 10c. Any one 10c. packet, three packets may be had for 20c.; three packets of a 15c. sort for 30c., etc.

MIXED BEE OF TALL AND DWARF ASTERS.

- New Rose**—Tall sort, about two feet in height. One of the very best varieties, and a profuse bloomer. Outer petals are full recurved, and inner petals beautifully incurved and tubercled like the Rose. Mixed colors. A favorite sort.10
- New Rose, Pure White**—Pure, peevily white, extra superior quality of working.10
- New Rose, Dark Red**—Very rich, clear color, and extra quality of working.10
- New Rose, Blue**—A beautiful shade of clear blue. The white, red and blue sorts are superb for flower beds, and contrasting finely with each other.10
- Vick's Branching, Pure White**—A strong variety, of the branching habit, and certainly a great improvement in the season than any other variety. The flowers are very large, often four inches in diameter, borne on long stems, reaching twenty to thirty inches in height. The petals are double, and are divided or edged in such a manner as to give the appearance of being a great many layers of petals. The resemblance is particularly noticeable in the early stages of the season.10
- Vick's Branching, Mixed Colors**—A strong variety, of the branching habit, and certainly a great improvement in the season than any other variety. The flowers are very large, often four inches in diameter, borne on long stems, reaching twenty to thirty inches in height. The petals are double, and are divided or edged in such a manner as to give the appearance of being a great many layers of petals. The resemblance is particularly noticeable in the early stages of the season.10
- Dwarf Victoria, Mixed Colors**—The finest Aster grown. Equally good for bedding, pots or exhibition. Plants one foot in height, the foliage almost hidden by the plumy flowers, three or four inches in diameter, of the most beautiful form, and the most exquisite colors to be found.10
- White Wave**—An extra fine white variety. Blossoms of fine shape, double to the center and peevily white. A profuse bloomer; grand for bedding or for pots.10
- Liliput Flowered**—Plant of medium height, almost smothered beneath a cloud of tiny button-like flowers as double as anything well can be. A charming sort.10
- Truffaut's Peony-Flowered**—A valuable and standard variety. The most perfect Peony type known. Tall growing, and bearing an enormous quantity of extra large, double flowers beautifully incurved and of every shade, from pure white to glowing crimson. Twenty colors or more mixed.10
- Reine des Halles**—A French introduction of much merit. This Aster is of a medium height, robust and free flowering; three weeks earlier than any other variety known. Mixed colors.10
- New Yellow Quilled**—A decided novelty, in color being a really good lemon yellow. Flowers beautifully quilled.10

- Dwarf Chrysanthemum-Flowered**—Plants ten inches in height, perfect pyramids of bloom. Fine for edging, and especially valuable as a late bloomer. Mixed colors.10
- Dwarf Bouquet**—Very compact, but six to eight inches high, a mass of blossoms from bottom to top. Mixed.10

- Shakespeare**—Dwarf variety, six inches in height. Novel shades of coloring, large globular flowers, and very floriferous. Each plant looks like a unique little bouquet set in the ground, so compact and crowded with blossoms. The cut shows their habit to good advantage. Just the thing for bordering a bed of taller growing sorts.5

SPECIAL OFFER—For \$2.00 we will send one packet each of these six superb ASTERS.

Mixed Asters.

- A bed of mixed Asters, all kinds, colors and varieties, is certainly attractive. We offer mixtures of both dwarf and tall-growing sorts separate.
- Mixed Tall-Crowing Asters**—All sorts and colors; will make an interesting and attractive bed. Large pkts.20
- Mixed Dwarf Asters**—All the low-growing or dwarf sorts. Large pkts.15

Alyssum.

Blooms
fall. S
Sweet

Little Gem

Antirrhinum, Giant Scented, OR SNAPDRAGON.

A new giant-flowered strain of the grand old Snapdragon, which in size and beauty of bloom, either in pots or garden, almost equals Gladiolus.

Giant White This remarkable new plant has jumped into fore-most place among others. White bloomers. No novelty in our garden, but it has won the attention or received praise equal to this. It is a perennial bloomer, compact and tumbling in habit, sending up flower spikes by the dozen, one to two feet in length, almost as large as and more beautiful than Gladiolus. Color, pure white, with lemon-tinted throat and of a lovely fragrance. Flowers ready two weeks after being cut. It has created a sensation in the New York flower market.

Giant Yellow Exactly like the above except in color, which is a beautiful canary yellow. 10
Giant Crimson Largest of all. Exceedingly fine. 10
Giant Mixed—Many colors, including the above, all large and exceedingly fragrant. Try them, both in garden and pots. 10

Ambrosia

This is a hardy annual which has been known a long time, though it has never been introduced. Its merits are long, spiral stems, covered with beautiful green foliage and seed buds, which are exceedingly fragrant. It is as desirable as the Rose Geranium as a plant with fragrant foliage, and for making up into bouquets and other floral work its beautiful long spirals of lovely green are unsurpassed. It is one of the easiest plants to grow, and seed can be sown early in the open ground. It takes its popular name, Ambrosia, from the unsurpassed fragrance of its foliage. 10

Aquilegia, or Columbine.

(PERENNIAL.)

One of the best of the early summer perennials. Curious flowers, extremely graceful and beautiful, and borne in great quantities high above the foliage, which itself is very beautiful and attractive. Extra fine for cutting. Per pkt.
Prize Mixture—This strain embraces more than one hundred varieties, double and single, and of all shapes and colors. 5
Chrysantha—Large golden yellow. 10

Flowering Beans.—(Climber.)

Flowering Beans are as beautiful as Sweet Peas, and fine for tall luxuriant climbers. Some of them are also finely sweet scented.

- Japanese White or Wistaria Bean**—This new flowering Bean is from Japan, and produces its long clusters of fine pure white flowers in the greatest profusion. These flowers so closely resemble the glorious white Wistaria, and are borne in such fine Wistaria-like clusters, that it is most appropriately called the White Wistaria Bean. It is a fine, rapid climber, and just covers itself with flowers, which, in addition to their beauty, are finely scented. New last year. 10
- Pink Wistaria**—Much like the above but a rich violet, pink and white followed by very ornamental and highly colored dark ebony-red pods. New. 10
- Scarlet Runner**—A fine old favorite with masses of intense scarlet blossoms. 5
- Mixed Sorts**—Many colors. 10

Ageratum Princess Pauline.

A lovely dwarf everbloomer, crowded with flowers every day in the year. As a pot plant it is perfectly charming, and bedded out it flowers profusely from May till killed by frost. Flowers borne in dense clusters, lovely sky blue with a clear white center. The most beautiful Ageratum known, and one of the very choicest of flowering plants, thriving under any and all conditions. 10

Ageratum.

One of the most useful and profuse-blooming plants known. Its very name, "Ageratum," meaning ever-young, refers to its ever being in bloom and to the long time each flower remains in beauty. A single head of Ageratum will remain fresh and perfect for a month in the open air, and from six weeks to three months in the window or greenhouse, where not exposed to storm and wind. Not even the Petunia will give a greater quantity of bloom or last longer in flower. This makes the Ageratum almost indispensable either in the house or garden. The new dwarf varieties are very bushy and compact in habit, and exactly suited for edging, carpet-bedding, etc. Give light, rich soil. No trouble whatever to grow. Per pkt.

- Little Gem**—A beautiful border variety. A sheet of delicate blue flowers the whole season, and very compact in growth. 5
- Little Dorrit**—Like the above, but pure white. 5
- Lasseauxi**—Compact plant with charming rose-colored flowers. An unusual shade. 5
- Canary**—Compact in habit, light canary yellow in color. A very novel shade in these flowers. 10

AGERATUM.

Bellis.—(Double Daisy.)

Beautiful double flowers that appear in early spring if plants are slightly protected over winter. Blossoms also very early from spring-sown seed, as plants bloom when but two to three inches high. If given a cool, moist, shady location, will bloom all summer, even in the south. As pot plants they are charming and will bloom freely all winter, as they delight in cold weather. In the open ground, cultivated exactly as you would Pansies, and next to the Pansy, it is the most charming little garden flower. Per pkt.

Double, Mixed Colors—White, crimson, rose and variegated; very double..... 5

Double, White—Pure color; handsome flower..... 5

Maxima, or Giant Daisy—No amount of praise can be too lavish for this new form of the charming double Daisy, which, next to the Pansy, is our most cherished early spring flower. The flowers are from one to three times larger than the ordinary double Daisy, very perfect and double and of lovely colors, ranging from pure white through bluish pink, rose, etc., to deep crimson. Many of the plants produce on one stem a cluster of 13 to 20 blossoms, instead of the usual solitary one. The blossoms are very large, unique and beautiful. Not only do they bloom early in the spring, but continue all through the summer and fall, and also make splendid pot plants for winter blooming, flourishing in cool windows and rooms where few other plants will survive..... 10

Canna.

Cannas are now the most popular bedding plants in existence, and certainly among the most striking and beautiful. How could it be otherwise, when in this one plant is combined stately habit and tropical luxuriance, superb foliage and brilliant blossoms, ever increasing in beauty and profusion until the crisis of autumn cut it down? New sorts are constantly produced from seed. Star of 91 and C. Childs were grown from just such seed as we offer of the famous French hybrid strain, that has been bred up to such a high standard that the individual flowers are the size of Gladiolus blossoms, and borne in great spikes or heads of bloom that make them grand for either summer bedding or greenhouse decoration in winter. Seeds should be filed at 60° and soaked for twenty-four hours in hot water before planting. Start early in house, but do not plant out until all danger of frost is over. The bed can scarcely be made too rich and mellow. Give plenty of water, and seedling plants will be in bloom by the middle of July and continue blooming until frosts. Per pkt.

Mixed Sorts—A choice collection of all varieties..... 5

Dark Foliage—Mixed; all dark, beautiful foliage sort..... 5

Mad. Crozy—A magnificent sort..... 10

Crozy's Dwarf Flowering—Mixed colors. These can be classed among the grandest of all flowering plants. They commence blooming very early from seed and continue all summer, making a display which, for brilliancy, cannot be surpassed..... 10

New Hybrids—Choice hand-saved seed from the grandest new Hybrid varieties, with artificial fertilization, and will give magnificent results..... 20

Candytuft, Little Prince.

A beautiful dwarf Candytuft, growing not over 6 inches in height, but spreading out and covering a considerable space, which is for a long season a perfect carpet of snow-white bloom. Fully equal to the grand perennial Candytuft. It is a very fine thing..... 10

Candytuft.

This good old annual has been a garden favorite for three hundred years. A fine edging plant, and good for cutting. Sow very early in open ground, and keep seed heads picked off for a constant succession of bloom. Per pkt.

All Colors, Mixed—Many fine shades..... 5

Pure White—A favorite for floral work..... 5

Dark Crimson—Good, bright color..... 5

Tom Thumb—Mixed colors. The ideal Candytuft, Dwarf, bushy plants, growing only 4 to 5 inches high, but bearing most profusely compact spirals of bloom of great beauty. Superb..... 10

Candytuft, Hardy.—(Perennial.)

One of the very best early perennials, extra fine for cemetery use, as the plants are a solid mass of white at just the time when flowers are most scarce, and as the plants are perfectly hardy they need no fussing with. Those who have never grown the Hardy Candytuft have missed a floral treat.

Fruiti—Dwarf, extra early and fine..... 10

Sempervirens—Large flowering, pure white..... 5

Carnation, New Marguerite.

A New Strain of Dwarf Perennial-Blooming Carnations Which Flower in 3 or 4 Months from Seed.

This is still the best carnation yet raised, and here is a description of its qualities. It has always been a favorite with the florists, and its blossoms, which are of a pure white color, are of a branching habit, and are of a most beautiful and perfect form. It is a dwarf perennial, and will flower in 3 or 4 months from seed. It is a most desirable variety for the florist, and is well adapted for the garden. It is a most desirable variety for the florist, and is well adapted for the garden. It is a most desirable variety for the florist, and is well adapted for the garden.

HARDY CARNATION.

Malmison—The flowers are of a pure white color, and are of a most beautiful and perfect form. It is a dwarf perennial, and will flower in 3 or 4 months from seed. It is a most desirable variety for the florist, and is well adapted for the garden. It is a most desirable variety for the florist, and is well adapted for the garden.

One packet each of the nine above offered for 60c.

CHRYSANTHEMUM
STORM-PETREL

Chrysanthemum Storm Petrel

This is a hardy perennial, with finely cut, fern-like foliage and dwarf growth. It blooms at all times of the year if kept in pots, and out of doors, until after hard frosts have killed almost everything else. It is a very profuse bloomer, and the pretty, rosette-like flowers are of pure white, very large and double. It blooms early the first year from seed, and makes a fine plant for both summer and winter..... 10

Canary Bird Flower—(Climber).

A dainty vine with beautiful cut leaves and pretty delicate flowers of a clear canary yellow. From the color of its blossoms, and also from a fancied resemblance of their shape to a bird with wings expanded, the plant obtains its common name. A pretty vine for the window or for a sheltered location out of doors..... 5

CAMPANULA

CANARY
BIRD
VINE,
COPYRIGHT 1897
BY J.L. CHILDS.

Campanula—(Perennial).

Beautiful plants, known as Canterbury Bells. Large bell-shaped flowers, very cheerful and attractive. Colors, blue, white, pink, etc. Sow seed in open ground, cover lightly and thin plants to stand twelve inches apart.
Double, Mixed Color s—A fine strain..... 5

CLITORIA.

Clitoria Ternatea.

A splendid perennial shrubby plant which is suitable for pots or the garden, and which blooms freely the first season from seed. Plants grow in a neat, bushy form, with handsome foliage and an abundance of large, pendulous blossoms, shaped like a Centrosema, and of a dark, rich indigo blue color. A very fine plant indeed, and one that is perfectly hardy in the open ground, blooming finely year after year. It is also a good plant for window culture, blooming with ease and freedom, and always attractive..... 5

CENTROSEMA GRANDIFLORA.

Centrosema Grandiflora

(Climber.)

This new vine has come to stay. It is easy to grow, quick to bloom, beautiful in flower and leaf, and is a hardy perennial, lasting for years. It will flower the first season from seed, and autumn frosts will find it still in bloom. It is a low, graceful climber, growing only six to eight feet high, which makes it far more suitable for a low trellis or lattice work, or to train around a door or window in summer, than a taller, larger-leaved vine would be, and its masses of large, inverted, pea-shaped blossoms, two inches or more across, and borne in clusters of four to eight flowers together, are very showy and pleasing. Fill a small vase with its dainty, bright flowers and foliage alone, and see how lovely they are for cutting. In color they range from rosy violet and reddish purple, with exquisite feathering or bordering of pure white to pure snow white. The rosy, violet shades are the most common, but as the buds and the back of the flowers of the dark varieties are pure white, each vine has the appearance of bearing different colored flowers at once. The winning way in which the flowers look up at one has won them the fanciful name of Look-at-me Vine. Per pkt.

Mixed—All colors..... 10

COREA SCANDENS.

Cobrea.—(Climber).

One of the finest of all climbers, equally good for out-of-doors or for house culture. Pretty foliage and large bell-shaped flowers that open a clear green, but turn to a lovely purplish blue. Plant seed edge-wise in moist but not wet soil; cover to prevent evaporation and do not water again unless soil becomes very dry. When seedlings appear water with great moderation until out of the seed leaf.

Scandens—Fine bluish purple..... 5

Childs Cosmos.

A variety of very beautiful flowers, the *Pauloni* and *Chrysanthemoides* of New York, and many others, which will bloom from September to November. In the North they are best in position, as severe frosts injure the plants. One of the best is the *Pauloni*, a port plant by being the best of all, and the flowers are very heavy and the leaves are very large. The flowers are of the height of from 1 to 2 feet, and the leaves are very large. The leaves are dark green, and the flowers are of a pale pink color. The flowers are of a graceful, daisy-like form, and the petals are very large. The *Pauloni* is a very beautiful flower, and the flowers are of a pale pink color. The *Chrysanthemoides* is a very beautiful flower, and the flowers are of a pale pink color. The *Chrysanthemoides* is a very beautiful flower, and the flowers are of a pale pink color.

- Childs Hybrid Mixed Colors—Very beautiful, flowers of various colors, from white to deep crimson. 10
- New Margaret—Very beautiful, flowers of various colors, from white to deep crimson. 10
- Giant Fancy Mixed Colors—Very beautiful, flowers of various colors, from white to deep crimson. 10
- Monster White—Very beautiful, flowers of various colors, from white to deep crimson. 10
- Monster Red—Very beautiful, flowers of various colors, from white to deep crimson. 10
- Monster Pink—Very beautiful, flowers of various colors, from white to deep crimson. 10
- Tints of Dawn—New and distinct varieties. The flowers with a white ground, and the petals are flushed with delicate pink, and the centers are of a very beautiful color. 10

One plant each of the 7 sorts for 50c.

EARLY-FLOWERING COSMOS, JULIA E. LEE.

Julia E. Lee—It was Miss Julia E. Lee, of New Mexico, who first sent us seed of the Cosmos and enabled us to introduce it to the world, and all will admit that the world owes her much. This new strain, which we have named in her honor, is so early in blooming that seed sown in the open ground at corn-planting time will commence blooming in July and continue until frost. What more need to be said of it? Its flowers are large and fine, and show all the rich and delicate colors (from crimson to white) found among Cosmos. We are sure that this new extra early flowering strain will be heartily welcomed by all.

Per pkt.

Klondyke—A cross between *C. Sulphurea* and Childs' Hybrids. It begins blooming very early in summer, and continues in great profusion until late fall, reaching a height of 3 to 4 feet. Flowers rich orange-yellow in color, and 2½ to 3½ inches across, differing somewhat in shape. It is a novelty in every respect.

10

Cypress Vine

(Climber.)

One of the prettiest vines imaginable; slender vines, thickly clothed with dark green, feathery foliage of great beauty, and dotted with intensely bright, velvety flowers that shine like little stars against their glossy background of green. Fine for training to small trellises or to run up poles or strings. Though old and well known, the Cypress Vine is one of the neatest and most attractive of the Annual Climbers. It belongs to the Morning Glory family. Mixed colors, white, scarlet, etc.

CYPRESS VINE

COPYRIGHTED 1897

BY J. L. CHILDS

Celosia.—(Cockscomb)

The old Cockscomb of our mothers' gardens, immensely improved of late years. Its huge combs, from six inches to a foot across, are of the most fiery gorgeous colors, unlike anything else in the floral kingdom. Good specimens are very fine all the late summer and autumn, and our best parks make use of thousands of them for autumn bedding. Start in heat and transplant in open ground after danger of frost is over. As pot plants they are also much admired, their beautifully fringed and ruffled heads attracting much attention.

Per pkt.

Dwarf Mixed—A fine mixture of all colors of dwarf habit, but producing enormous heads of bloom. Elegant for pot.

New Tree—This splendid sort is so hardy and vigorous that seed may be sown in open ground in the spring, instead of starting it under glass. It grows rapidly, reaching the height of five or six feet, and branches freely, producing several heads of enormous size, and dark, rich crimson in color. It is very effective, and should be in every garden, for not only is it the easiest to grow, but the most showy of all Cockscombs.

10

Cleome.—(Spider Flower.)

A garden flower of superior merit, one that will grow vigorously in any situation and bloom profusely all the time from spring to late fall, caring not for prolonged droughts or for continuously rainy weather. We know of no flower which will stand adverse circumstances so perfectly as this. The flowers are borne in large clusters; some are of snowy whiteness, others fine pink, with long, scraggy stamens, which stand out in all directions, suggesting its common name, "Spider Flower." It is fine for a separate clump or for the center of a bed of other flowers, where a tall-growing, attractive plant is desired. Mixed colors.

5

Golden Wave—A row of this plant is truly a wave of gold, and nothing but its brilliant yellow color can be seen, so numerous are the blossoms. It is of compact growth; flowers very large, exceedingly showy and are produced in great masses all summer. A most showy plant, rivalling in beauty the famous *Coreopsis Lanceolata* and the *Cosmos*.

5

CENTAUREA MARGUERITE
"IMPERIALIS"

COPYRIGHT, 1900
BY
J. L. CHILDS

New Marguerite Centaureas.

These are the most improved garden flower plants of the season. The superb new Centaurea Imperialis surpasses scores of other varieties in the richness of its color, the length of its long, wiry stems, and are exceedingly graceful, while for cutting, for this season, no flower can surpass them. The new Centaurea Americana Gigantea is of the most lovely texture and color. Its seed is on a ground very rich in nutritive value and very early and valuable for medicinal purposes. It is a very early bloomer, and its flowers are for cutting, but in its grandness with. They grow like a weed in any situation. Per pkt. 5

Pure White..... 5
 Odorata Purpurea—Fine, Pale, contrasting fine..... 5
 Chameleon—Fine yellow..... 5
 Mixed, All Colors..... 5

Centaurea, Imperialis.

This is a new and greatly improved strain of C. Marguerite. The flowers are larger and more vigorous, with less tendency to rot than the old Marguerite. They possess the same richness of color, fragrance and long, graceful stems. But this is not all. This new strain, Imperialis, is so strong and vigorous that unfavorable wet and hot weather, which kills portions of the Marguerite, have no effect on it, and it blooms profusely all the season. 10

Centaurea, Americana Gigantea.

A giant-flowering Centaurea, with white blossoms fully 4 inches across. The petals are so constructed as to resemble rich lacework. Exceedingly handsome. 30

COPYRIGHTED 1893 BY
J.L.CHILDS.

Dahlia.

Good Dahlias can be grown from seed, and plants will bloom the first season from the seed. Anyone who can raise a Zinnia or a Morning Glory can grow Dahlias from seed. They are remarkably easy to germinate, and from the very seed leaf the plants are stocky and sturdy. Seed sown in the house in March or April will produce flowering plants as soon as plants grown from tubers. Some of the finest, largest Dahlias, and the richest colors we have ever seen, were among seedlings. Give good soil and never let the plants suffer for water, and our word for it, you will be more than satisfied. Out of a large paper of seed no two plants will be alike in flower, while there will be every color represented, from snow white to blackish maroon. Start seed in house and transplant to open ground after frost is gone.

- Double Large Flowering, Mixed**—Will produce some magnificent varieties..... 15
- Double Pompon, Mixed**—Extra choice strain..... 10
- New Single, Mixed Colors**—Flowers very large and of rainbow color. Exceedingly popular as cut flowers.... 5
- Gracilis, Mixed Colors**—Fine cut foliage and a profusion of brilliantly striped and flecked blossoms..... 10
- Cactus**—A new class of broad-petaled double flowers, esteemed by many the finest of all. Very distinct and extra for cutting..... 20
- Imperialis**—the "Lily Dahlia," the most beautiful of all Dahlias. It grows 10 to 12 feet high, and bears panicles of elegant Lily-like flowers measuring 8 inches from tip to tip of petals. The color is a very delicate mauve, almost white, veined with old pink around the orange-yellow center..... 15

Diamond Flower.

A dainty little annual with tufts of tiny foliage and beautiful little white and violet-blue flowers that bloom within a month from the time seed is sown. It will grow in the open ground, over rock-work, or in pots, never exceeding three inches in height, and rarely two. The tiny flowers have a glistening sheen that has given them their name of Diamond Flower, and being surmounted by a wealth of bright-green foliage, they show to a wonderful advantage. For pot culture in winter it is just superb. Sprinkle a few seeds in a small pot or saucer, or in pots where other plants are growing, and within a month you will have the most charming mat of foliage and flowers—covering the surface of the soil like moss—that you ever saw. In the garden it will grow and seed all summer, covering the ground with a perfect carpet of beauty..... 10

Datura.

- This is a majestic garden plant which is easily grown, and which furnishes an abundance of magnificent large blossoms. It has a very tropical appearance. Per pkt.
- Sweet Nightingale**—One of the finest garden flowers. Plants rapid and bushy growers, crowned with great Lily-like blossoms a foot in length, like an enormous trumpet, white as snow and deliciously scented. It is a fine plant for the center of a bed-of-evening bloomers or to use at the base of a rockery. One plant in bloom will scent up a whole garden or lawn..... 10
 - Cornucopia**—Much like the double Brugmansia, except it is more dwarf in habit, and a fine lilac and white color. Blooms in two or three months from seed, and is a superb flower for the garden, or as a pot plant both summer and winter. Flowers like great trumpets: quite double and of fine fragrance..... 10
 - Golden Queen**—A magnificent sort, with an immense trumpet-shaped double bloom of a creamy yellow color. It is of dwarf, stout growth, with fine foliage and the great blossoms, which are a foot or more in length, show to wonderful advantage. New and very fine..... 10
 - Mixed Colors**—Many fine sorts, both double and single..... 10

DIANTHUS.

COPYRIGHTED
 BY J. L. CHILDS
 1903

Dianthus

An indispensable garden flower and one fitted to adorn the poor man's garden or the spacious grounds of the millionaire.

flower that is almost perfect.

Never so large as the flowers of the Emperor, but in height, reaching to 18 inches, with striking and varied colors. Per pkt. **Diadematus, flora penna**—Some of the most beautiful flowers of the rich shades of red, yellow, orange, and blue. Some of the most striking and beautiful of the group.

Double White—A beautiful variety with double flowers of pure white. **Eastern Queen**—A beautiful variety with double flowers of pure white, with a pink center, and a variety of other colors.

Imperial—Double flowers of pure white, with a pink center, and a variety of other colors. **Brilliant**—A double variety with a center of double flowers of dark, rich red, as large and fine as Ceramics. **The Bride**—A double variety with a brilliant, glowing crimson center, shading into pink bands. **Mixed**—Our own mixture of the most beautiful double and single sorts, and of every desirable shade or particular marking. This will give a bed of beautiful flowers, and scarcely two plants will be alike.

Delphinium.—(Perennial.)

One of the earliest perennials known, and increases in beauty each year. Tall, stately growing, with immense spikes of the most brilliant flowers in all shades of lavender, purple, pale, in blue and deep, dark blues. Sow seed in a flat or very early in spring, and plants will bloom the first summer. Very hardy. Give half shade.

Mixed Colors—A variety of colors. Per pkt. 7

DELPHINIUM

DIGITALIS

Digitalis.—(Perennial.)

One of our most striking perennials. Thus, with the double Hollyhocks and the Delphinium, form a stately trio of tall-growing plants of which nothing finer can be chosen for backgrounds, center of wide borders, interspersing with shrubbery, etc. If plants are not allowed to seed, they are crowned for months by long pyramidal spikes of lovely pendant thimble-shaped bells, snow white, rosy blush, or exquisitely shaded or spotted. The blooms are nearly or quite two inches in length, and lap each other with the utmost regularity. For the center of large bouquets they are almost equal to spikes of Gladiolus. Per pkt.

Gloxinoides Grandiflora—A strain with large, beautiful Gloxinia-like blossoms. Extra. Per pkt. 5

Everlasting Flowers.

These are flowers of eternal beauty—those which never fade. They are unsurpassed for winter decorations and may be made up into bouquets, baskets, vases, etc. They last for years by being cut and dried when in bud and blossom. The following are all exceptionally beautiful and easily grown.

- Per pkt.
- AMMOBIUM ALATUM**—A very useful everlasting. Plant robust and great bloomer. Flowers pure white and double. Dry as recommended for Acrocliniun, and be sure to cut plenty of buds, as they dry beautifully. 5
 - ACROCLINIUM**—Probably the most beautiful everlasting known. Flowers pure peach white, or an exquisite soft clear shade of pink; with bright golden center. Cut the first day they open or the center becomes discolored. Hang the bunches, heads downward, in the shade to dry, and the flowers will appear as perfect as when gathered. 5
 - HELICHRYSUM**—One of the most beautiful of all everlastings. Plants grow two feet high, and are very hardy, blooming until late in autumn. An easy plant to grow, and flowers are very bright. The white and light colored varieties color easily, and are often dyed in shades not otherwise obtainable in everlastings, and used in wreaths, crosses, and winter bouquets. Flowers should be picked before fully expanded, especially for dyeing. Colors, white, yellow, orange, crimson, etc. 5
 - Monstrosum**—Mixed colors, very large. 5
 - Dwarf**—Mixed colors, compact and free flowering. 5
 - Fire Ball**—Deep fiery red, large and double; new. 5
 - Golden Ball**—Golden yellow; new. 5
 - Snow Ball**—Pure white. 5
 - GOMPHRENA**—Remove cotton covering from seeds, and start in heat, if possible. Good for garden, and make neat pot plants. Plants bear great quantities of clove-like blooms, altogether different in appearance from any other everlasting, and very attractive buds as well as full-blown flowers; extra fine for winter bouquets. Mixed colors. 5
 - RHODANTHE**—A fine everlasting, good for the garden, and a pretty pot plant. The most delicate and graceful of this delicate class. Try it by all means and cut blooms early for drying. Bright pink and white, mixed. 5
 - XERANTHEMUM**—An easily grown everlasting, and furnishes the only shades of blue and purple to be found in this class. Mixed colors. 5

Grasses, Ornamental.

The everlasting would be quite useless without their setting of soft, pretty grasses in winter bouquets. Grow a good quantity of these elegant grasses. There are many of them quite ornamental in the garden and are all useful for cutting for summer bouquets, as well as for drying for winter or for dyeing.

- Mixed Dwarf Annual Grasses**—Many fine sorts. 5
- Mixed Tall Annual Grasses**. 5

COPYRIGHT 1901 BY J.L. CHILDS.

SPECIAL OFFER.

For 25 cents we will send one packet each of Ammobium, Acrocliniun, Helichrysum, Rhodanthe, Xeranthemum, Gomphrena, and the Tall and Dwarf Mixed Grasses, in all 8 packets for only 25 cents.

Gourds.--(Climber).

Well-known climbers, with the most fantastic and grotesque fruit imaginable. Fine for covering sheds, training over fences or bush piles, and always sure to attract the attention of the children, who love to play with pretty striped and oddly crooked fruits. Keep perfect for years.

- Mixed Sorts**—All sizes, shapes and colors.....10
- Nest Egg, Improved**—A striking vine when hanging full of its pretty, curious fruit, that so closely resembles smooth, well-shaped hens' eggs that a hen might well be excused for claiming them as her own production. As the shells become very tough and hard they do not crack or burst open in freezing weather, and are thus very useful for nest eggs. Very ornamental as well.....10
- Dipper**—Another useful Gourd, that, as the fruit is light and strong, and does not rust or rot or heat easily, is just right to use in dipping hot liquids, soap, etc., besides being useful for birds' nests, fancy hanging baskets, etc..... 5
- Sugar Trough**—Enormous hard-shelled fruit, holding from three to ten gallons each, and as they never rust or rot, and are very light and strong, are just right to use as receptacles for lard, salt, seed corn, soap, etc., or to use as nesting boxes, buckets, etc. They last for years..... 5
- Fragrant**—Oval round fruits 2 to 3 inches long, and nearly as thick through. Pretty striped or mottled shells, the inside filled with musk melon-like flesh and seeds. One fruit will perfume a room with the most delicious odor.....10

EARLY LUFFA?

COPYRIGHTED BY J.L. CHILDS

Early Luffa—Seed sown in the open ground in any Northern State or Canada, like Cucumbers, will bear and ripen an abundance of fruit before frost. The lace-like net-work of fibre which forms inside the fruits is a very useful article, and is used for various purposes, such as dish-rags, sponges, and even for bonnets and other

millinery work. The flowers of this variety are also very numerous, large and showy.....10

DOUBLE HOLLYHOCKS

Hollyhock. — (Perennial.)

One of the finest of all perennials, and unsurpassed as a stately, imposing plant for backgrounds, screens, center of wide borders, etc. Plants grow from four to six feet high, and bear pyramidal spikes of large, ruffled-like flowers of every shade and color, from pure white to almost black. The yellow, magenta, rose and black are intensely pure and deep, while the pure white, pale lemon, soft pink and lavender shades are exquisite, soft and delicate. The purely blooms of this pure white Hollyhock are as fine for all floral work as the most double Rose or Camellia. If seeds are started very early, plants often bloom the next September.

Double White—Pure and fine, 10
 " **Magenta**—Fine, bright color, 10
 " **Lemon**—Pure, bright, 10
 " **Pink**—Soft delicate and 10
 " **Black**—Rich, elegant, 10
Double, Mixed Colors—Very showy, 10

Mammoth Allegheny—Flowers of a rich, cross, finely fringed, of such exquisite shading as to resemble Colors, shaded, in 10

Lobelia.

Containing 100 varieties in pots, edgings, baskets, etc. Grounds of A most charming of in the most flowers.

Crystal Palace—..... 5
New Double Dwarf, Mixed Colors—A low, of 10
Royal Purple—Extra fine, with dark stalks and large, deep blue flowers, having distinct white 5
Coldense—A compact, low-growing variety, the foliage of which is golden-yellow, and is most charmingly set off by the hundreds of blossoms which the plant carries of the brightest, deepest blue, with a pure white eye. We have never seen in one plant a more charming contrast between flowers and foliage than is shown in this most superb novelty. 5

Linum Perenne. — (Perennial.)

Not entirely new, but very rarely seen, although it is one of the most beautiful of plants that is appreciated when seen. It is a very justly described. We will not attempt to describe it, but it conveys the impression of its great beauty; this the gardener never knew until they see it, but will say that it is a highly perennial, sending up numerous stems which send out 2, very branches, which are clothed with a growth of soft, hair-like foliage. At the tips of the branches are produced large, silver-lipped blossoms, borne with stem and growth that they appear to be floating in the air. The effect is beautiful. No garden in the land should be without this exquisite flower.

Mixed Colors—..... 10

Larkspur.

An old-fashioned, but from the most valuable annual, with large, compact spikes of showy flowers, in shades of white, pink, red, blue, etc. Sow early in open ground.

Hyacinth-Flowered—Great Hyacinth-like spikes of large double flowers. Mixed colors. 5

Lobelia, Pumila Splendens.

A great novelty. This Lobelia stands our hot, dry climate, and blooms perfectly all summer, when others fail. It is a perfectly exquisite plant, dwarf, compact, rich, deep blue, with white center. Fine also for pots. 10

Marigold.

Petted by our grandmothers, neglected by our mothers, now once more on the high wave of popularity. Bright, showy flowers, that only need the slightest care to do well and blossom freely. Per pkt.

French, Mixed Colors—Double flowers; rich, dark shade. 5

Dahlia-Flowered—Very rank and tall, studded with enormous double Dahlia-like flowers. The colors range from the palest canary yellow to a deep, full orange. 5

Legion of Honor—A most sterling variety. Plant very dwarf and compact, bearing its flowers well above the foliage. These are of large size and exceedingly striking, owing to the wide contrast in their colors. The center of the flower is a bright brownish red, while the outer half is fine golden yellow. It is really the prettiest Marigold we have ever seen, and should be in every garden. It blooms profusely all summer, and in autumn especially, the whole plant is a solid pyramid of bloom. 5

Mimulus.

Beautiful little plants, with the daintiest and prettiest flowers imaginable. Will not succeed in hot sun, but is just the plant for cool, shady beds, or for baskets or pots in poorly lighted windows. Seeds fine and need care in sowing. Great favorite with those who have once grown them. In exquisite coloring these flowers rival the Gloxinia. Per pkt.

Mixed Sorts—All colors (MONKEY FLOWER)..... 5

Moschatus—(MUSK PLANT). Well known for its fine musky fragrance..... 5

Double Mixed—Double flowers; splendidly spotted..... 10

Tigrinus Grandiflorus—Flowers size of a Petunia, and of very bright and striking colors; all spotted, tigered and variegated in a most charming manner..... 10

Nicotiana.

Fine for separate clumps or masses, or for the center of beds of evening bloomers. One of the easiest of all plants to grow, and equally fine for outdoor culture or for winter blooming in pots. Its long, tubular, star-pointed flowers are pure white, exceedingly fragrant and very profusely borne. It is one of the few plants that will flower well without a single ray of direct sunshine, and, for shaded grounds and north windows, it is invaluable. Per pkt.

Affinis—Three feet high, with hundreds of fragrant blossoms borne for months without intermission..... 5

Decurrens—A dwarfier and more branching variety than Affinis, equally beautiful and even more profuse..... 10

Nicotiana, Sylvestris.

We regret that space does not permit us to show a cut of this beautiful plant. It is a magnificent garden ornament, growing five feet high, with large, handsome leaves, making it a grand foliage plant. It also bears large, branching panicles of long, tubular, white flowers, which are very handsome and fragrant, each panicle showing as many as 50 flowers at a time..... 19

Nasturtium.

If we were asked to name the six best Nasturtiums, the Nasturtium would be one of them. They are so easy to grow that a six-year-old child could do it, and they are so easy to care for that they have every garden and window-sill. Their compact habit, attractive foliage, and beautiful flowers, some of which are troubled by no insects, and their seed for salad, and their leaves for soups, make them a most desirable plant.

- Lady Bird**—A variety of Nasturtium with large, white flowers.
- Empress of India**—A variety of Nasturtium with large, white flowers.
- King Theodore**—A variety of Nasturtium with large, white flowers.
- Golden King**—A variety of Nasturtium with large, white flowers.
- Cocoon**—A variety of Nasturtium with large, white flowers.
- Pearl**—A variety of Nasturtium with large, white flowers.
- Rose**—A variety of Nasturtium with large, white flowers.
- Spotted**—A variety of Nasturtium with large, white flowers.
- Deity**—A variety of Nasturtium with large, white flowers.
- Crystal Palace**—A variety of Nasturtium with large, white flowers.
- King of Tom**—A variety of Nasturtium with large, white flowers.
- Ruby King**—A variety of Nasturtium with large, white flowers.
- Cloth of Gold**—A variety of Nasturtium with large, white flowers.
- Tom Thumb, Fine Mixed**—A variety of Nasturtium with large, white flowers.
- Giant-Flowered Tom Thumb, Mixed**—A variety of Nasturtium with large, white flowers.

Climbing Nasturtiums.

Climbing Nasturtiums can be used as bedders by pegging the long shoots to the ground, as low climbers for window or screen, or used as house-climbers in winter. They are never troubled by insects, and are quick, clean growers that will cover themselves with flowers of the bright yellow color. Some of the most popular are:

- M. Red, All Colors**—A variety of Nasturtium with large, white flowers.
- Loebium, or Oriole**—A variety of Nasturtium with large, white flowers.
- M. d. Conchert Hybrids**—A variety of Nasturtium with large, white flowers.

Caprice—A variety of Nasturtium with large, white flowers.

"Caprice" Nasturtiums.

- Climbing Caprice**—A variety of Nasturtium with large, white flowers.
- Dwarf Caprice**—A variety of Nasturtium with large, white flowers.

shrubly climbers in bush and tree form. A large range of colors and forms are available. Clear gold, yellow, salmon, red, and white, all shades of brown, and some with red and white, with all combinations of these colors and patterns showing. Some of the most popular are: *indescribable*. The plants are of a bushy habit, with large, luxuriant foliage, and a most wonderful profusion of flowers, large for their stature, especially for winter. They are easy and rival in beauty the best plants in any collection. The best time to plant is in the fall, they will bloom in the early spring and are most unsurpassed for window boxes, planters, etc.

DWARF NASTURTIUMS.

Phlox Drummondii.

One of the very best of all bedding annuals is the Phlox Drummondii, surpassing almost everything else in dazzling brilliancy. We may well be proud of this distinctively American flower, for it is extremely beautiful, neat in growth and an extraordinary bloomer. The newer sorts of Phlox are so far ahead of the older varieties that we have discarded all the latter, and offer none but those beautiful new ones of the latest production. The Phlox make beautiful ribbon beds, where different colors are sown side by side, and are also in the masses of solid color. Per pkt.

- Mixed—Three or four colors. Fine for large beds and for pots. Per packet 5
- Cocardee—A very lovely variety. Per packet 5
- Fancy—A very lovely variety. Per packet 5
- Grove—Large, pure white flowers. Very fine and early. Per packet 5
- Rosee—A very lovely variety. Per packet 5
- Violette—A very lovely variety. Per packet 5
- Yellow—A very lovely variety. Per packet 5
- Albee—A very lovely variety. Per packet 5
- Stella—A very lovely variety. Per packet 5
- Double White—The flowers are pure white, and so simple and elegant. Per packet 5
- Double Yellow—The flowers are pure yellow, and so simple and elegant. Per packet 5
- Nana Compacta—A very lovely variety. Per packet 5
- Nana Cereulea Stella—A very lovely variety. Per packet 5

Childs' Jubilee—This strain of Phlox Drummondii is as superior to other Phloxes of regular outline as our new Star Phloxes are to the ordinary strains of Fimbriata Phlox. The flowers of Childs' Jubilee Phlox are of great substance, beautiful form and uncommon size, while the colors are extraordinarily rich and varied, glowing crimson, dazzling scarlet, deep rose, soft pink, pale blush, maroon-black, lavender-purple, pure white, and numberless other rare shades, many with contrasting eyes, stripes or featherings. In habit these new Phloxes are erect rather than procumbent, and bear their velvety blossoms in great profusion, making them unrivalled for bedding. They are of dwarf, stout, branching habit, always standing erect, and the individual flowers are the size of a twenty-dollar gold coin. The grandest of all Phloxes of any type yet known to cultivation. They are superior even to the grand Perennial Phloxes, which are so very beautiful. Per packet 10

Childs' Star—Nothing else in the Phlox line has ever created such a sensation as the unique German strains of Fimbriata Cuspidata and Star of Judinburg, when introduced a few years ago. Their large size and their curiously pointed, fringed and toothed blooms—entirely unlike anything else—on the floral world before. Unfortunately these flowers were muddy and indistinct in coloring. This we not took to remedy by hybridization between the new inbred strain and the old brilliant sorts of regular form, and we are more than satisfied with the success. We have succeeded in retaining the much admired forms of the German strains, while the colors of our improved hybrids are of every conceivable shade, more than a hundred distinct tints, shades, colors and combinations having been counted among them. Scarcely two plants can be found of the same shape and color. If you want something odd, new and striking, try Childs' Star Phlox. Per packet 10

SPECIAL OFFER.—For only 7c, we will send one packet each of these fifteen finest Phloxes.

GIANT EXCELSIOR.

IMPERIAL GERMAN

PANSIES

COPYRIGHTED
BY
JOHN LEWIS CHILDS
1903

CHILDS' GRAND PANSIES.

A UNIVERSAL FAVORITE with young and old. Every child sees the face in the Pansy, and, aside from its great beauty, we all treasure it as the symbol of modest worth and true affection. The smallest yard must have its Pansies. Not poor, foreign plants, scraggling amided with heat and drought and hard-baked ground, though even there yielding us handfuls of cheery bloom; but, robust, strong, vigorous plants, rooting in the cool, deep mellow beds they love, made rich with fertilizers, kept free from weeds and shaded from the hot afternoon sun. In such a bed one may gather great velvety Pansies by the hundreds,—flowers so grandly beautiful that they scarcely seem of the earth. Although the Pansy loves coolness, and gives its largest, most blooms in early spring and late autumn, they are so easy to grow that those living in the South can grow superb ones by giving rich bed, sheltered location, and abundant water. Sow seed early in house or in open ground. In the open ground sow seed very early in spring, while the ground is yet cool and moist, for late autumn and fall bloom, or in August and September for spring and early summer bloom. For fall-sown seed have the best moist and kept shaded by boards or papers until the plants appear. These will make vigorous plants that will endure the winter if protected by a few evergreens in clumps, or their light covering. Do not let the plants seed if you wish to keep them in bloom freely all the time. *Pansy* seeds are sold at any price.

Our Pansy seed is the very choicest product of Europe, and the various strains and distinct varieties we offer are the best known to cultivation.

Childs' Imperial German Pansies.

Introduced by us several years ago, and by the leading favorite throughout the world, they have since then been placed on the market under the name of Imperial German Pansies. We may be depicted as a plant in the first place, large flowers of the finest coloring, strong, robust, and vigorous growth, withstanding the heat and drought of the summer flowers during the entire summer. Flowers of great substance and beauty.

- Gloriosa Perfecta**—An indescribably lovely flower, a reddish steel-blue, with distinct red and white markings..... 10
 - Snow Fairy**—Grand snow-white blossoms, perfect bloom, fine for cemeteries..... 10
 - Black Knight**—A large Pansy of inky blackness..... 10
 - Thunder Cloud**—Another grand Pansy of most unusual markings; large, coal-blue flowers, each with red and white markings..... 10
 - Azure Blue**—A clear, lovely shade, very fine for bedding..... 10
 - Emperor William**—Elegant deep blue, very useful for bouquet making..... 10
 - Little Red Riding Hood**—A good advance flower, bright red Pansy of the future. A rich reddish some of them very brilliant and showy. Only a part of the seeds come true to character..... 10
 - Deep Yellow**—A fine color for bedding..... 10
 - Odlor, or Five-Spotted, Mixed**—Beautifully spotted flowers. A peculiar variety..... 10
 - Large Spotted, Mixed**—On white, yellow and reddish ground..... 10
 - Lord Beaconsfield**—True. Flowers of great substance and size, shading from deep indigo at the center to the palest azure blue at the edge of the upper petals. Unlike any other Pansy, and extra fine for cutting..... 10
 - Marbled**—Beautifully marbled, various shades..... 10
 - Striped**—Very showy and striking flowers, distinctly striped and shaded..... 10
 - Brönze Perfecta**—A unique color, hard to describe. Exquisite to combine with the deep blue and purple Pansies in cut-flower work..... 10
 - Mixed Seed**—Of more than fifty distinct shades of Imperial German, including those described above..... 10
- One packet each of the above fifteen Imperial German for \$1.00.

General Collection of Pansies.

- Large-Flowering, Choice Mixed Colors**—A superb strain of choice large-flowering types, including all colors. A very great satisfaction. Is surpassed only by our *Childs' Imperial German*..... 5
- Troutdale Giant, Mixed Colors**—These are famous for their great vigor, etc., though the form is not so perfect as the Imperial Germans. A fine range of choice colors..... 5
- Cassier's Choice Odlor**—Seed saved only from selected flowers of the very largest size and most beautiful blotching. A very distinct strain..... 5
- Eugnot's Superb Mixed**—Needs no praise, for it is already known as the best selection of a noted Pansy fancier. Flowers extraordinary in size and coloring..... 10
- Snow Queen**—A perfect beauty, being a pure snow-white which never becomes true from seed. A great bloomer..... 5
- Yellow Bird**—Very large flowers of a pure bright yellow color. A fine bloomer..... 5
- Fire King**—Flory yellow and reddish purple, rich and striking..... 5
- Silver-Edged Dark**, rich velvety purple, with distinct white edge. Lovely for cutting and for funeral work..... 5
- Black Giant-Flowered**—A new black Pansy of the largest size; a rich coal black; very fine and striking..... 10
- Cardinal**—Deep scarlet, the brightest color in Pansies, and one that comes pretty true from seed..... 10
- Peacock**—A Pansy of superb and varied colors, most of them showing that gorgeous and luminous bronze-blue seen only in peacock feathers. It is a finely colored strain and cannot be too highly praised..... 10
- Freya**—Another exceedingly fine European novelty of last year. Flowers large, deep velvety purple, shaded blue and scarlet, with a beautiful white rim. A characteristic of this bloom is that the back is distinctly marked like the front, which gives it a conspicuously full flowering appearance. It is certainly a very richly colored..... 10

Above collection of 12 pkts. for only 50c.

Childs' Giant Excelsior Pansies.

It is impossible to do justice to these lovely flowers in a printed description. Cold type cannot convey an idea of the indescribable richness, the varied and exquisite coloring, the large size, perfect form and great substance of the blossoms. Plants are compact and bushy, and produce great quantities of flowers, borne well above the foliage, on strong stems. Owing to their vigor, this strain withstands the hot and dry weather better than any other variety, and produces its great, beautiful blossoms in profusion all summer. Over a hundred different shades and combinations of colors have been counted in one bed of this strain. 3 pkts. 50c..... 20

Childs' Superfine Pansy.

The Pansy is our leading specialty in seeds, and testimonials show that for years we have sold the finest Pansy seed that has been sold in this country. As the introducers of the Imperial German and Giant Excelsior Pansies, we had the finest strains of these, the best of all Pansies ever had. Superfine is merely a careful selection of the finest of the plants which show the greatest vigor and perfection in growth and beauty in size and shape of flowers, and are best for seed. They are carefully cultivated and the seeds saved only from a few of the largest and most perfect flowers of the finest colors. We grow it in Northern Germany, where the Pansy attains the greatest perfection, and we can emphatically say that this is the finest Pansy seed ever offered in the world; the very best that can be grown or had at any price. Per pkt. of 25 seeds, 30c.

New Pansies of 1900.

- BISMARCK—SUMMER GIANT**—A new strain of Pansy found in a remote part of Italy, where the Margaret Carnation was discovered a few years ago. Having been developed in a warm climate, its flowers, through the summer, continue to be very large and fine, almost equal to those of early spring. It stands heat and drought remarkably and produces its blossoms on long stems and in endless profusion. The colors are numerous and varied, covering all shades, and some of the combinations are very unique indeed. Blossoms large and quite distinct in shape, being more oblong than round. This new strain possesses so many admirable points, and those which will make it valuable in this country, that it is sure to become a great favorite..... 10
- RUBY-RED**—The richest colored Pansy yet produced, and comes quite true from seed. Flowers large and of a rich dark ruby-red, and having a texture almost like velvet. The depth and richness of color will vary in different climates, but all will be grand..... 10
- FAIRY QUEEN**—As a bedder, or as a solitary plant, this is a remarkably effective new Pansy. Size very large, color pure sky-blue, splendidly bordered with white, producing a distinct effect and a delicacy of color combinations which is rare. This is by all odds one of the most pleasing colors we have ever seen in Pansies, and its large size and perfect shape makes it more than beautiful..... 10

Fancy Striped Pansies.

These are real gems of the best coloring. A strain made up of various colors, all equally and photosquely striped and variegated. These Pansies will be greatly prized for their floral and leafy character, distinct stripes. . . . 10

Fancy Scarlet and Red Pansies.

This is a rich strain of all the new colors in scarlet and red which have been raised to date, such as Fiery Face, Cardinal, Fire King, etc. These flowers to very bright colors. . . . 10

Fancy Margined Pansies.

The large, flat blossoms of this strain are in colors, white, blue, black, yellow, and red, with a powerful margin of white and a great many other colors. The effect is very rich and distinct. . . . 10

New Pansies for 1901.

The following six pantries are introductions of this year. Per 100.

- Masterpiece**—Large, showy blossoms of rich colors, the borders of the petals being ones of a pale, undulate and curled. Very distinct. . . . 10
- Jennings**—A strain of Pansy with flowers the size and coloring of which have not heretofore been seen. We have measured blossoms that were 1 1/2 inches across and with colors as exquisite as they are good. See "Specialties and Novelties" 20
- Diana**—Rich amber or orange yellow and a great bloomer. Unsurpassed for bedding. 15

Violet-Scented Pansies.

This new type is a cross between the Pansy and the Violet, combining the ideal properties of each. The flowers are much larger than the Violet, but like Pansies, but with the delicious fragrance of the latter. The flowers are also quite free from central rays and markings, and the habit of the plant is decidedly dwarf and compact, producing its flowers on long foot-stalks, and they appear continually from early spring until late fall. The plants possess to a considerable extent the hardy and robust nature of the Violet, and make splendid companions as well as garden plants. This unique strain originated with Dr. Stuart, of Chirside, England, and was named by him "Violeta." They are now called "Tuted Pansies," "Margined Pansies," and "Violet-Scented Pansies." The latter name seems to us to be the most appropriate. The range of colors runs through white, buff, canary and azure blue, and the coloring of each is exceedingly delicate and charming. A most important novelty, and one in which the characters of the Pansy and Violet will be especially desirable. We first introduced this strain several years ago, since then it has been wonderfully

Violet-Pansy Papilio.

A decided novelty, and a cross between the Pansy and Violet. The flowers are Violet-shaped, large and borne in endless profusion, a plant showing from 20 to 40 blossoms every day from spring until late fall. Color, a lovely violet-blue, in some plants darker than others, with a dark eye. For bedding purposes this new Violet-Pansy is one of the best we have seen in a long time. . . . 10

BUSH
Sweet Pea

Murpee's Bush Sweet Pea.

This new Pea grows in dense bush form, about 12 inches high and requires no support. In this respect, much like a fish bean. The flowers are white, flaked and striped purple. This will, we believe, prove more desirable than Murpee's Cupid Sweet Peas, which, despite all that is said in their favor, are not a success in many localities..... 10

PERENNIAL PEAS

WHITE PERENNIAL PEAS

Perennial Peas.

Not raised only in the high north, but in the south, this pea that blooms from seed in an early summer until late autumn, milder weather, or cold, rain or drought. Plants of vigorous healthfulness, bearing numerous flowers of diverse colors, with a fine, neat, and bushy habit, and a flower on an inch or more across. The same can be said of rarely seen, for they are easy to grow, and their beauty is so beautiful that we have no doubt that you could not admire their cheerful flowers and clear green foliage. Four to six feet in height. Per pkt.

- Mixed, All Colors..... 5
- Pure White—Superb..... 10
- Deep Crimson—Fine rich color..... 5
- Pink Beauty—White, veined, edged and shaded to pink 5

Dwarf "Cupid" Sweet Peas.

This is a dwarf Sweet Pea, and it is growing only five inches high, yet spreading out and forming a solid mat of foliage and flowers of a most beautiful aspect. The blossoms are very sweet, and they are most greatly abundant, with three flowers on each stem. It begins to bloom as early as May, and continues until August 1st. It contains in proportion more flowers than any other Sweet Pea, and makes a most desirable and superb plant for bedding, massing, and single flower cultivation. Also, very desirable as pot plants. Per pkt.

- White Cupid—Most beautiful, perfect, very sweet..... 5
- Pink Cupid—Most beautiful, perfect, very free grower..... 5
- Pamrose Cupid—Most beautiful, perfect, very sweet..... 5
- Alice Eckford Cupid—Most beautiful, perfect, very sweet, white, with light green and delicate shades..... 5
- Beauty Cupid—A large, broad flower, slightly hooded. Standards fine, soft rose, bordered with white. Wings rosy pink with crimson edges. A great beauty..... 5

(The color of the above Cupids for sale.)

Mixed Cupid—All the above colors..... 5

Picotee Pinks.—(Perennial)

These are really hardy Perennials, with flowers more delicate than other pinks and pleasant fragrance. Though hardy, they are stronger for a while protection over winter.

Mixed Colors—Large flowering..... 10

Platycodon, Grandiflora.

(Perennial)

A companionable flower that is attractive in the border, pretty in balcony boxes and very fine for vases and cut-flower work. Blooms first year from seed, though it is a hardy perennial, the plants living in the ground over winter and blooming profusely year after year in the same spot. On this account it is very valuable. The pretty star-like flowers are three inches across and the colors are very clear. It is a most beautiful and satisfactory plant which blooms freely all the season, one plant often having a hundred or more of its large fine blossoms at one time.

Mixed Colors..... 5

Petunia.

This is a flower far beyond all. For high, full and rare plants, seen in the mountains with the Petunia for beauty, and in a beautiful garden, on our list, as a showy in the garden. We have now in front of a beautiful cloud of brilliant blossoms, that could be seen far over the prairie, gleaming in the bright sun, like some great star, and all this wealth of beauty was the product of a few sheets of paper of seed. The same is true of the finest work is not complete without these beautiful flowers, that mild weather here, the sun and rain, and the winter is almost in its. The seed is best sown in the house, and the young plants transplanted to open ground one foot apart, but if the soil is fertile very fine, and only be sown in open ground, and covered with. After they are once up they are not to be feared.

NEW GIANT-FLOWERED PETUNIAS.

A giant-flowered strain, which originated in California. These Petunias are truly magnificent in every sense of the word, and show great improvement over the best European strains.

- Climatis-Flowered**—New pure white and like a great Climatis.....10
- Giant Kermisina**—Large, open throat of deep crimson-black color, and dark veining. Very fine.....10
- The Rainbow**—Richly colored flowers with golden yellow throat; exquisite and comes true every time.....10
- Ring of Emerald**—Large pink and crimson blossoms, deeply bordered with a green band. Attracts great attention.....10

- Fringed Perfect**.....10
- Giant Flowered Sing. & M. via Co. pre.**.....10
- Ruffled Giants**.....15

DOUBLE GIANT-FLOWERED PETUNIA.

This is the choicest double Petunia seed that the world can furnish, and we stake our reputation on it. A larger per cent. will produce double flowers than any other, and the flowers will be larger and better.

- Giant Flowered Double, Mixed Colors**—This strain of giant-flowered Petunias originated in California, and it is one of the most valuable new flowers that has ever come from that state. They are the largest and finest colored Petunias ever yet seen. Their size and beauty will be a revelation to all who see them. A larger per cent. comes double from seed than in any other strain you know.....20
- Double White**—A very fine, pure white flower, and very double; 20 per cent will come true from seed.....20
- Double Heliotrope**—Large, round blossoms, very double, and of a beautiful heliotrope color.....20
- Double Crimson**—Intense crimson, large, double.....20
- Double Rosea**—Pink, crimson and white, beautifully mottled and fringed.....20

One packet each of above five for 75c.

BOUQUET

PETUNIAS

Bouquet Petunias.

We have seen no new flower in a long time that has pleased us so much as these beautiful dwarf Petunias. They are very hardy and strong, but the plants are dwarf, very bushy and compact, producing their bright blossoms in such wonderful profusion that each plant looks like a perfect bouquet set in the ground. As a pot plant they are also very fine, and bloom incessantly both summer and winter. For groups, beds, borders, single specimens, or for pots, they are perfectly superb.

- Snow White**—Pure snow-white, without shade or mark. . . . 10
- Adonis**—Bright carmine-red, with a pure white throat. A perfect wonder in profusion and brilliancy. . . . 10
- Variegated**—Blossoms elegantly striped, blotched and variegated, crimson, rose and pure white. Very attractive. . . 10
- Mixed Bouquet**—Above three sorts. 10

DOUBLE PETUNIA.

STANDARD PETUNIAS.

- Childs' New Hybrids**—Striped, blotched and stained. Of intense and vivid marking; never out of bloom. . . . 5
- Grandiflora Mixed**—Very large flowers and fine colors, including blotched, bordered, striped, etc. 5
- Nana Compacta**—A dwarf bedding Petunia, almost smothered under its load of beautifully variegated flowers, and blooming all summer. 5
- Good Double Mixed**—A fair strain of Double Petunia. Seed which will give about 30 per cent. double. 10

DOUBLE PORTULACA

Portulaca.

The Portulaca will stand more abuse than almost any other flower. They do not like deep shade, or wet, damp soil, but in any other situation they only ask the sowing; they will take care of themselves afterwards. The drier the weather and the hotter the sun, the more they flourish, carpeting the ground with their mat of succulent foliage, that during the fore part of the day is almost hidden by clouds of gay blossoms in every color of the rainbow. Fine for bordering walks, rock work and bedding. Beautiful in ribbon beds, and they can be transplanted even in full bloom. Per pkt.

- Grandiflora, Mixed Colors**—White, crimson, rose, scarlet, yellow, striped, etc. Very brilliant. 5
 - Double Rose-Flowered, Mixed Colors**—Large blossoms, as double as Rosas, and the greatest variety of colors. . . 10
 - Double Yellow**—Fine brilliant color. 10
 - Double Scarlet**—Clear and bright. 10
 - Double White**—Pure and beautiful. 10
- The 3 sorts for 20c.

Poppies.

Forers of and favorites from the days of our grandmothers. There is nothing more graceful than the stony blooms of Single Poppies, and the gaiety of their long wire stalks, like so many "blue" butterflies that a passing zephyr might waft from their airy perch. There is nothing more gorgeous than the double Poppies, bursting with fullness, glowing with color, and like great Pansies, or Snowballs in size. There are few flowers easier to grow, if the precaution is taken to sow early, and cover lightly, and none more useful to light up dark masses of shrubbery, mixed borders, or the bits of landscape. Do not wait for warm weather to sow your seed, but sow very early in the spring, that the plants may have their growth made, ready to bloom at the coming of warm weather. Per pkt.

Improved Shirley—No better flower seed novelty was offered, until now. This new strain of Shirley Poppy, growing six feet and higher, bred by Mr. Wilks, the original introducer of the Shirleys. Habit of plant dwarf and sturdy, blossoms of enormous size, and of the most brilliant colors, to be had in any flower. No display can surpass it, in this Poppy, or in any other what it is.

- 10 **Childs' Great Peony-Flowered**—A strain perfected after years of high cultivation, and careful selection. Plants of such height, that a foot or more, and bear many double flowers of all the colors.
- 5 **Peacock**—Large, Fringed, and brilliantly beautiful. Many shades of colors, with vivid black centers, and
- 5 **Nankeer Yellow**—A beauty of color, fringed, and blossoms

See

Fringed flowers, like Snowballs, cupped like Bosses, and of the same, excellently fringed and shaded, and others, in shades of yellow, orange, and other shades. The coloring is something wonderful.

- 10 **Nankeer Yellow**—A beauty of color, fringed, and blossoms
- 10 **Young**—Very handsomely and graceful, and particularly desirable because they furnish us with a color hitherto lacking in these flowers. The yellow and orange shades are particularly nice.
- 10 **Flushing Bride**—The plants are of dwarf, stout growth, like Snowdrift, and belong to the Peony-flowered type. The blossoms are of enormous size, perfectly double to the center, and beautifully fringed. Color snow-white, with lovely bright crimson testooning above the edges of the fringed petals. It is difficult to imagine a more charming combination. This Poppy is one of the earliest double varieties to bloom.

The 5 sorts for 50c.

SALVIA SPLENDENS COMPACTA.

Salvia.

The Salvia is now a standard bedding plant, and well does it deserve its honor. It stands heat and drouth remarkably well, and its colors are very showy and intense. Seed is best started under glass, though self-sown seed frequently comes up in great numbers where a bed of these plants has been the year previous. Cuttings are easily rooted and make fine winter-blooming plants. Per pkt.

- 10 **Splendens**—A most lovely shade of blue.
- 10 **Splendens Compacta**—Fine dwarf habit, very free flowering, and of intense brilliancy. This is the finest of all Salvias, and one of the very finest plants for garden or pots that it is possible to have. It blooms profusely all the year, beginning in about three months from the time of sowing the seed. Perfectly exquisite.
- 10 **Splendens, Mixed**—Scarlet, white, striped, purple, etc.

Ricinus Zanzibarensis.

There are several varieties of this superb new Ricinus, all of which are characterized by extra large and handsome leaves, compact, branching growth, forming a perfect pyramid of elegant foliage. The seeds are very large, and each kind of a different color, white, black, scarlet, brown, etc. All beautifully marked and mottled. They are so beautiful that they are worth the price asked just to look at. All kinds, mixed..... 10

Scabiosa.

This is one of the very best bouquet flowers of our entire list, and is also fine for masses or clumps in the flower garden. Each plant bears a profusion of beautiful flowers, rich, velvety, glowing and unlike any other flower, while the long wiry stems fit them for use in bouquets and vases. Sow seed early in open ground, and they are almost sure to succeed. They are very hardy, and plants frequently endure the winter, and do even better the second season than the first. While all colors of Scabiosa are fine, the rich black and velvety royal purple find the most admirers. Per pkt.

- Mixed Colors—(MOURNING BRIDE)..... 5**
- Double, Mixed Colors—Dwarf habit; fine colors..... 5**
- Snow Ball—The plant is a strong grower, and the flowers are very large, perfectly double, and as white as snow. They are produced very freely..... 10**
- Royal Velvet—Each head of this variety, when in full bloom, may well be named a ready-made nosegay, composed as it is of 20 to 30 distinct florets of a velvety purple color, on which the white stamens contrast finely..... 10**

Ten-Weeks Stocks.

To our mind we do not catalogue a finer flower than the Ten-Weeks Stock. It has every merit of a perfect flower—a compact habit, many and long spikes of closely-set, large, double flowers, each as double as a rose, waxy of texture, exceedingly sweet, and varying in color from snow-white to dark maroon-brown, and through all intermediate shades of red, blue and yellow. It is a grand bedder, and a fine pot plant, blooming the winter through. It develops in its greatest perfection in the cold atmosphere of our Northern States. In the South and West a cool situation should be chosen, sheltered from the mid-day sun. This plant requires rich, mellow soil, and must never be allowed to suffer for water. Poor care will result in poor flowers. It is worse than useless to plant inferior seed of this flower, that has been brought to its present high standard by careful breeding and high cultivation. Our seed is of the very best, and will please all who try it. Per pkt.

- Early Ten Weeks** 12 of the finest colors, mixed..... 10
- 44 44 44 —Pure white, very sweet..... 5
- 44 44 44 —Rich crimson..... 5
- 44 44 44 —Clear blue..... 5
- 44 44 44 —Yellow, new and fine..... 5

Dwarf German—Mixed colors. An extra fine strain of large-flowered Stocks..... 10

New Large Flowering Globe Pyramidat—One of the finest of all. Immense spikes of grand flowers, in almost rainbow colors. We have counted twenty-three different shades in a single bed of these flowers, in bloom at one time..... 10

Giant Perfection—One of the finest for the open ground, growing to the height of 2½ feet; flowers also of immense size. Many beautiful colors mixed..... 20

Snowflake—A superb variety. Flowers as perfect as though cut out of wax. Much grown as a pot flower for cool rooms..... 10

Victoria Blood Red—A fine companion to the Snowflake, and grand for cutting. Deep and rich in color and very fragrant..... 10

Celestial Blue—A beautiful color, and contrasts admirably with the two sorts above..... 10

Tree—Mixed colors; a gigantic branching sort..... 10

One packet each of the twelve sorts for 60c.

BY J.L. GILDS.

Verbenas.

Like the Pansy, the Aster and the Petunia, the Verbena is a favorite with everybody, and one of the most universally popular of all flowers, both for the garden and for pot culture. For constant and profuse flowering, and for brilliancy and beauty of colors, it has no equals. Start seed early under glass, if possible, that good strong plants may be had for transplanting in the garden. They will commence blooming in June and continue until after severe frosts, and during the entire time nothing in the garden will attract more attention than the bed or clump of Verbenas. In August cuttings may be taken from some of the best ones and potted up for winter blooming. Our prize strain are the finest Verbenas in cultivation. Per pkt.

- Extra Choice Mixed**—From a named collection.....10
- Golden Bedder**—A striking variety with bright scarlet blossoms and golden yellow foliage.....20
- Primrose**—A great advance toward the coveted yellow Verbena. A soft, pale yellow, or primrose.....10
- Odorata**—It is so hardy seed can be sown in the open ground early in the spring, where they will quickly germinate, grow rapidly, and in a few weeks be in bloom, and give a great profusion of beautiful blossoms all summer. The blossoms, instead of being in clusters like other sorts, run up into spikes, usually 3 or 4 inches long. It is very sweet scented and pure white in color.....10
- Moss Verbena**—This new Verbena produces a mass of fine, moss-like foliage, and as the branches spread out over the ground in all directions a lovely carpet of mossy green is formed, above which are borne the delicate clusters of purple-blue blossoms in the wildest profusion. The effect is most charming. It is more hardy and robust than most Verbenas, and blooms in a very short time from seed. It is novel and beautiful..10

CHILDS' PRIZE VERBENAS.

Famous as the finest strain of Verbenas known. We grow four acres of these superb flowers, and we know what we are talking about when we say they are the finest of all Verbenas. The plants are vigorous and short-jointed and perfect sheets of bloom. The trusses are very large, the flowers of mammoth size, perfect form and embracing the richest and most velvety colors. They are also delicately sweet-scented. The range of colors is great, and shades are mostly very delicate and dainty. In coloring they are, in fact, perfectly exquisite, there being very little of the common old blue and purple colors among them. In their place we have delicate blushes, lavenders, pinks, velvety indigos, intense scarlets, whites, mottled, striped, variegated, etc., in fact, a thousand different colors and combinations.

- Childs' Prize, Mixed Colors**—Hundreds of delicate shades. Enormous sized flowers; dwarf, compact habit and prodigious bloomers.....20
- Childs' Prize, Pure White**—Comes true from seed. Great trusses of snowy blossoms of exquisite fragrance.....15
- Childs' Prize, Scarlet**—A very intense scarlet.....15

THE MAYFLOWER VERBENA.

Raised and named by Luther Burbank, and was the greatest floral novelty of last year. The shape of its individual flowers and clusters of bloom, as well as its color, are identical with the flowers of the Trailing Arbutus, or Mayflower, and having the same superb fragrance. The size of the flowers is about equal to a silver quarter, and in delicate coloring and rich perfume it has no rival. It is one of the very finest novelties in choice flowers.

- Pink Mayflower**—Delicate shades of pink, and very fragrant, like the Trailing Arbutus.....20
- White Mayflower**—Pure white and sweetly scented.....20
- Mixed Mayflower**—Pink, white and other shades, mixed.....20

Fire Ball—Dwarf habit, large double blossoms of intense scarlet, as round and perfect as a ball. It makes a fine border or mass, its bright color and perfect habit showing to great advantage.....10

Snow Ball—Exactly like Fire Ball, except color, which is snow white and makes a charming contrast.....10

Lilliput, Mixed Colors—This strain is the name of beauty and perfect, non-Zebra. Plants small and of bushy growth, each bearing a mass of beautiful little blossoms of the most brilliant and brilliant colors. These and many other Zinnias are gems indeed, and should be in every garden.....10

Cold Bug—Plants grow a foot high and branch freely into beautiful little compact bushes, which are at all times covered with beautiful golden-yellow blossoms as double as roses. New last year.....10

SPECIAL OFFER.

To encourage the free use of our improved Zinnias, we will send one packet each of the eight varieties here offered for only 10c.

CHILDS' "IMPROVED"

ZINNIAS.

Zinnia.

From early childhood the Zinnia has been a special favorite with us, and the strain which we cultivated in our first little garden we still sell and grow as our improved. We have selected the stock seed every year for thirty years. This careful attention has brought it to wonderful perfection. This Zinnia is a robust, free grower, furnishing an abundance of large, double blossoms which are of varied and brilliant colors, during the entire summer and fall. Each flower keeps perfect for six weeks before fading, and each plant is a great mass of bloom all the time, making a showing which is peculiar. Nothing else can fill their place. Seed should be started inside or sown in the garden about corn-planting time.

- Childs' Improved, Mixed Colors**—Saved only from select flowers, perfect in shape and color. The finest strain of Zinnia in cultivation. Every plant will produce immense double blossoms of various colors, from white to deep crimson, maroon, pink, yellow, orange, scarlet, violet, primrose, buff, striped, etc. Every plant will give fine double flowers. Single and poor flowers long ago disappeared from this strain.....10
- Crested and Crinkled**—All colors mixed. A strain with curiously crested and crinkled petals.....10
- Improved Striped**—A good strain representing all the leading colors, but all striped. Really the finest strain of Striped or Zebra Zinnias in cultivation.....10
- Double Yellow**—Blossoms large and bright yellow..... 5

LILLIPUT.

Seeds for Window or Greenhouse Culture.

(Many Seeds of this character also offered on Green Paper pages—Specialties and Novelties).

The satisfaction derived from the cultivation of house plants is not alone in seeing them in bloom. There is joy in seeing them grow and develop day by day, and the one who starts a plant from seed and rears it up to bloom gets all the pleasure there is in plant culture. Geraniums, Carnations, Chrysanthemums, Begonias, Heliotropes, etc., are easily grown from seed, and it is really fascinating to raise them in this way, watching each plant as it unfolds its bloom, noting its form, color and other characteristics, and when occasionally we discover an immensely fine one, much superior to any we have ever before seen or heard of, the highest pleasure and satisfaction possible to get from plants and flowers is ours. It is from seed that all fine new varieties of house plants are produced, and it is nothing for a seedling Chrysanthemum or Carnation to be worth more than a thousand dollars. Our strains of all these seed are much finer than are usually sold.

Geranium.

A wondrously beautiful greenhouse or window plant, and not at all hard to grow. Seeds germinate quickly and easily, and young plants grow off without any trouble. Keep in a shady place over summer and remove to house in fall. Use insecticides to keep free from aphids, and as flower buds show give good light. A beautiful plant, the large, luxuriant leaves surmounted in late winter and spring by immense panicles of magnificent large flowers of the most brilliant colors. Nothing could be more effective in the window; in fact no flower is more showy or effective, and the flowers last in full glory for two to three months. Colors exceedingly rich and velvety, ranging from crimson-black to pure white, through all the shades of crimsons and blues, frequently with large white centers or exquisite borders.

Grandiflora, Mixed—Large-flowering prize varieties10

Grandiflora, Dwarf Mixed—Two to three inches across and of the richest and most varied colors. The immense head of bloom is like a beautiful bouquet, finely set off by the large, handsome leaves, above which it towers.....20

Grandiflora, Dwarf White—Grand new pure white.....15

Grandiflora, Dwarf Azurea—Lovely sky-blue.....15

Double Flowered—Extra choice mixed, all fine, double blossoms in immense clusters.....25

Calceolaria.

Not one in ten of our customers have ever seen a Calceolaria in bloom, yet it is one of the handsomest and most striking pot plants we know of. Seeds fine, and must be sown with care, but after they are fairly up they grow well, and will bloom the next winter. Each plant bears hundreds of pocket-like flowers, spotted and marked in the most curious manner. Our great show of Calceolarias during the late winter and spring months is one of the noted attractions of Floral Park. Per pkt.

Dwarf Hybrids—Large flowering, mixed colors.....15

Grandiflora—Spotted and tigered, as well as fine self-colors; very large and exceedingly fine.....20

Begonia.

One of the most beautiful of the window plants. Large, soft, heart-shaped leaves, and small, delicate flowers. Some are double, some single. Some are of the trailing habit, some are upright. Per pkt. 10

Rex, Mixed Sorts—Large, dark, spotted leaves, and small flowers. Some are double, some single. Some are of the trailing habit, some are upright. Per pkt. 15

Tuberous-Rooted Rex—One of the most beautiful of the window plants. Large, soft, heart-shaped leaves, and small, delicate flowers. Some are double, some single. Some are of the trailing habit, some are upright. Per pkt. 20

Tuberous-Rooted Hybrids—Fine single mixed. Per pkt. 15

Tuberous-Rooted Hybrids—Fine double mixed. Per pkt. 20

Vernon, Mixed Colors—Flowers, especially the year round, the plants being completely covered with them at all times, especially during winter. They make low, bushy plants in summer, the leaves, when exposed to the sun, turning to a rich bronze when not bright, and the beauty of the flowers. Grow in small pots, as a wood. Grand perennials bloomers. In many many colors, white, pink, red, etc. Per pkt. 10

Vernon, New Crimson—Fine dark crimson. Per pkt. 10

Vernon, Golden Leaved—Elegant golden leaved foliage and lovely pink blossoms in endless profusion. Highly ornamental. Per pkt. 10

New Hybrids, Mixed—Large flowering and perennial blooming. This is a mixture of the newest and rarest named flowering Begonias. It includes many fine hybrids, and seed is saved from our noted collection of many sorts. We have taken the greatest pains in hybridizing this seed, and it will produce many distinct new forms. Per pkt. 15

New Sweet Scented, Mixed—Fine mixed seed of our grand, new sweet-scented varieties. Per pkt. 20

NEW HYBRIDS MIXED.

Abutilon.

As indispensable for the window or greenhouse as the Petunia is for the flower garden. Well suited to be abused and neglected than almost any other house plant. Grows rapidly from seed, and is soon in bloom. Leaves are very ornamental and are often beautifully variegated. Lovely bell-shaped flowers, borne the year around, in all colors—white, pink, yellow, orange, red, etc. Per pkt. 10

Choice Hybrids, Mixed—All colors mixed. Per pkt. 10

Infanta Eulalia Hybrids, Mixed—Large blossoms of various colors. The finest of all Abutilons, blooming freely all the year, and making a short-pointed, bushy growth that is much more desirable than the tall growing kinds. See green paper pages. Per pkt. 20

Carnation.

A favorite with everyone. Fragrant double flowers of elegantly form and exquisite markings. Seeds and plants grow as freely as the old garden Pink. Spring-sown seeds produce the fine winter flowering plants. Per pkt. 10

Monthly, or Perpetual—Most good house sorts, and will produce garden or for pots. Many colors mixed. Per pkt. 15

Margaret—Large early flowering, and will produce garden or for pots. Many colors mixed. Per pkt. 10

Chebaud Early French—A fine strain, combining the best qualities of Margaret and the large and perfect class. Per pkt. 20

Malmison—Large early flowering, and will produce garden or for pots. Many colors mixed. Per pkt. 15

Cbrysanthemum.

One of the most beautiful of the winter flowering plants. They will produce garden or for pots. Many colors mixed. Per pkt. 15

Extra Choice Mixed—A fine strain, combining the best qualities of Margaret and the large and perfect class. Per pkt. 20

Cyclamen Grandiflora.

They are the most beautiful of the winter flowering plants. They will produce garden or for pots. Many colors mixed. Per pkt. 15

Camelia Japonica.

We have a great deal of seed of the finest quality of seed of the wild camelia, and beautiful plants. They will produce garden or for pots. Many colors mixed. Per pkt. 15

CAMELIA JAPONICA.

FERNS

Fuchsia.

Lovely pot plants which bloom profusely at all times. Grows rapidly from seed, and is soon in bloom. Per pkt. 15

Mixed Hybrids—Best double and single named sorts. Per pkt. 15

Ferns.

Ferns are exquisite for table or drawing room decorations, window cases, hanging baskets or rockeries. Store them in a cool, moist place. Per pkt. 10

Boerhaave Fern—A fine strain, combining the best qualities of Margaret and the large and perfect class. Per pkt. 20

Geranium.

Very easily grown from seeds, and if started early will bloom the first summer and last. So long plants are always healthy and make a fine, bushy growth, blooming in many colors. Per pkt. 10

Zonale, Extra Choice—Mixed, from finest new large-flowered varieties. Per pkt. 10

New Hybrid Large-Flowering—Grand strain, from which we grow the magnificent new sorts, colored among Specialties and Varieties. All colors, mixed. Per pkt. 15

Bronze and Cold—Very fine foliage. Per pkt. 10

Souvenir de Mirande—Saved from the marbled varieties of the Mirande type. Distinct and very beautiful. Per pkt. 10

Apple Scented—A fine strain, combining the best qualities of Margaret and the large and perfect class. Per pkt. 20

Double Mixed—From finest new sorts, and will produce garden or for pots. Many colors mixed. Per pkt. 15

Pelargonium, or Lady Washington—Fine mixed. These are perfectly magnificent, but seed is scarce. Per pkt. 20

Ivy Leaved—Double and single mixed; extra fine, with magnificent masses of bright red flowers, and a beautiful trailing habit, with rich, ivy-like foliage. Per pkt. 20

LEMOINE'S NEW HELIOTROPE.

Heliotrope.

LEMOINE'S NEW EARLY-FLOWERING GIANT.

This new strain of Heliotrope blooms in a very short time from seed, and plants are as easily raised from seed as Fancies or Asters. The seedlings make a rapid growth and are in bloom in a short time. They bloom abundantly in the garden all summer, or all the year round in pots. The panicles of bloom are often six inches across, three times as large as ordinary Heliotrope, while the colors range from indigo-black through all shades of blue to almost pure white, and some with red tints, others with large white eyes. In fragrance they seem to surpass the ordinary sorts. A packet of this seed will furnish a bed of flowers for your garden or lawn which would cost several dollars were you to purchase the plants, and give you great handfuls of the delicious blossoms all summer.....15

Gloxinia.

The most beautiful of all pot bulbs. Seedlings grow well and, if given proper care, will bloom in five months from the time of sowing seed, giving larger and better flowers than can be had from old bulbs. Per pkt.

French Hybrids—Splendid mixed; finest varieties.....15
Tigered and Spotted—Mixed, all beautifully spotted.....15
Crassifolia Erecta—Mixed colors, all erect bloomers.....15

Pure White—The most heavenly of all flowers....15

Lantana.

A little slow to germinate, but seedlings grow rapidly and soon make thrifty plants. An extra fine bedding plant, with very brilliant Verbena-like flowers. We offer a very fine strain. Flowers in all shades of vermillion, orange, lemon, white and pink. Mixed colors.....10

Lemon Verbena.

Everyone knows the Lemon Verbena, and everyone ought to have a few specimens of it; its fragrant foliage is so fine to use for bouquets and other floral work.....10

Musa Ensette.

Fine single specimens of this are grand beyond description, and give a massive, tropical effect that nothing else can equal. It grows several feet high the first season, with huge, wide-spreading leaves that dwarf everything near it. Give sun, rich soil and abundance of water.....10

Oleander.

Well-known shrubby plants for tub culture. Very beautiful when in bloom.

Mixed Colors.....10

Palms.

Grand decorative plants for the house or piazza, and increase in value each year. Easily grown from seeds, which are slow, but quite sure to germinate.

Mixed Sorts—Many varieties.....19

Filifera, or Weeping—Very fine and easily grown.....19

Seaforthia Elegans—One of the finest and best known....15

Phoenix Canariensis.....15

Riciniata—Elegant curved fronds of great size.....20

Primulas.

For our magnificent Primrose see Colored Plate No. 6.

Swainsonia.

Lovely pot plants, blooming freely all the time. Foliage as well as flowers is exquisitely handsome. One of the very finest of all pot plants for constant blooming. Flowers closely resemble Sweet Peas, and are borne in large clusters. There are two colors, white and pink. We offer fine plants of both sorts on another page.

Mixed Colors—White and pink.....10

Violet.

A fine collection of many fine varieties and colors—blue, lavender, white. Many of the finest scented varieties are included.

Mixed Sorts.....10

Smilax.

This elegant vine is easily grown from seed, which, though slow to germinate, is sure to grow. Not only a fine window vine, but exceedingly fine for outdoor planting wherever a small growing vine is wanted. In the open ground it grows luxuriantly, furnishing great quantities of its dainty glossy-green sprays that are exquisite to use in cut-flower work, and remains fresh and green until after early frosts. In the house it requires good light and freedom from dust. Its feathery little blooms are delicately fragrant, but its chief merit is its exquisitely beautiful foliage.....5

MISCELLANEOUS SEEDS.

Two pages of odd seeds, all of which may be very easily grown by anyone and all very desirable, especially the Lantern Plant, Nymphaeas, Everbearing Strawberries, Japan Maples, etc.

Chinese Lantern Plant.

A most magnificent plant for the garden during summer, or for pots. Treated like a Geranium, it grows and fruits freely from seed the first season, yet the plants are perennial and perfectly hardy in the open ground, or may be wintered in the cellar or grown in pots as a window plant. When in fruit during early fall and winter it is a superb pot plant. The plant produces numerous large white flowers, which are followed by large inflated husks, much the shape of Chinese lanterns, at first a beautiful green color, changing to a yellowish hue and then to brightest scarlet, and as they hang suspended among the green foliage they present a most novel and strikingly beautiful appearance. Autumn frosts do not injure foliage or fruit, and it is a showy plant long after all others are killed. In these husks or "lanterns" a fruit is borne, in color a deep ruby-red, and good either for cooking, preserving or eating raw, and keeps well into the winter. Branches of "lanterns" cut and dried retain their rich and brilliant color, and make most beautiful winter bouquets when used with dried grasses or leaves. The plant grows from 1 1/2 to 2 feet in height, clothed with luxuriant foliage, among which is suspended a number of bright "lanterns," all the time..... 10

CHINESE LANTERN PLANT.

Lilium Tenuifolium.

This superb Lily grows freely from seed and blooms abundantly the second summer. A fine lot may be raised in this way..... 10

Iris Kämpferi.

Seedlings bloom well the second summer, showing a great variety of colors, and large wavy blossoms, some double and some single..... 10

Nymphaea.

Lovely Pond Lilies of which everyone is so fond. Many of the new foreign varieties grow and bloom from seed the first year, and among them there are a great variety of colors, white, yellow, blue, purple, etc. Seed should be sown in a pan or saucer of mud, just covered with water. In a warm temperature they will germinate quickly and grow rapidly. These Lilies have a fragrance rich and peculiar; considered by many to be superior to any other flower.

Zanzibarensis, Blue—The grand day-blooming African Water Lily, with enormous incurved flowers of most exquisite coloring, and so profuse blooming that a tub of them is never without flowers from early summer until frost. They grow so rapidly that they will bloom in ten weeks from seed, and are so little trouble anyone can succeed with them. Give them a very rich soil, full sun, and shallow water to start in. The larger the vessel that contains them the ranker they grow, and the larger their flowers, but they will bloom in a common bucket, even. Seed should be sown in cups of soil and tepid water..... 15

Zanzibarensis, Red—Like the above, except in color, which is a fine purplish red..... 15

Dentata—(NIGHT-BLOOMING STAR LILY). There is nothing among water plants finer than this. Opens about four o'clock in the evening and closes at noon the next day. Star-like blossoms, pearly white, and blooms freely from seed the first season..... 20

Coerulea—A lovely Pond Lily four inches across, and of a beautiful lavender blue color. It has a remarkable fragrance, differing from all others..... 10

Alba—A lovely pure white Water Lily of great beauty and fragrance..... 10

Nelumbium, or Egyptian Lotus—This is the grand and ancient Egyptian Lotus, a Water Lily of great size and surpassing beauty. It should be planted in rich mud, with one or two feet of water. It flowers the first season, its flower stems rising out of the water to the height of four or six feet, surmounted by a great double pink or white flower, which is a foot or more across. The beautiful, rank leaves are often over two feet across. Either in pots or tubs this plant is in bloom from July to October, and is an object of unsurpassed beauty..... 20

Alpine Everbearing Strawberry.

These grow freely from seed and fruit the first summer. Our experience with them is as follows: In March or April we sow seed (under glass). The young plants appear in a short time and grow well, and in May are transplanted to the open ground. By the first of July they commence blooming, and the first fruit ripens about the 14th of that month. From that time there is ripe fruit continually until late in October. The berries, while not quite so large as the garden varieties, are much higher flavored. In fact, they are in quality far superior to all others. A few of them will perfume a whole room, so great is their delicious aroma. Who could desire a more unique novelty than this? Grow Strawberries from seed, like Pansies, and have delicious fruit all summer, some white, some red, some black, and some (the bush varieties) which produce no runners. Per pkt.

Runner Varieties, Mixed—White, crimson and black-fruited. These are everbearing, fruiting freely from June till October. The plants increase rapidly by runners, like ordinary sorts. All perfectly hardy in any climate.15

Bush Varieties—Wonderful berries, having no runners, but growing into immense stool plants; fruit similar to other Alpine; enormous yielder, single plants in this State having yielded one pint of berries at a picking in November. Fine for borders, as they throw out no runners, and are singularly beautiful when loaded with their dense crops of fruit; grow easily from seed, the seedlings bearing well the first summer. Perfectly hardy and of exquisite flavor. City people, or others, who desire to do so, can grow the bush varieties admirably in pots. They are well adapted to pot culture, and will even fruit well during winter.

Everbearing Bush White—Beautiful snow-white fruit of exquisite flavor.15

Everbearing Bush Red—Like the above, but a fine crimson color.15

One packet each of the three sorts for 30c.

Ampelopsis Veichti.

The ever-lovely "Boston Ivy" or Japanese Woodbine. Finest of all hardy wall vines. 5

Pæonies.

Officialis—Mixed; well-known garden plant.10

Tree—Seed imported from Japan; the beautiful and famous Tree Pæony; all colors, mixed.20

Wistaria Sinensis.

Grand hardy climber of remarkable beauty. Mixed seed of both the white and blue varieties.10

Japanese Maples.

These are the most beautiful, unique, and the highest-priced Ornamental Shrubs to be had; hence they are seldom seen. We have secured from Japan a quantity of seed saved from all the finest varieties (of which there are hundreds), from which our customers can grow a fine lot at little expense. When small they make most charming pot plants, the varied colors and patterns of the leaves making them highly attractive. As they get larger they may be planted permanently on the lawn, as they are hardy, where they will make most beautiful objects. The leaves of the various sorts range in color from dark crimson to pink, green, white, etc., many being beautifully variegated and mottled. Besides their fine colors they are beautifully cut and divided.

Japanese Maples—Mixed seed of many sorts. 10

Freesia.

It is not generally known that these beautiful, fragrant flowering plants may be grown to great perfection in four months from seed. Seed may be sown at any time in pots and boxes, or frames, of light, rich soil. They will soon germinate, and under favorable circumstances they will bloom finely within four months from time of sowing.10

Clematis.

These two fine varieties are easily raised from seed.

Paniculata—A most superb new climber, bearing enormous quantities of snow-white blossoms.10

Davidiana—The unique bush Clematis, bearing a great profusion of blue blossoms.10

General List of Flower Seeds.

AT THREE CENTS PER PACKET.

These well-known garden flowers require but little description. We do not claim that our stock and strains of them are extraordinarily fine, as is the case with our Specialties in Choice Select Flower Seeds, which commence on page 41 and run to page 79, but we do claim that they are as good as can be had anywhere, and much better than the average.

Price
3 CENTS
Per Pkt.

We have made a uniform price of 3 CENTS PER PACKET for these well-known flower seeds. It matters not whether you take one packet or one hundred, the price is 3 CENTS PER PACKET.

ARTIMISIA GRACILIS—Beautifully cut, feathery foliage of fine fragrance and great beauty. Its habit of growth is pyramidal, 4 to 5 feet high, and every branch covered with a thick growth of fine, feathery foliage, which is of the brightest emerald green color. It is particularly adapted to cut-flower work, and all will find it useful and highly satisfactory.

ARCEMONE GRANDIFLORA—Flower of snowy whiteness, the center filled with golden stamens. Its shape is like that of a snowflake, and its generally flat, its immense size making it very conspicuous. Grows 28 inches high, and has beautiful foliage. Few garden flowers are so singularly striking as this.

ASTER, IMBRIQUE POMPON—Fine flowers, almost as round as a ball. Twenty-five colors, mixed.

AMARANTHUS, Mixed Sorts—Are valuable on account of their very beautiful and often brilliantly colored foliage, sometimes surpassing the best Coleuses.

ANTIRRHINUM, Tom Thumb—Mixed colors; fine Snapdragon, growing only eight inches high; flowers large; colors very brilliant, orange, scarlet, yellow, maroon, white, rose, and red.

BRACHYCOME (SWAN RIVER DAISY)—A graceful, Chrysanthemum-like flower, often called Swan River Daisy. Plants bloom quickly from seed and remain in bloom a long time. Plants only grow from six to eight inches high, and are fine for edgings, as their blossoms are profusely borne and are pretty and attractive; also a fine basket plant for the house. Colors, blue, white, pink, etc.

CALENDULA, Double Mixed—A superb flower; large, double and perfect to the center; rich shades of yellow. A fine plant for fall and winter blooming in pots, being of dwarf, robust habit, blooming all the time.

CALLIOPSIS, Dwarf Compact—Mixed colors; fine low-growing plants, producing thousands of blossoms.

CALLIOPSIS, New Double—This new double form of the old Coreopsis is a most desirable flower for garden culture, as it grows freely and blooms continually in any soil or situation. The flowers possess all the rich and varied colors of the single form, and are always greatly admired. All colors, mixed.

CALLIOPSIS, Lanceolata (PERENNIAL)—Graceful and profuse blooming plant, with large, striking flowers of a brilliant golden yellow, and remains in bloom all summer. Its long, wiry stems fit it admirably for bouquet making, while its golden cloud of blooms, far above the foliage, makes it a capital bedder.

CENTAUREA CYANUS, Victoria—Forms a dense mass of foliage and branches, above which are borne hundreds of lovely blue blossoms. Grows about one foot high and begins to flower within thirty days after seed is sown.

CENTAUREA CYANUS, Double—A new double-flowered form, which comes pretty true. Remarkable for the new shades and combinations of colors it shows, many of the flowers being striped or variegated.

CHRYSANTHEMUM, Annual, Mixed Colors—Plants grow from 12 to 18 inches high and bear a profusion of bloom, each flower being belted and lined with the most clear and vivid colors. This fineness of coloring has earned them the name of "Painted Daisies."

CELOSIA, Dwarf Feathered, Mixed—Pretty plants of light-colored flowers.

CHEIRANTHUS, Fairy Queen—This fine little flower is the favorite of the Stork and Wallow. One of those light flowers that give a quick return for the care, blooming a month after seed is sown, either in garden or pots. One who has never seen them does not realize how bright and pretty they are. Clusters of many-seeded, shaggy flowers are, they form a perfect mass of bloom, and for small bouquets, filling flower-baskets, etc., they are just the flower one needs in quantity. Bright, without being big, and cheerful without being gaudy. Very easy to grow and sweet scented.

ESCHSCHOLTZIA, Mixed Colors—The Eschscholtzia is one of the hardiest and most easily grown of our annuals. It is also a very showy one, growing rapidly and coming into bloom soon after the plants are at average ground. The foliage is finely cut and handsome and the flowers exceedingly showy, large and freely produced.

FENZLIA, Mixed Colors—Charming low-growing plants, forming mat-like tufts of foliage, thickly dotted by a long succession of beautiful white or rose-purple throated flowers. An extra fine little plant for edging or carpet-bedding, or for baskets in the house. Blooms very quickly from seed.

CAILLARDIA, Mixed Colors—These bear a profusion of very highly colored, daisy-like blossoms that are very attractive.

GYPSOPHILA ELEGANS—Everyone who is fond of bouquets ought to grow this. It produces long, fine, mist-like sprays of tiny white flowers that are one of the finest things in the world for all cut-flower work, softening all hard lines, toning down all glaring colors and giving the finish to a bouquet that filmy lace does to a rich dress. Blooms soon after sowing seed.

HIBISCUS, Hardy Hybrids, Mixed—(PERENNIAL)—A fast-growing perennial that in one season attains the height and dimensions of a shrub. Exceedingly fine for clumps or an ornamental hedge or screen, as they last always, never winter-kill, and in midsummer, when shrubby flowers are scarce, they bear for weeks enormous flowers as large as tea saucers, white, bluish, pale and deep pink, rose, etc., the most of them with deeper-hued eye. Plants from spring-sown seed will bloom in September.

HIBISCUS, Golden Bowl—This is a plant which grows about two feet high and begins to bloom early from spring-sown seed, the enormous flower measuring 5 or 6 inches across, beautifully cupped and of the most exquisite, soft, canary-yellow, with a large black center.

HONEYSUCKLE, Mixed—Everyone knows the Honeysuckle, with its delicious fragrance, but everyone does not know that it is quite easily grown from seed, blooming the second season, with ordinary care.

LYCHNIS, Burning Star—A blaze of brilliancy for months, if plants are kept from seeding. Star-like blossoms covering the dwarf, bushy plants as with a cloud. Perfectly hardy, and blooms even better the second season than the first. Mixed colors.

MIRABILIS, Tom Thumb—Mixed colors. A new dwarf strain of great beauty. Grows only 12 inches high, and each plant is a compact mass of lovely yellowish leaves, which, in evening, are hidden by hundreds of gay blossoms of all colors and variegations.

MORNING GLORIES—(CLIMBER)—The old-fashioned Morning Glory, as easy to grow as any weed. Brilliant, beautiful flowers of every shade of white, blue, pink, scarlet, and variegated. The standard vine. Mixed, all colors.

MAURANDYA—(CLIMBER)—It has an exceedingly graceful habit, very handsome, dense foliage, pretty, fox-glove-like blossoms, borne in great profusion, and keeps green until after severe frosts. A beautiful vine for hanging baskets, with its dainty white, maroon and rose-colored blossoms. Mixed colors.

NIGELLA—Often called Love-in-a-mist, from the curious way in which the pretty blue blossoms are veiled by the feathery, close-enveloped foliage. Dwarf mixed.

NEMOPHILA, Mixed Colors—Pretty little plants, with a profusion of very delicately colored blossoms. Blooms very early.

OXALIS, Mixed Colors—Some of the annual Oxalis are very pretty border plants, and bloom very quickly from seed.

ENOTERA—(EVENING PRIMROSE)—Large, saucer-shaped blooms of the purest white or softest, richest shades of yellow, and deliciously fragrant.

PEAS, Lord Anson, Trailing—These are of a trailing and not of a climbing habit, and are dwarf and bushy, differing greatly from the ordinary Sweet Peas. Their flowers are the largest and most beautiful in form and color of all flowering Peas, and will greatly delight all who plant them. They also commence blooming about three weeks earlier than Sweet Peas, and continue all summer. Two colors, pure white, and sky blue, mixed.

PASSIFLORA GRACILIS—This "Fairy Passion Vine" is a charming annual; it has pretty light green leaves, and is a very dainty and graceful thing for hanging baskets, pots or trellises; will grow to the height of 5 or 6 feet out of doors; the flowers are white, followed by seed fruits, at first light green shaded white; when ripe they turn bright shining red and burst open, disclosing fiery scarlet seeds; the entire plant becomes covered with these fruits and the effect is very pretty indeed.

PHACELIA COMPANULATA—An easily grown annual that will commence to bloom a month from the time seed is sown in open ground. Erect, cup-shaped flowers of a lovely blue. Flowers borne profusely and a long time. Its shade of color is one of the rarest and loveliest seen among blues.

SCHIZANTHUS, Childs' Winter-Blooming—The "Butterfly Flower." An easily grown plant, bearing quantities of gay, butterfly-like flowers, beautifully marked and spotted. The plants are such profuse bloomers that each branch looks like an immense panicle of lovely blossoms, and closely resembling some species of Orchids. For winter blooming in pots the Schizanthus is one of the most desirable of all flowers. Plants from seed sown in November will be full of bloom from January to May, making a display which cannot be surpassed. This strain is one of the grandest plants for blooming in pots that can be had.

SUNFLOWER New Double Dwarf—Compact grower, with large double flowers.

SUNFLOWER, Multiflorus—If planted singly in good soil, this new Sunflower reaches the enormous height of from 12 to 15 feet, and is richly branched from the base up to the top, each branch bearing a multitude of medium-sized golden-yellow flowers with small black center, which offers an invaluable material for bouquets and garnishing purposes.

SENSITIVE PLANT—(MIMOSA)—A curious plant with delicate, fern-like leaves that fold closely together if touched, as though they were wilted by a hot blast.

TORENIA, Large-Flowered, Mixed Colors—A neat pot plant, but of little account for the garden.

TRAILING HOLLYHOCK—This is a hardy perennial, sending out vines which trail over the ground in a beautiful manner. It is really a beautiful miniature Trailing Hollyhock, the leaves and flowers being similar to that glorious old plant, and it has the double advantage of being a constant bloomer, from early spring until late fall. The flowers are bright crimson in color and produced freely, as are also the vines and foliage.

VIOLET—Seeds slow to germinate, but not at all hard to grow. Every garden should have a good bed of these fragrant favorites.

VERBESINA, Occidentalis—Blooms profusely from June to October, the blossoms being large, richest and brightest golden-yellow in color, closely resembling a Cosmos, and borne on long, graceful stems. Seed sown in pots at any time during winter will be up and blooming within a few weeks.

YUCCA FILAMENTOSA—The stately clumps of stiff, bayonet-like leaves, bristling out from the center in every direction, are extremely ornamental, but in midsummer they take on an added glory. Thick, woody flower-stalks are thrown up, growing as high as a man's head, and bear at their summit immense compound panicles of creamy, bell-shaped flowers, each floret two inches across.

Price of all these sorts, 3 Cents per Packet.

VEGETABLE SEEDS.

What we say about our Flower Seeds, on page 41, may be said about our Vegetable Seeds. We grow and offer but a limited number of varieties, only those which possess the greatest value for the home garden and the markets. These varieties are also special stocks, cultivated, selected and improved until they have reached the highest mark of perfection which it is possible to attain.

Beets and Turnips, round, smooth, uniform, tender; Cabbage, large, solid, crisp, sure-heading and long-keeping; Tomatoes, large, smooth, uniform, perfect in color, shape and quality; Lettuce, crisp, beautiful and delicious; Corn, rich, sugary, tender and perfect; Melons, of high flavor, quick and robust growth, perfect and luscious; Onions, uniform in size, perfect in shape, delicate in taste; Squashes, early and late, of high quality; Radishes, crisp, mild, perfect in shape and color, and of quick growth. These are all points which we have brought to perfection in our prize strains of Garden Vegetables. Our thousands of customers in every nook and corner of the country know this, and to them we refer those who have never used our Seeds. They can be found everywhere, for we supply nearly a half a million plants direct, which is more than the combined output of any other two houses in the world, and is in itself the best possible endorsement of the high quality of our Seeds.

Asparagus.

The earliest vegetable of spring, with a delicious flavor as of green peas. Every family should have a large bed full. Seed grows very readily. Sow in rows one foot apart, and keep free from weeds. Transplant the second year into permanent beds, setting plants two feet apart. Hay the ground very rich and mellow and give the soil an annual top-dressing of rotten manure. Nothing more delicious than Asparagus tips stewed until tender, then season with butter, pepper and salt.

New Mammoth—The tender shoots used for cutting are freely produced, and are of enormous size, very tender, rich and delicate. It starts very early in spring and lasts in cutting condition eight weeks. The largest and finest sort grown. Seed, 10c. per pkt.; 25c. per oz.; \$1.50 per lb. Fine two-year-old roots, 50c. per dozen; \$2.50 per 100.

COPYRIGHT 1913 BY J.L. CHILDS

Artichoke, Globe.

This is cultivated for its unopened flower-buds, which are cooked like Asparagus. On established plants these buds are borne constantly from September until frost, when tender succulent vegetables are getting scarce. Hardy perennial, easily grown in any garden soil and lasts for many years. Sow seed in drills and transplant the next spring into permanent beds. Protect by light litter the first winter. Pkt., 10c.; oz., 30c.

Carrot.

Popular both for table and stock. A heavy cropper. Roots can be kept for winter like Beets and Turnips.

Danvers—(PRIVATE STOCK.) The true strain. No better to be found anywhere. All gardeners know the importance of securing the best seed to grow really fine crops. This can be relied upon as the best seed to be obtained at any price. It will yield 30 tons per acre. Pkt., 5c.; oz., 15c.; lb., 80c.

Improved Long Orange—A very popular variety for stock feeding. Heavy cropper. Pkt., 5c.; oz., 15c.; lb., 70c.

Oxheart—An early table sort; small and short, but fine grained and tender. Can be forced or sown in the garden for early use. Pkt., 5c.; oz., 15c.; lb., 75c.

Beans.

One of the most delicious of all vegetables, and one that may be had in great abundance all the season. Sow successively every two or three weeks from early May to end of July. Those sown latest, and which mature in September, October, or November, will be the best. String Beans are better in autumn than at any other time.

W New Early Golden-Eyed Wax, (BUSH)—Ten days earlier than any other golden wax, and, moreover, is absolutely rust proof. An immense bearer, and pods tender and crisp. A superb market sort because of its beautiful color and uniformity. Pkt., 10c.; pint, 30c.; quart, 50c.

Extra Early Refugee, (BUSH)—The earliest strain of Refugee by ten days. One of the most profitable Beans ever grown. Loaded with pods in any season, and of a fine quality. Grown by all market gardeners, who are always quick to pick up a good thing and to stick to it after they once see it. Pkt., 10c.; pint, 25c.; quart, 40c.

Byer, (BUSH)—This out-ranks any other Bush or Snap Bean so far introduced. In quality it is the best, and in productiveness it will more than double any other variety. The Michigan Agricultural Station, where this Bean was tested, says of it in their Bulletin, No. 153, issued in February, 1898: "The Byer Bean. —Plants of healthy vigorous growth, very branching and productive. The pods are five to six inches long, round, nearly straight, green in color, very brittle and fine in quality. The plants are very productive, and have a long season of bearing. It is a valuable sort for the home garden or market." The Bulletin then goes on to give the comparative tests. This table shows that one plant of the Byer Bean produced 271 pods, weighing 47 ounces. The variety which approached next to it was Stringless Green Pod, with 121 pods, 20½ ounces. From that the number ranges down to 16 pods, 2½ ounces, in Union White Valentine. This shows that the Byer is more than twice as productive as the best of the twelve other varieties tested. I do not think we need to say any more in recommendation of it. Price, 10c. per pkt.; per pint, 30c.; per quart, 50c.

W Yosemite Monster Wax, (BUSH)—Mammoth pods eight or ten inches long, as thick as one's finger, and very fleshy and thick-meatd. Color a rich golden yellow, very clear and wax-like. Bush an enormous bearer, and sure to attract attention anywhere from the size of its great pods. Pkt., 10c.; pint, 30c.; quart, 50c.

W Improved Golden Wax, (BUSH)—Large golden pods, tender and wax-like. A fine variety. Pkt., 5c.; pint, 25c.; quart, 40c.

Smart's Hybrid Green Pod —

BEAN, BUSH LIMA.

Burpee's Bush Lima, (BUSH)—This grows 18 to 20 inches high, of stout growth, erect, branching vigorously into a fine circular bush two or three feet in diameter. This bush character is permanently established, and not two per cent. will attempt to throw up runners. Leaves of large size, healthy and vigorous, leathery and dark emerald green, showing great health and strong constitution. It is the only bush form of the large-seeded Lima, and ten times more valuable than the small-seeded sorts. Its yield is quite wonderful, each bush producing 50 to 200 large pods, well filled with beans of great size, and of the true, rich, luscious Lima flavor. It is a matter of congratulation that we can now raise the true large Lima without poles. Pkt., 10c.; pint, 25c.; quart, 45c.

Mammoth-Podded Lima, (POLE)—(KING OF THE GARDEN) —The Limas have a distinct, rich, buttery flavor, very different from all other sorts, and are much liked by most people either to use green or dry. Used as Shell Beans only. We consider this variety the finest of all, with enormous pods containing four to six immense Beans in each. Give a hot, sunny location. Boil until tender, pour off the water, and season with butter, salt and a little cream. Pkt., 15c.; pint, 30c.; quart, 55c.

Lazy Wife's, (POLE)—The old standby. Never fails to produce loads of round, thick-fleshed pods, fine for snaps and last long in perfect condition. Fine as a Shell Bean and of superior quality. Pkt., 10c.; pint, 30c.; qt., 50c.

Early Golden Cluster, (POLE)—This bears a profusion of handsome golden pods, six to eight inches long, and continue in bearing a long time. Pkt., 10c.; pint, 25c.; qt., 50c.

YOSEMITE MONSTER WAX.

THE MARKET GARDENERS BEETS

BLACK QUEEN

LANE'S SUGAR

Beets

The sweet, tender Beets are very profitable summer and winter crops. The tops are very profitable for greens. Very early varieties have been developed as a result of progressive hybridizing, and give them a beautiful deep red color and firm texture. When well grown, Beets are most delicious if boiled and served with butter, or a rich cream sauce, or if sliced and served with a hot dressing.

Edmond's Blood Turnip—This is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Egyptian Dark Turnip—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Detroit Early Dark Red Turnip—This is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Black Queen—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Improved Early Blood Turnip—Very early variety, and an excellent variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Early Egyptian Dark Turnip—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Improved Long Smooth Red—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Bastin's Blood Turnip—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Lane's White Sugar—This is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Mangle, Mammoth Long Red—This is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

Mangle, Golden Tankard—A very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety. It is a very early variety. It is a very hardy and productive variety.

and 6 to 8 in. Large, oval roots, much as 2 to 4 lb. them. Price, 2 Mar. 2015. A heavy crop. Pkt., 5¢; 1 lb., 10¢; 5 or 10 lb. lots, by express, 90¢ per lb.

ASPARAGUS BEET

The Asparagus Beet.

A wonderful new vegetable which we offer now for the first time, and which is highly recommended by the best gardeners. The leaves are a bright green, and are very tender and delicious when served with butter, or a rich cream sauce, or if sliced and served with a hot dressing. The great value of the plant is in the fact that the leaves, which are cut and used all summer, are very early in the season. As a substitute for Asparagus nothing could be better, and it may be cut and used all summer. A most valuable new vegetable. Fit for use 2 to 3 months from seed. Pkt., 10¢.

COPYRIGHTED BY J.L. CHILDS 1893

SNOWBALL CAULIFLOWER

Cauliflower.

The most luscious of all the Cabbage family. Requires high cultivation and rich soil. Cook by steaming until tender, then dress with drawn butter and serve hot. It is one of the most delicious of all garden vegetables.

Snow Ball—One of the very best varieties for early culture. Dwarf, compact grower, with large heads of snowy whiteness and delicious flavor. This is a sure header, very early, but valuable for late as well as for early Cauliflowers. Pkt., 15c.; oz., \$2.50; lb., \$7.00.

AMERICAN BEAUTY.

American Beauty—A fine hardy Cauliflower, especially adapted to American soil and climate, as it is an American strain and American grown seed. Heads early, size large, quality the very best. Pkt., 10c.; oz., \$2.25.

Earliest Dwarf of Erfurt—Valuable for garden culture and an extra fine forcing sort. Our strain of this is the finest to be had in Germany, and it is considered to be the perfection of all Cauliflowers. Pkt., 25c.; 1/2 oz., \$1.00; 1/4 oz., \$3.00; oz., \$5.00.

GOLDEN SELF-BLANCHING.

Celery.

A vegetable at once beautiful, toothsome and beautiful. Said by physicians to be of great benefit in all diseases of the nerves and kidneys. Deliciously fresh, crisp and nutty to the taste, and with the broad stalks ivory white, waxy yellow or rosy red, tipped with finely compound leaflets of pale, glaucous green, are ornaments to the finest table. Sow early in house or hot-bed and transplant, or sow outdoors when the ground becomes warm, making the soil very smooth. When plants are four or five inches high transplant, giving six inches between plants in the row. Have the soil very fine and rich, plant in trenches, and as the plants grow draw the earth closely around them, to blanch the stems. Never do this in wet weather, or the stems will rust. South of the Ohio, Celery can remain in the ground all winter with a little protection. In the North, plants should be taken up and stacked closely together, with soil firmed around the roots, and kept in cellar or pit for use.

Giant Pascal—A sport from the Golden Self-Blanching, of immense size, broad, thick, stringless stalks, remarkably crisp and nutty, easy to blanch, and the very best keeper of any Celery. The huge stalks of this kind will "snap" like glass, they are so tender, and they never are watery or strong. Fine market sort, and one of the very best for the home garden. Pkt., 10c.; oz., 30c.; lb., \$2.00.

White Plume—One of the most beautiful of all, and the earliest. Brittle, fine-grained and the easiest known sort to blanch. Pkt., 10c.; oz., 25c.; lb., \$2.00.

Golden Self-Blanching—Fine to follow White Plume. An exceedingly fine flavored sort; blanches easily to a beautiful golden yellow, and is very brittle and crisp. No garden complete without it. Pkt., 10c.; oz., 30c.; lb., \$2.50.

New Rose—A fine rose-colored Celery of high flavor, crisp, and nutty. Much liked. Pkt., 10c.; oz., 50c.

Giant Turnip-Rooted, or Celeriac—Bulbs like a small turnip, with a pronounced Celery flavor, excellent sliced and cooked for stews, salads, soups, etc. Pkt., 5c.; oz., 25c.

Cabbage.

There is no garden vegetable grown that success or failure so plainly depends upon the quality of seeds sown. Poor seed of Cabbage is dear at any price. Our seed is all raised on Long Island, where the finest Cabbages in the world are grown. We could buy common Cabbage seed for very much less, but we know our customers would rather pay a little more and get seed they can rely upon. Three things are necessary to raise fine Cabbage—extra good seed, rich, mellow soil and thorough cultivation.

Long Island—A new early sort of great value, and one which can be grown for early, medium and late crops, either at the North or South. It is very early, of large size, uniform, and a sure header; it does not burn or blister, but retains its lustrous, fresh green color even after being shipped to distant markets; hence its great selling qualities. By those who have grown it, it is said to be the most valuable Cabbage in cultivation, and from our experience we can say that it really is the finest and most profitable sort to grow, either North or South. Pkt., 10c.; oz., 20c.; lb., \$2.00.

Early Long Island Wakefield—A standard variety, early and of fine quality. By all odds the best and most profitable early sort to grow in any part of the country. Our strain is perfect. Pkt., 10c.; oz., 20c.; lb., \$2.00.

Newark Early Flat Dutch—An early large Cabbage of excellent quality, of the flat-head type. Pkt., 10c.; oz., 20c.; lb., \$3.00.

Excelsior Large Flat Dutch—This is a fine strain of Flat Dutch, always a standard sort, particularly in the South and Southwest, as it heads well in hot weather. Quality good and size large. Pkt., 5c.; oz., 15c.; lb., \$1.50.

Winningsstadt—This is a German variety; very distinct, with large, pointed heads, solid and closely packed. Very fine quality and exceedingly popular. Pkt., 5c.; oz., 15c.; lb., \$1.50.

True Surehead—This is also of the Flat Dutch type, and therefore very certain to head, however hot and dry the weather. The heads are large, round and flat and very hard and firm of texture, fine grained, and of most excellent quality. It is also a remarkably good shipper and keeper, and is bound to become a universal favorite. For years our True Surehead Cabbage seed has been the leading sort with thousands of market gardeners. Pkt., 10c.; oz., 20c.; lb., \$2.00.

World Beater—A new Cabbage, as large or larger than Marblehead Mammoth, yet uniform in size and true to type, and a very solid header. No doubt it is the very best mammoth Cabbage to be had. Originated here on Long Island by a noted Cabbage grower. Pkt., 10c.; oz., 20c.; lb., \$2.25.

All-Seasons—As the name would indicate, good for all seasons—early, medium or late. A sure header and long keeper; quality very fine. It is a remarkably good new sort. Head large and solid, round with flat top, finest quality, and ready for marketing almost as early as the standard early sorts. Pkt., 10c.; oz., 20c.; lb., \$2.00.

Vandergaw—A highly bred Cabbage that could hardly be improved in any respect. Compact, short-stemmed, sure to head, with heads very uniform and hard, few outer leaves, and quality of the very best; crisp, fine-grained, and delicate and delicious flavor. Can be used as second early, main crop, or as a late Cabbage, by sowing seed in succession. Pkt., 10c.; oz., 20c.; lb., \$2.00.

Perfection Drumhead Savoy—The Savoy Cabbages are not nearly as much grown as they ought to be. Easily distinguished by their crisped, wrinkled leaves and their distinct marrow-like flavor when cooked, approaching the taste of Cauliflower more nearly than any other Cabbage. This is one of the best Savoys. Pkt., 5c.; oz., 20c.; lb., \$2.00.

Marvin's Savoy—An extra fine Savoy. A sure header, with large, wrinkled heads, that are delightfully tender and crisp. A fall and winter Cabbage, keeping well and not losing its flavor. The best of all Savoys, which have the most delicious flavor and are more crisp and tender than other Cabbages. A superb sort for the home garden. Pkt., 10c.; oz., 30c.; lb., \$3.00.
Red Dutch—The most popular pickling Cabbage. Large, deep red. Pkt., 5c.; oz., 10c.; lb., \$2.00.

1893

Variiegated—This is a unique novelty among vegetables. It is of the ordinary size and habit, but the dark green leaves are streaked and blotched with white, rose, red, and lilac, and when the plant attains its size it makes a splendid show when planted in rows or masses, or when grown as single specimens, especially in the autumn and during winter. Pkt., 10c.

SPECIAL OFFER.

For only 75c. we will send one packet each of these 13 finest Cabbages. It gives one a chance to ascertain the best sorts for their locality.

Brussels Sprouts.

Defiance—A finely bred, large and tender strain of this delicious vegetable. Stem tall and covered with tender little heads, or "sprouts," from top to bottom. Quality very fine when cooked and served like Cabbage. This splendid vegetable should be more generally grown. All who have tried it prefer it to Cabbage. It is easily grown and those who once try it always grow it. Pkt., 10c.; oz., 50c.

Matchless—A variety of vigorous growth and fine, solid sprouts of the very best quality. An extra fine sort, which is highly prized in Europe. Pkt., 5c.; oz., 15c.; lb., \$1.50.

Cucumber.

Do not try to grow Cucumbers in poorly prepared ground. Make low, flat hills from four to six inches apart, each hill two or three feet across, and thoroughly pulverize sixteen to eighteen inches deep. Mix a large shovelful of rotten manure in the soil of each hill, and plant from six to eight seeds in each, as some are apt to fail. If bugs appear, dust with slug shot or with lime and soot. Allow no fruit to ripen on vines. For pickles and late Cucumbers seed can be sown as late as July.

Childs' Early Beauty—A most remarkable and valuable early Cucumber, first offered last year. It is a sport from Early Siberian, and has that variety's great value as a cropper. It is as early as Extra Early Russian, though twice as large as that variety, and keeps its lively green color to a very late state of growth, and will supplant all other early sorts, such as Siberian, Russian, Green Prolific, Thorburn's Everbearing, etc., for it is not only earlier, but larger and much finer in every respect. It is even so fine that it has been called Early White Spine, though it has no relation to that superb late variety. Pkt., 10c.; 3 pkts., 25c.; oz., 35c.; lb., \$3.00.

Long China—A very solid Cucumber, with few seeds, and growing eighteen to twenty inches long. A fine and prolific variety. Pkt., 5c.; oz., 25c.; lb., \$1.25.

Thorburn's Everbearing—Claimed to even excel the Early Russian in its ever-bearing character, producing fruit in immense quantities, whether fruit is allowed to ripen on the vines or not. Fine for table or for pickles. Cucumbers short and thick. Pkt., 5c.; oz., 15c.; lb., 80c.

Childs' Ivory Monarch—An ivory-white Cucumber, growing nearly two feet in length and weighing five or six pounds. Six times larger than any other sort. It is really a monster, and when half grown exceedingly fine in quality. Its enormous size, great beauty and oddity make it one of the finest vegetables for exhibiting at fairs, and it never fails to capture first prize. Its flesh is thick and solid, with a very small seed cavity, and notwithstanding its size, it has fewer seeds than any other Cucumber we ever saw. Pkt., 10c.; 3 pkts., 25c.

Improved Early Russian—One of the most valuable, especially in the South. It is so very dwarf, hills need be only three feet apart, yet it is one of the most prolific varieties of all, bearing its short, plump fruits in clusters, and if not allowed to ripen seed will bear from June until October, and that in hot, dry weather that crisps nearly every other variety, root and branches. Pkt., 5c.; oz., 20c.; lb., 90c.

Bennett's White Spine—(PRIVATE STOCK). Our seed from this is saved from one of the finest stocks on Long Island, and Long Island leads the world on choice garden vegetables. These Cucumbers grow seven to ten inches long, uniformly plump and full to the very ends, a glossy dark green in color. A superior quality in every respect. Pkt., 10c.; oz., 20c.; lb., \$1.00.

Early Green Cluster—A prolific variety, with crisp, brittle fruit. A fine pickling variety. Pkt., 5c.; oz., 10c.; lb., 80c.

Cherkin—Small, thick, oval fruit, very prickly, crisp and tender. Used only for pickling. Pkt., 5c.; oz., 10c.; lb., 60c.

Green Prolific Pickling—A standard pickling variety, with slender, dark green fruit, very crisp. Pkt., 5c.; oz., 10c.; lb., 60c.

Japanese Climbing—This Cucumber is such a strong and vigorous grower that the vines attain twice the length of ordinary varieties. The vines climb readily, and they may be grown on fences, poles or trellises, thus saving much valuable space in small gardens. The fruits are of a fine, lovely green color, about a foot in length. Flesh thick and firm and of salad quality. Never bitter and exceedingly fine for pickling as well as for slicing. The vines never mildew, and the fruit being raised well above the ground is always free from insects, rot or rust. When picked freely, a vine will continue bearing during the entire season, and one hill will keep a good sized family supplied with this delicious vegetable all summer. Pkt., 10c.; oz., 25c.

African Horned—When fully grown it is the size of a small Muskmelon, oblong, and covered with protruding points or horns. For eating it should be taken before it is too old. In quality it is simply delicious, having the pure Cucumber flavor in a degree of delicacy and refinement not before seen. It is exceedingly tender and consequently easily digested. Pkt., 10c.; 3 pkts. for 25c.

One packet each of the eleven sorts, 60c.

Sweet Corn.

Every family garden ought to have a selection of Sweet Corn, from the earliest to the latest varieties. Fine for drying, as well as for summer table use.

Childs' Honey Dew—For years seedsmen have been working to get a corn as early as the Cory, with purple top, white cob and superb qualities of the later varieties. We at last have it. Childs' Honey Dew is not only the earliest, but has a good sized ear, white cob, and large, pearly kernels of the very finest quality, tender, sweet and nutritious. It also keeps in good condition a long time before hardening, and runs perfectly uniform, each ear exactly alike. It grows to medium height, and the ears are formed low and two to three on each stalk. Mr. Willard, the extensive seed-corn grower of Weathersfield, Conn., who grew an acre of the Honey Dew the past season, says: "It is the finest Early Corn." It is the most profitable corn to plant, combining, as it does good size and color, luscious quality, handsome appearance and long keeping, and earliest to mature. Pkt., 10c.; pint, 30c.; quart, 50c. We will send a peck, by express, for \$1.00, or a bushel for \$3.50.

Shoe Peg, No Plus Ultra, or Quaker Sweet—One of the very best eating varieties grown. An old sort, but none the less valuable on that account. Very deep kernels of the sweetest and most appetizing flavor, and one of the best of all for drying and canning. A prolific and thoroughly reliable Corn. Pkt., 10c.; pint, 25c.; quart, 40c.

Mammoth—Immense ears of superb quality; very late. Can scarcely be omitted from a first-class garden. Pkt., 10c.; pint, 25c.; quart, 40c.

Cory Extra Early—One of the most valuable early Corns grown. One to two weeks earlier than any other sort, except Childs' Honey Dew, while the ears are plump and of good size and quality, sweet, tender and delicious. Pkt., 10c.; pint, 20c.; quart, 35c.

Early Maine, or June 21st—This is one of the very earliest and, by the way, one of the very finest sorts grown. For an early variety it is of large size, with large pearly white kernels, which are very highly flavored. It is not subject to the Corn disease, and is the surest cropper of any extra early sort. We can recommend it very highly. Pkt., 10c.; pint, 30c.; quart, 50c.

Pop Corn, Ruby Beauty.

This new Pop Corn is to our mind the finest variety yet seen. It is of the rice type, with beautiful ears and kernels, of the richest ruby color. Grows quickly, ripens early, and when popped expands into a great flake-like puff, which is tender and delicious. Pkt., 10c.; pint, 40c.

EVERGREEN SWEET CORN.

Evergreen—The standard late sort, and probably the all-round best Sweet Corn grown. It has magnificent large ears, deep kernels, small cob, and possesses the finest flavor, being tender and juicy. A favorite with everybody, and must have a place in every garden. Pkt., 10c.; pint, 20c.; quart, 35c.

Egg Plant.

New York Improved—Very popular in all the city markets. This is the earliest, best and largest variety grown and is a fine one for either market or private garden. Stem solid in heart and translucent but warm, rich, melon soft. The fruit is very handsome, large, smooth, and round, and of a rich, shining purple-black color, and is long until frost. Cook by cutting into half or quarter-inch slices, and after paring, dip them into salted water for an hour, then dip them in egg and bread crumbs and fry in hot fat until golden brown. It has a more delicate much liked or everywhere. This is very fine. Pkt., 10c; oz., 25c; lb., \$2.00.

Giant New York Spineless—The finest Egg Plant in cultivation. It is of the N. Y. Purple type, but much larger in size and has a most deliciously rich color. In quality it is unsurpassed. But what makes it particularly desirable is the fact that its stems and leaves are devoid of spines and the plants can be handled without discomfort. A really valuable variety. For market as well as for family use it is equally well adapted. Pkt., 15c; 1/3 lbs., 37c.

White Pear—This new, pure white Egg Plant is a most beautiful variety as well as the finest in quality of all Egg Plants. Very tender, delicate and highly flavored. Ripens early, and grows to a large size and bears freely. Really one of the best and a valuable variety in a long time, and one which we can highly recommend. Pkt., 10c.

Garden Vine Fruit.

Garden Lemon—This new vegetable is a great boon to all those sections of the country where fruit is scarce, as its fruits make delicious preserves, sauce etc., and are more easily prepared. This is something like the Vine Peach, but needs no Lemon in putting up, as it is much more acid. Cultivate like the Melon. Pkt., 10c.; oz., 25c.; lb., \$1.40.

Vine Peach—This sort has fruits the size of a large Peach, and of a bright orange color. Flesh firm and when cooked with lemon to give it a slight acidity, makes fine pies, sauce, sweet pickles or preserves. Easily grown, and a good keeper. Stored in a cool, dry place they keep fresh and good for several months. Pkt., 5c.; oz., 15c.

COPYRIGHTED BY J. L. CHILDS 1893.

Leek, New Giant Italian.

The Leek is a very hardy, easily-grown vegetable, of mild, agreeable flavor, and is used for soups, stews, and as a garnish. It is much more tender than that of the Onion. This is a new and very valuable variety, the best for general cultivation. Pkt., 5c.; oz., 15c.; lb., \$1.00.

Kohl Rabi.

Extra Early Vienna—A curious vegetable, in appearance half-way between a Turnip and a Cabbage, with a turnip-like swelling of the stem above ground, which, while young and tender, has a delicious Cauliflower-like flavor. Very appetizing and pleasant. Very easily grown. Pkt., 5c.; oz., 25c.; lb., \$2.00.

Ground Cherry.

Something like the old Husk Tomato. Easily grown on any light soil and very prolific bearers of tender little fruits, each enclosed in a husk. For pies, sauce and preserves they are much liked, and if left in the husks will keep a long time in a cool, dry room. Pkt., 5c.; oz., 25c.

Kale, Dwarf German.

Kale is very easily grown and much hardier than any Cabbage, standing the winters well, if protected by a little light litter or straw. The action of frost improves its flavor wonderfully, and it is particularly fine for winter and early spring greens. Sow seed in May or June and transplant as for Cabbage. For spring use they may be sown as late as September. Pkt., 5c.; oz., 10c.; lb., 50c.

Herbs.

Anise	Useful in the sick room, and many other ailments.	5	10
Balm	For rheumatism, etc.	5	10
Balm	Very fragrant leaves for use in soups, etc.	5	10
Caraway	Seed of extensive use in flavoring.	5	10
Coriander	Used for flavoring soups, etc.	5	10
Dill	Used to impart a pleasant flavor to pickles.	5	20
Hoarhound	Used for curing coughs and colds.	5	10
Lavender	Fragrant leaves used to scent clothing.	5	40
Sage	Most useful of all; needed in every garden.	5	20
Sweet Fennel	5	20
Sweet Marjoram	For herb.	6	15
Tansy	For medicinal use.	5	30
Thyme	5	40
Savory, Summer	Fine for flavoring, dressing, etc.	5	15
Rosemary	Aromatic and medicinal. Very fragrant; also a moth preventive.	10	50
Wormwood	A splendid plant for poultry.	5	25

One packet each of the fifteen fine sorts, 50c.

Dandelion.

Improved Large-Leaved—The old "greens" of our grandmothers, now improved to large, tufty plants, with wide, long leaves of superior quality. These make a very healthful, nutritious and pleasant food that can be used very early in the season. Pkt., 10c.; oz., 50c.

Lettuce.

An indispensable vegetable—certainly the finest salad plant known. Easily grown, either in hot-bed or garden, and can be sown very early. South of Mason and Dixon's line, can be sown in open ground in fall, and needs only a slight protection of straw or loose litter to be perfectly hardy.

Childs' Half Century—We all know how much careful selection year after year has to do with the quality of our vegetables, but there are few things that can claim a half-century's descent from only the choicest and best specimens of one type. This Lettuce can do so, however, and we are not surprised, therefore, at its superior qualities. Its leaves fold together, forming a long, loose head, remarkable for tenderness and delicious flavor. It may seem a good deal to say, but it is, nevertheless, a fact, that for tenderness, brittleness and delicious quality, this Lettuce, grown in the open ground, surpasses any other sort grown under glass. Nothing can approach it in quality. It is so brittle and tender that its leaves break to pieces in handling, if care is not used. It is a quick grower, and attains its full size in forty to fifty days, and remains in fine condition for a very long time. Pkt., 10c.; oz., 25c.; lb., \$2.50.

Tomhannock—Just the Lettuce we have all been looking for; one that will stand the hot, dry weather of mid-summer without growing bitter, tough and running to seed. It makes a beautiful bunch a foot high, and even more across, and the leaves are delightfully crisp and tender. Light green, well bronzed. Pkt., 10c.; oz., 20c.; lb., \$1.25.

Golden Heart—A very handsome, large-growing variety of rich golden yellow color. Good quality, grows quickly and is ready to use early. Pkt., 10c.; oz., 25c.; lb., \$2.50.

CREAM

BUTTER.

Cream Butter—A crisp, tender, richly flavored variety, forming large heads of a beautiful creamy color; medium early, and stands summer heat remarkably well. This is one of the very best summer varieties of head Lettuce we have ever grown. Heads very solid, crisp, and of a beautiful and refreshing cream color. In quality it is very buttery and rich. Pkt., 10c.; oz., 20c.; lb., \$1.50.

White Paris Cos—This is a popular European sort, and is good for forcing or early summer sowing. Well grown heads weigh 5 to 7 pounds. Pkt., 10c.; oz., 15c.; lb., \$1.35.

Denver Market—A fine sort, still able to hold its own against all new-comers. In every respect this is a first-class sort, and always popular. Pkt., 5c.; oz., 15c.; lb., \$1.

Denver Market, or Savoy—An early variety of head Lettuce, either for forcing or open ground. Forms large, solid heads of a good light-green color. The leaves are beautifully marked and blistered (like Savoy Cabbage), and crisp and tender; of excellent flavor. This is in many respects a most unique Lettuce, and one which will be very popular as soon as known, occupying the same place among Lettuce, as Savoy's do among Cabbages. Pkt., 5c.; oz., 15c.; lb., \$1.25.

New Hanson—Our Southern customers say this is the finest Lettuce they can grow. Plants large and uniform, perfect head, quality superlatively fine, and stands heat extraordinarily well. There is probably no better large-heading sort than this. Pkt., 5c.; oz., 15c.; lb., \$1.00.

Buttercup—A beautiful golden sort, almost as ornamental as a Colous. Large heads and fine quality; beautiful golden yellow. Pkt., 10c.; oz., 30c.

STRAWBERRY
MUSKMELON.

Muskmelon.

This fine fruit is much more delicious when eaten fresh from the vines than when allowed to stand for days in the heat of the market. Grow them like Cucumbers.

Strawberry—Its first appearance last fall caused a great furore in the markets. People were loud in its praise, exclaiming that it surpasses all other Melons in points of excellence, with the flavor like that of the Strawberry, hence the name. It grows to a desirable table size, from six to eight pounds each. Its outside appearance compares favorably with the Queen Number of old, turning to a yellowish hue, as it were, over night, when ripe. Its flesh, deep flesh is of an attractive salmon-red color, soft to the touch, and exceptionally delicious. It is certainly one of the most attractive and best flavored Melons yet grown. Pkt., 10c.

Childs' Great Combination—(Great Combination is an appropriate name for a Melon which contains the largest size, superior quality, long frame, late ripening and long keeping qualities. In size it will average twice as large as any other Muskmelon you know, two and a half to three pounds, in length as well. It is very thick minded, rich in color, yellow in color, and highly fragrant. In quality it is very rich and delicious, being produced only by Emerald Gem. It is the best of the Melons for its size, and it grows better and faster than any other Melon. It is a very good variety for winter use, for which it is well adapted. It is a combination of all the best qualities of the Melons, and it is a splendid uniform specimen, and its fruit is as large as if it were a much larger variety. A packet of seeds, which will be grown in the fall, for the winter, 20c; 1 lb., \$1.25.

Princess—A very handsome, large, and delicious variety for home garden use. The fruit is very large, and it is very rich in flavor. Melons of this size and quality are not very common. Pkt., 10c; 1 lb., \$1.25.

Bay View—A very profitable variety to grow, and it will yield from 4,000 to 5,000 lbs. to the acre, and the seed is very fine. Some of the sweetest and most delicious Melons ever grown, both in flavor and color. Pkt., 10c; 1 lb., \$1.25.

Champion—A very handsome, large, and delicious variety of delicious flavor and rich quality. A great crop and a favorite market variety. A fine standard variety, which will give great satisfaction in any locality. For shipping it is without doubt the very best of all Muskmelons. It grows well, comes well, is of the appearance and high quality. None better for market gardeners. Pkt., 10c; 1 lb., \$1.25.

Emerald Gem—In quality this variety is well and every home garden should include it. Medium size, round, with salmon flesh, so rich, sweet and so good that it needs to be eaten with a spoon. No other Melon can compare with it in eating qualities, and it is the sort of all others for the home garden. It is rather soft and perishable for marketing, except near home. Where known in our villages and cities, the Emerald Gem brings double the price of any other Melon, and for gardeners who deliver to customers, or to the market direct, it is the most profitable. Pkt., 10c; 1 oz., 15c; 1 lb., \$1.25.

Banana—Melons very slender, and two or three feet long. A very fragrant variety, and it is packed with the rougher ribs, of very good quality. Its flesh and flavor is as well as its shape, reminding one of a great delicious Banana. Pkt., 10c; 1 lb., \$1.25.

Montreal Green Nutmeg—One of the most valuable large melon and a good one to try; flesh green, very firm, and delicious, and unlike most varieties, does not lose flavor during wet or cold weather. Pkt., 10c; 1 lb., \$1.25.

Winter Pineapple—A new melon of high value, owing to the fact that it can be kept until Christmas or later. The color of the flesh is a deep lemon yellow, and the outer skin is a dark green, marked with yellow. The quality is delicious, having a rich spicy flavor and much thicker and firmer flesh than ordinary Muskmelons, in fact their long keeping qualities. They very rarely ripen on the vines, so the melons must be picked off in the fall and put in some cool place, until they are wanted. It is usually necessary to place them in a warm room for three or four days before using, so as to ripen them thoroughly; in this way they can be had for the winter months. Pkt., 10c; 1 oz., 20c.

One packet each of the nine sorts for 90c.

DUKE JONES" WATERMELON.

Watermelon.

Never plant Watermelons on hard, poor soil. Plant in large, deep, mellow hills, made very rich with well-rotted manure, and you will have great crops of this delicious vegetable, which, to be had at its best, must be picked from one's own garden.

Duke Jones—Briefly, this is supposed to be the largest, handsomest, most prolific, and in other respects the finest melon grown. Will average nearly fifty pounds each by the field, while some specimens reach nearly one hundred pounds. Pkt., 10c.; oz., 20c.; lb., \$2.00.

CHILDS' RUBY GOLD WATERMELON

Childs' Ruby Gold—A variety introduced by us. The most beautiful table Melon grown. Fine for table decoration, cut crosswise and alternated with slices of deep red melon. In shape the melons are a long oval, two feet or more in length, and will weigh 40 to 60 pounds each. The flesh is a rich, solid golden yellow, with star-like center of carmine or ruby-red, almost too beautiful to think of eating, yet its quality is as superior as its appearance. There is absolutely no core or hard spots in it, but the flesh is juicy, sweet, luscious, melting in the mouth almost like ice-cream. Lasts long in perfect condition without getting "stringy" or "mealy." Early and sure cropper. Pkt., 10c.; oz., 30c.

Hungarian Honey—One of the most delicious varieties known, of an almost honey-like sweetness. Round, dark green melons that will average about ten pounds each; flesh rich and melting. Extra early and fine for the Northern States. Pkt., 5c.; oz., 15c.; lb., \$1.25.

Phinney—An early, oval variety, prolific, sweet and crisp. One of the best. Pkt., 5c.; oz., 10c.; lb., 75c.

KLECKLEY'S SWEET.

COPYRIGHT
1899
BY J. L. CHILDS.

Kleckley's Sweet—The earliest large melon, weighing 40 to 60 pounds each, and ripening in about seventy days from the time of planting. It is a great yielder, and in quality the sweetest, juiciest, most crisp, solid and luscious. Grows two and one-half feet in length. Brilliant red inside, dark green without. With us the best melon ever tested. Pkt., 10c.; oz., 20c.; lb., \$1.25.

Mountain Sweet—A fine old sort, so deliciously sweet and tender that it will almost melt in one's mouth. The best variety for the extreme North, where few Watermelons succeed. Pkt., 5c.; oz., 10c.; lb., 75c.

Dixie—A great Watermelon for the South, for growing to ship to Northern markets early. It possesses the finest quality, combined with large size, handsome appearance, earliness, long-keeping and excellent shipping qualities. It is so much earlier than Kolb's Gem that it gets into market in time to catch the highest prices. It is a great melon for marketing. Pkt., 5c.; oz., 10c.; lb., 60c.

CUBAN QUEEN

Cuban Queen—A very juicy, sweet variety, of the largest size, a special favorite with those who like their melons nearly all core. A splendid seller in the market, a good keeper, and productive. Pkt., 5c.; oz., 10c.; lb., 60c.

IRON CLAD.

Mammoth Iron Clad—Enormous melons, sometimes weighing from 50 to 75 pounds. Do not plant on heavy soil, or they will come into bearing late. A superb melon. Flesh rich and sweet, shell hard and firm, and melons will keep well for weeks. Pkt., 5c.; oz., 10c.; lb., 75c.
One packet each of these nine Melons for 50c.

American Onions.

One of the most wholesome foods known, and much relished by most people. Most physicians agree that the free use of Onions as a food is a healthful and beneficial stimulant to the system. In cases of colds, coughs and lung troubles they are often better than medicine. Certain it is that they are the best remedy for that new disease, "La Grippe," and their use is one of the best preventatives from taking it. The Onion is one of those vegetables with which success or failure depends largely upon the quality of seed sown. The best Onion seed is always the cheapest. We are certain that ours is as good as can be found anywhere. Have the ground made very fine, deep and rich for Onions, and keep free from weeds. We also offer a new Onion Set on 10th page.

Large Red Wethersfield—A favorite red-skinned sort, of large size and handsome appearance. Onions somewhat flattened, flesh purplish-white, high-flavored, and keeps well without rotting. A standard sort and a great favorite with market gardeners. Pkt., 5c.; oz., 15c.; lb., \$1.40.

Yellow Globe Danvers—Another popular Onion, widely grown for market. Plump, hand-size, yellow-skinned bulbs, very uniform, round and perfect. We have an extra fine strain of this. More seed of this Onion is annually sold than any other variety. It does well everywhere, in all soils and in all climates, and is everywhere a popular market sort. Pkt., 5c.; oz., 15c.; lb., \$1.40.

Extra Early Red—A quick-growing variety, much liked in the North, as it grows well in cold, mucky soils where others fail. Pkt., 5c.; oz., 15c.; lb., \$1.30.

Southport White Globe—A globular, mild-flavored Onion of fine appearance and superior quality. A great favorite in most localities, and probably the most popular White Globe variety. Pkt., 10c.; oz., 25c.; lb., \$2.25.

EXTRA EARLY BARLETTA.

Italian Onions.

During the past few years Italian Onions have come into favor with astonishing rapidity. Where a few years ago they were grown only as fancy garden crops, they are now planted extensively for market, and they are, too, a profitable crop. They are of rapid growth and attain a very large size in a wonderfully short time. They are not only large but very uniform, perfect in shape, and exceedingly handsome in appearance. In quality they are acknowledged on all sides to be the best, having an exceedingly mild, delicate and pleasant flavor. For eating raw, they are, of course, greatly superior to other Onions, owing to the mildness of their flavor. These Onions do best on a rich, light or sandy soil, in a warm and, if possible, sheltered situation.

Mammoth Silver King—A superb Onion that sometimes grows to weigh 3 or 4 pounds. Silver-skinned, white fleshed, very mild and tender—so mild, sweet and tender that it can be eaten raw like an apple. It has an average diameter of 5 to 7 inches, making a circumference of 15 to 20 inches. It is probably the most popular Italian Onion known to cultivation. A grand seller in all markets. Pkt., 10c.; oz., 25c.; lb., \$2.00.

Prize Taker—A very large, yellow globe Onion, very handsome, fine flavor and grand sort for market. Immensely productive, producing 700 bushels to the acre, and is claimed by the introducer to be the largest, handsomest, finest-flavored yellow globe Onion ever introduced. It is a good keeper. Pkt., 10c.; oz., 25c.; lb., \$1.75.

Mammoth Pompeli—A most remarkable Onion on account of its enormous size and fine quality. They often grow to the weight of 4 or 5 pounds, with a very thin and delicate skin, which is of a handsome reddish or reddish-brown color. Notwithstanding its great size, it is exceedingly mild and fine grained. Extra fine; easy culture; good keeper. Pkt., 10c.; oz., 25c.; lb., \$1.50.

Early Radish, or Barletta—The prettiest, button-like little Onion imaginable. Small, flat, and silver-skinned, so mild in flavor that they can be eaten raw, like a stalk of Celery, and for pickling are far ahead of any other Onion. Leaves almost no odor on the breath, and is liked by all. Three weeks earlier than any other Onion, and grows very readily from seed. Is used largely for eating raw, like a Radish, yet when cooked it has the most delicate flavor of any Onion. Introduced by us several years ago as Early Radish, about the time it was introduced into France as Barletta. Pkt., 10c.; oz., 25c.; lb., \$1.50.

SPECIAL OFFER.

We will send one packet each of the eight sorts for 50c. One ounce each for \$1.00.

CHILDS' "MORNING STAR" PEAS

Peas.

This delicious vegetable is so much finer when freshly gathered than when allowed to shrivel for days in the market, that every family, if possible, should grow their own Peas. For early crop, plant as soon as the ground can possibly be worked in the spring, and plant every two weeks thereafter for succession until summer.

Childs' Morning Star—A new wrinkled Pea, earlier by a week than any of the small, round varieties. This was the greatest vegetable novelty of 1894. It is the earliest pea grown by nearly a week. It is a fair-sized, wrinkled variety, and, therefore, possesses the same delicious quality of the late wrinkled kinds. For the first time the fine quality of the late varieties is combined with extreme earliness. When this is once tried no other early pea

will be grown. Added to its other qualities it is exceedingly prolific, and continues to bear longer than any other early sort. It grows 18 to 20 inches high, and does not require bushing. Mr. William Falconer says: "I ought to tell you about the 'Morning Star' wrinkled pea you let me try here two years ago. I sowed it in single rows in light, warm soil, about the end of March, when I sowed round peas and Alpha and American Wonder. It astonished me by its earliness, coming in ahead, and it is a good cropper and of fine quality. Better still, it is the most reliable wrinkled pea for fall use—sown August 1st—that I have ever grown." Mr. J. Goody, of Clare, Suffolk, England, writes: "Your pea, 'Morning Star,' beats any pea in England for a first crop." Pkt., 10c.; 3 pkts., 25c.; pint, 35c.; quart, 60c. By express or freight, \$2.00 per peck; \$5.00 per bushel.

Childs' Universal—In Childs' Universal we have a new sort destined to become the universal garden favorite the world over. It was originated over ten years ago, since when it has been carefully selected and grown, until we now have what we believe is the most perfect pea in cultivation. It combines a dwarf habit with fine quality and enormous productiveness, the three essential features all in one sort. It can be styled a half-dwarf, not tall enough to require staking, yet branching freely and producing vine enough to give one of the largest crops any pea can yield. The peas are of medium size, wrinkled, and of exceedingly high flavor. It is medium early, and fine for succession if sown at intervals of two weeks. For a standard garden sort it must take the lead, being superior to Champion of England, inasmuch that it does not require staking. Per pkt., 10c.; pint, 40c.; quart, 75c.

Alaska—The best of all early round varieties, ripening ahead of all others, except Childs' Morning Star, and bearing great quantities of fine peas, richly flavored. A fine market pea, as the whole crop matures almost at one time. Pkt., 10c.; pint, 30c.; quart, 40c.

Champion of England—Still able to hold its own among all newcomers as a pea of superlatively fine quality. Late and a heavy cropper. Unsurpassed quality. Pkt., 10c.; pint, 20c.; quart, 35c.

AMERICAN WONDER PEAS

American Wonder—An early wrinkled pea of exquisite flavor, ready for the table in thirty to forty days after planting. Grows only a few inches high. Pkt., 10c.; pint, 30c.; quart, 50c.

McLean's Little Gem—An old standard Tom Thumb variety, still among the very best for a first crop pea. Very hardy. Pkt., 10c.; pint, 25c.; quart, 40c.

Everbearing—A fine sort for the home garden, as it does not ripen its pods at one crop, but continues in bearing a long time. Fine flavor. Pkt., 10c.; pint, 30c.; quart, 60c.

PEA ALASKA.

CHILDS' IMPROVED CELESTIAL PEPPER.

Pepper.

No trouble whatever to grow. Useful for culinary purposes, ornamental as pot plants and quite necessary to the health of all cage-birds and poultry. Every garden ought to have a good bed.

Childs' Celestial, Improved A fine sharp-flavored Pepper of transcendent beauty, setting its fruit early and continuing until cut down by frost. A well-grown plant will show peppers in every stage of growth, and in three or four different colors, according to the stage or ripeness—creamy white, pink and vivid scarlet, all on the bush together, a most novel and wonderful sight. Beautiful pot plants: In fact, few pot plants make such an attractive show as does the Pepper when in full bearing. It is perfectly charming, showing such quantities of fruit of so many distinct colors. Pkt., 10c.; oz., 50c.; lb., \$3.00.

THE 'RUBY KING'

Ruby King—The beautiful plants are crowded with large, handsome fruits of a bright ruby-red color, which grows four to six inches long by three to four inches through. They are remarkably mild and pleasant to the taste. So mild is their flavor that they can even be sliced and eaten with vinegar like tomatoes or cucumbers. Pkt., 5c.; oz., 25c.

Large Bell—A fine old standard sort, large, bell-shaped. Pkt., 5c.; oz., 25c.

Red Cluster—A dwarf sort, loaded with beautiful glossy scarlet fruit, which are particularly valued for pickling. Pkt., 5c.; oz., 25c.; lb., \$3.50.

Childs' Kaleidoscope—Beautiful enough to be classed among pot plants, yet with the sharp flavor that makes it valuable in the garden. At the time the pretty plum-like peppers form, and before they are fully grown they are of a light yellowish-green color. As they commence to ripen they change to a more ordinary color, then deepening to orange, then to a bluish pink or rose, varying from shade to shade until they become a vivid, shining scarlet. One of these pepper plants, with their dark green leaves, and looking full of cream, pink, yellow, rose and red fruit, is so amazingly beautiful. A very easily grown, hardy and most attractive one. It is enormously productive, growing freely and weeping with their loads of beautiful fruit. Pkt., 5c.; oz., 20c.

Peanut, Early Sweet.

Grow some Peanuts for the children. Not at all hard to grow, and stands heat and drouth like a salamander. This sort is so early that it ripens in all the Northern States and in Canada, while its quality is of the very best, the nuts being exceedingly sweet and rich when roasted. Any light, sandy, or loose soil suits them. Pkt., 10c.; pint, 20c.; quart, 30c.

Peppergrass.

or Cress.
Extra Curled—An appetizing relish, of fresh, piquant taste, often added to lettuce and other fresh salads for variety. Splendid for canaries, who are very partial to it, and keep healthier for its use. Very easy to grow and can be sown in any little nook or vacant spot. Pkt., 5c.; oz., 10c.; lb., 50c.
Water Cress—Grown in mud, water, ditches, or at the edge of running streams. Its uses manifold, is very hardy, and as it is of an evergreen nature can be used all winter. A salad bowl heaped full of this Cress, of dark green leaves, is a pretty sight in January. Pkt., 10c.; oz., 35c.

Pumpkin.

Large Cheese—An old standard sort, and a grand variety for large field crop. Pkt. 5c.; oz., 10c.; lb., 50c.

Quaker Pie—What would Thanksgiving be without pumpkin pie? This Pumpkin furnishes fine-grained and rich-flavored fruit, just what is wanted for a really good pie. Ripens early and keeps late. A prolific sort of a light yellow shade; very popular. Pkt., 10c.; oz., 15c.; lb., \$1.00.

Genuine Mammoth or True Portion—This is the giant Pumpkin that always takes the premium at the county fairs for size. Grows so large two men can scarcely lift one of the fruits, which have been grown to weigh nearly or quite 200 pounds. Flesh bright yellow and very fair quality. Pkt., 10c.; oz., 25c.; lb., \$2.00.

Parsnip.

One of the few winter vegetables. The roots are perfectly hardy, and are improved in flavor by the action of frost. Roots can be dug during thaws in winter or very early in spring, when a change of food is most relished. They are boiled whole, then sliced thin and fried brown with slices of salt pork.

Improved Guernsey—This is not the coarse Stock Guernsey, but the table variety of that name, the sweetest, finest grained Parsnip grown, and a heavy cropper. Smooth, thick roots, about 12 inches long. Very fine stewed, fried, etc. Pkt., 5c.; oz., 10c.; lb., 60c.

Improved Long Smooth Hollow Crown—An old standard variety, of fine quality, with very long roots. Pkt., 5c.; oz., 10c.; lb., 50c.

Parsley.

Hardy and easily grown. Very fine for garnishing, as well as useful for flavoring soups, etc.

Extra Double Curled—Mossy curled and crisped leaves; very beautiful and of good quality. Pkt., 5c.; oz., 10c.; lb., 85c.

Beauty of the Parterre—One of the finest sorts for garnishings or low edgings. Very fine quality. Pkt. 5c.; oz., 15c.; lb., \$1.50.

Spinach.

American Savoy—A heavy cropper, of fine quality and very hardy; succulent leaves, curled and crinkled like a Savoy Cabbage. Hardest and most productive sort. Pkt., 5c.; oz., 10c.; lb., 40c.

New Zealand—A valuable new variety, as it grows freely all summer and may be cut repeatedly. As fast as cut new shoots and leaves will grow out. Pkt., 5c.; oz., 10c.; lb., \$1.00.

Strawberry.

We have all heard of the great size and luscious sweetness of the French Strawberries. They are certainly a great way ahead of the American varieties. We have secured seed of the finest large-fruited kinds, which we have every reason to believe will produce varieties far superior to those in cultivation in this country. Strawberries are easily grown from seed, and it is interesting to note the different shapes, sizes and quality of the seedlings when they begin to fruit.

Large-Fruited Varieties—Mixed. Pkt. 10c.

Salsify, or Vegetable Oyster.

One of the most delicious of all root vegetables. So hardy that it can be left in the ground all winter and dug as needed whenever the ground thaws. Stew until tender, then cook exactly like oysters, with pepper, cream and butter. Try a large bed of them this year. They are delightful.

Large White—A quick grower; very fine flavor. Pkt., 5c.; oz., 10c.; lb., \$1.00.

Sandwich Island Mammoth—Like the above, but twice the size. Cannot be praised too highly. Pkt., 10c.; oz., 15c.; lb., \$1.40.

Radish.

The following are the cream of all sorts.

- Earliest Forcing**—Earlier than any other sort, by a week. Bright scarlet turnip Radish, very smooth and round, with small tops, allowing it to be grown closely together in hot-bed or forcing bench. Fine also for out of door sowing. Pkt., 10c.; oz., 15c.; lb., \$1.35.
- Early Mammoth**—Known also as "Shepherd" and "Charlier." This variety sometimes reaches the enormous length of two or three feet and is sometimes eight inches through at the top. A very quick growing variety, crisp, juicy and tender, and mild in flavor. Its color is a fresh pink and white, and for market has no superior among summer Radishes. It remains tender and good for several weeks after it is ready for use and is a splendid all-round Radish. Pkt., 5c.; oz., 10c.; lb., 70c.
- French Breakfast**—A very attractive pink and white Radish, olive-shaped and with delicately flavored flesh, free from coarseness or any biting quality. A grand little table sort. Pkt., 5c.; oz., 10c.; lb., 60c.
- White Vienna**—Finest of all long white Radishes. Skin and flesh pure white, beautiful shape and fine flavor. Pkt., 5c.; oz., 10c.; lb., 75c.
- Early Scarlet Turnip**—A fine quick-growing early Radish, of fine eating qualities. Pkt., 5c.; oz., 10c.; lb., 60c.
- Chinese Rose, Winter**—A handsome and superior mid-summer, fall and winter sort, of a lovely scarlet-rose color and large size. Flesh, meaty, crisp and tender. Keep roots in soil for winter use. Pkt., 5c.; oz., 10c.; lb., 60c.
- 20 Day Express**—Is fit for the table in twenty days from the time of sowing the seed and is fully grown in twenty-five days, at which time the Radish is about one inch in diameter at the top, three inches in length and tapering to a point. Color, brightest, richest scarlet, tipped with white. Quality very mild, crisp and delicious. By far the best flavored Radish we have yet seen, and the most desirable for table use. The finest, and, without doubt, the earliest Radish in cultivation. It combines all good points. Pkt., 10c.; oz., 15c.; lb., \$1.00.
- Sakurajima Mammoth**—One of the good new things from Japan. It is of very quick growth, reaching an enormous size in a short time. Color, pure white; crisp and tender, and of remarkably mild and pleasant flavor. An ideal table Radish. Pkt., 10c.; oz., 15c.
- Icicle**—See Novelties, Plate No. 3.
- Twelve Months' Radish Mixture**—A superb mixture of all kinds of Radishes, early, medium, fall, winter, Chinese, etc. Sow a row of it and it will furnish you delicious Radishes throughout the year. The early and medium ones, as they mature and are pulled, make room for the larger growth of the fall and winter varieties. This mixture is made up of twenty-five best varieties, and with it is necessary to make but one sowing for the entire year. This novel mixture was introduced by us some years ago, and our customers like it so well that last season we sold tons of it. Pkt., 10c.; oz., 15c.; 1/2 lb., 60c.; lb., 80c.

One packet each of above 10 sorts, 50c.

SQUASHES

Squash.

A delicious table vegetable, and when cooked like pumpkin, makes superior pies.

Ford Hook—A long, golden yellow Squash, with very dry and fine-grained flesh. This is one of the best winter Squashes, and an extra fine keeper, and the plants are so robust that failure is very rare. Resists the attacks of the Squash borer better than most kinds; matures early and is everywhere a sure cropper. Pkt., 10c.; oz., 15c.; lb., \$1.25.

Sibley—Another fine winter Squash that keeps well nearly all winter. Shell hard and flinty; pale green in color. Flesh a brilliant orange-red; very dry and rich in flavor. A fine baking variety. Pkt., 10c.; oz., 15c.; lb., 75c.

Metcalf—A Maine variety of extra fine quality, fine grained and dry. No better eating Squash can be found anywhere. A long winter keeper, good till spring. Pkt., 10c.; oz., 20c.; lb., \$1.25.

Perfect Gem—This sort is good both for summer and winter use. Thin skinned, fine grained and of very pleasant flavor. Will keep almost any length of time. Pkt., 5c.; oz., 10c.; lb., 70c.

Mammoth Chili—Specimens of this have been grown to reach 300 pounds in weight. Notwithstanding its enormous size, this Squash is of very fair quality, and keeps well. Pkt., 10c.; oz., 20c.

Mammoth Whale—A new French variety of the enormous weight of one hundred or more pounds. Fruit thick and an ashy-gray color, and tapers toward the end. Flesh solid, beautiful orange-yellow and of excellent quality. It has also the advantage of being a long keeper and a variety which does well in any soil or climate. It is a splendid variety in all respects, especially for exhibiting at fairs. Pkt., 15c.

Giant Summer Crookneck—A new Crookneck, which is a little earlier than the old variety, and fully twice as large, being nearly two feet in length. It is of extra fine quality, handsome in appearance, and finds a ready sale at good prices in any market. Pkt., 5c.; oz., 10c.; lb., \$1.00.

Early Scallop—An early summer sort. Very fine and popular. Pkt., 5c.; oz., 10c.; lb., 60c.

Japanese Alphabet—Its peculiar characteristic, from which it derives its name, is in the fact that its seeds are distinctly marked on both sides with characters which appear to be Japanese letters, and it is said that the Japanese alphabet may be selected from a handful of seed. Be this as it may, it is certainly curious and interesting, but that is not all. We find the Squash to be superior to the old Hubbard in quality, and a much stronger and freer grower, as easily raised in short, as pumpkins. For pies this variety excels all other squashes or pumpkins. It is a great novelty in every respect. Pkt., 15c.; 3 pkts., 35c.

JAPANESE ALPHABET SQUASH.
 COPYRIGHTED 1897
 BY J. L. CHILDS

Improved Hubbard—(PRIVATE STOCK). No more popular Squash than the Hubbard has ever been grown. Of late years it has largely lost flavor because stocks have become badly mixed with inferior strains. Our stock is quite limited, but is absolutely true and will produce the old-fashioned, deliciously sweet Squash we all remember. Pkt., 10c.; oz., 20c.; lb., \$1.75.

One packet each of the 10 sorts for 75c.

Tomatoes.

An indispensable vegetable. City dwellers with almost no room can train their Tomatoes to their back wall and raise quantities of fine, fresh fruit for their own use. Start early in the season or later, transplant just before a gentle rain, and tie plants to stalk or trellis. They stand drouth remarkably well. Just before setting all the well developed fruits, spread them singly in a light, frost-proof place, and they will continue ripening for two months or more.

Childs' Picture Rock—The grandest Tomato ever introduced. Early, smooth, uniform, prolific, longest bearing, longest keeping, and the finest in quality. In all these essential points this Tomato is superior to any other kind. Fruit bright scarlet, of fair size, and so perfect and uniform that they look as though each one was moulded with the same stamp. On account of this perfect shape and great beauty it is unsurpassed for market. Its quality is extra fine and it commences to ripen its fruit very early and continues in bearing until frost, a most remarkable quality. Its keeping qualities are, however, the most wonderful. Ripe fruit fresh from the vines have been kept in perfect condition from three to four weeks during warm summer weather. It originated in the Picture Rock region of Wisconsin, hence its name. Pkt., 10c.; 3 oz., 25c.; lb., \$1.00.

Childs' Ruby Queen—Tomato of enormous size, and as smooth as an apple. Its color is the deepest and darkest crimson-red, very rich and beautiful. It is very solid, very thin skin, and its flesh throughout is most tender. It has not a particle of coarseness or toughness. It is just the sort you would choose for your own table above all others. It is much like the Golden Jubilee, except in color, and is perhaps rounder and smoother in shape. Pkt., 10c.; 3 pkts., 25c.; oz., 50c.

Ponderosa—A Tomato of large size, solid, of fine quality. Claimed to be the largest known sort. Pkt., 5c.; oz., 25c.

One pkt. each of the 10 Tomatoes for 60c.

Childs' Diadem—Here we have at last what leading horticulturalists all over the world have devoted years to producing. A Tomato of high quality, with a beautiful striped or variegated skin. Can you imagine anything more unique? Diadem is a Tomato of medium size, perfect shape, high quality and of a deep ruby-red, the rich dark color of the skin being broken with stripes and spots of old gold, the beautiful effects of which are admirably shown in cut above. Not only is it beautiful, but in points of excellence in other respects it is quite up to Picture Rock, which is now the standard of perfection. It is of fair size, smooth, handsome shape, and of best quality. This splendid novelty was introduced by us last year, and has given great satisfaction everywhere. Many people say that it is the most novel thing, and by far the greatest attraction, in their gardens. Everybody is delighted with it. Pkt., 10c.; 3 pkts., 25c.; oz., 50c.

Ignoutum—Esteemed as the perfection of a Tomato. Extremely early and a great cropper. Fruits large, smooth, without green spots or cracks, and almost entirely free from cracks or rotten spots. Delicious flavor, very meaty, and but few seeds. Fine for slicing, cooking or canning. Pkt., 5c.; oz., 20c.; lb., \$2.00.

Climbing Tomato—A novel Tomato of a climbing habit that, if supported, climbs to a considerable height. A very unique ornament to the kitchen doorway or window when hanging full of its many large red fruits. Fruit smooth, solid and of fine flavor. Quite a novelty and in every respect a very unique Tomato. Pkt., 10c.

Childs' Golden Jubilee—A fit companion to the Ruby Queen, and, like it, of enormous size, specimens having been grown that weighed over two pounds each. The fruits are round and solid, with very few seeds; flesh meaty and, like all yellow varieties, very sweet and mild in flavor. A beautiful table sort, especially when arranged with the deep, rich slices of Ruby Queen on the same dish. The skin of this sort parts readily from the fruit without scalding. An important feature. Pkt., 10c.; 3 pkts., 25c.; oz., 50c.

The Standard Seed Co.

STATION TREE.

Station Tree—This variety originated by crossing the French Tree with Alpha, the result being a very distinct variety, with thick, curly, almost black-green foliage and great numbers of handsome, solid fruit, with the fewest seeds of any known variety. Tomatoes are of very fine quality, and this sort is especially recommended for forcing, as it does extra well in pots, the earliest of all, and being of fine upright growth it requires but little room. Pkt., 10c.; 3 pkts., 25c.

Turnips.

A valuable garden and farm crop. Good Turnips are almost as desirable for table use as Potatoes. For winter use sow last of July or first of August. Turnips may be sown late in ground that has been cropped with Peas or Beans early in the season.

- Scarlet Kashmir**—This Turnip has a striking resemblance to a large Radish, being as large and uniform in shape and crisp as a Radish, and of the most excellent quality. It matures almost as quickly as the earliest Radishes, being several weeks ahead of any other Turnip, and when cooked is of unsurpassed quality. Pkt., 10c.; 3 pkts., 25c.
- Early Ivory**—A sort of peculiar value, owing to its extreme earliness. It grows almost as quickly as a Radish, and to a great extent resembles a large white winter Radish. It is sweet and of first-class quality. Pkt., 10c.; oz., 40c.
- Early Flat Dutch**—Clear, white skin, and juicy, crisp flesh. A fine sort for either market or home garden. Pkt., 5c.; oz., 10c.; lb., 45c.
- Purple Top White Globe**—A large Turnip of fine keeping qualities. Pkt., 5c.; oz., 10c.; lb., 50c.
- Large Yellow Globe**—A large round Turnip, with deep, yellow flesh and fine, firm grain; very sweet and good. Pkt., 5c.; oz., 10c.; lb., 50c.
- Extra Early Milan**—The earliest strap-leaved variety. A smooth, medium-sized variety, with a bright purple top. Fine quality and good keeper. Very delicious. Pkt., 5c.; oz., 10c.; lb., 75c.
- White Egg**—Beautiful white, egg-shaped sort, of rapid growth. Flesh firm and solid, fine-grained, sweet, and of very mild flavor. Fine either for early or late variety. Grows to good size. Pkt., 5c.; oz., 10.; lb., 50c.
- Tennoji**—The Tennoji Turnip is a mammoth flat variety of excellent quality. It is impossible to say just how large it will grow under favorable conditions, but the Japanese claim is something incredible. Here in our trial grounds, under the disadvantages of a crowded test-bed, it has grown to the largest dimensions we have ever seen in a Turnip. Finest seed, just imported from Japan, 10c. per pkt.; 3 pkts. for 25c.; oz., 35c.

Ruta-baga, or Swede.

These are grown largely for stock feeding, as well as for table use. For either purpose they are a profitable crop.

Golden Fig—Fruit small, beautifully smooth, and almost incredibly productive. The flesh is solid, thick-meat, very sweet and pleasant, and are just right for preserves or sweet pickles, or for drying in sugar like figs. In fact, it dries well and is an admirable fruit when dry, fully equal to the fig. Pkt., 10c.; oz., 50c.

Peach—A distinct, medium sized Tomato, of very peculiar but pleasant flavor. The fruit of this Tomato is about the size and shape of a peach, and is of a soft, peachy-red color. Pkt., 5c.; oz., 20c.

- Carter's Elephant**—A new Turnip of great size and a wonderful cropper. In shape it is beautiful and perfect and remarkably uniform, of quick growth and excellent quality. Owing to its very large size it will probably turn out 50 per cent. more bushels to the acre than any other, and is, therefore, the most profitable variety for large crops, especially for growing for stock feeding. Pkt., 5c.; oz., 10c.; lb., 80c.
- Breadstone**—A beautiful white Ruta-baga, so remarkably tender that it will cook in fifteen minutes, while the flavor is uncommonly sweet and delicate. It is also a wonderful keeper, not growing pithy and dry like the ordinary Turnips when kept in the cellar over winter. Flesh perfectly white, fine grained, tender and sweet, without the strong taste so common among Ruta-bagas. Finest of all table varieties. Pkt., 10c.; oz., 15c.; lb., \$1.00.
- Improved American Ruta-baga**—Large, smooth and handsome, quick in growth, tender and fine in quality. A superb standard sort. Pkt., 5c.; oz., 10c.; lb., 60c.

NEW ZEALAND BEAUTY.

FARM SEEDS.

We offer a few very desirable Farm Seeds. Our New Zealand Oat, Golden Superb Corn and Early Siberian Millet are great and valuable Novelties, worth thousands of dollars to the farmers of our country.

New Zealand Beauty Oat.

FOR SPRING SOWING.

A few years ago a customer in New Zealand sent us a small sample of an exceptionally handsome and heavy Oat. We have grown it for several years, and in point of yield and beauty it certainly surpasses any American Oat. It is also extremely early in ripening. We have now a stock sufficient for offering it. It is of stout, rather short growth, not subject to "lodging," and so early that it escapes severe droughts, therefore assuring a large crop every year. The grain is plump, heavy and exceedingly handsome. We are satisfied that it is by all odds the most valuable Oat ever brought into the country. Pkt., 10c.; lb., 40c.; 3 lbs., \$1.00, postpaid. By express or freight, peck, \$1.50; bushel, \$4.00; 2 bushels for \$7.00.

Winter Turf Oat.

FOR FALL SOWING.

The greatest of all forage for winter pasture and for heavy crops of grain.

A hardy, robust winter Oat for fall sowing is indeed a novelty worthy the attention of every farmer in the land. It is exceedingly heavy and enormously productive, as many as 150 strong stems having been counted growing from one stool and bearing 6,342 grains, all from one seed. Sow as you would winter wheat or rye, the latter part of August or in September, and it will afford the finest winter pasture which it is possible to have, and yet give an enormous crop of grain, which ripens early, before it can be injured by dry weather. The straw grows to the height of four or five feet, with enormous heads of grain a foot in length. Grain large, plump, and exceedingly heavy. We believe it will yield twice as much to the acre as any other Oat, and that it will supersede all other kinds. Introduced by us a few years ago and has become famous. Price, per pkt., 10c.; lb., 30c.; 3 lbs., 75c., by mail, postpaid; \$1.00 per pk.; \$3.00 per bus., by express or freight.

GOLDEN SUPERB.

New Field Corn,

GOLDEN SUPERB.

The Most Valuable Field Corn Ever Grown, and Now the Leading Favorite Where Known, from Maine to California.

An enormous golden dent variety, so early that it can be grown in the Northern States, and out-yields any other sort. It originated in Connecticut. It is the finest Field Corn we have ever seen. Ears very large and handsome, 24 rows of deep kernels. It is enormously prolific, producing over 200 bushels to the acre in very dry seasons, in hills four feet apart each way, and with ordinary cultivation. Its great vigor enables it to stand dry weather remarkably, and give a good crop, when other sorts fail from drouth. Often two or three ears are borne on one stalk, and they run as uniform as though they were all made in the same mould, and they are as perfect and handsome as though they were made of wax. No other variety of Corn can approach this, and it is bound, when known, to be more extensively grown than all other kinds put together. Owing to its extreme earliness it may be harvested earlier than any other Dent Corn, even when planted much later. It is the earliest by several weeks of all dent varieties. It is seldom one sees anything bred up to such perfection as is this new Corn. Pkt., 10c.; lb., 35c.; 3 pounds for \$1.00, postpaid. By express or freight, at buyers' expense, peck, 75c.; bushel, \$2.50; 2 bushels, \$4.00.

EGYPTIAN
TREE ONION

Onion.

Egyptian or Perennial Tree

—In this we have an entirely new variety of Onion. It differs from those raised from seeds or sets, from the Top Onion, Potato Onion, in the fact that when once set out, without the slightest protection, it will come up year after year as soon as the frost breaks ground, and grows so rapidly that it is ready for market or home use two or three weeks before any of them. It is usually ready for the table early in May. Is unsurpassed for sweetness

and tenderness. It is perfectly hardy in all sections of the North. Pint, 25c.; quart, 30c., postpaid; peck, by express, \$1.50.

Teosinte.

As a forage or fodder plant this is the greatest thing of the age, especially for the South. In appearance it resembles corn, but the leaves are much longer and broader and sweeter. It grows twelve feet high, producing a great number of shoots, which are thickly covered with heavy foliage. Eighty-five stalks have been grown from one seed, and it produces forty tons to the acre. At the rate hay and other stock feed costs, Teosinte will yield \$200 worth of fodder or ensilage to the acre. Plant it as you would corn. W. J. Pitts, of Stockton, Ga., writes: "I cut two two-horse loads of forage from an ounce of seed." It may be cut two or three times during the season. It never suffers in drought or rain. Three pounds of seed is enough for an acre. Pkt., 10c.; oz., 15c.; lb., \$1.50.

TEOSINTE U.S. PATENT 899
MAY 12 1896

EARLY SIBERIAN MILLET.

Early Siberian Millet.

A new sort of great value for the South that it will mature in a few days in hot weather, and ripen in 70 to 80 days. It is of a fine green color (not yellowish like other Millets), and is of superior quality for feeding. Stands heat and drought to a remarkable degree—in fact, being so very early it largely escapes droughts. Owing to its great "tillering" quality it requires only 10 to 12 quarts of seed per acre for hay, and less for seed. It is undoubtedly the finest cheap forage ever introduced. Per oz., 10c.; lb., 40c.; 3 lbs., \$1.00, by mail. Peck, \$1.50; bushel, \$4.00, by express.

MAMMOTH SAGE.

Tobacco, Persian Muscatelle.

This is the best of all an exceedingly ornamental plant, and so early it can be grown in any State. It is from the garden of the King of Persia. The grower says of it: "It is one of the earliest varieties we have of and it grows so early that it is ready for the market in the first of June. The leaves are strong, thickly set with leaves, many of them measuring 3 1/2 to 4 1/2 feet in length, with 1/2 inch width, with 1/2 inch ribs. The leaves are usually small ribbed, very elastic, of the finest possible texture, a light brown color and mild flavor. Pkt., 10c.; oz., 50c.

PERSIAN
MUSCATELLE
TOBACCO

Mammoth Sage.

A plant of this new Sage will yield more than a dozen of the common sort. The leaves are of enormous size and superior quality, and the plant a compact, rank grower, covering a space of more than three feet in diameter, rarely flowers and never runs to seed, and can be picked all the season. It is perfectly hardy in the coldest climate. Every person who has use for Sage should plant this variety. Fine plants, 15c. each; 3 for 30c.; 6 for 50c.; 15 for \$1.00.

« SUMMER FLOWERING BULBS »

The word *Bulb* sends a thrill to the heart of every lover of flowers whenever it is heard. No other word in horticulture seems to indicate so much or raise in one's mind such vivid pictures of grace, brilliancy and delicate beauty. In our mind we see long spikes of *Gladiolus* of brilliant, fascinating and varied colors; great flaming *Amaryllis* of indescribable beauty; *Gloxinias*, spotted, marked and colored most exquisitely; great spikes of waxy *Tuberoses* of wonderful purity and fragrance; lovely, graceful, charming *Zephyranthes* and *Mexican Gems*; exquisite *Dahlias* and fantastic *Tigridias*.

Bulbs are favorites with all, and they are planted by many who will not grow any other class of flowers. They are so easily grown and so satisfactory to everyone that they are invaluable. Summer-flowering Bulbs require no skill and very little attention to grow them to perfection. Plant them in the garden in spring, after severe freezing is passed, and they will soon be up and will flourish and bloom all summer. In Autumn, after early freezing is passed, the Bulbs should be lifted, dried and stored in a cellar or some other position, away from frost, for planting again the following spring. We are headquarters for Summer-flowering Bulbs, and grow and sell more of them than any other two houses in the world.

The Gladiolus.

The *Gladiolus* is our leading specialty, and our collection is the largest and finest in the world—in fact, we supply most of the bulbs which the world uses. We grow about one hundred acres of them and upwards of 15,000,000 flowering bulbs. *Gladiolus* being our leading specialty, are here offered at less than one-half the usual price. Our Childs's and Lemoine's are simply grand. Do not miss them.

The *Gladiolus* is the most satisfactory, the most desirable and the most popular of all garden bulbs. Nothing else of the kind costs so little, and nothing else grows and blooms so readily for anybody and everybody, in any soil or climate. It is, in short, the most satisfactory garden flower, thriving and blooming, as it does, with the least care and attention, and makes a display which for brilliancy and beauty of coloring, few bulbs can equal and none surpass. The *Gladiolus* is to the flower garden what bread is to man. "The staff of life." Our collection is so large that many of the finest and highest-priced sorts of European Catalogues can be supplied by us by the ten thousands, and we offer them at very low prices. Not only do we grow the finest varieties of *Gandevensis* by the million, but also Lemoine's New Hardy Hybrids. But the finest of all *Gladiolus* is the new strain, Childs'. This novelty is of such sterling-worth that it deserves more than special attention. See Cover.

CULTURE.—*Gladiolus* are of the simplest culture. Plant at any time from April to July, in any fairly good soil, well spaded. Set in rows three inches apart, or in masses, six inches apart each way. Plant in full sun, if possible, and keep down weeds. They bloom from July to October. After fall frost, lift the bulbs, and, after removing the tops, let them dry for two or three weeks in any airy position, under cover. Then, after removing the roots, store them in a cellar, or any cool, dry place, away from frost, for planting again the following spring.

Mixed Gladiolus.

Our mixed *Gladiolus* are not the poor, dull colors, old discarded red sorts and worthless seedlings usually sent out as Mixtures. On the contrary, they are made up from splendid named sorts, brightest and more varied colors, white, yellow, pink, rose, blush, intense scarlet, carmine, violet, striped, blotched, variegated, etc. All old, common, and poor sorts have been discarded, and this mixture is of the highest grade.

Mixed, All Colors, First Size—Extra large flowering bulbs. Per dozen, 30c.; per 100, \$2.25; per 1,000, \$20.00, by mail.

Mixed, All Colors, Second Size—These are all fine blooming, young, vigorous bulbs. Per dozen, 15c.; per 100, \$1.00; per 1,000, \$8.00, by mail.

Mixed, White and Light Varieties only—First size, 30c. per dozen; \$2.25 per 100.

Mixed Scarlet Varieties only—First size, the finest scarlet sorts, 25c. per dozen; \$2.00 per 100.

Mixed, Pink Varieties only—First size, finest pink colors, 25c. per dozen; \$2.00 per 100.

Large Gladiolus Bulbs.

EXTRA LOW PRICE BY EXPRESS.

No flower so adorns the garden or lawn as does the *Gladiolus*, and none are more easily grown or so fine for decorating churches, rooms, dining tables, halls, stores, offices, etc. That our customers can afford to plant them extensively, we offer
Large Flowering Bulbs, Mixed—Choicest varieties and finest flowers, by express, 100 for \$1.50; 300 for \$4.00; 500 for \$5.50; 1,000 for \$10.00.

- Le Poussin**—Light red, white blotch.
- May**—A lovely pure white flower, finely flaked bright rosy crimson; superb.
- Madame Monneret**—Double rose.
- Mr. Bains**—A wonderful distinct color, a clear, light red; self color.
- Napoleon III**—Bright scarlet; white line in each petal.
- Octoroon**—A beautiful salmon-pink; very distinct.
- Reine Blanche**—Pure white, dark carmine blotch.
- Reverend Berkeley**—Light rose and tinged with violet-carmine feathered white blotch.
- Sylphide**—Pure white, flamed carmine. Extra large and fine.

10-CENT CLASS.

Price of these 70 sorts, 10c. each; any 3 for 20c.; or 6c. per doz. One each of the 70 sorts for \$3.00.

- Amitie**—Large spike of large, fleshy, rose-colored flowers, shaded with straw-color on the lower petals, streaked with purple; the edge flamed with rose.
- Ajax**—Beautiful striped.
- Amalthee**—Pure white with violet-red blotch; ground of the corolla velvety violet, the lower petals tinted lilac.
- Anna**—Cherry, tinged orange.
- Aurore**—Bright salmon-rose, striped orange, carmine and lilac; blotch cherry-rose, streaked violet.
- Bayard**—Large carmine-red flowers, slightly tinged with lilac and delicately banded with white in the center.
- Bicolore**—Large flowers of bright rosy salmon, except lower petals, which are ivory-white, suffused with rose at edges.
- Big Medicine**—Blush-white, marked violet.
- Blondine**—Tall, compact spike of large, straw-colored flowers, slightly streaked at the edges with rosy lilac.
- Canary Bird**—Finest yellow.
- Cameleon**—Compact truss of large, slaty-lilac flowers, flamed orange, with white bands down the middle of each petal; large creamy white blotch, streaked violet.
- Carnation**—Fleshy white, profusely tinted at the edges with richest carmine, lower petals blotched purplish carmine.
- Chamart**—Lilac, shaded with purple.
- Champs de Mars**—Saffrino, distinct white blotch, bordered carmine.
- Chrysolora**—Golden yellow, pure and distinct.
- Coraire**—Compact spike, large flowers of intense dark and velvety scarlet, and tinted with brown at the edges.
- Countess Craven**—Rose, flaked carmine.
- Delicatissime**—White, suffused with soft carmine-lilac, the pure white lower petal edged lilac.
- Diamond**—Fleshy white, of a remarkable freshness; throat ivory-white, blotched and streaked carmine.
- Doctor Hoge**—Mauve, suffused with rose; center pure white.
- Elizabeth**—Dark rose, flamed bright carmine purple; large purple-carmine blotch, with white stripes.
- Emma Thursby**—White ground; carmine stripes through petals; blotch on the lower division.
- Eugene Scribe**—Flowers very large and wide; perfect tender rose, blazed carmine-red; extra fine.
- Eugene Souchet**—Bright rose color, relieved by a large white blotch and stripes, rising from the intense color at the edge of the petals.
- Fairmount**—Bush-white, blotched carmine.
- Fatma**—Very large flowers of ivory-white ground, profusely striped with bright rosy salmon; violet blotch.
- Feu Follet**—Well opened flowers, with ivory-white throat, richly tinted and striped with carmine at the edges.
- Flamboyant**—Large flowers of fiery scarlet.
- Fulton**—Velvety vermilion.

Choicest Named Gladiolus.
5-CENT CLASS.

Price of the following 21 fine sorts, 5c. each; 3 for 15c.; or more at 2c. each. Any sorts at 2c. per doz. One each of the 20 sorts for 50c.

- Adison**—Dark amaranth, with white stripes.
- Africain**—Darkest crim-son-black, with a pure white blotch in the throat. The darkest and one of the finest colors; large flower and spike.
- Augusta**—Lovely pure white, with blue anthers.
- Brenchleyensis**—Vermillion-scarlet; fine old variety.
- Ceres**—Pure white, spotted with purplish rose.
- Conquete**—Large and fine flower of bright cherry-red, with a conspicuous pure white blotch, upper petals striped with delicate rose.
- Gen. Phil. Sheridan**—Fiery red, white line running through each petal, and a large, pure white blotch on the lower division.
- Hesperide**—Profusely blotched and flaked bright rosy salmon on a pure white ground.
- Isaac Buchanan**—Very fine ground.
- John Bull**—White, slightly tinted with sulphur.
- Lamarck (De)**—Cherry, slightly tinted with orange, blazed with red; center well lighted, very large, pure white stain.

Callia—Very long spike of large and handsome rosy white flowers, flushed bright carmine at the edges.
Grand Rouge—Enormous spike, and flower of the most perfect shape and intense scarlet. Best of all scarlets.
Oen. Sherman—Large fine scarlet.
Horace Vernet—Large purple-red, with white blotch.
James Carter—Light orange-red; large white blotch.
Jupiter—Light-red shading off to a crimson.
La Favorite—Rose flamed carmine; lower petals yellow.
La France—Pure white flowers; are slightly flamed with carmine toward the edges; large amaranth blotch.
Latone—Tall and very compact spike; the flowers of a delicate rose, with creamy white blotch and stripes.
Laura—Light orange-red, tinged with carmine, white blotch.
Leander—Large flowers of lilac color beautifully shading off to carmine; distinct white band and blotch in each petal.
Lord Burlington—Watermelon-red; light throat.
Lord Byron—Brilliant scarlet, blotched pure white.
La Crosse—Fine spike; flower orange-scarlet, flaked maroon.
Le Titien—Brilliant rosy scarlet.
Martina Washington—Light yellow, of large size, in a well arranged spike; lower petals tinged with rose.
Madame De Vaux—French white; purplish-carmine blotch.
Madame Lesoble—Pure white; large purplish rose blotch.
Mr. Krelage—Terra cotta red, flamed with smoke color; white blotch with carmine lining.
Mrs. E. H. Krelage—Fiery red; white blotch, with carmine.
Mervette—Fine cherry-rose, slightly tinged with violet; edged and flamed with dark carmine.
Noemi—Light rosy lilac.
Paquita—Beautiful yellow, slightly tinged with rose at the edges; blotch of darker shade.
Panorama—Large spike of well arranged flowers; beautiful lilac, shaded and mottled with brilliant carmine; throat creamy white; center of each petal banded white.
Phebus—Brilliant red; large pure white blotch.
Pheraon—Large cherry-red flowers, streaked and edged with violet; center band of petals white.
Princess of Wales—White; flamed with carmine-rose; deep carmine blotch.
Proserpine—Rosy white.
Pygmalion—Cherry-red, slightly flamed with a darker shade; pure white blotch, feathered violet; white band.
Pyramide—Perfect spike, broader at the lower part than at the top, large, well expanded orange-rose.
Reine Victoria—Pure white; carmine-violet blotch.
Richard Cœur de Lion—Fine spike of large flowers of a bright crimson-red color flamed and edged with garnet; lower petals spotted and blotched golden yellow.
Robert Fortune—Orange lake, shading off to purple-crimson; veined white.
Roi Leopold—Blush rose slightly suffused with orange and shaded deep currant-red; white blotch.
Romulus—Very brilliant dark red; large, pure white blotch; larger white lines on the lower petals.
Seduction—Rosy salmon, very bright and open, throat very clear, with large white blotch, and is feathered carmine.
Shakespeare—White, very slightly suffused with carmine-rose; large rosy blotch.
Stanley—Handsome spike of well-shaped flowers, very open, large, rosy-salmon, flamed all over with the deepest rose.
Teresita—Upper petals of pure white, suffused with rose, and striped carmine at the edges, lower petals pale rose, large, y blotched and striped with bright violet.
Thalia—White, flamed and streaked with carmine.
Van Spandonk—Fiery red; splendid.

Flamingo—Fiery red; blotch of rich purple.
Glory of Brightwood—Scarlet with lemon throat.
Ganymede—Compact and tall spikes of rosy carmine flowers with amaranth sheen.
Crover Cleveland—Very tall spike, good sized flower which varies in color from bright orange-red to bluish-gray, marked and blotched with amaranth and smoky red.
Culliver—Large, bright carmine flowers with conspicuous white bands in the middle of each petal.
Harvard—Brilliant solferino, white throat, bordered.
La Candeur—White, lightly striped carmine-violet.
Lady Carrington—Pale lilac, streaked red; white center.
Le Vesuve—Intense fiery red; very rich.
Loredan—Bright cherry-rose flowers, speckled with creamy white and slightly shaded with slate color at the edges.
Madri—Large, deep, reddish-black.
Madame Auber—Compact spike of extra large, well shaped flowers of very pale rose-lilac; blotched creamy white; dappled light rose on some of the flowers.
Marie Berger—Rosy lilac, blotched and striped with red, shading into yellowish-rose towards the center.
Mascaraillie—Compact and very regular spike of a beautiful salmon-rose color.
Mehut—Currant-red, striped and flamed white.
Meyerbeer—Brilliant scarlet, flamed with vermilion; amaranth-red blotch.
Mlle. Maries Mies—Delicate rose, flamed with carmine; slight blotch of rosy purple; dense spike.
Murillo—Fine cherry-rose on a light ground; white blotch, with a white stripe down each petal.
Norma—Pure white.
Nereide—Long and compact spike of large flowers of mother-of-pearl rose, suffused with lilac; blotched violet.
Navajo Chief—Fine spike and flower; clear rose with carmine throat.
Ondine—White, tinted with lilac; small dark violet blotch; slightly flamed with lilac-carmine.
Orpheus—Rosy cherry flamed carmine; purple blotch.
Papillon—A compact well-formed spike, with flowers of a yellow ground, conspicuously flaked and bordered red.
Penelope—Blush-white; lower petals tinted yellow, streaked carmine.
Pepita—Rich yellow.
Prince of Wales—Bright red; violet-feathered white blotch.
Princess Frederick William—Streaked flesh color.
Queen of the Fairies—Fine light sulphur-yellow, shaded.
Red Cloud—Salmon-pink, flamed with carmine, lighter center, outer portions of petals have a frosted look.
Sceptre de Flore—Flowers large, with white throat, having in the center a carmine-red star; the shade of the petals brightens to the richest rose color spotted with carmine.
Sunset—Lovely pink, blotched and flamed darker.
Sultana—Bright satin-rose flamed with carmine, purple-carmine blotch.
Sylvie—White, slightly edged with delicate cherry-rose, throat very clear, perfectly shaped flowers.
Talma—Rosy carmine flowers flamed with bright carmine, and striped scarlet and pale violet.
Therese de Vilmorin—Tall spikes; flowers of a creamy white, passing into pure white, with purplish rose stripes.
The Sultan—Large white; flamed, striped and blotched carmine.
Victor Jacquemont—Bright orange, flamed with scarlet; blotch bright violet, streaked and speckled pure white.
Virgil—Bright glowing crimson; very handsome.

20-CENT CLASS.

Price of the following 55 sorts, 20c. each; any 3 for 50c.; or \$1.50 per doz. One each of the 55 sorts for \$8.00.

Andre Leroy—Deep cherry-red, flamed and striped darker; white blotch and white stripe in center of each petal.
Angele—White, showy and effective.
Anna—Cherry, tinged bright orange; lower petals striped dark carmine on white ground.
Antonius—Scarlet-cherry, slightly tinged with orange, flamed carmine; pure white blotch.
Archduchess Marie Christine—White, slightly tinged with lilac, flamed rosy carmine.
Astree—Pure white, with distinct violet-carmine blotch; throat suffused with pale lilac.
Ball of Fire—Scarlet-crimson; maroon blotch, blue center.
Baroness Burdett-Coutts—Delicate lilac tinged with rose, flamed rosy purple; spike very long, flowers large.
Calypso—Flesh-colored rose, streaked and blotched carmine.
Coralie—White, tinted with rose and yellow; flamed with bright rose, yellow blotch.
Conquerant—Handsome spike of very large carmine, with a pure white blotch, and a well-defined white band.
Corinne—Tall spikes of large, rosy carmine, shading off to cherry; streaked pure white, and penciled carmine at the edges; blotch creamy-white, striped violet.
Ciceron—Fine lilac.
Duchess of Edinburgh—A flower of fine form and great substance; a plant of strong growth, attaining a height of six feet. Purplish-rose, with a carmine stripe.
Fleur de Lys—Fine compact spike of large, pure white flowers, slightly blotched violet at bottom of throat.
Fra Diavolo—Long, compact spike of large, bright orange-red flowers flushed violet-red at the edges of the sepals; large, pale yellow blotch.

Gladiolus—Snow White.

This grand novelty is absolutely pure snow-white, the only pure white Gladiolus in existence. It also has large, well open flowers and an enormous spike of the most perfect and beautiful shape. 15c. each; 3 for 40c.; 12 for \$1.25.

Gladiolus Seed.

It is very interesting to raise Gladiolus from seed. The range of color and beauty of bloom in seedlings is very great. One never sees two seedlings alike. Sow seed in light, sandy soil in the open ground, about corn planting time, and shade until they germinate. Might be started earlier in hot-beds, if desired. Seedlings generally bloom the second summer.

Hybrids, Mixed, All Colors—Very fine. Pkt., 10c.; 3 pkts., 25c.
Lemoinei Hybrids, Mixed—Sometimes blooms the first summer, and always the second. Pkt., 10c.; 3 pkts., for 25c.
Childsi, Mixed Colors—Finest of all. Very frequently bloom first summer, especially if started early. Pkt., 20c.; 3 pkts., for 50c.

One pkt. each of Hybrid, Lemoinei and Childsi for 25c.

Gladiolus and their Culture.

This is a complete and unique treatise on the Gladiolus, giving all needful information regarding the different species and their culture. It is finely illustrated, and is a valuable work on this most important garden flower. Price, 10c., postpaid.

Mixed Lemoinei Hardy Hybrid Gladiolus.

We offer a splendid mixture of Gladiolus Lemoinei, all colors and varieties. More than 100 sorts and many rarely beautiful seedlings. 25c. per dozen; \$2.00. per 100.

Unique Seedling Gladiolus.

An extra fine mixture of all pure seedling Gladiolus including all classes, Childsi, Lemoinei and Gandevensis Hybrids. Will make a unique bed with endless variety. Fine flowering bulbs, 30c. per dozen; \$2.30 per 100.

Lemoine's Hardy Gladiolus.

The odd and fantastic markings of these Gladiolus, and their beautiful shape, resemble the fascinating beauty of the Orchid. Yellow, crimson, white, brown, green, pink, etc., are blended together, producing an effect seen in no other flower. They are of recent introduction, therefore, new and quite unknown. It is useless to attempt to describe their regal beauty, for it cannot be done. They must be seen. Besides their gay colors and odd markings, they have two very important points of superiority over other sorts. First, they bloom two or three weeks earlier and are in full perfection before others appear; and secondly, they are hardy and may be left in the ground over winter, from year to year, without lifting in autumn; yet we do not advise this plan, as we think it better to lift them in the fall and store them in the cellar, that they may be planted out in fresh, mellow soil in spring. They do well either way.

- Atlas**—Clear violet, large velvety maroon blotch.
Admiral Pierre—Large flowers, round, very open; dark carmine-red, lower divisions clouded with purplish maroon, surrounded with light yellow.
Bejazet—Lovely light pink, shading to delicate blush; velvety carmine blotches.
Bassengault—Rose, blotched fine purple.
Bassuet—Large, brilliant vermilion.
C. Heineman—English red, lower petals bright crimson, edges velvety and gold color.
Chas. Martel—Rosy blush, intense large carmine blotch.
Cleopatra—Red, carmine blotches, tinted with yellow.
Creole—Of unusually fine form; color rosy blush, flamed and shaded with carmine; deep crimson blotch.
De Cheville—Salmon-red, buff blotch.
Edison—A beautiful combination of many rich colors.
Emile Lemoine—Bright vermilion, dotted gold.
Enfant de Nancy—Purplish red, lower petals deep crimson color, and blotching entirely new.
Etendard—Light brick-red, with large canary-yellow and crimson blotches.
F. Bergman—Large, well-open flower, orange-pink, with large carmine stains.
Cambetta—Dark amaranth-red. Exceedingly rich.
Incendiaire—Fiery red, large blotch of crimson-red on lower petals, small gold markings.
Lafayette—Very large, yellowish salmon, crimson blotches.
La France—Light salmon; velvety purple, blotched on yellow ground.
Lamarck—Salmon, crimson and yellow spots.
Lamartine—Rosy flesh, with large, bright maroon blotch.
M. Leveque—Dark crimson; perfect shape.
Marie Lemoine—Large spike of fine, well-expanded flowers; upper divisions of a pale creamy color, flushed salmon-lilac, the lower divisions spotted violet and yellow.
Mme. Lemoine—White, tinged with salmon; large violet and maroon blotches.
Murillo—Bright claret-red, with velvety crimson throat.
Nydia—Blush pink, with large orange-scarlet throat.
Onelisk—Rich solferino, deep crimson blotch, tipped yellow.
Pactole—Sulphur-yellow, spotted black.
Romeo—Rich and beautifully colored.
Vashti—Creamy white, blotched carmine.

Price of above, 5c. each; any 5 for 20c.; the 30 sorts for \$1.00.

Amaryllis.

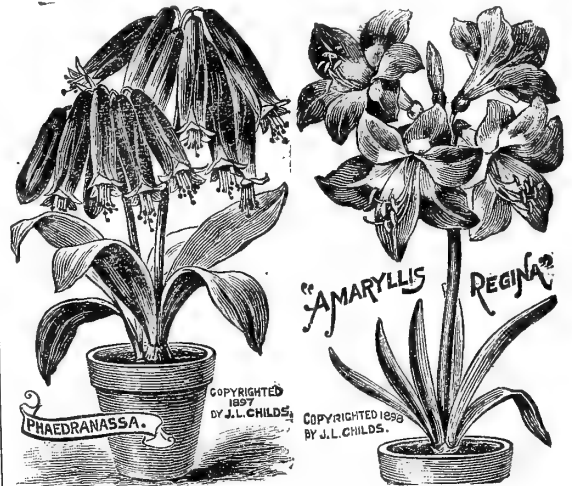

A royal family of bulbs, with large umbels of magnificent Lily-like flowers of largest size and richest coloring. Besides the pure white, pale flesh and soft pink shades are many intense and brilliant shades of crimson, scarlet, orange and vermilion, either self-color or boldly striped with white, green or red. Can be kept in pots the year round, or planted out in open ground during summer. Alternate rest and growth is the secret of big Amaryllis blossoms, and lots of them. While growing give them all the sun and moisture possible; but while at rest, give very little water, or none at all. The finer varieties increase so slowly as to be always high in price, but if our customers were to compare our prices with the leading European firms, who ask eight, ten, fifteen and twenty dollars per bulb for what we ask from fifty cents to two dollars for, they would think our prices extremely low for such rare and fine varieties. Each.

- Belladonna**—Elegant blush-colored blooms of great fragrance and beauty..... 25
- Aulica Platipetala**—Large vigorous grower. Bulbs and flowers of enormous size; color, deep blood-crimson, shaded black. A grand variety..... 75
- Formosissima**—There is hardly a flower which has such a deep, rich, velvety crimson color, a color so intensely brilliant as this. It is a free bloomer and succeeds well either in pots or in the open ground, and bloom very soon after planting. Few flowers can equal it in richness and beauty of color, and it generally blooms within a month after planting..... 15
- Empress of India**—A famous European variety which usually sells at \$10 each. Color, deep scarlet, banded orange, shaded to white. Enormous size..... 2 00
- Hamilton Hybrids**—Extra fine hybrids which bloom at all times of the year. Flowers large and well formed and of two colors, scarlet and white, variegated..... 1 00
- J. L. Childs**—Outside petals grayish white, inside bright pink, striped and suffused with pure white. Flowers very large and produced freely at all times of year. A most exquisitely beautiful flower..... 1 50
- Johnsoni**—A grand old sort, always popular. Flowers large and very beautiful, deep red, striped white..... 40
- Phadrannassa Gloriosa**—The flowers are borne in pendulous clusters, and an odd mingling of colors, green, orange, scarlet, etc. Always admired, for it is a very odd and exceedingly interesting plant. The clusters of fine, drooping blossoms are entirely unlike any other species of Amaryllis..... 15
- Regina**—The queenly beauty of this superb Amaryllis has given it the name of Regina, or Queen Lily. That it is a fine winter bloomer also adds much to its merit. Bulbs large and strong, ready to commence growth as soon as potted, and will soon bloom. Flowers very large, wide-open or spreading shape. Color, soft, light scarlet, with white center or throat. The charming color and beautiful shape of the flower makes this one of the choicest of the large and celebrated race of Amaryllis species. 3 for 30c..... 15

CRINUM ORNATUM.

Crinum Ornatum—This is the king of the Amaryllis tribe; it produces a large round bulb, which grows to weigh as much as ten pounds. It can be treated as a pot plant, or grown in the garden as a summer flowering bulb. It is of the easiest culture, and sure to succeed with everyone. It flowers are large, and like a most beautiful Lily, borne in immense clusters at the top of the stout scapes. Color, soft, delicate blush, with a scarlet bar through the center of each petal and very sweet scented. Fine bulbs, 40c. each; 3 for \$1.00.

Tretea—Beautiful, large, Lily-like blossoms, pure snow-white, of charming beauty and fragrance. They generally commence blooming within a few weeks after planting, and nearly every bulb produces from two to five flowers. For pot culture bulbs can be planted at any time during the winter or spring, and will soon bloom. Five to six may be planted in a five-inch pot. In the open ground they are not at all particular as to soil or situation, but are quite sure to thrive anywhere. Pot a few for immediate blooming in the house; they are charming. Large, selected bulbs, 5c. each; 6 for 25c.; 12 for 40c.

SAUROMATUM SIMLENSE
Amorphophallus Simlense.
 (OR SAUROMATUM).

A rare and curious garden bulb, with odd flowers and luxuriant Palm-like foliage. The spathe of this Calla-shaped flower is two feet in length, with tapering point, and is of very large size. Color of bloom, greenish chocolate on outside, inside yellow spotted with purple. Foliage very large, luxuriant like a Palm. Plant out in open ground quite early, or by corn planting time. 30c. each; 5 for \$1.00.

Cooperia Drummondii.

This bulb belongs to the Amaryllis family and can either be grown in pots or open ground. The beautiful Lily-like flowers are borne on stems 10 to 15 inches high, and are profusely borne. They have a saying in Texas that the Cooperia blooms after every rainstorm. Certainly its flowers spring up as if by magic repeatedly through the season. Color, pure white. Bulbs large and strong. 5c. each; 6 for 25c.

CHOICE ACHIMENES.

Achimenes.

A most beautiful flowering bulb for pot culture, and requiring much the same treatment as Begonias and Gloxinias. They are very easily grown and produce a wonderful profusion of flowers all summer, some varieties blooming even up to Christmas. Colors, white, crimson, blue, rose, heliotrope, etc. Many of the sorts have highly ornamental foliage, as fine as the best Coleus. We have some 25 different named sorts, including some of the finer varieties of Tydaes, a bulb near akin to the Achimenes. These bulbs should be potted as soon as received, but we shall book orders and not send the bulbs until planting time. Fine Mixed Bulbs of Achimenes and Tydaes, 80c. per dozen; 6 for 50c.

SPOTTED CALLA.

Spotted Calla.

The leaves of this beautiful Calla are deep green, with numerous white spots, which give the plants a magnificent appearance. The flowers are pure white, with a black center and very beautiful. 15c. each; 3 for 35c.

For New Yellow and other CALLAS see pages 28 and 29.

Paneratium Tortuosum.

PANERATIUM TORTUOSUM.

A rare species of the great Amaryllis family, which produces large bulbs that may be treated like Gladiolus. Planted out in the spring, they produce large elegant leaves which are of a grayish blue tinged color, very odd and peculiar as well as handsome. The flowers are borne in clusters, as shown in the cut, pure white and fragrant. It is also an admirable pot plant. We are fortunate in being able to offer fine large bulbs of this rare flower at 20c. each; 3 for 50c.

LIVONIA.

JEWEL.

Superb New Dahlias.

These Dahlias, of recent introduction, are, in our estimation, the finest in cultivation.

Livonia—Flower stems long, and the color of the large perfect blossoms is a soft, sweet, sea-shell pink, a color as rare as it is beautiful. In our opinion the most beautiful Dahlia in cultivation. Flowers perfect and freely produced.

Clifford W. Bruton—The finest pure yellow decorative Dahlia. Of immense size, 5 to 6 inches in diameter; of full Chrysanthemum form, and full to the center. A strong vigorous grower, and an extremely profuse bloomer to have so large a flower.

Zulu—The black Dahlia. A large double flower of fine form and jet black color. A great novelty.

Floral Park Jewel—Flowers of many colors, from deep maroon to bluish white, including beautiful spotted and variegated forms, are borne in great profusion on the same plant at the same time. In fact a plant will hardly ever produce two flowers alike. Blush-white, crimson-maroon, white suffused with maroon, maroon suffused with white, crimson-red, purple spotted, marked or marbled white, spotted, marbled and striped with maroon, pink or crimson, or several colors suffused in an odd and irregular way. The exceeding beauty of a plant loaded with flowers and each one of a different color can be better imagined than described. The blossoms are perfectly double, large and of perfect shape, and borne by the hundred.

Nymphaea—Like a lovely pink Water Lily. Extremely beautiful and novel. It is a great and persistent bloomer all through the season, and its charming Water Lily-like blossoms are grand.

Camelliaflora—Plant dwarf and stout. Flowers very large, perfect in shape and pure snow white.

Mary D. Hallock—Extra fine yellow.

William Agnew—The best red Dahlia ever produced. Seven inches in diameter and always full to the center. Of perfect form and exquisite quality, while the color is the richest shade of intense dazzling red.

Red and Black—Deep, glowing crimson, heavily margined with jet black. Of beautiful form and one of the most effective.

Apple Blossom—A very fine new variety. Combines all the shades found in the Apple blossom; red-pink and carmine to pure white.

Fern-Leaved Beauty—An exquisite Dahlia, the flowers of which are striped with deep crimson and the foliage is beautifully cut and fern-like.

Maid of Kent—Cherry-red, tipped white; sometimes a solid color.

Arabella—An early and profuse flowering variety of large size and perfect form. Pale primrose, tipped and shaded old rose and lavender. Extra fine.

Miss Florence Shearer—A fine flower of a clear, soft lilac color edged with gray.

Mrs. Dexter—Very large, rich salmon. Best of its color.

Psyche—Pale primrose, shaded pink. Dwarf branching plant and one of the most profuse bloomers.

Prince Bismarck—Very large; deep rich purple.

Miss Lou Kramer—Yellow, heavily tipped clear bright crimson, overlaid with pink. A pleasing variety of the Pompon type.

Prince Charming—Another Pompon with beautiful little blossoms. White, pencilled, suffused and heavily tipped with purple pink.

Cactus—We have several fine varieties of different colors of the beautiful new Cactus type.

Price, 25c. each; 3 for 60c.; the 20 for \$3.50.

Mixed Dahlias—We can supply large field-grown tubers of 25 finest Dahlias (mixed), at \$1.00 per dozen, by mail or express. Larger tubers can be sent by express.

For DAHLIA SEED, see page 53.

THE GREAT ISMENE.

(*ISMENE CALATHENA GRANDIFLORA.*)

Having grown a Large Stock we are able to offer this Superb Bulb Very Cheaply.

Those who are familiar with the true Ismene cannot say enough in praise of its beauty and purity. The flowers are of very large size, like an Amaryllis, novel form, and of snowy whiteness, and are also exceedingly fragrant. It is really one of the most lovely of all the great Amaryllis tribe, having a peculiar grandeur which one can appreciate at sight, but cannot describe. Bulbs are large and strong and begin to flower in two or three weeks after planting, sending up tall flower stems, which bear several of its magnificent blossoms. As a pot plant it is grand, and as a garden bulb treated like a Gladiolus it is one of the choicest of all flowers. Do not fail to try it. It will more than please you for it is superior to the Bermuda Easter Lily as a flowering bulb. Strong flowering bulbs, 20c. each ; 3 for 50c - 7 for \$1.00.

Mexican Gems.

Though entirely distinct from each other, we class these three fine bulbs together, as their habit is somewhat alike. They can all be grown either as pot plants or in the open ground. They are very effective when grown in clumps or masses and are very profuse and long blooming. Exceedingly fine for cutting. Gems of real grace and beauty.

Bessera Elegans—Flower stems from one to two feet high, bearing loose umbels of beautiful, drooping scarlet and white flowers. A charming bouquet flower. Few flowers present such graceful beauty, while growing in a natural state or when cut, as does Bessera Elegans.

Cyclobotbra Flava—Narrow grassy foliage and a constant bloomer. Flowers bell-shaped, bright yellow dotted brown. Very graceful and in every respect a perfect gem.

Milla biflora—The flowers are pure waxy white, two inches in diameter, star-shaped, and usually in pairs on long slender stems. It is beautiful, especially for cutting. Too much praise cannot be bestowed upon this lovely flower. It pleases everyone and should be grown very largely. This charming flower is exceedingly popular for florists' use, and the demand for the blossoms is great. The blooms frequently last two weeks when cut and placed in vases of water. It is a perfect gem.

Price 5c. each; the 3 for 10c.; 3 each of the 3 sorts for 25c.; or 30c. per dozen.

Montbretia.

One of the brightest and most winsome flowers we know of. Should always be grown in masses or groups and are then remarkable showy and brilliant. From July to October they are one mass of flowers, spike after spike of the flame-like beauties appearing. Extra fine for cutting, their dash of color lighting up a heavy mass of flowers with grace. One of the most lovable flowers we know, so graceful and bright and cheery.

Crococmaeflora—Fine scarlet.

Elegans—Yellow, flamed scarlet.

Pure Lemon—Fine lemon-yellow.

Transcendent—Brilliant flame color.

Price 5c. each; the 4 for 15c.; 40c. per dozen.

OXALIS LASANDRIA.

OXALIS DIEPPI.

Summer-Flowering Oxalis.

No bulb is so valuable for edging the borders of walks or flower beds as the beautiful flowering Oxalis. When planted three inches apart they produce an unbroken row of elegant foliage and pretty flowers, and as they bloom very quickly after planting they furnish a neat and attractive border for the whole season. They are also splendid when planted in a mass, and make a very showy bed. The bulbs which are the size of peas, or larger, can be planted the first of May, or perhaps earlier, and will be in bloom by the first of June. No flower is easier grown than this, as they are sure to succeed in all soils and situations. They are also charming when grown in pots and make a very attractive mass of fine foliage and gray flowers. They can be planted in this way at any time during the winter or spring, and will commence blooming at once. Every bulb will grow and flower beautifully. Price of fine bulbs, 10c. per dozen; 25 for 15c. 100 for 40c.; 500 for \$1.50; 1,000 for \$2.50.

Dieppi—Pure white; very fine.

Lasandria—Fine rosy pink, beautiful cut foliage.

Shamrock—Lovely clover-like foliage and pink blossoms.

Mixed Colors—Several colors.

Mammoth Bulbs—We can supply mammoth-sized bulbs of the Oxalis, nearly as large as Gladiolus, and which will produce a wonderful profusion of bloom, at 5c. each; 3 for 10c.; 12 for 35c.

IPOMŒA MEXICANA.

GALADIUM ESCULENTUM.

Galadium Esculentum.

A grand sub-tropical foliage plant, growing four feet high, and bearing immense shield-shaped leaves of the sunniest, richest green. Extra fine for groups or single specimens upon the lawn, or as borders to tropical beds, or to plant at the margins of ornamental pools, etc. Give plenty of water. 15c. each; \$1.50 per dozen.

Fancy Galadium.

For our fine assortment of Fancy Galadiums see page 7.

Madiera Vine.

A rapid growing vine, covering a large space in a short time. Fleshy, heart-shaped leaves of a light green, and in late summer numerous racemes of feathery flowers of powerful and delicious fragrance. A very beautiful and popular vine, which succeeds admirably. 5c. each; 3 for 10c.; 12 for 30c.

CINNAMON VINE

MADEIRA VINE
COPYRIGHTED
1895 BY J. L. CHILDS

Cinnamon Vine.

A pretty, hardy vine, with edible roots and neat, glossy, cordate foliage. In midsummer it bears clusters of tiny but exceedingly fragrant flowers, with an odor like cinnamon. A very pretty vine to train over a small trellis, or around a window. 2 for 5c.; 5 for 10c.; 12 for 20c.

Ipomœa Mexicana.

This beautiful climber is also offered among "Specialties and Novelties," with the Moonflower. It is also entitled to a place here as a summer-flowering bulb. It forms a root as large as a Dahlia, which is safely wintered in any cellar, and when planted out in the spring it commences a strong growth at once, and is really the most useful of all climbing plants, as it starts so early and grows so rapidly. Its flowers are of a satin violet-crimson color, and remain open all day. This is often known as Tuberosis-rooted Moonflower. An elegant vine for conservatories or large bay-windows during winter. 20c. each; 3 for 50c.

For other IPOMŒAS and MOONFLOWERS see page 19.

HYACINTHUS
CANDICANS

Hyacinthus Candicans.

A species of Hyacinth which blooms during August and September, grows three to five feet high, with spikes of pure white flowers two feet in length. The bulbs are large, round and solid, and throw up large flower stems which are gigantic spikes of thimble-shaped white blossoms. Planted in the spring they bloom in August, September and October, strong bulbs producing two, three and even four flower stems. A bed of a dozen or more bulbs produces a grand effect. A few planted in the center of a bed of Verbenas, Petunias, or other flowers make a beautiful display. They contrast elegantly with Gladiolus. Planted anywhere, singly or in clumps, they are magnificent. For a cemetery nothing can be more beautiful or appropriate, and nothing thrives better in any situation. Strong bulbs sure to bloom, 10c. each; 3 for 25c.; 12 for 75c.

Tigridias.

One of the most showy of all summer bulbs, and blooms from midsummer until frost, growing three feet high, with large wide-open triangular blooms, four to six inches across. The colors and markings are very brilliant and peculiarly odd and attractive, and clumps of them in the border have a most gorgeous effect. It is difficult to name a flower of such unique and exquisite beauty as a Tigridia, the superb spotting being so self-like and handsome. They are easily grown and always more than satisfactory. One cannot without seeing them realize how truly beautiful they are. The named sorts we offer are truly immense, some of them being quite new.

Mixed Sorts—All colors, 3 for 10c.; 12 for 40c.

Canariensis—Fine bright yellow.

Conchiflora—Yellow, spotted orange.

Grandiflora Alba—White, fine crimson spots. A perfectly magnificent flower.

Speciosa—Deep red, fine purple spots.

Lilacea—Brilliant violet-crimson; new and very fine.

Rosea—Magnificent rosy pink.

Immaculata—Pure white. New and magnificent.

Price of above grand named sorts 5c. each; the 7 for 30c.; 3 of each for 75c.

NEW HARDY SPIDER LILY.

New Hardy Spider Lily.

This grand new Spider Lily has the advantage of being perfectly hardy, and when left undisturbed a few years forms large, imposing clumps that are a mass of clustered heads of pure white, fragrant flowers. The flowers have a peculiar and striking beauty which must be seen to be appreciated. The flowers are borne in large clusters, are of waxy whiteness and unsurpassed fragrance. More beautiful than most of the high-priced Lilies. An extra choice garden flower which we cannot too strongly recommend. Also a fine pot plant. Fine flowering bulbs, 20c. each; 3 for 50c.

Queen Lily.

A fine new plant with a bulb somewhat like a small Tuberosa. The foliage is exceedingly beautiful and of tropical appearance, leaves being large and paddle-shaped. The flowers are borne on a strong scape which rises from the center of the plant, and are in the form of a cockade. Colors exceedingly delicate, white and pink with orange center. A beautiful and novel plant which blooms in August and September and makes a fine pot plant as well as a fine garden plant. Its luxuriant and beautiful foliage is a fine feature but its flowers are exceedingly novel and attractive also. A fine new thing in every sense of the word. 15c. each; \$1.25 per dozen.

SPECIAL OFFER.

As an ornamental foliage plant there is nothing better than Phrynium, and for a curious, rare and little known plant, the Queen Lily is an extra fine thing. We will send one of each for 30c.; 3 of each for 75c.

Phrynium Variegatum.

An elegant pot or bedding plant which is faithfully depicted in the accompanying cut, though it conveys no idea of the exquisite variegations of the leaves. Its manner of growth is much like that of a Canna, the leaves borne on erect foot-stalks with spreading blades of oblong-lanceolate form. They are bright pale-green, beautifully variegated with white and gold, the variegation being extremely diversified. In some leaves the whole area is white, in others only one-half, in others again it is confined to the interspaces between two or three of the ribs, while in others it is reduced to a few stripes. It is very free growing and one of the most ornamental plants imaginable. As a pot plant it surpasses the best Palms, and can be compared only to some of the rare Dracænas. As a bedding plant, planted out in full sun, it is simply elegant, making a specimen which for ornamental foliage, has no equal. It is a free, vigorous and easy grower, succeeding in all situations and under all conditions. Being so very cheap, we trust that all of our customers will plant it. It is sure to delight all. 20c. each; 3 for 50c.; 7 for \$1.00; 15 for \$2.00.

Childs' Superior Tuberoses.

The one flower the rich man must have and the poor cannot do without. We all love its massive spikes, thick, waxen, blooms of rich, creamy whiteness, and its deep delicious fragrance. How often has this sweet flower, that might have bloomed in paradise, been placed upon the cold forms of those whose spirit has gone to fairer fields. We have made our prices very low, that every flower lover may enjoy their peerless beauty. For open-ground culture, plant about the middle of May. Give them rich soil, in full sun, and keep free from weeds, and they will bloom finely. Plant a good big lot of them for cutting, and if you will pot those which are in bed about the time frost is expected, they will bloom elegantly in pots for a long time; often till Christmas.

Excelsior Pearl—Introduced by us twelve years ago. It is the finest bloomer of all Tuberoses; habit dwarf, flower stalks short, spikes and blossoms enormous in size and very double and fragrant. The finest for pots as well as for the garden. Large select bulbs, 6c. each; 3 for 15c.; 12 for 50c.; 100 for \$3.00.

Tall Double—The old popular variety. Splendid for the open ground. 5c. each; 5 for 20c.; 12 for 40c.

New Variegated—The leaves of this variety are bordered with creamy white; flowers single but very large and of exquisite fragrance. Bulbs continue to grow and bloom year after year. It makes a most magnificent plant. It blooms several weeks earlier than the other sorts, which greatly adds to its value. 10c. each; 3 for 20c.; 12 for 75c.

Single Orange Scented—A fine sort, bearing very early in the season, large spikes of beautiful single orange-like blossoms. Very fragrant. 10c. each; 3 for 20c.; 12 for 75c.

One bulb each of above four sorts, 25c.; 3 of each for 60c.

Zephyranthes.

The Zephyr flowers, or Fairy Lilies, are gems of rare beauty; and when planted either in pots or the open ground they produce very beautiful Lily-like flowers nearly all summer. Though some of the varieties are old, they are not generally known or seen in cultivation, owing to the fact that they have never been properly and thoroughly introduced. When once grown they are always grown, for they are one of the prettiest and easiest grown flowers; it is possible to have. They are of a lovely section of the great and popular Amaryllis family.

For pot culture plant three or four in a 5 or 6-inch pot, and they will bloom beautifully. For the garden plant in spring and lift them in the fall, like Gladiolus. We offer here several new sorts of great beauty, which makes a collection of six superb kinds. Those who plant them, either in pots or the open ground, will be delighted with them.

Rosea—Beautiful clear rose; flowers large and very handsome. One of the oldest and best; blooms all summer. 5c. each; 3 for 10c.

Sulphurea—(GRANT FLOWEED). This produces flowers as large as a large Amaryllis, and on stems 15 to 24 inches in height. One of the clearest and finest shades of yellow we ever saw. The shape of the flower is perfection itself. It is one of the choicest gems in the bulb line. 10c. each; 3 for 25c.; 12 for 75c.

Atamasco—This is, in all respects, much like *Rosea*, except in color, which is pure white. Flowers large and very beautiful. A cheap but magnificent sort. 6c. each; 3 for 10c.; 12 for 30c.

Floribunda—A new sort, and unlike all others. It bears its flowers usually in pairs, two on one stem. It is very beautiful, being of a rich golden yellow, and exceedingly sweet-scented, its perfume being unlike any other flower we ever saw. Flowers as large as a good Amaryllis and exceedingly handsome. It is one of the very finest bulb novelties. 10c. each; 3 for 20c.; 12 for 60c.

Andersoni—A little beauty, its flowers being smaller than the others; beautiful tulip-shaped, and orange-yellow in color. A free bloomer. 5c. each; 3 for 10c.; 12 for 35c.

Candida Improved—Pure white, and the freest bloomer of all, though not so large. 5c. each; 3 for 10c.; 12 for 25c.

SPECIAL OFFER—One fine bulb each of these six lovely Zephyr flowers for only 30c.; 3 of each for 75c.; 12 of each for \$2.50

HARDY PERENNIAL PLANTS.

The earth wears a crown of Floral Beauties, and among the brightest, richest and sweetest are the Hardy Perennials. They fill a place in our gardens, and in our hearts, which nothing else can supply. Like Flowering Shrubs, when once planted they are good for a life-time, and we come to regard them as a part, not only of our home, but our very existence. What would induce us to part with the grand old clumps of Paeonies, Lilies, Iris, etc., which have stood along the path in our front yard so long, and greeted us year after year with such cheery brightness and beauty? They have cheered us through many vicissitudes and dark hours of life. They were loved by dear ones whose voices we hear no more; their blooming calls to our minds dear associations, happy days and happy faces which Time, the great Destroyer, has stolen from us. Yes, let us enrich our little yard or little lawn, our borders and walks, with these dear flowers, which will be our friends and companions for evermore.

The list of Hardy Perennials here presented we have collected together with great care, having in view one special object, viz.: to supply the best varieties and best plants at a smaller cost than they can be had elsewhere in the world. We feel sure that we have succeeded, and that our customers will not let this season pass without adding many of these treasures to their homes. They are all perfectly hardy anywhere, and thrive and bloom year after year with little or no care after once well planted.

Achillea Grandiflora.

A most useful and beautiful hardy perennial plant which furnishes a profusion of the choicest double white flowers all summer. It commences to bloom by the first of July and is a perfect mass of bloom until frost, as many as 5,000 flowers having been counted upon one plant at one time. Flowers pure white, perfectly double, and are produced in large sprays, and are unsurpassed for all sorts of cut-flower work, bouquets, etc. It is perfectly hardy anywhere, and so vigorous that it will take care of itself among weeds. For cemetery planting there is nothing finer, for it is sure to live, thrive and bloom profusely year after year. The plants we send out will bloom profusely this summer.

15c. each; 5 for 50c.

Aster, Alpina.

One of the most charming hardy perennial plants we have ever seen. Its flowers are borne in profusion early in spring, and are the size of a large wild Daisy, about three inches across, composed of a double row of intensely blue petals, surrounding a golden yellow center. It is double the size of any other hardy Aster, and closely resembles a large Paris Daisy in shape and general appearance. Another important point is its extreme earliness. It begins to bloom long before any other Aster, usually in May. Price, 30c. each; 4 for \$1.00.

COPYRIGHT, 1899 BY J.L. CHILDS.

HEUCHERA
SANGUINEA

Heuchera Sanguinea.

This rare and little-known plant will be a revelation of beauty to all who try it. It is of very pretty, graceful habit, sending up great numbers of flower stems, which branch freely and produce for a period of two or three months a great profusion of scarlet blossoms. Nothing finer for vases or decorating. Perfectly hardy. 15c. each; 4 for 50c.

HARDY

CANDYTUFT

Candytuft, Hardy.

A plant of exquisite beauty, being of low, compact, spreading growth, and producing its profusion of bloom in May or June, when pure white flowers are particularly scarce. Its profusion of bloom is so great that a bed of it looks at a little distance like a mass of fleecy snow just fallen. Few hardy plants will give as much real satisfaction as will this beautiful gem. Lifted late in the fall, it will bloom well in the house during winter. Perfectly hardy and foliage ever green. 15c. each; 5 for 50c.

Calystegia Pubescens.

A fine double perennial Morning Glory. A hardy perennial vine, coming from the roots each spring, and bearing quantities of pale satiny-pink flowers, as full and double as Rosas. Just the vine for rockeries, banks, poor, hard soil, where nothing else will grow, or a hundred other places, where a really handsome trailing or climbing vine is needed that is able to take care of itself. The vines we send out will bloom the first season and continue all summer. Its long vines wreathed in a profusion of large, double, Rose-like blossoms are very attractive. 15c. each; 3 for 40c.

PERENNIAL
POPPY

COPYRIGHTED 1935 BY J. L. CHILDS.

Perennial Poppy—(Papaver).

If there is a more gorgeous flower anywhere than the Perennial Poppy we fail to know it. The most indigent observer stands spell-bound in the presence of its magnificent fire-like scarlet flowers with their silken texture and foil-like heart of innumerable purple-black stamens. Each bloom is as large as a saucer, and sits perched like a bird on the end of a swaying, hairy, slender stem, high above the deeply-incised and handsome foliage. Many consider it the most showy flower that blooms. A grand plant to light up dark corners and dull shrubbery. Do not disturb them after planting as they dislike removal. Fine plants, 20c. each; 3 for 50c.

DAY LILY (VARIEGATED FOLIAGE)

Day Lilies—(Funkias).

Large White—Pure in color as the driven snow, as smooth in texture as though cut from sheeted wax, all its snowy trumpets exhaling sweet fragrance, no sweeter, lovelier or more perfect flower can be grown. Perfectly hardy, and easy to grow. Blooms continuously from August until frost, producing scores and even hundreds of its large Lilies. Handsome light green foliage. 30c. each.
Variogated Leaved—Leaves as handsome as a flower. A rosette-cluster of almost white leaves, lightly striped with green and yellow. Flowers pretty pale lilac-blue on tall spikes. Fine also for pots. Altogether this is one of the very finest of all hardy plants. 20c. each; 3 for 50c.

IRIS KÆMPFERI.

Double Iris Kæmpferi.

These new Iris from Japan rival the Lily in stateliness, the Pæony in magestic beauty, the Orchid in marvelous delicacy and blending of colors, the Chrysanthemum in profusion, and surpasses almost every plant in size and kingly magnificence of its flowers. Think of a plant sending up to the height of three feet a dozen flower spikes, each spike bearing from two to four enormous blossoms eight or ten inches across and of the most delicate and beautiful colors, markings, and combinations. Think of a bed of all colors, white, indigo, violet, lavender, mauve, sky-blue, royal purple, blush, yellow, etc. Your imagination can conceive of nothing grander, and when you see them you will realize that they are infinitely more grand and beautiful than your imagination could portray. Such are these new Double Iris Kæmpferi, the king of hardy perennial plants. Once planted in your garden they are a joy for a lifetime without further care, blooming profusely in June and July, during which time they are the greatest attraction your garden can contain. Received highest award at the World's Fair.

Blue Jay—Large flowers; fine azure blue freely mottled.

Eclair—Lovely pure white. Extra large and fine.

Mahogany—Very large flower, deep mahogany red.

Co-d Bound—Tall and showy, with flowers of enormous size, probably the most beautiful of all. Pure snow-white, with large gold-banded center.

Blue Danube—Extra fine luminous blue, with peacock luster and yellow eye. Very large and showy.

Zenobia—Rich purple, mottled with grey.

Mt. Hood—Light blue, shaded darker. Bright orange center.

Pyramid—Tall and showy, flower very large; light violet-blue with slight white veins.

P. C. de Rohan—Purplish blue, shaded violet and red.

Robert Craig—Tall and very large; French white, shaded with violet toward center; extra fine.

Price 15c. each; any 3 for 40c.; the 10 for \$1.00; or \$1.00 per doz.

Double Mixed—40 Fine sorts, 7 for 50c.; 15 for \$1.00.

IRIS SEED—We can supply fine seed of these beautiful Iris Kæmpferi, mixed, at 10c. per pkt.

COPYRIGHT, 1899 BY J. L. CHILDS.

IRIS KÆMPFERI.

SINGLE VARIETIES.

Como—Reddish amaranth, with large white center.

Shadow—Enormous wavy petals, dark indigo blue with peacock luster and golden center. Grand.

Snowbound—Large, pure white, with golden bands.

Souvenir—Lovely rose-pink, satin gloss and blue veins.

Violet Cap—Pure white, veined and suffused dark blue.

Quakeress—Light lavender, tinged rose.

Price, 15c. each; the 6 for 50c.; or \$1.00 per dozen.

MRS. SAXTON

SENATOR LEXOW

SPOTTED BEAUTY

COPYRIGHTED 1899 BY J. L. CHILDS

FIVE ELEGANT NEW SORTS.

These five new Iris Kæmpferi are grand.

Mrs. C. T. Saxton—Pure white, enormous size and triple extra double. The finest double variety.

Senator Lexow—Enormous flower like Shadow, but much larger; great wavy petals a foot across. Indigo blue.

Spotted Beauty—Large size, very double; silky white freely and finely spotted with violet-crimson.

Little Pink—A lovely variety (single), not quite so large as some others, but of a blush-pink color. Very distinct.

Gigantea—Extra large size, same as Lexow, with beautiful wavy petals; blue with purplish red tinge, yellow center and white veins. Extra fine single sort.

Price, 25c. each; the five for \$1.00.

NEW SEEDLINGS.

Fine seedlings of Iris Kæmpferi, which present a wide range of beautiful colors and large sized flowers, some double and some single. They are perfectly magnificent. 75c. per dozen.

Mosquito Catcher Plant.

This pretty plant, *Vincetoxicum*, comes from Japan. It grows one to two feet high and all summer bears a profusion of pretty, white, star-like blossoms that secrete a viscid fluid that attracts mosquitoes and sometimes other insects as well. Alas for the poor mosquito! No struggling on his part can ever free him after he has once dipped his beak in the forbidden sweets, though he may tug and plunge and buzz for a day or two after. A single spray of bloom will capture a dozen mosquitoes. 15c. each; 5 for 50c.

VINCETOXICUM

Anemone, Whirlwind.

A variety of the beautiful old *A. Japonica*, but with large, semi-double blossoms of a snow-white color. It possesses a beauty and airy grace which is seen in but few flowers, and its great profusion of bloom at the end of summer and during fall, when pure white flowers are scarce, makes it very valuable—in fact one of the finest novelties of the year. 10c. each; 5 for 50c.

ANEMONE
"WHIRLWIND"

Paeonies.

The favorite of to-day, as it was fifty years ago. Luxurious foliaged plants, with magnificent, double incurved flowers of enormous size and rich colorings. Nothing can surpass the intensity of the dark varieties that fairly glow with a radiant fire of richness, while the white and pale varieties are very soft and delicate in their coloring.

New Giant—Like an enormous double Rose, of a blush, almost white color; a Paeony which grows 3 to 4 feet high, and bears flowers nearly as large as a man's hat, which resembles a perfect Rose. In fact, the flower is the same shape, fragrance, and exquisite satin-like pink color as Baroness Rothschild Rose. It is beautiful beyond description. Fine roots, 40c. each; 3 for \$1.00.

Victor Lemoine—Large size and great fragrance—deep crimson. 30c. each.

Fragrans—Bright pink, double and very sweet. 25c.

Double White—Pure white, very scarce. 40c. each.

Tenuifolium—Fine cut, fern-like foliage of exquisite beauty, and blossoms in May. Rich, flery scarlet. 30c. each.

Humilis Single—Large, purple-rose; very early. 25c. each.

One each of the 6 sorts for \$1.50.

Mixed Paeonies—Ten sorts. \$1.50 per dozen.

HERBACEOUS PAEONIES.

New Perennial Phloxes.

Those who remember the thin-petaled white and the dull-hued purple Perennial Phlox of old-fashioned gardens can scarcely recognize these new Phloxes as the same flower. These new varieties are in bloom from June until frost, and the individual florets are twice the size of the old time Phlox, and the shades of color the brightest, richest and clearest. There are no finer or more useful perennials than the Perennial Phloxes, or which will give more complete satisfaction. The varieties we offer are new and fine and the plants we send out will bloom magnificently the coming summer. They are cheap and we hope that all our customers will plant them.

Athis—A beautiful rosy scarlet, tinged with salmon. Very bright and showy.

Snow Cloud—White, suffused with purple. Extra fine.

Charlotte Saisson—White, suffused with pink, deepening toward the center to bright vermilion.

Lasalle—Enormous flower and truss, individual flowers being 1½ inches across. Color, light crimson tinged with lilac and shaded lighter towards the center.

Diplomat—Beautiful light lilac with crimson eye. Very large flower and truss.

Eclair—Deep, bright purplish crimson. Extra large.

Master Clarence Hulse—Pure white. Flowers and truss of very large size and exceedingly beautiful.

Sylvester Hulse—Beautiful lilac-rose.

Miss Hattie Hulse—Pure white with beautiful pink eye.

Morty Hulse—Beautiful rose-lilac, marbled with white, flowers large and of beautiful form.

Pluton—Deep wine red; splendid. New.

Mad. Reudatier—Fine lilac, bordered and flaked white.

15c. each; any 6 for 60c.; the 12 for \$1.00.

New Pyramidal Phloxes.

Pyramidal White—A great acquisition, being a plant of sturdy, compact growth and bearing enormous pyramidal panicles of great blossoms. By far the finest white, and in all round good points the finest Perennial Phlox grown. Great solid panicles of grand effect.

Pyramidal Crimson—Like the above, with same great blossoms, but of a bright crimson color. The two sorts contrast finely. They bloom all summer long and are equal to Hydrangeas in majestic beauty.

20c. each; the two for 30c.

Phlox Subulata—One of the finest of low, turf-growing plants, fine for carpeting under trees, around rock-work, edging beds, etc. Early in spring is very showy with its cloud of bright pink blossoms. We do not understand why this is not more widely grown, for it is perfectly hardy and once planted will take care of itself. 15c. each; 5 for 50c.; 12 for \$1.00.

Grand Speciosum Lilies.

The Speciosums are the hardiest, most robust and free-flowering of all Lilies, not omitting the old Tiger Lily, while in beauty they are second to none. The magnificence of their blossoms cannot be described.

Rubrum—Deep rose, freely spotted crimson and mottled white; perfectly exquisite. 10c. each; 3 for 25c.; 7 for 50c.

Melpomene—Words cannot describe the beauty of this variety. Frosted white, spotted, clouded and bearded with pinkish crimson. Petals deeply recurved and widely bordered. 20c. each; 3 for 50c.; 7 for \$1.00.

Praecox—Large, perfect and beautiful. Frosted white, with a tinge of blush at the top of petals. The blush-like fringe in each petal adds to its beauty. 20c. each; 3 for 50c.

Monstrosum Album—Broad, flat stems and immense heads of flowers, often fifty in a cluster. Pure snow white. 15c. each; 3 for 35c.; 7 for 75c.

Punctatum—Fine white, with a delicate pink tinge and rosy spots. 30c. each.

Henry—New and exceedingly rare. Tall, strong grower, producing flowers in great profusion of a fine apricot-yellow color. The yellow Speciosum. \$1.00 each.

Opal—We had thought that no Speciosum could exceed Melpomene, but this new Lily is even larger, grander, and, if possible, more richly colored. Like the opal, for which it is named, the eye drinks in its lovely tints with delight. To say that it is frosted, glistening white, delicately clouded and suffused with rosy blush and spotted with rosy scarlet, is to convey but a slight idea of its perfect loveliness. The deeply recurved petals are snowy white at the tip, gradually deepening in color to the base of each petal, which is blotched with a raised, moss-like fringe, which glistens like diamonds. The flower is very large. 50c. each; 3 for \$1.25.

One each of the above 7 sorts for \$2.00.

Fine Lilies.

The brush cannot paint or the pen portray the exquisite purity and delicacy, yet magnificent grandeur, of the stately Lily. It is the plus ultra of floral beauty, and we urge our friends to each year add a few Lilies to their collection. No other flower will so adorn our homes when in bloom, and they constantly improve after planting. We feel sure that if our readers could see a good collection of from 20 to 40 different sorts in bloom they would never rest until they had a goodly number of their own. As a rule, Lilies are of the easiest cultivation, especially the following, which have been carefully selected as the hardiest, handsomest and best. We grow at Floral Park about five acres of Lilies, and the bulbs we offer are large, healthy, vigorous and cheap.

Ten Beautiful Lilies Cheap.

Our enormous stocks of home grown Lilies enable us to offer the following fine varieties remarkably cheap. It is a great opportunity for a good collection at a small cost.

- Canadense**—Lovely nodding blossoms, bell-shaped, yellow spotted black.
- Elegans**—Fine mixed colors.
- Longiflorum**—White, trumpet formed, very fragrant. A lovely Lily, being almost exactly like the Bermuda Easter Lily, but blooming a little later, and hardy.
- Pardalinum**—(LEOPARD LILY)—Rich scarlet and yellow flowers, spotted with rich brown. Robust and free flowering. A superb Lily, and one which will give the greatest possible satisfaction. Succeeds in all situations. No garden complete without it.
- Superbum**—Three to six feet high, flowers from five to forty, nodding; brilliant orange-red; blooms in July.
- Speciosum Rubrum**—(LANCIPOLIUM)—Large, wide flowers recurring more or less at the tips. Among the choicest of all Lilies, and perhaps the most robust and the most radiantly beautiful. Very fragrant and hardy. Lovely rose and white spotted crimson.
- Tigrinum fl. pl.**—(DOUBLE TIGER LILY)—This is a plant of stately habit, growing from 4 to 5 feet high; foliage is dark green and very long, bearing an immense number of double, bright orange-red flowers, spotted with black.
- Tigrinum, Splendens**—Improved Tiger Lily.
- Umbellatum**—One of the very best, blooming in June or July, with very large perfect flowers. Colors range from black-red, through all the shades of crimson, rose, yellow, buff, apricot, etc., many being finely spotted and variegated. 25 finest sorts mixed. Per dozen, \$1.00.
- Wallacei**—This Lily is very floriferous, each bulb throwing up from 4 to 6 flower stems, each one of which is crowned with 8 to 10 beautiful upright blossoms, of a delicate, bright apricot color. It is very perfect in form and a most desirable sort. 60c. per dozen.

Price, 10c. each; 6 for 50c.; the 10 for 85c. All home grown.

Rare Lilies.

- Auratum**—(THE GOLDEN BANDED LILY OF JAPAN)—We can say that this is the grandest of all Lilies, and certainly the most popular. 20c. each; 3 for 50c.
- Brownii**—A grand Lily, but very rare. The large, wax-like flowers are chocolate-purple on the outside, snowy white inside. Stamens a rich chocolate brown. Blossoms large and trumpet shaped. 50c. each.
- Longiflorum Variegatum**—The leaves of this variety are most beautifully variegated white and green, making a plant of great beauty. Sold a few years ago at \$5.00 each. Price now only 60c. each.
- Batemaniiæ**—Pure apricot color, without spots. A much prized Japanese variety. It is a near relative to the rare and beautiful *Leichtlini*. 20c. each.
- Excelsum**—This remarkable Lily attains the wonderful height of 5 to 6 feet. It produces from 8 to 12 nodding, rich apricot-hued blooms; has a delightful perfume, and its stately form makes it attract attention wherever grown. You will be delighted with it. Makes a fine pot Lily for winter blooming. 50c. each.
- Elegans Flore Pleno**—A rare sort, bearing double blossoms of a salmon color, spotted black. It is not only very handsome, but its extreme rarity and novelty makes it a handsome addition to any collection. 40c. each.

Lilium Tenuifolium.

(The Most Elegant of Lilies).

The lovely Coral Lily of Siberia. A great beauty. The brightest of all Lilies. Grows 20 inches high, with finely cut foliage, slender stems and beautiful shaped flowers of a brilliant coral-red. One ought to grow them by the dozen, they are so fine for cutting, and make such grand clumps for the lawn. Blooms very early. Having grown an enormous stock of this exquisite Lily we are prepared to offer it at the exceedingly low price of 15c. each; 3 for 30c.; 6 for 50c.; 15 for \$1.00; 100 for \$6.00.

HARDY FLOWERING VINES.

ON this page and the next we have tried to show the great beauty and desirability of Hardy Flowering Vines—such as may be planted in the ground for screening porches, windows, summer houses, etc., and which are perfectly hardy in any State, and sure to flourish and increase in size and beauty each year.

Large-Flowering Clematis.

The finest vine in existence for small trellises or piazza pillars. Used also to cover rock work, mound, stumps, etc., or can be used as a low trailer, pegging its shoots down to the ground. Foliage neat, habit graceful, and for a month a solid sheet of bloom, the large, starry flowers actually hiding the foliage. The flowers are from 4 to 9 inches across, extremely showy. All of these are perfectly hardy, and are the finest varieties.

Ramona—A strong, rampant grower, fully three times as strong as Jackmanni, often growing ten feet the first season. It is a perpetual bloomer, flowers appearing both in the old and the new wood, giving an abundance of blossoms all through the season. In color a fine deep sky-blue, lovely and distinct from any other. In size the flowers surpass anything we have ever seen. Perfectly hardy and very vigorous; new and grand.

Henry—This is the finest of all white Clematis, and should find a place in every collection. It is not only a vigorous grower, but is a remarkably free and continuous bloomer, beginning with the earliest and holding on with the latest. Flowers large, of a beautiful creamy white.

Jackmanni—This is perhaps the best known of the fine perpetual Clematis, and should have credit for the great popularity now attending this family of beautiful climbers. The plant is free in its form of growth, and an abundant and successful bloomer, producing flowers until frozen up. The flowers are large and of an intense violet-purple, remarkable for its velvety richness.

Md. Edward Andre—This was introduced only a few years ago, and created a real sensation. It is as large and free as Jackmanni, but its color is novel and distinct, being a fine dull crimson or red. The only variety of the red shades among large-flowered Clematis.

Languinosa Candida—A well-known pure white variety which is everywhere esteemed. Flowers very large, and pure in color.

Price, 50c. each; the five for \$2.00.

Clematis, Paniculata.

We cannot well say too much in praise of this vine. A clean, thrifty, robust growing vine, of graceful habit, with attractive glossy foliage, and covered in August and September with a sheet of clustered snow-white bloom of the most delicious fragrance. No other vine so completely covers itself with flowers. An arbor or portico over which this Clematis is trained is a wall of white for the time being, and what makes it the more striking is that nearly all other vines have ceased blooming at that time. The panicles of bloom are very pretty for cutting, the pretty star-like florets, with their feathery stamens, appearing to fine advantage contrasted with the large and more vivid flowers of the early autumn garden. Perfectly hardy; grows rapidly. Fine vines, 25c. each; 3 for 60c.; 6 for \$1.00.

Bell-Flowered Clematis.

The most beautiful, hardy and rapid growing varieties of recent introduction. They are really gems in every respect, and will give great satisfaction.

Coccinea—A lovely sort, producing an abundance of handsome vine and a great profusion of large rosy-scarlet flowers, which are exceedingly handsome and useful for all sorts of decoration. It blooms all summer long. Fine plants for blooming at once.

Crispa—Much like Coccinea, except its color is a fine blue, tipped with white.

Price, 20c. each; the two for 50c.

Rose, Crimson Rambler.

This new Rose is the sensation of the hour, and well it may be, for it is indeed a marvel. It originated in Scotland, and is a hardy everblooming, climbing Polyanthus. It is perfectly hardy in the open ground, will grow 8 to 10 feet in a season, is in bloom all the time from early spring to late fall, the flowers appearing in great panicles as large as a man's hat and of a deep, rich crimson color, like blood-colored velvet. The flowers, when cut, last two weeks in water, and fully a month on the bush, which is a perfect mass of rich crimson at all times. It can be grown in various ways; as a pillar rose, as a trellis rose, and for covering a wall it has no equal, and when pegged down it will form a bed of itself. Cut back, it is a magnificent pot rose for the window. It is always in bloom, even when very small, and is easily trimmed to a bushy grower. Being the introducer in this country, we have the largest and finest stock of this superb Rose.

Strong field-grown plants, 10c. each; 3 for \$1.00.

HONEYSUCKLES

Ampelopsis Veitchi.

The fashionable wall climber of the day. Clings tightly by suckers thrown out along the stem, to rock, brick, ect., and is a wall of living green the summer through, turning in autumn to a flaming crimson, when it is fairly gorgeous. It stands the dust and dry air of cities admirably. Nothing else can take its place. 15c. each; 5 for 50c.; 12 for \$1.00.

The dear old Honeysuckle is never out of place, at the rich man's mansion or the poor man's cottage. For a cheap, hardy, robust, yet lovely vine, it is the chief standby. Flowers exceedingly beautiful and very fragrant.

Fuchsia Flowered—Large clusters of long, trumpet-shaped flowers that droop like a Fuchsia, brilliant coral red.

Golden Leaved—Marvelously effective. It bears innumerable sprays of the most perfect little leaves that are covered with a net-work of gold and green, often marked with pink also. The gold deepens at the tip of the sprays and there is nothing finer to combine with corsage bouquets, while for trimming floral baskets they are the finest things we know of. A strong grower, with white blooms. A unique vine.

Halliana—The best white monthly Honeysuckle, with dark green foliage, which keeps fresh and green nearly all winter, and beautiful clusters of the sweetest-scented flowers that open a snowy white and turn a pale yellow. These flowers are produced in profusion from early spring to late fall. A fine vine for a trellis, or verandah. 15c. each; the 3 for 40c.; \$1.50 per dozen.

Apios Tuberosa.

OR THE TUBEROUS-ROOTED WISTERIA.

A valuable hardy tuberous-rooted climber, closely resembling the common Wistaria in vine and foliage and having clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. Plant the bulb near a trellis, tree, fence, or any place where you may wish a climber. They grow to a great height, and bloom profusely. The bulbs are perfectly hardy, and should not be taken up over winter. It is sure to give great satisfaction. If possible, plant two or three bulbs near together, to produce a greater mass of vines and flowers. Price, 10c. each; 3 for 20c.; 7 for 50c.; 15 for \$1.00.

Wistaria.

A favorite vine that will grow twenty-five feet in a single season. Just the thing for second-story verandas, or as a tree climber, or to train against a high wall. In early spring is covered with great massive clusters, sometimes two feet long, of lovely pea-shaped flowers.

Alba—A mass of white flowers in spring, the clusters of bloom reaching two feet in length. 75c. each.

Sinensis Magnifica—Fine large clusters of lovely blue flowers, produced in great masses. 20c. each; 3 for 50c.

WINDOW OR GREENHOUSE PLANTS.

One may have a home grandly constructed, elegantly fitted and furnished in every particular, wanting nothing which money can furnish, yet if it does not contain a window of bright blooming plants it lacks some essential feature, and is, in fact, almost desolate, and its inmates must be regarded as lacking in some degree refinement and taste. On the other hand, the humblest cottage is made a home indeed by the brightness and fragrance of its well filled windows of plants, and when we see it we know that good taste, refinement and a whole-souled people dwell within.

Plants are our natural home companions; they are bright, refreshing, cheery; winter may rage without, but inside they make spring perpetual. A refined and generous nature craves plants and flowers. Nothing else can take their place; especially to the care-worn woman, whose elevated taste and love for refinement goes largely unsatisfied, plants and flowers are one of God's richest blessings.

The plant department of our business is most extensive. We have acres of greenhouses and annually produce and send out over two million plants. Our system of picking is such that our plants carry successfully through the mails to nearly all parts of the world. We are careful to send out only well-rooted, healthy stock, and to offer only such varieties as are sure to give satisfaction—the very best of their kinds. The enormous quantities which we grow enable us to offer the finest plants of the choicest varieties at a price so low that they are within the reach of all. These facts have made ours the greatest plant distributing establishment in the world.

Begonia, Rex.

Enormous triangular leaves of satin-like texture, and metallic lustre, richly belted and zoned with the most striking colors. No finer decorative plant anywhere.

Peralpa—Leaf finely variegated silver-gray and deep emerald-green. Leaves small, but form abundantly.

Pearl—A great leaf of a solid silver color. Very handsome. Underneath ribbed red.

Louise Classon—Leaf dull red underneath, almost black outside, variegated with large pink blotches, having a peculiar metallic lustre. Very odd and beautiful.

Enfant de Nancy—Large, beautifully ribbed; deep green disk, thickly spotted. Large silvery zone and spotted green edge. Very fine.

Robert George—A fine large leaf, long-pointed and beautifully toothed. Color, light silver-green, with a center and border of deep blackish green. Very handsome.

Roi Fred—A perfectly gigantic leaf of a clear, liquid silver color, with a dark center and an elegantly fringed and festooned border of green and silver. Finely ribbed underneath. Size of leaf, 15 to 20 inches.

Price 30c. each; the 6 for \$1.00.

Mixed Begonia Rex.

Our collection of Rex Begonias is perfectly magnificent, including over 20 finest named sorts, which we can supply mixed at rate of 3 for 40c.; 6 for 75c.

Tuberous-Rooted Rex.

In foliage and growth it in no respect differs materially from the common B. Rex, but the crown or base forms a tuber after the style of *B. Weltoniensis*, which may be dried off and kept in that state like common Tuberous-Rooted Begonias, and when replanted will start at once a strong growth of beautiful foliage. It is a Novelty which will be welcomed. See page 12. 30c. each; 4 for \$1.00.

GLORIE D' LORAINÉ.

Begonia, Glorie d' Loraine.

The greatest blooming plant ever introduced. It is virtually all flowers all of the time. Of compact growth, each plant looking like a unique bouquet of most beautiful pink blossoms. 30c. each.

Begonia, Vernon.

Plants flower perpetually all the year round, being completely covered with bloom at all times, especially during winter. They make lovely bedding plants in summer, the leaves when exposed to the sun turning to rich bronze color, adding much to the beauty of the flowers.

Vernon, Crimson—Produces a profusion of dark crimson flowers. Many of our customers regard this as the very finest pot plant for perpetual blooming in existence.

Vernon, White—Splendid large blossoms, pure white.

Vernon, Pink—Lovely blush and pink shades. In other respects exactly like above.

Vernon, Yellow Leaved—This new variety has pure white blossoms slightly shaded or bordered with exquisite silky pink, while the foliage is of a charming yellow.

10c. each; the 4 for 37c.; or \$1.00 per dozen.

Night Blooming Cereus.

The most beautiful flower in the world. Its blossoms are a foot across, of a pure satiny white, outside petals tinged with reddish brown. It is also deliciously fragrant. No description can do justice to its wonderful beauty, or portray the magnificence of its pure cup, filled with thousands of silky stamens. Truly a flower of the gods, and one which seems not of earth, as its beauty is unfolded only in midnight's darkness. 25c. each.

Brugmansia.

Stately plants blooming at all times of the year. Flowers enormous in size and highly fragrant.

Arborea—Called also Angels' Trumpets and Wedding Bells. One of the grandest hard wooded plants we know of, and easy to grow. It grows several feet high, and is quite bushy. The foliage is large and tropical, and its blooms—how shall we describe what words cannot picture? Imagine a little bush three feet high with twenty or thirty pendulous blooms open at once; great creamy white blooms, eleven, twelve, or thirteen inches long and eight inches wide, of a texture resembling thick, fluted satin. Imagine these creamy trumpets pouring fragrance forth till the air is heavy with sweetness. Imagine all this, then remember the blossoms last for days in perfection, and that new buds are constantly coming on, and you will see why we value it so highly. It can be wintered unwatered in a cell or pit. Grand for Easter or Christmas decorations or for yards. 25c. each; 3 for 60c.

Doubled Flowered Very beautiful and fragrant. The great double trumpet-shaped flowers are indeed handsome. Flowers freely at Thanksgiving and Christmas. 40c. each; 3 for \$1.00.

Bridal Rose.—(Rubus Floribunda).

A remarkable plant with leaves resembling a blackberry in shape; its flowers are produced during winter, and are as double as a Peony, and almost as large. Color pure white, and when a plant one or two feet high shows a score or more of these enormous flowers, which they often do, the sight is a most novel and attractive one. New and little known. Will create a sensation anywhere. 20c. each; 3 for 50c.

Hydrangea.

Superb and easily managed tub plants, blooming when very small, and growing larger and finer each year. Their immense close panicles of bloom are wonderfully showy, and they last in perfection for months. Largely grown for Easter and early summer decorations, and are perhaps the most beautiful plants for piazzas or steps.

Rosea—Beautiful rose-colored bloom that later turns to blue. A profuse bloomer, bearing very large panicles.

Thos. Hogg—Much like above, but more white.

Red Branched—This new variety, with heads of bloom as large as a water-pail, is of unusual value, commencing to bear its enormous trusses of deep rose-pink bloom while yet very small and increasing constantly in size and profusion of bloom. The stems and branches are dark purplish red, which, with the fresh green leaves, set off the clouds of rosy bloom admirably.

20c. each; the 3 for 50c.

HYDRANGEA.

Rare Fuchsias.

These are very fine varieties of recent introduction.

Trailing Queen—Good plants for hanging pots are rare—as rare as they are beautiful. This new Fuchsia never grows erect, but always trails down over side of the pot, and is the most beautiful of all plants for suspension. Luxuriant without being weedy, procumbent without being sprawling, clothed with handsome foliage, and loaded with hundreds of gracefully drooping flowers, nothing more could be asked for as a basket plant. A well grown plant of this Fuchsia is a weeping fountain of waxen-scarlet and violet-purple bells, and it remains in this condition for months at a time. Very robust and easy to grow, the branches reaching a length of four and five feet, blooming and growing nearly the whole year. The leaves are dark green, ribbed and rayed with red or crimson, which makes them luminous and handsome. Flowers and buds long and graceful, borne in large clusters at the end of the vines. When expanded the flowers are very large in size, tube and sepals bright rosy scarlet, while the corolla at opening is a rich violet-purple, changing the second day to a fine shade of crimson, the two colors in the same cluster contrasting beautifully. A good specimen will show hundreds of flowers at once, and the effect when suspended in a window is truly glorious.

AUTUMN LEAVES.

New Fuchsia—Autumn Leaves.

Now offered for the first time, and is probably the most beautiful foliage plant yet introduced. Plant of a decided weeping habit, with good sized leaves, about half of which (those nearest the ends of the branches) are of various bright colors like autumn leaves. Yellow, orange, bronze, pink, crimson, varied with shades and tints of other colors make up the most curious and beautiful foliage coloring. Flowers crimson and blue, single and borne very profusely. Not a plant in cultivation like this or one with such superb beauty of foliage. For lack of space we were unable to offer this among "Specialties and Novelties." 30c. each; 3 for 75c.

STORM KING

Storm King—The double white, Perpetual Blooming Weeping Fuchsia. Its graceful, weeping habit, and its superlatively beautiful flowers, more freely borne than those of any other sort, makes the most valuable of Fuchsias. It is always in bloom, often as many as 200 buds and blossoms on a plant at once. The branches droop most gracefully, and the blossoms are frequently as large as teacups. The buds, for two weeks before they expand, are balls of glowing scarlet-crimson. When expanded the enormous double flowers are almost pure white, capped by a calyx of glowing scarlet; and when a plant is loaded with buds and blossoms it presents a sight which for true grandeur and beauty no flower can surpass.

Phenomenal—The largest of all Fuchsias, and also very distinct in its rich, dark colorings. Enormous double flowers, sepals scarlet, corolla a bright violet-purple.

Little Beauty—A perfect little gem of a Fuchsia, growing but 6 inches high, and always full of bloom.

Mad. Bruant—Enormous size, very double, corolla fine heliotrope-blue, sepals deep coral-red. New and fine.

Above 5 Fuchsias 20c. each; the 5 for 75c.

Chinese Hibiscus.

Where can we find a more striking plant than this, with its glossy leaves and huge flaming flowers of satin-like texture? Summer or winter, it is always budding and blooming, and, if it becomes too large for the window, can be wintered in the cellar. Pots of Hibiscus are extra fine for piazza or balcony, and for bedding out in summer.

Gigantea—A graceful single-flowered variety, with wide-opened flowers eight and ten inches across, and of the most vivid crimson-scarlet. Indescribably rich and striking as a flaming torch; sure to please those who like a bright flower and plenty of it.

Cooperi—Crimson flowers, and superb foliage marbled in three colors, white, rose and green. One of the best of all.

Minneatus—As gorgeous and fine as the best Pæony, and fully as large. Bush blooms when but a foot high. Blossoms a burning crimson, very double.

Chrysantha—This is said to be a cross between an Abutilon and a Hibiscus; certainly it seems to show characteristics of both. It blooms as perpetually as the Abutilon, but with large flowers, like the Hibiscus, five and six inches in diameter. Flowers flat and saucer-like, of a clear, bright canary yellow, with black eye or center.

Price, 20c. each; the 4 for 60.

The Dwarf Justicia.

This new Dwarf Justicia is really a much finer plant than our engraving suggests. Everyone knows the tall, lanky, straggling habit of the old Justicia Rosea. This new sort, which is now grown so extensively by Parisian florists, begins to bloom when the plant has only three or four leaves, and is never out of flower afterward. If pinched back occasionally, it makes a very dwarf, stocky plant, frequently covered with 20 to 30 large pink flower-heads, lasting a long time. The foliage is also more persistent and highly ornamental being heavy in texture and very velvety. It's the plant for everybody to grow in quantity. It was lately shown at the National Horticultural Society's exhibition at Paris, and, at Ghent, a plant with 20 flowers spikes received well-merited awards. 20c. each; 3 for 50c.

New Yellow Justicia.

A taller grower than the above, but with equally handsome clusters of bloom which are of an orange-yellow color. In all respects a plant of merit which is sure to become popular. There is no finer flowering plant for bedding than the Justicia, especially the new dwarf variety. 25c. each.

New Dwarf Magnolia.

Next to the Otahete Orange, this new dwarf Magnolia, for pot culture, is the most desirable plant of its class. It is of a shrubby nature, like the Orange, its leaves being evergreen and very ornamental, much more so than the Orange, but when loaded with large, yellowish flowers, of such superb fragrance, it is a plant which for novelty and genuine beauty is not surpassed. Its color is fine, having a rich brownish tinge, and the powerful fragrance of the blossoms is like rich, ripe bananas. For church or parlor decoration this plant has no superior. It is as easily grown in any window as a Geranium the year round, or it may be wintered in the cellar. South of Washington it is hardy. 60c. each.

NEW DWARF JUSTICIA.

Olea Fragrans (Fragrant Olive).

This is the sweetest flower that blooms, belongs to the Olive family and is a perpetual bloomer, never without flowers, either summer or winter, though the plant may not be a foot in height. The flowers are small, creamy white and borne in immense clusters. Each individual blossom, though no larger than the head of a shawl-pin, has more sweetness than the largest and most fragrant Lily. Its fragrance is also delicate and charming, really the finest of all flowers, and you cannot pass a plant without noticing it. It succeeds well in any window. 30c. each; 3 for 70c.

Lemon Verbena.

An old but always popular plant, prized for its fragrant foliage. Sprays of its leaves are always fine to use with flowers in bouquets. Very easily grown and can be wintered in cellar if need be. 15c. each; 3 for 30c.

Cape Jessamine or Gardenia.

A lovely pot shrub producing an abundance of large, double, white, wax-like blossoms of great beauty and renowned fragrance. Nothing else like it, and for delicate beauty and fragrance it is unrivaled. 20c. each; 3 for 50c.

Russelia—Juncea.

This plant has long, wiry, graceful stems which grow in graceful drooping masses, flowing like hair. On these bare stems are borne quantities of long, tubular flowers of the most vivid scarlet. It is a novel, and beautiful plant, suitable either for beds in summer or pot culture. In pots it blooms the entire year, especially during the winter and early spring months. The great drooping masses of bloom are like a fountain of coral, scarlet and green. It is a valuable addition to our list of best plants. Price, 20c. each; 3 for 50c.

Oleander.

What home is complete without its tub of Oleander? A very tractable plant that can be grown in almost any soil or situation, kept growing all the year, or rested in the cellar. Its dark green willow-like foliage is in itself neat and pleasing; but when in bloom it is beautiful beyond expression, with its many large, delicate satin-like flowers. **Pink**—Large blossoms of fine rosy pink. Very double. **White**—Magnificent large snow-white double blossoms. **Crimson**—Fine deep crimson-red. Extra. **Yellow**—Large and very beautiful. **Variegata**—Leaves bordered with creamy white; flowers pink, very double. A magnificent plant, the contrast of foliage and delicate color of blossoms being very striking.

Price, 35c. each; the five for \$1.25.

RUSSELLIA JUNCEA

COPYRIGHTED 1895 BY J.L. CHILDS

COPYRIGHTED BY J.L. CHILDS 1893

Pleroma Splendens.

At present this is a rare flower. Not only is it a free grower and blooms the year round, but it is another addition to the very small list of purple-blue flowers, always an uncommon color, but a striking one, and one that imparts a look of richness to a general collection. Flowers very large—three inches across—opening flat, the velvety petals showing to great advantage, and reminding one of the regal beauty of Clematis Jackmanni. Plants commence to bloom when only a few inches high, and continue all the time. 20c. each; 3 for 50c.

MANETTIA VINE.

Manettia Vine.

A poor vine is little but an eyesore; but a thrifty Manettia is lovely beyond question. It can be grown either in the house or garden, and is in full bloom every day in the year. In the house it can be trained all around a window, and it will be a solid wreath of bloom, both summer and winter; in the open ground, during summer, it will grow ten feet, branching freely and covering a large space of trellis, arbor or wall, showing at all times thousands of bright blossoms. The flowers are 1½ to 2 inches long, and of the most intense fiery scarlet, shading off to a bright yellow tip. They are also covered with a scarlet moss or hairy substance, which adds much to their beauty, and each flower keeps perfect for weeks before falling. No plant is easier to grow, and it commences to bloom most profusely at all times. There is not a day during its life that it is without flowers, if it has any sort of decent care. 15c. each, 3 for 35c.

COPYRIGHTED BY J.L. CHILDS. 1893.

Nepeta Glechoma.

This new Nepeta is hardy, fragrant and pretty, its small, round leaves finely marked with white. Very fine for hanging baskets, standing any abuse and looking cheerful under it. One of the prettiest things in the world with which to carpet graves, as it roots wherever it touches the ground and forms an impenetrable net-work of vines, through which weeds and grass cannot creep. It will grow in any kind of soil, in sun or shade, hot or cold location, and is ever a mass of green and white, refreshing to the eye. Unsurpassed for vases, hanging pots or baskets. 15c. each; 3 for 30c.

COPYRIGHTED BY J.L. CHILDS

Double Petunia

A grand flower for pots, garden vases, or for summer bedding. Their splendid, large double flowers are fine in any situation and very freely produced. The two following sorts are the best. 20c. each; the two for 30c.

- Lucy Longstreet**—Fine crimson, fringed and variegated with white; large and double and splendidly frimbriated.
- Snowdrift**—Large, double, frimbriated flower of purest snowy whiteness. Extra good.
- Double Mixed**—12 fine colors, 15c. each; 3 for 30c.; 12 for \$1.00.

Filifera Palm.

One of the best window Palms, needing no petting to succeed. Stands dust and dry air, and lack of sunshine, and is very ornamental with its elegant fan-shaped leaves, of a rich, dark, leathery green, picturesquely fringed with long, thread-like filaments along the segments of the leaves. The plant is a compact grower, well-adapted to pot culture, succeeding in any situation, and with any treatment that will keep a Geranium alive. It will make a grand ornament during winter, and in summer it can adorn a veranda, or be placed in any shady place about the garden or yard, or used for a center in a vase, basket or flower bed—always ornamental anywhere. All Plants of the fan-leaved sorts have, when young, leaves of a long, narrow shape, developing the round, fan-shaped ones as they grow older. *Strong plants, 50c. each; 3 for 50c.; 7 for \$1.00. Seed, per paper, 1c.*

Phoenix Palms.

There are several varieties of Phoenix, most of them differing but little from each other. They are sturdy, hardy and robust growers, in time attaining a considerable size; they are always graceful and handsome, with foliage not surpassed. For window culture they are always a success as they readily adapt themselves to any situation. We can recommend them highly. *Fine plants, 25c. each; 3 for 60c.*

Zamia.

We have all heard of the wonderful beauty of the rare Cycus Revoluta, and a good specimen of which is worth \$5 to \$20. Here we have a close relative of little cost, quick growing, and almost, if not quite, as decorative a plant for windows, hallways, etc. The Zamia grows freely, and will thrive, if need be, with no sunlight at all. No Palm is more beautiful than this, with its numerous long fronds of vivid green, and of such majestic beauty that all stop in admiration of it. *30c. each; 4 for \$1.00.*

Cocos Weddelliana.

A perfect little gem; one of the most elegant and graceful little Palms that has ever been introduced. The plant is dwarf and very neat; leaves whitish green on the under side, and arching out most gracefully. It is finely adapted for decorations of all sorts, and easily endures the hardships usually falling to house plants. *40c. each; 3 for \$1.00.*

WATER HYACINTH.

Water Hyacinth.

Each plant is a rosette-like cluster of smooth, round, green leaves, to each of which is attached a singular puffed, bladder-like leaf-stalk that enables the plant to float. Each flower in the spike is the size of a silver dollar. A blending of lilac-rose and azure blue tints, with the upper and slightly hooded petal blotched a deep metallic blue, with golden spot in the center, and sparkling in the sun as though sprinkled with diamond dust. Grows well in open vessels in the window, or in tubs or pools out of doors. Blooms best in full sun. 20c. each; 3 for 50c.; 7 for \$1.00.

Smilax.

The dainty, yet luxuriant masses of the glossy Smilax are as handsome in the window as any other flower, and, as the plant is easy to grow, anyone can possess it. A beautiful climber for the arch of a plant stand, wreathing it in a bower of the loveliest green. The finest foliage we have for bouquets, cut-flower work, etc., as it is so beautiful and spray-like, and lasts for hours without wilting. Flowers white, fleecy, profuse and fragrant. 15c. each; 3 for 30c.

COPYRIGHT, 1899 BY J.L. CHILDS.

STROBILANTHES.

Strobilanthes Dyerianus.

A new house and bedding plant of great beauty. It forms a compact bush 18 inches high, with leaves 6 to 9 inches long, 3 to 4 inches wide, and of the most intense metallic purple color, shading into light rose, with a light green margin, a combination unapproached in any other plant. The flowers are a lovely violet-blue, very beautiful, of a Gloxinia-like appearance. For a bedding plant it has few equals. In an exposed position its foliage colors highly, and is superbly ornamental. 15c. each; 5 for 50c.; 12 for \$1.00.

SWAINSONIA.

Swainsonia, or Swanflower.

It will be hard to name a plant now in cultivation which can equal this in beauty and general good qualities. It has a most beautiful fern-like foliage and blooms perpetually every day in the year, its blossoms being the shape and nearly the size of Sweet Peas, and borne in great clusters of twenty to forty. These clusters appear at the axils of the leaves, and a single branch shows many clusters of bloom at all times. The plant is a free and rapid grower, beginning to bloom in three or four weeks from cuttings, and continuing for years. It is easier to grow and manage than a Geranium, thriving in any soil or in any window, and is a superb bedding plant for the garden in summer. We believe there is no plant so easy to grow, or one that thrives and blooms under all conditions as does this charming plant. **Pure White**—Large milky white; exquisite. **Deep Red**—Fine dark red, with large white blotches. **Pink**—New; bright pink, white center.

Price, 20c. each; 3 for 50c.

Parrot's Feather.

A lovely, mossy plant, with long, trailing stems, covered with plummy, feathery foliage of the freshest loveliest green imaginable. Is fine for aquariums, where few plants do well, and makes the water much more healthful for the fish. Grows nicely also in water tubs or ornamental pools, and is much admired when grown in hanging pots or baskets of soil. It grows as well in soil as in water, if it is kept well watered. It is one of the most charming trailing and drooping plants, and grows so rapidly that it can be cut with the greatest freedom. 15c. each; 3 for 30c.

VIOLET, SWANLEY WHITE.

Sweet Violets.

The flower of sentiment and song, and ever the symbol of modest worth. Its delicious fragrance alone makes it friends everywhere, but this is only one of many merits. In the inclement weather of early spring and late autumn, the Violet greets us with its pretty, sturdy, fragrant blooms that have no fear of frosts or sleets, but bloom in sweetness to the very verge of winter. If given protection in pit or cold frame, or unheated halls or chambers, these Violets may be had in bloom all winter, but they will stand little fire heat.

Swanley White—In pots it grows luxuriantly and is loaded with flowers. In the garden it is hardy with slight protection, and greets us in early spring with a profusion of its large, snowy, sweet-scented blossoms. The growth of the plant is vigorous and healthy, bearing in great numbers very large, perfectly double flowers of pure snowy whiteness and unexcelled fragrance. A plant will often have fifty flowers open at once.

Imperial—The finest blue Violet. Flowers extra large and sweet, borne in great profusion.

Alaska—A grand new sort, well adapted to garden culture, being hardy and robust and producing in spring great masses of enormous double flowers of a deep blue-black color and powerful fragrance.

La France—A new single Violet of great size, beauty, and fragrance. Flowers single, borne on long graceful stems, and unsurpassed for color and fragrance.

Belle de Brunneau—The most magnificent double Violet ever introduced. Large flowers, long stems, deepest, richest violet color, and unsurpassed fragrance.

15¢ each; the 5 for 50¢; \$1.00 per doz.

Sanseveria Zealanica.

There is scarcely a decorative plant listed that is more striking in foliage and habit than this, and certainly none other that will stand as much downright neglect and hardship. Nothing but frost or a continual drenching with water has terrors for it. It will grow in a dark hall, a cool bedroom, or stand on the mantel in a heated sitting-room. It will stand gas and dust, and will go for months without a drop of water, yet remain as thrifty as ever. Singularly beautiful, as well as easily grown. Erect, rigid, sword-like leaves; in some old specimens reaching a length of from four to six feet. The leaves are thick and fleshy, a dark green color, with clouded bars of white. In May and June it sends up long, plummy flower spikes, which, in their soft, feathery whiteness, remind one of an Agave's flower. The splendid outlines of this plant, together with its distinctive marbling, makes it a superb plant for jardinières, centers of vases, etc. It will also grow splendidly out of doors in summer. Just the plant for sunless windows or halls, where nothing else will grow. It is new and little known to cultivation, but a plant which all will delight to possess. 20¢ each; 3 for 50¢.

Stapelia Variegata.

Not strictly a Cactus, but resembles one in habit and appearance. Thick, succulent stems and star-shaped, spotted maroon, brown and yellow blossoms, very odd and striking. Flowers throughout the year. The flowers are thick and leathery, resembling the skin of a reptile. It is exceedingly attractive. 15¢.

CHOICE AND RARE FRUITS.

The Fruit Garden is an indispensable part of any rural home. It is a delight, a satisfaction, a convenience, a profit, and a source of the most healthful and delicious food supply any family can have. Beginning with the Strawberry in May, the supply is never exhausted until the last winter Apples have gone. Junberries, Cherries, Raspberries, Wineberries, Currants, Blackberries, Plums, Peaches, Pears, Grapes, etc., follow successively. They save expense, are luscious and convenient, and any place well stocked with fruits always finds a ready sale at a good price; they enhance its value often many times in excess of its cost.

No. 150.

STATE OF NEW YORK,
Department of Agriculture.

Certificate of Inspection of
Nursery Stock.

This is to certify that the stock in the nursery of John Lewis Childs, of Floral Park, County of Nassau, State of New York, was duly examined in compliance with the provisions of Chapter 432 of the Laws of 1898, and it was found to be apparently free in all respects from any contagious or infectious plant disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests.

Dated August 4, 1900. Albany, N. Y.

C. A. WIETING,
Commissioner of Agriculture

We have for years made a specialty of Choice Fruit Novelties, and have introduced nearly all the leading sorts for ten years past. The variety here offered are all of recent introduction, and each and every one possesses great merit. The trees here offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received before they can be planted, they may be safely kept for any length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruit early, that they may be planted out before the foliage starts.

At prices named, we send strong, robust young stock by mail, postpaid; but by express we can send much larger trees, especially Peaches, Apples, Plums, etc. Strawberries, Raspberries, Dewberries, Grapes, etc., are of course as well sent by mail as by express, as far as size is concerned. Our fruit stock is all vigorous and healthy, and whether you have it sent by mail or express, it will be sure to please you by its rapid and vigorous growth and early bearing.

Choice Strawberries.

Of all fruits known to cultivation, the Strawberry is conceded to be the most luscious, and is a universal favorite; yet it is not grown by one-half the people who might grow it just as well as not. It is but a few hours' work to plant a Strawberry bed and care for it during the year, and no work can possibly yield a better return. Strawberries bought in the market are not to be compared with the luscious ruby beauties, fresh and ripe, from the vines. The following are the very best varieties in cultivation—the cream of all—including extra early, medium and late sorts:

Great Washington—The real giant among big Strawberries. This improved new sort originated in the State of Washington. Samples which we received in February were potted, and bore fine fruit in April. Several hundred plants planted out in April fruited fairly well, though no fruit was expected the first season. The berry is not only the very largest and handsomest in cultivation, but by all odds the best flavor. It is also a great cropper and vines are extremely healthy and vigorous, a merit not possessed by any other very large sort. What more need be said. It is certainly the grandest Strawberry ever introduced, 60c. per doz.; \$2.00. per 100; \$15.00 per 1,000.

Darling—The originator says: "This is the most productive and earliest of any on my grounds. It is a seedling of Mitchell's Early and has fruited three years." It is certainly a fine berry, medium size. I believe it is the finest early sort. The cluster illustrated was picked in May 1898 from the originator's patch. We have fruited it here and found it to be fully twice as productive as Mitchell's Early, will average larger in size and ripens same time. In health and vigor of plant it is equal to any I ever saw; have never seen any rust on it. Last year it sold at \$20.00 per 100. Strong, healthy, vigorous plants, 60c. per doz.; \$2.00 per 100; \$12.00 per 1,000.

Johnson's Early—From Somerset County, Md. There is but little doubt that this is one of the most valuable early berries ever offered. Mr. L. Shanley Davis, of New York, makes a specialty of handling the finest fruits and berries grown, and he says that Johnson's Early is the finest early berry he has had in the store. It is a seedling of Hoffman and Crescent. In size this berry is much larger than Hoffman, deep red in color, glossy, firm, sweet and of excellent flavor. The plant resembles Hoffman. It makes runners freely. In point of yield it is as productive as Crescent. It ripens with Mitchell's Early in point of time. Soon after blossom the stem curves and the fruit turns down, thus getting the protection of the cap. The plant is perfectly healthy and is believed to be absolutely rust proof. 60c. per doz.; \$2.00 per 100; \$12.00 per 1,000.

Echo—The great table berry. It has the highest and richest flavor of all Strawberries. A very productive variety. Mid-season. Fruit large. Every fruit grower should have it in his garden. When you have fruited it you will never do without it. While we have grown and fruited it only one year it appears to us to be the **FINEST BERRY YET INTRODUCED**. It certainly has no equal in rich sweet flavor, at the same time being very large and handsome. 75c. per doz.; \$2.50 per 100.

Gibson—A berry that will excel all mid-season berries that have been introduced. It originated at Marlboro on the Hudson, the oldest fruit growing section in this country, and the fact that the originators sold nearly 100,000 plants, within a radius of ten miles, in the spring of 1899, at a price of \$15 per 1,000 is a good testimonial of its merit. It has never been grown for market by any one except originator. It has all of the qualities of a money maker.—1st, it has a perfect blossom, 2nd, it is a good, strong grower. 3rd, it is very productive of large, round, firm, uniform and good colored fruit, 4th, its shipping quality is its greatest merit, as is shown by following sales from originator's book: In the spring of 1899 we experienced in this locality the most severe drought known to the oldest inhabitants, but notwithstanding this the Gibson produced a fair crop and for the season the average price for the Gibson was over 13c. per qt., an average greater than the highest price for any other variety. 60c. per doz.; \$2.00 per 100; \$12.00 per 1,000.

NEW YORK.

New York—This is the big fellow that won the \$100 gold prize last year over the *Glen Mary*. After fruiting the berry another year we find it still in the lead for large size, productiveness and health and vigor of plant. Miss Martha G. Yates of Tompkins county, N. Y., an ex school teacher who prefers fruit growing to teaching, was the lucky winner of the \$100 in gold. The following is her description of the berry: "The strawberry plants I sent you to compete with Glen Mary were seedlings of a large Bubach No. 5 Strawberry, circumference $7\frac{1}{4}$ inches, fertilized with Jessie. We always call these "*The Big Berry*." Everyone who sees them is astonished at their size and productiveness. We always sell of these berries at a fancy price to people who board here during the summer." As fruited here the berries are large to very large, season of ripening medium; color dark scarlet, changing to crimson when fully ripe; colors all over at once, no green sides or green tips. When the berry commences to ripen on one side you will find it in the same stage of ripening all over. The quality is good. In growth of plant it is very large and stalky, equaling in this respect the very largest ever grown and for health and vigor of plant we have yet to see one that would surpass it, though we have grown hundreds of varieties. 60c. per doz.; \$2.00 per 100; \$15.00 per 1,000.

Mineola—For a general all-round Strawberry, we believe this to be the finest variety in cultivation. It originated on Long Island and has been cultivated here for ten or a dozen years by a few growers, and was first introduced into general cultivation by us. The fruit is of very large size and exceedingly sweet and luscious in quality, in this respect surpassing any other variety. It is a most vigorous grower, its foliage being of great size and wonderfully healthy and luxuriant. The fruit is borne on tall stems, which hold them well up from the sand and dirt below. The berries are perfect in shape, beautiful in color, enormous in size and exceedingly prolific, succeeding well on all soils. Either as a market, home or exhibition berry it is par excellence. Fine plants, 40c. per dozen; \$1.50 per 100; \$10.00 per 1,000.

Crim's Double Cropper—A new sort, which was originated in New Jersey by a Mr. Crims. The introducer says of it. "In the spring of 1896 I planted $2\frac{1}{4}$ acres of the Double Cropper and in June, 1897, gathered and marketed several hundred bushels of fruit, and in the following September I gathered and marketed in New York over 100 bushels more of fine large berries, which sold for prices ranging from 50c. to 75c. per quart." This statement, being verified, is sufficient to make the Double Cropper at once an acknowledged acquisition. With us it is a most healthy and vigorous grower, with fine dark rich foliage. Our plants are from the originator and are therefore genuine. 40c. per dozen; \$1.50 per 100; \$10.00 per 1,000.

SPECIAL OFFER—6 plants each of all 8 fine Strawberries for \$2.00, 12 plants each for \$3.50, or 100 plants each for \$10.00.

BALLOONBERRY.

The Balloon Berry.

Plant grows 10 to 15 feet high, and, like the Wineberry, the canes are covered with silky red hairs. Fruit ripens all summer, and is very large, shaped somewhat like a strawberry, or more like a balloon, from which its name is derived. Color of fruit, clear yellow, tinged red; as large and as handsome as the Tree Strawberry. Luther Burlank, who has grown this berry for several years, and from whom we purchased the entire stock, says of it: "It came to me from my collector in Japan, who found it back in the interior. It is a large-growing, vigorous, hardy plant, somewhat inclined to trail. Grows 10 to 15 feet long, and an inch or more in diameter at the base in good soil. Leaves very handsome, compound, lanceolate. Fruit, which is ripening nearly all summer, is clear yellow, shaded red, inflated so as to resemble a balloon. Cultivation will make it as delicious as it is ornamental. A most unique, highly ornamental and valuable berry, unlike anything else. Fruits finely here, even up to November. Fine plants, 20c. each; 3 for 50c.; 7 for \$1.00. Seeds, 10c. per pkt. It grows very quickly and rapidly from seed.

Tree Strawberry, OR STRAWBERRY-RASPBERRY.

This is one of the most unique and at the same time the largest and most beautiful berry of any kind that has yet appeared before the public. It comes to us from Japan and is of the Raspberry family, though in many respects it resembles a Strawberry, growing on a bush two feet high. The plant is entirely hardy in any location, and a most profuse yielder, ripening an enormous crop of fruit in July and August, and more or less all the time up to November. In quality the fruit it called good, though not so finely flavored as either the Strawberry or Raspberry, but quite as good as most Blackberries. It is very fine when cooked, and makes a jelly which has a unique flavor, and is superior to the jelly of any other fruit. In habit of growth the plant is distinct from both the fruits named. The root is perennial, throwing up numerous, strong, branching shoots, which are covered with its large, beautiful berries the whole summer, from early in July until freezing weather, rendering it a perpetual bearer. The canes or shoots die to the earth in winter, new ones being thrown up the following spring, which begin blooming and setting fruit at once. The foliage is light green in color, bright, clean, cheerful and pleasing, and exempt from attacks of all insects and diseases. The berries are globular, slightly oblong in form, monstrous in size, a rich, glossy, ruby-red color, sweet and melting. 15c. each; 5 for 50c.; 12 for \$1.00; 30 for \$2.00. Seed, 10c. per pkt.

RASPBERRY
"COLUMBIA."

Raspberries.

The following list is the very best sorts known.

Columbian—A Raspberry of gigantic size, the canes growing to the height of 10 to 16 feet, strong and woody. Very hardy and vigorous. Fruit large, dark red, with small seeds. A Cap variety, never suckers and is increased by tips.

Cuthbert—A very large, red variety, of superb quality. It is an enormous yielder, and grows freely in any situation. It will adapt itself to any wild or out of the way place and make a splendid wild berry, if one has not the time to give it culture.

GOLDEN QUEEN.

Golden Queen—This is a sport from the Cuthbert, and is exactly like that excellent berry in all respects, except that its color, when ripe, is a fine, rich golden yellow. It is of high quality.

Kansas—The King of all Black Cap berries. Medium early, large size, grows with a vigor and activity, excellent quality and perfect hardiness, make it superior to any other variety.

Childs' Allsummer—An everbearer, commencing to ripen its large berries in July and continues until killed by autumn frosts. The plants are strong and vigorous, growing three to five feet in height, standing erect without stakes or other support. Foliage very large and rank, dark green above and silvery white underneath. In hardness nothing can surpass it, as it has never been injured in the severest climate. It is immensely prolific, the berries being of great size and dark red in color; quality extra fine. Mrs. Stowe, of Montana, says: "I was fruited for five years and borne a full crop each year, no matter how hot the weather. Our plot is 45 feet in length by 15 feet in width, besides a single row 115 feet long. From this plot and the row we picked last year fully 11 bushels of berries. For five years the yield has been very uniform. In 1889, the yield during July was 244 boxes; August, 175 boxes; September, 27 boxes, an abundance of green fruit being killed by frost September 25th. In many sections, where the season is long enough, its October crop is the largest." To see it at its very best it must have a moist soil or plenty of water.

COPYRIGHT 1887 BY J.L. CHILDS.

GOLDEN CLIMBER.

Southern Everbearing White—An extra large berry of a beautiful light amber, almost pure white, color. Plant has the same general habit as Childs' Allsummer, but it is better for dry soils. Perfectly hardy, vigorous and a great cropper, both summer and fall. The fruit is of extra fine quality. In fact, we think it is the finest flavored of all Raspberries, therefore most desirable for the home garden. Its beautiful color, contrasting with red or black varieties, makes a very appetizing dish when served together. In many respects this is the very finest Raspberry in cultivation.

Golden Climber—A climbing Raspberry is a novelty of more than ordinary importance, and one that is sure to delight all who appreciate the unique and valuable in horticulture. This berry has grown and fruited with us for two years, and we can offer it with our strongest recommendation. Planted in a good, rich soil, near a building or trellis, it will grow 10 to 15 feet in a season, and the strong young branches may be fastened up to a trellis or building as one would secure a grape vine. Its fruit ripens very early (one of the very first of all Raspberries), and is produced in very large clusters, is of good size and fine quality, and deep golden yellow in color. Foliage large, vigorous and healthy, and is a berry of the most thorough and hardiness. It being such a rank grower and producing such an enormous amount of wood, makes it immensely productive. It will probably yield twice as much fruit as any other sort. It is ornamental as well as useful, and, taken all in all, our customers will find it exceedingly valuable, and capable of being put to many good uses.

Price of all Raspberries 7c, each; 5 for 30c.; \$1.00 per doz.; \$5.00 per 100. One each of the 7 sorts for 65c.; 3 each for \$1.50.

CHILD'S EVERBEARING TREE BLACKBERRY

Childs' Everbearing Tree Blackberry.

For a Blackberry it is the largest, finest flavored, most prolific, fruiting for two months and requires no stakes. It grows from five to seven feet high, branching freely into a fine tree form, as seen in the cut, straight and croet. The berries are of enormous size, equalled only by the Erie, borne in large clusters, which commence to ripen early in July and continue into September, making its fruiting period nearly two months or more. The finest Blackberries we ever ate we picked about September first from some of these plants which had been ripening fruit since July 8th. They are exceedingly sweet, juicy and delicious, melting in the mouth without a particle of hard core. Its delicate flavor, great productiveness, enormous size, long season of bearing, and perfect hardiness in the coldest parts of the country, make it the most valuable of all berries for family use. Some of our customers who bought it last year report that the plants fruited last summer, and berries proved to be the largest and finest ever seen, and that the symmetrical branching of the plants makes them perfect little trees.

Price, first quality, 20c. each; 3 for 50c.; 12 for \$1.50.

Two Fine Blackberries.

Price, 3 for 25c.; 12 for 75c.; 100 for \$2.50.

Erie—It is in every sense a superb Blackberry, being enormously prolific, hardy, the fruit large in size, perfect in shape, sweet and luscious in quality. Is soft and melting to the taste, being ripe and sugary to the very core.

Early Harvest—The earliest Blackberry grown and in every way a grand good sort. Often grows eight feet high, and a perfect mass of fruit from top to bottom.

SPECIAL OFFER.

2 each of the 5 Blackberries here offered for 60c.; 3 each for \$1.70.

COPYRIGHT, 1895 BY J.L. CHILDS.

RATHBUN BLACKBERRY.

New Blackberry Rathbun.

Surpassing any other variety. Two common quart boxes, one of the Rathbun and one of the Snyder variety, were picked and counted. The basket of Rathbun was filled by 45 berries, while it required 164 berries of the Snyder to fill the quart. One of the Rathbun berries was, at the same time, measured and found to be 1 3/4 inches long and 1 1/2 inches in diameter. A large proportion of the berries will measure from 1 1/4 to 1 1/2 inches in length, and the whole crop is very uniform. The fruit of the Rathbun, unlike most Blackberries, has no hard core, in fact, no core is perceived in eating it. All is soft, sweet and luscious, with a high flavor. It is superior to all the well known varieties in cultivation in this quality. On this point it may be said that there is nothing more to be desired, and it is not probable that there will ever be a variety to surpass it in this particular. The Rathbun was severely tested for hardiness during the winter of 1895-96, when for several days the temperature was 20 degrees below zero, but did not kill the vines. The plant is a strong, erect grower, and, unlike most varieties, it produces but few suckers. It sends up a strong main stem which branches freely. These branches curve over and bend downward till the tips touch the ground. Then late in the season they send out roots from the tips of the branches and thus propagate themselves in the manner of a Black Cap Raspberry. 25c. each; 5 for \$1.00; 12 for \$2.00.

Iceberg Blackberry.

It bears loads of delicious, snowy berries, which are not only white, but so transparent that the seeds, which are, unusually small, may be seen in the ripe berries. "Clusters larger than those of Lawton; berries at least as large, earlier, sweeter, and more tender and melting throughout, though as firm as Lawton is, when ripe." No garden should be without this grand White Blackberry. Strong plants, 20c. each; 3 for 50c.; 7 for \$1.00; 15 for \$2.00.

"ICEBERG" BLACKBERRY.

PRIMUS HYBRID BERRY

The Wonderful New Hybrid Berries.

Hybrids between the Raspberry and Blackberry. Creating a New and Entirely Distinct Fruit of Great Value.

These are hybrids between the Raspberry and Blackberry, produced by Luther Burbank, the well-known horticultural expert. We have owned the entire stock of these two great berries for five years, and have thoroughly tested them. Primus was first offered three years ago and has given great satisfaction. Phenomenal was offered last year for the first time. Both are hardy, vigorous, enormously productive, and berries of wonderful size—perfect giants—while in quality they are preeminently fine as to leave nothing to be desired.

Primus—This is one of Mr. Burbank's greatest productions, and he says of it: "This was my first success with Blackberry-Raspberry Hybrids, and it has been fully tested for several seasons. It is one of the most productive berries known, and is larger and more regular in shape than any other berry. Its flavor is unique; nothing like it has before appeared. All pronounce it superior when cooked, and eaten raw it is claimed to be the best berry ever tasted. This berry is really enormous in size of fruit and vigor of growth. Its flavor is like that of a Raspberry and Blackberry combined; fruit long and handsome, of a Mulberry-black color. Its season of fruiting is earlier than either the Raspberry or Blackberry, following close upon the Strawberry, often before Standard Blackberries commence to bloom. Bushes incline to a trailing habit, and are best trained upon wire, like Grape vines. It is somewhat of a perpetual bearer, showing more or less fruit all summer. In a greenhouse it is a great thing, for it will fruit splendidly all winter and prove exceedingly profitable. It is as hardy as an Oak in any climate, and a sure cropper every year.

Phenomenal—Of this Mr. Burbank says: "This is larger than the largest berry ever before known. It has a bright crimson Raspberry color, is as productive as could be desired, and the most delicious of all berries for canning and drying. The berries grow in clusters of 5 to 10 or more, and the individual berries measure 3 inches around one way, by 1/2 inches the other way, and weigh one-quarter ounce each; even larger ones were weighed and measured last season, and when exhibited provoked the question, "Will they be sold by the dozen?" We have found this berry to be all that is claimed for it—phenomenal in every particular. Its beautiful bright color contrasts charmingly with the glossy black of Primus. An expert pronounces this "the greatest wonder of all." It tastes and looks like both the Raspberry and Blackberry. We are offering this splendid berry this season at a very low rate. It is one of the most remarkable of all new fruits seen during this generation. A berry of sterling worth in every particular. It is twice as large and in every way superior to the new Logan berry which is being so highly praised.

Price, 25c.; 1 of each for 10c.; 3 of each for \$1.00, or \$2.00 per dozen.

Dewberry, Lucretia.

It is a climbing Blackberry, the vine growing very large and may be allowed to trail over the ground, or may be trained up to trellises, like Grapes. It is a sure annual bearer, the berries being larger, sweeter and superior in every way to Blackberries. The fruit is borne in great quantities, and is of a soft pulpy nature, sugary and delicate, and seems to melt in one's mouth like ice-cream. The berries are very large, often more than two inches in length, a glossy sparkling black color. It is perfectly hardy, and does not sucker from the roots, but is increased from the tips like Black Cap Raspberries. When in bloom in the spring it is very ornamental indeed; the flowers appearing in large quantity and are of great size and snowy whiteness.

Price, 15c.; each; 5 for 50c.; 15 for \$1.00.

DEWBERRY

CHILD'S JAPANESE WINEBERRY

Child's' Great Japanese Wineberry.

The most wonderful and valuable of Japanese fruits. It belongs to the Raspberry family, is a strong, vigorous grower, attaining the height of 4 to 6 feet, and is perfectly hardy in all positions without protection. It is, in fact, more hardy and vigorous than any Raspberry or Blackberry. It stands alike the cold of northern winters and the heat of southern summers without the slightest degree of injury. Its leaves are of the darkest green outside and silvery white underneath. The young shoots and branches are covered with reddish brown hair or moss, which makes the plant odd and handsome.

Fruit—The fruit is borne in large clusters, often 75 to 100 berries in a bunch. These berries are, from the time of formation and bloom until they ripen, enclosed in a "burr," which is formed by the calyx covering them entirely. When ripe, the "burr" opens, exhibiting a large berry of the brightest, light, glossy scarlet, or sherry wine color. The "burs" and stems are covered with a heavy reddish moss like a moss rose bud, giving the plant a most unique and beautiful appearance. The flavor of the fruit is entirely different from any other berry, being very sprightly, sweet and juicy, having no disagreeable sour, but a delicate and luscious flavor peculiar to itself and superior to other berries. The seeds are very small and no more objectionable or noticeable than the seeds in strawberries, which gives this berry another point of great superiority over raspberries or blackberries.

Free from Worms and Bugs—It is absolutely free from all insect ravages. Worms cannot crawl up the stem and branches, owing to the silky moss or hair with which they are covered. Owing also to this or some other reason the plant is shunned by all the destructive tribes of insect pests. It is a pleasure to eat a dish of these berries, knowing that there are no worms or bugs mixed with them.

For Table. As a table fruit there is nothing finer than the Wineberry. Its delicious, sprightly flavor is most toothsome and refreshing, served with sugar.

For Canning and Preserving. For canning and preserving, the Wineberry is greatly superior to any other fruit. It is the only fruit which will retain its fresh, sprightly flavor after being cooked, and for cooking in any form there is nothing which can compare with it. It also makes the most delicious jelly.

For Syrup and Wine. The Wineberry makes a syrup which, for flavoring, is superior to all other fruit juices. As a flavor for soda water it is delicious and novel. It will make more wine from the same bulk than any other fruit, and good judges have pronounced it the most delicious wine ever tasted. For invalids, and in cases of sickness, it is superior to any other wine or tonic, creating strength and a relish for foods where all else fails. We predict that it will soon become the leading wine producing fruit, especially medicinal wines of high quality.

Time of Ripening and Productiveness. The fruit commences to ripen early in July and continues in bearing for a long time. It is the most prolific berry known, the bushes being literally covered with its large clusters of luscious fruit which are very easily gathered. Owing to their novelty, superb flavor and great beauty they sell more readily and at far better prices than any other berry. It is propagated from the tips like Cap Raspberries and Dewberries.

Price. First-class, vigorous plants, by mail, postpaid—15c. each; 5 for 50c.; 12 for \$1.00; 30 for \$2.00; 50 for \$3.00; 100 for \$5.00; 1,000 for \$40.00.

We can also supply 2-year-old plants from open ground at 25c. each; 3 for 60c.; 7 for \$1.00.

Seed. The Wineberry grows freely from seed, and produces strong, vigorous plants, which fruit abundantly the second year. You can get a fine lot of plants very cheaply in this way. Seed will germinate best if it can be allowed to freeze after sowing. Or it may be soaked well in warm water before sowing. Fresh seed, per pkt., 10c.; 3 pkts for 25c.

New Giant Currants.

These two Currants are novelties of great importance. When you consider the enormous size and beauty of the fruit, great productiveness, hardiness and vigor of the bushes (out-yielding other varieties almost two to one), we may be pardoned if we feel a little pride in being the introducers of them. Empire is deep ruby-red; Purity, pure white—the two contrasting magnificently when seen together. In size the fruit is often 2 1/4 inches in circumference, and borne in clusters four inches long, while bushes two years from the cuttings yield six to ten quarts each. The fruit being so very large and excellent, sells readily at almost double the price realized for other sorts. It seems hardly necessary to say anything more about them. Their great value will be apparent. Another valuable point about these new Currants is their lateness in ripening. They ripen somewhat later than other varieties, therefore escaping the great glut and low prices which Currants bring in the height of the fruiting season. Empire and Purity, coming in later and being so much finer in size and appearance, virtually have the field.

Empire—New giant red.
Purity—New giant white.

Childs' Giant Ruby—One of the finest of all Currants. It is of remarkable strong growth, and in the size and quality of the fruit it is really a marvel. The berries are very large, borne in enormous clusters of twenty to thirty, yet leaving room near the wood to make picking easily done without bruising or crushing the berries. In color they are the most beautiful, ruby-scarlet, sparkling and glossy, and, being so large in size, they catch every eye, and sell more readily and for much better prices than any other variety. It is now being largely planted where Fay's and other sorts have been pulled out, for it is a greater and surer bearer than any other. In this variety it bears fruit three times as much fruit as Fay's or Cherry, and the fruit is certainly much finer in every respect. Mr. N. Hallock says: "I have grown the Giant Ruby Currant for four years. Bushes three years set yielded the past season five pounds of fine fruit, where Fay's Prolific, in the same lot, has been an entire failure. Of the seven or eight kinds I grow, Giant Ruby yields double the quantity of fruit of any of them."

PRICE—1 each; \$1.50 per dozen. One each of the 3 sorts for 50c.; 3 each for \$1.25; 12 each for \$4.00.

Grandall Tree Currant.

We were the first to call general attention to this most excellent fruit, and for the last six years it has had with us a tremendous sale, and as far as we have heard has in every instance proved greatly satisfactory. It is a strong and rapid grower, attaining a height of seven to nine feet and branching freely into a fine, symmetrical tree form; single shoots often grow four to five feet in one season. It bears every year a tremendous crop of large, black fruit, nearly the size of a grape, the quality of which is entirely unlike that of any other black Currant, as it has none of the odor or disagreeable flavor common to black sorts. Its quality is very fine indeed, and is not excelled for cooking in any form, either for pies, jelly, jam or sauce. Its flavor is that of the Sweet Currant, combined with the acid of the Cherry Currant. It is almost sure to commence bearing the first year, and certainly will yield a big crop the second year. The fruit begins to ripen the middle of July and continues to the middle of August, the large berries being borne in clusters of four to twelve, and cling to the tree a long time after they are ripe, and it is, in fact, entirely exempt from all insect ravages, either in foliage or fruit. It is of ironclad hardiness and will stand the most severe climate without a particle of injury in any respect.

New Dwarf Juneberry.

The berries are the size of ordinary cherries, being green in an unripe state, changing to bright scarlet, and when fully ripe to a dark purple-blue; and as the three colors hang in clusters upon a bush they present a most charming and appetizing sight. It is exceedingly sweet and has a peculiarly rich and luscious flavor; a most charming fruit to eat from the hand. It is also one of the most showy flowering shrubs, as it blooms very early in the spring, and every branch is a solid wreath of delicate feathery whiteness, so numerous are the flowers. Price, 20c. each; 3 for 50c.; 7 for \$1.00.

Gooseberries.

This is a berry which in England holds first place, and is more extensively grown than any other small fruit, excepting only the Strawberry. It is not grown in this country to the extent it ought to be, mainly owing, we judge, to the poor quality of the varieties in general cultivation. The following varieties are greatly superior to others:

Josslyn—A pure American variety, first tested some 10 years ago and now established as the most healthy and vigorous Gooseberry in cultivation. It is a most prolific bearer and the berries are very large and handsome, being when ripe a deep red color. It absolutely will not mildew.

Industry—A Gooseberry of strong, vigorous growth, freedom from mildew or other diseases, and large, handsome fruit of delicious quality. The berries are dark cherry in color and when ripe are rich and sugary.

Keepsake—Very large, light green, and of the richest quality. Considered to be the finest new Gooseberry in many years. Strong grower and an immense cropper, like Industry, but one or two weeks earlier.

25c each; 1 each of the 3 for 50c.; 3 each for \$1.50, or \$2.00 per doz

JUNE BERRY.

CAMPBELL'S
EARLY.

LUCILE.

NECTAR.

New Grapes.

Everyone who has a bare fence, wall or out-building, or a few feet of vacant ground, can plant a few Grape vines and reap an annual harvest of luscious fruit. Owners of country places, or even of city lots, need never be without an abundant supply of Grapes in season. There is no fruit that yields a more prompt or generous return. Everybody can grow it, and everybody should have it in abundance. The following sorts are the very cream of the hundreds of varieties which are before the public; they are mostly varieties of recent introduction and of improved quality.

Nectar or Black Delaware—The Nectar has more good qualities for the home garden than any other variety we know of recent introduction. Being so remarkably free from mildew and rot, it is not easily affected by unfavorable climatic conditions. It ripens with Moore's Early and can be left hanging to the vine till frozen without its quality being in the least impaired—in fact improves every day. A good strong grower and large annual cropper. The fruit is black with heavy blue bloom, of a quality the very best, pulp tender and skin tough and will hang a long time after gathering without decaying from the bunch. Berries larger than Delaware, but with the same unsurpassed flavor. N. Grape will give greater satisfaction in all parts of the country.

Campbell's Early—Points of special merit in Campbell's Early Grape are: A very strong, vigorous, hardy vine, with thick, healthy, mildew-resisting foliage, and perfect soil-fertilizing blossoms; always setting its fruit well, and bearing abundantly. Clusters very large, usually shouldered, compact and handsome, without being unduly crowded. Berries large, nearly round, often a inch, or more in diameter; black with light purple bloom; skin thin but very tenacious, bearing handling and shipping admirably. Flavor rich, sweet, slightly vinous; pure with no foxiness, coarseness or unpleasant acidity, from the skin to the center. Flesh rather firm but tender and of equal consistency, parting easily from its few and small seeds. As more than one-third of the people do not and will not swallow grape seeds, we consider this a strong point in favor. Its season is very early; often showing color late in July, and ripening, in Ohio, according to the season, from the fifteenth of August. It has very remarkable keeping qualities. Has hung upon the vines this fall sound and perfect, for six weeks or more after ripening, with no tendency to shell off or fall from the stem. A few

crates were put in a cool cellar Oct. 5th this year and are now (Dec. 20th) apparently as perfect as when stored and looking as though they may keep in equally good condition until next April. As a good keeper and shipper it is believed to be unequalled by any other Grape.

McPike—This mammoth production, which we examined, together with its grand leaf, was originated by H. G. McPike, in Ill. It has been seeking, if possible, to find a better grape from every point than the Concord; one that would be wholly reliable and furnish annually untold tons of superior fruit. He has worked with this object particularly in view. Now it is accomplished, the grape is here. The general character of the Concord is given to its seedling, the "Warden," with its extra hardness, good leaf, increased quality of blue-black fruit and bloom upon the berry. This is the first step forward. The McPike is a seedling of the Warden, and partakes of all the good qualities of these two grapes to a marked degree. Perfectly hardy, with a leaf unprecedented; it is earlier than the Concord, bunches large, even and compact; berries even in size, covered with a beautiful bloom, blue-black in color; ripens uniformly, and has generally the appearance of the Warden. The berries are of mammoth size, being three inches in diameter, and of superb quality, by far the best grape ever seen.

Lucile—The "Lucile" originated on the grounds of J. A. Putnam, a Son of New York, about 1888. It is a purely native variety and a magnificent specimen of the Wyoming leaf, with which it has much in common, as to color, quality and health, hardness and strength of leaf and growth of the vine; but it is twice the size of Wyoming. It yields fruit of the finest quality, in size and quantity. The Lucile ripens early, between Moore's Early and Warden, and has a beautiful English color; large and compact, as Warden, and of nearly the same shape. Its skin is thin but tough, and is therefore a good shipper. It never drops its bunches, as do all, though not equal to the Brighton of Delaware, in quality, yet better than Moore's Early. Its flesh and flavor is very much like that of Wyoming Red. The Lucile is a most vigorous grower and enormous bearer, equal to the Niagara in this respect. But it ripens up all its wood to the tips, under a load of fruit. It has up to now been known to winter-kill, and is probably as hardy as any variety in America. It has never been attacked by the downy mildew or any other disease. The Lucile is exceedingly productive and will, one season with another, yield as many tons to the acre as either the Concord, Warden or Niagara. We recommend it for both amateur and market use. The Lucile is a grand good grape for the extreme North, where early, extra hardy varieties are needed and appreciated.

Price of these 4 grand new Grapes, 30c. each. One of each for \$1.50; 3 of each for \$4.00.

Five Grand Grapes.

These are all of quite recent introduction and are superb in every sense of the word. Among them are black, white and red varieties.

Early Ohio—This is the earliest of all Grapes; originated at Euclid, Ohio, in 1882, being a chance seedling of the Concord. The third year from seed it set thirty clusters of fruit, which were allowed to grow; they ripened August 20th. It has borne large crops every year since, ripening in 1889 the 15th of August, and always as early as the 20th of that month, fully one week to ten days earlier than Moore's Early. It is fully three times as productive as Moore's Early, better in quality, and never drops from the stem, a fact that shippers will fully appreciate. On account of its earliness the fruit is readily sold in the market at 10 to 15 cents per pound at wholesale. Testimonials received from all parts of the country corroborate the foregoing in every detail. The introduction of this variety makes it possible to grow Grapes in any locality where heretofore it has been impossible to ripen them on account of frost.

Moore's Diamond—This is probably the finest of all white Grapes. The vine is hardy and healthy in growth, vigorous, and perfectly free from mildew. Berries large, of a beautiful light straw color—almost white—and of a most delicious quality, having few seeds and a pulp which melts in one's mouth like snow.

Moyer—An extra early Grape, about the size and color of the old Delaware, but with a larger bunch. It is, perhaps, sweeter and more delicious than any other Grape grown; in this respect being superior to the Delaware. It has beautiful red berries, which are very handsome, and the vine is a hardy, robust grower vigorous and productive. Originated in Canada.

Niagara—No Grape has been so largely advertised as this, and none so extensively planted during the first few years, and, we may say, none has proved more profitable. It is the leading white Grape of the day. Berries very large, borne in large bunches. Flavor sweet and delicious, there being but few varieties which can equal it. It is exceedingly productive, and as hardy and robust in any locality as the Concord.

Golden Pocklington—A very sweet and delicious Grape of a beautiful amber color. Hardy, vigorous and productive. A magnificent sort.

Price, 15c. each; \$1.25 per dozen. 1 each of the 5 sorts for 60c. 3 each for \$1.50.

EARLY

OHIO

COPYRIGHT.
1898
BY J. L. CHILDS.

Peaches.

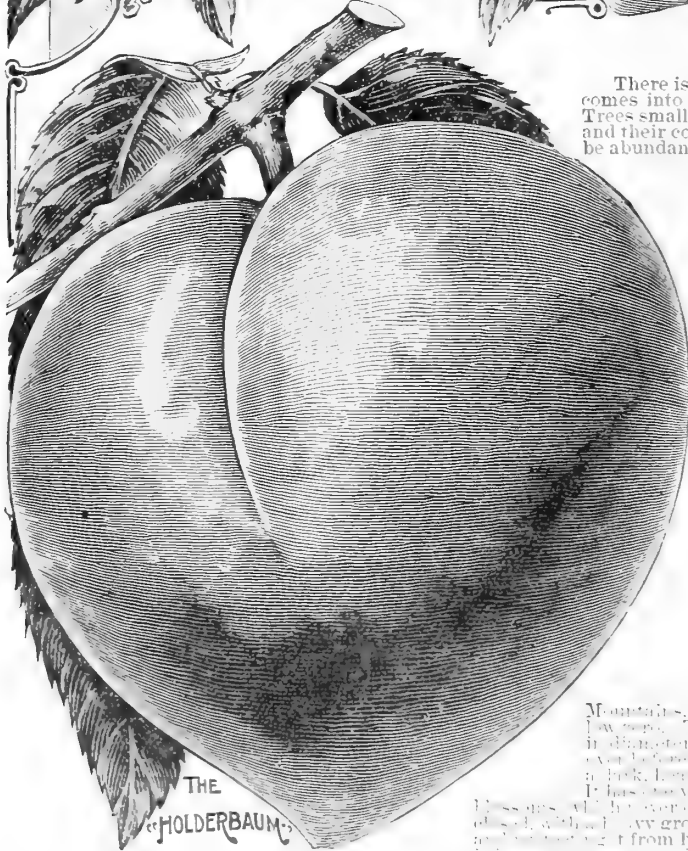

There is no tree which makes a more rapid growth and comes into bearing sooner after planting than the Peach. Trees small enough to go by mail will bear in three years, and their cost is so little that every home in our land should be abundantly supplied with this most valuable fruit.

The Everbearing Peach.

This is one of the most remarkable of Peaches, as it combines many desirable qualities which make it of great value for family use. 1.—Its long-continued bearing period. The first ripening begins about in July, and successive crops are produced until the beginning of November. Fruit in all stages of development—ripe and half-grown—may be seen upon the tree at the same time. Two-year-old trees bear freely. 2.—As the tree blossoms during a long period, a complete failure of fruit has never happened since the original tree first began to bear, ten years ago. 3.—The fruit is creamy white, mottled and striped with light purple and with pink veins; oblong in shape, and tapering to the apex; flesh white, with red veins near the skin; very juicy, vinous and of excellent flavor; quality very best. Freestone, of the Indian type. No praise can do justice to this magnificent novelty. It is really one of the finest things we ever offered. Good size, prolific, best quality and bears continually for three months. What more can be desired? Fine trees for fruiting next year, by mail, 30c. each; 3 for 75c.; 7 for \$1.50.

Holderbaum Peach.

This Champion of all Peaches originated in 1856 in Somerset, Pennsylvania, at one of the highest and coldest points on the Allegheny Mountains, where the mercury of our drops to 25 degrees below zero. The original tree is now at least 100 inches in diameter at the base, with a large surpassing anything ever before seen in the continent. The leaves are of a dark, heavy green, measuring from 8 to 10 inches in length. It has also a wonderfully large and peculiar character of its blossoms, which are open on the tree like those of other varieties, but remain closed, with a heavy growth of moss-like fuzz covering the young Peach and protecting it from heavy spring frosts. The size of the matured fruit is so large that specimens measuring from 12 to 14 inches in circumference are not infrequently seen on the sunny side. In texture it is very firm, of fine quality, and a perfect freestone. The pit is very small and the flesh light yellow, streaked with red from the center, and of most exquisite flavor. It ripens about August 15, thus making it one of the earliest of all freestone varieties. For hardness, vigorous growth and long life, it is certainly the Champion of all Peaches. 25c. each; 5 for \$1.00.

THE
HOLDERBAUM

ference. In color it is of a light cream-yellow, with a beautiful red cheek on the sunny side. In texture it is very firm, of fine quality, and a perfect freestone. The pit is very small and the flesh light yellow, streaked with red from the center, and of most exquisite flavor. It ripens about August 15, thus making it one of the earliest of all freestone varieties. For hardness, vigorous growth and long life, it is certainly the Champion of all Peaches. 25c. each; 5 for \$1.00.

CHAMPION PEACH.

Champion—Fruit very large, often 10 inches in circumference. Flavor most delicious, juicy, sweet and rich, surpassing most other varieties. Color, a beautiful creamy white, with a bright red cheek, most strikingly handsome in appearance. Its season of ripening is medium early. It is the largest, finest and most satisfactory standard sort grown, 20c. each; \$1.50 per doz.

La France—Early, large, beautiful. Skin dark carmine red, flesh white, fine, melting, juicy, of exquisite perfume. Tree vigorous and prolific, of dwarf growth, fruiting freely when two years old. A grand variety. 20c. each.

Dwarf Japanese—This is the earliest of all Peaches, maturing in about eight weeks from time of blooming. It is a dwarf-growing, very stocky variety from Japan, bearing when three or four feet high; a little tree, one year planted, matured twenty-four fine specimens. The blooming season is late, making it free from damage by frosts. Fruit large, beautiful crimson and yellow, heavily overlaid with red. The flesh is rich, juicy and of most excellent quality, and of blood-red color. It is the most fragrant of all Peaches, a single specimen being so sweet as to fill a whole room with the delightful fragrance. The trees are very productive. It requires so little room that it may be grown on the lawn or in any nook and corner which would not accommodate a larger variety. It is a perfect gem of a fruit. 20c. each; \$1.50 per dozen.

One each of our five Grand Peaches for \$1.00; 3 each for \$2.75.

The Dwarf Rocky Mountain Cherry.

This wonderful fruit was discovered in 1878, in the mountains of Larimer County, Colorado. It is one of the most productive fruits that grow. It is not uncommon to pick 15 to 20 quarts of fruit from a three-year-old bush, and so cherries have been counted on a branch 12 inches in length from a two-year-old bush. The fruit, when ripe, is jet-black and of a size as shown in the cut. In flavor it is much like the sweet cherries; when ripe is conceded superior to any other variety. It is ornamental as well as useful, both in flower and fruit. It bears every year, grows to a height of four feet, and has never been affected by insects or disease. On account of its small growth it can be grown in a little space, where there would not be room to plant a larger growing cherry or other tree, and is a superb thing to plant on the lawn or among shrubbery. It is one of the most startling novelties of recent years. As it blooms and bears fruit when only a foot high, it may be grown in a pot, if desired, like the Oranthe Orange. Price, 25c. each; 5 for \$1.00.

Quince.

Meech's Prolific—This Quince is remarkable for its early bearing, as small trees standing in nursery row will often produce a large crop. They are wonderfully productive and sure to bear every season. The fruit is also remarkable for its rare combination of beauty of form and color, great size and fragrance. Its size is large, and shaped like a handsome Pear; skin smooth and of a bright orange-yellow. Under good culture the fruits average 12 to 15 ounces each. Flesh delightfully fragrant and most delicious in flavor. One or two fruits, when fully ripe, will fill a large room with its delicious aroma. For cooking, it is tender and quite free from hard lumps, so objectionable in most varieties. The tree is really very ornamental, as well as useful. In the first place, its flowers are large and showy, and its foliage is abundant and luxuriant, and when loaded with fruit it is indeed a splendid sight, and looks much like an Orange tree in bearing. Price, 25c. each; 5 for \$1.00.

Childs—This is a most remarkable new sort, as it is such an improvement over all varieties of Quince. The fruit grows to an enormous size, larger than the largest Apples. In shape it is nearly round, resembling an Apple very much, with smooth skin. It is of very mild, pleasant flavor, so much so that when ripe it is delicious to eat raw from the hand, as one would eat a good Apple. For cooking it is superb. Its flesh is so tender that it will bake or stew as readily as an Apple, and in less time. The tree is a large, rank, luxuriant grower, with heavy foliage, and bears enormously, beginning when they stand in the nursery rows and only a few feet in height. Originated by Luther Burbank. Price, 60c. each.

Eleagnus Longipes.

This is a new fruit from Japan, and was, we think, first seen in fruit at the summer residence of Mr. Chas. A. Dana, late editor of the New York Sun. For two or three years many people have been to see it and to taste it, and it seems that no one ever tires of praising it. It has fruited elegantly in our own grounds now for four summers, and as a rare or fancy fruit it is one which is sure to delight its possessor. It is a shrub, fruiting when only three or four feet high, and probably never exceeds five or six feet when fully grown. The fruit is borne in quantity the whole length of the branches, is oblong or olive shape, and about the color of a dark red cherry. It has a small pit and an excellent flavor, being rich, juicy, sprightly, and more luscious than the cherry. It ripens in July and August, and the fruit remains in good condition a long time before dropping. The bush is perfectly hardy and robust. Price 20c. each; 6 for \$1.00.

Three Grandest Plums.

Since the introduction of our Wineberry and Hybrid berry nothing has been offered in the way of new fruits which can compare in value and importance to these new Plums—Burbank's greatest productions. They are crosses with Japan varieties, and possess the most distinct characteristics, are the most beautiful, most luscious, best bearers and keepers, hardiest and best adapted to all soils and climates.

Delaware or Dwarf Weeping Plum—A superb and highly ornamental tree of short, symmetrical growth and long branches which droop to the ground. Owing to its dwarf habit it can be grown in space that would not admit of a larger kind. The best Plum in existence, with a most exquisite flavor, like that of the Delaware Grape. It is described by some as possessing the flavor of the Apricot, Grape, Plum and Watermelon combined. Fruit of good size, purple flesh and skin, with white bloom. It is exceedingly productive and ripens very early. Tree hardy and healthy, bearing when but two feet high. A perfect gem of a fruit and ornamental tree combined, and should be on every lawn and in every garden. It is designed to be the most popular Plum of the future, as it is certainly the most beautiful and luscious.

Shipper—Tree a large, rank grower, and enormously prolific. Fruit of large size, rich, juicy and sweet. Form and color of Imperial Gage, but handsomer, and the best Plum for shipping yet introduced. Hardy, robust and heavy annual cropper. The most profitable for market, as it is of the best quality, largest size, most prolific and best shipper.

Juicy—This glorious new Plum is a cross between Botan and Robinson. The fruit is the size of the former and three times larger than the latter, and of perfect shape. Skin thin and transparent, light yellow, underlaid with scarlet—as beautiful as wax. In quality it seems to us that there is no other fruit that can approach it. It has a delicious sweetness, mingled with a sprightly acid and a high, melting Plum flavor, surpassing anything we ever saw. When fully ripe it is so juicy that, when the skin is broken, its delicious pulp flows out like honey. The tree is a hardy, rank, luxuriant grower, though of dwarfish habit. It blooms so late in spring that frost never injures the crop. In this respect it is valuable beyond estimate. It begins to bear when very small—trees scarcely three feet high often producing large crops. When of fair size it is an enormous yielder, and the fruit ripens early. The fruit keeps a long time after ripening, often fifteen to twenty days, in hot weather, before decaying.

Price of these 3 fine Plums, 25c. each; the 3 for 60c; \$2.00 per dozen.

New Apples.

It was our good fortune a few years ago to come into control of several new Apples of superior quality. They are so valuable that they will become leading favorites, and we advise our customers to plant a few, if only to get grafts.

The Senator—It is only now and again that there comes a new apple of such superlative merits as to delight at once the pomologists and the "plain people" also. But this rare combination is given to the world in the Senator—the most admired and best liked Apple shown at the World's Fair. For rare beauty and singularly fine quality the choicest of every beholder. Bears every year; began at four years and outbears Ben Davis. Trees simply look like a pile of apples; 16-year trees averaged 24 bushels first class apples; limbs bend to the ground, but don't break. Finer quality than Kinnald, don't scab; good keeper. Size very large; shape nearly round; color bright-red, with small yellow markings.

Bismarck—This new Dwarf Apple is indeed a wonder. Little trees a foot or so in height will bear a few apples of enormous size, either growing in pots or in the ground. A little tree 12 inches high, which we imported from France last winter, bore a fine large apple the following summer. Fruit very large, of brilliant color, and borne freely on trees two years old. A most unique pot plant and a fine little tree for the garden, the great appeal on such very small trees attracting great attention.

Lorain Sweet—An apple of great size and superb quality. It ripens in early fall and is the most delicious Sweet Apple grown, flesh being exceedingly tender and melting and of the most luscious flavor, reminding one of the sweetness of honey. Should be in every orchard.

Elisa Rathke—Very ornamental, branches hanging perpendicularly. Fruit good size, yellow, vinous. Keeps till April.

Monstrosus de Niketa—Gigantic size and good quality. Largest known.

Nidwetzkina—Wood, branches, blossoms and fruit of a dark red color.

Rambourg de Winnitza—Very large, weighing two pounds; yellow, sometimes striped crimson; firm, juicy, vinous; late keeper.

30c. each; \$2.50 per doz. One each of the 7 for \$1.50.

Chestnut, Japan Giant.

Introduced recently from Japan, and a Chestnut of enormous size, the nuts averaging four to six times larger than our American variety, and it is not unusual for burrs to contain four to seven of these large perfect nuts. They are almost sure to commence bearing the second year after planting, no matter how small the tree may be. They mature their fruit early and it drops at the first touch of frost. Enormously prolific, tree highly ornamental and will prove an attractive and novel thing on anyone's place. 30c. each; 4 for \$1.00.

Gladiolus Childsi.

It is difficult to describe flowers of such varied and peculiar beauty as these Gladiolus. They are much stronger and more vigorous than others, the growth being exceedingly rank and the foliage dark, healthy green. They are very tall and erect, often standing four or five feet high, with spikes of bloom over two feet in length. They branch freely, in most cases each stem producing three or four spikes of bloom, and bloom much earlier than ordinary varieties. The flowers are of great substance and gigantic size, frequently seven to nine inches across. The form of both flower and spike is perfection itself, and they last in bloom a long time before fading, owing to their great substance and vigor, but the most remarkable feature is their coloring. Orclids cannot surpass them in their varied and delicate shades, markings and blendings. Every color known among Gladiolus is represented, and many never before seen, particularly blues, smoky grays and pinks, all having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc., and in this peculiar net-work of charming spots and colors lies one of its special points of unsurpassed beauty. The flowers are more beautifully colored than Lemoine's Hybrids, and much larger than Gandevenis. From every quarter comes words of the warmest praise for their unexcelled magnificence. They far outrank all other Gladiolus in size of spike, size of bloom, vigor, varied and magnificent coloring and freedom of bloom. They were first produced by Max Leitch, of Germany, the most noted horticulturalist in the world, and are the result of a careful cross between the finer varieties of Gandevenis and that lovely species, Saundersoni. In our hands they have been still further hybridized and improved.

FINE MIXED GLADIOLUS CHILDSI:

All colors and varieties. Every one an exquisite beauty. Large flowering bulbs, 3 for 15c.; 6 for 25c.; 12 for 40c.; 100 for \$3.00.

ELEGANT NAMED GLADIOLUS CHILDSI.

Following fifteen sorts, 5c. each; 50c. per doz. The fifteen for 60c.

- Bowdoin**—Very large flower, light orange-scarlet, with large, pure white throat. Very exquisite.
- Booth**—Flaming orange-scarlet, with large, pure white throat.
- Columbia**—Light orange-scarlet, freely blotched and pencilled with bluish purple. Throat freely marked and mottled.
- Dr. Sellow**—Large spike and very large flower, of great substance. Deep, rich rose crimson, slightly pencilled darker. Center of petals rayed with white. Throat pure white.
- Ethel**—Beautiful soft rose color, with white and crimson.
- Henry Gillman**—Deep salmon scarlet, with pure white bands through each petal, the throat showing peculiar mottling.
- Livonia**—Light red, with white mottled throat.
- Little Blush**—Dwarf habit, compact spike of bluish white.
- Mohonk**—A strong, rank grower, flowers of large size and great substance. Deep dark pink, with spotted throat, shaded orange and flaked with maroon.
- Nezinscott**—Bright blood scarlet, with deep velvety crimson-black blotches and white mottling in the throat.
- Old Oxford**—Slaty crimson, heavily clouded with blue. Large crimson and white mottled throat.
- Splendor**—A splendid large flower of the softest, sweetest rose color. Large magenta strains, with purple and white mottlings.
- Sacramento**—Deep, bright coral-scarlet, with white mottlings.
- Torch-Light**—Very large spike of large, light, flaming scarlet flowers. Throat mottled and spotted white and violet.
- Wm. Falconer**—Spike of great length and flowers of enormous size. Light pink and bluish, delicate, freely mottled.

Following fifteen sorts, 10c. each; \$1.00 per doz. The fifteen for \$1.25.

- Aurea Superba**—Foliage of a distinct yellow color. Flowers and spikes large and of peculiar brilliancy. Color soft orange-scarlet, with distinct white blotches and mottling.
- Brilliant**—Beautiful orange-red, with carmine and white throat. Superior to Flamboyant, Meyerbeer and other red varieties.
- Dr. Parkhurst**—A spike nearly three feet in length and bearing upwards of 25 flowers. Dark, brilliant red, with an elegantly white mottled throat. A superb variety.
- Deborah**—Dark red, tinged with amaranth. Very large pure white throat and blotches. Also white band through petals.
- Eva**—Beautiful rose, shaded and marked with slate. Throat finely mottled with various colors.
- Gracilis**—Slender, graceful spike with large flower of a dull red color, margined and pencilled with slate blue.
- Hohokus**—Large, flaming crimson; throat mottled bright magenta.
- Mrs. Beecher**—Beautiful deep rose crimson. Large well opened flower, with pure white throat, freely marked and spotted.
- Mrs. La Mance**—White, overspread with a slight lilac shadow, the mottling being purplish crimson.
- Middleboro**—Salmon pink, freely flaked and pencilled with deep rose, and carmine mottled throat.
- Marginata**—Fine salmon, with crimson and white throat, each petal having a delicate margin of slate-blue.
- Mottled Gem**—Large, spreading flower, showing an unusually large throat, beautifully mottled white, violet and scarlet.
- Newark**—Orange-red, with white and crimson mottled throat.
- Oddity**—Deep amaranth red, deeply suffused with purple-blue. Large distinct white marks and red and white mottled throat.
- Saratoga**—Large, flaming orange-scarlet; white mottled throat.

Following twenty-five sorts, 20c. each; \$2.00 per doz. The twenty-five for \$3.00.

- Allerton**—Bright rosy red, blotched and marked with carmine.
- Africa**—Dark amaranth, shaded black, with large green-tinted white center. Very distinct, odd and conspicuous.
- A. H. Goldsmith**—Large flower of great substance. Color pink, mottled and striped with dark crimson. White throat.
- Burlington**—Bright pink, beautifully tinged with orange-scarlet. Carmine and white mottled throat.
- Beverly**—Large, light-red, clouded and shaded smoky blue.
- Cumberland**—Dark slaty-purple tinged red, with pure white and scarlet marked throat.
- Erie**—Bright, rosy carmine, with canary colored throat.
- Elaborate**—Bright fiery red, freely pencilled with brilliant amaranth and large white throat. Very fine.

- Fedora**—Large fine salmon-rose, with large mottled throat.
- Governor McCormack**—Extra large flower and truss. Beautiful rose, mottled with silvery gray and with violet and white mottled throat. Very fine.
- Keokuk**—Deep, bright pink, clouded, tinted and spotted slate-blue.
- Lael**—Soft pink, with bright carmine throat, shaded with orange and having a peculiar metallic lustre. Enormous.
- Little Violet**—Dwarf habit, compact spike of a pleasing lilac.
- Lizzie**—White, tinted blush; violet crimson throat.
- M. Zolar**—Lilac-rose, flamed slate color.
- Marquethé**—Large flower and spike. Bright red, freely marked, blotched and suffused with slate-blue.
- Mrs. W. N. Bird**—Beautiful lilac-rose, crimson-white mottlings in throat, and carmine marks. Extra fine.
- Nakomis**—Soft pink, blotched and shaded with orange; white and crimson throat. Enormous spikes.
- Princeton**—Large, flaming red, with violet and white mottlings in throat. Spikes of great length.
- Ruby**—Very dark, deep ruby red, with bright violet and white mottling in throat. An exceedingly rich color.
- Salem**—Fine salmon-pink, dark velvety maroon blotches.
- Siboney**—Slaty gray, marked and mottled darker.
- St. Oscar**—Large, well-open flowers, rosy pink outside and bluish pink inside, with throat variegations of different colors.
- Senator Childs**—Large, well-opened flower, deep glowing red, with enormous white throat. Extra fine.
- Winthrop**—Very bright scarlet. Inside of petals suffused with pure white mottlings, and with large white blotches outside.

Following ten sorts, 30c. each; \$3.00 per doz. The ten for \$2.50.

- Adolph Close**—Large, spreading flower of a peculiar slaty blue color, with large crimson and white mottled throat.
- Bessie Tanner**—Very large, beautiful soft rose color, with pure white throat. Exquisite.
- Falconer's Favorite**—Very strong, rank grower, enormous spike; flower large, deep ruby brilliant red, white band petals.
- Kitty Leland**—Bright rosy salmon, with orange tinge. Flower spike often as much as three feet in length, showing between twenty and thirty blossoms, which are of the largest size.
- President McKinley**—Flower of gigantic size, light scarlet with very large and conspicuous white throat.
- Savannah**—Deep blood red, with white mottled throat.
- Sandusky**—Carmine red, pencilled and flaked darker.
- Striped Banner**—Very tall, with long spike. Flowers large and well open; white, freely marked and striped deepest crimson.
- Tinted White**—A very large flower, well open and a pure white color, beautifully tinted with pale pink. Tall spike and vigorous.
- Waukesha**—Salmon-pink, shaded lighter inside; large beautiful purple-rose throat, thickly mottled crimson. Spikes 2 to 3 feet.

Following twenty sorts, 50c. each; \$5.00 per doz. The twenty for \$7.00.

- Admiral Dewey**—Enormous throat, beautiful silvery pink, with velvety crimson markings.
- Ada**—Bright, soft rosy scarlet, white mottled throat.
- Ben Hur**—Large compact spike, enormous flower of a peculiar and almost indescribable color. Light salmon rose, tinged, flaked and mottled with blue. Throat beautifully mottled and spotted.
- Beacon**—Large, flaming red; mottled throat.
- Colonel Wood**—Bright scarlet, large mottled throat.
- Exquisite**—Of rather slender growth, with long, graceful spike. Color, pure white with brilliant magenta.
- General Roe**—A profuse, irregular mottling of pink and slate, subject to wide variations.
- Governor Saxton**—Deep amaranth, almost black, striped, shaded and mottled with red. A very odd and conspicuous color.
- Jay**—Compact spike; large open flower of great substance. Bright crimson-pink, flamed, darker, throat clouded and mottled.
- Lowell**—Fine pink and carmine, beautifully striped like Eugene Scribe. Good substance.
- Mrs. R. A. Goldsmith**—Large flower, fine spike. Soft delicate rose, shaded lighter. Pure white throat.
- Niilo**—Amaranth red shaded purple, numerous blotched and flaked with slate and beautiful, large, pure white center. Mottled and spotted with crimson.
- Norma Dee Childs**—Extra large flower and spike. Color delicate white, softly pencilled with rose, and with large sulphur yellow throat. Perfectly exquisite and distinct.
- Olympia**—Pure white, beautifully zoned with sulphur-yellow, slightly marked violet in throat.
- Oriole**—Lovely mottling of pink and gray, with beautiful yellow banded throat. Small flower, but exquisitely colored.
- Peoria**—Slaty lilac, with white and crimson throat.
- Perfect Beauty**—Very large flower of a tinted white color. Beautifully spotted with magenta.
- Sentry**—Blush pink, spotted crimson. Dwarf.
- Ukiah**—Deep, rich rosy carmine, pencilled darker; white throat.
- Yolande**—Pure white, softly tinted blush, with large, brilliant crimson throat.

Following six sorts, \$1.00 each. The six for \$5.00.

- Blanche**—Large flower, pure snow white, with but slight, faint marks of soft rose. Finest white.
- Blue Danube**—Splendid large flower, perfect spike. Exquisite silvery blue, with carmine and white throat. One of the best.
- Blue Perfection**—The best blue variety yet produced. Flowers clear, dark, slate-blue, with a distinct scarlet stripe in lower petals. Very beautiful.
- Daisy Leland**—Enormous spike and flower. Easily the largest flower produced by any Gladiolus. Bright rosy pink of exquisite loveliness. Spike gracefully curved.
- Tuxedo**—Fine rose, marbled with crimson, throat showing large white stripes and beautiful mottlings.
- Variabills**—Enormous size and vigor, standing nearly seven feet high with the largest spike ever seen on any Gladiolus. But this is not the only great merit. The flowers range in color from dull deep pink, flaked with blue-black, to a solid blue-black color of smoky hue, flaked with pink. Some spikes will be one color and some the other, while flowers of both colors are often seen on the same spike. Throat mottled white.

One Bulb each of the ninety-one sorts for \$16.00.
